[Public Law 120-81st Congress; Chapter 237-1st Session]
JOINT RESOLUTION [S. J. Res. 55]
To print the monthly publication entitled "Economic Indicators"
Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Joint Committee on the Economic Report be authorized to issue a monthly publication entitled "Economic Indicators," and that a sufficient quantity be printed to furnish one copy to each Member of Congress; the Secretary and the Sergeant at Arms of the Senate; the Clerk, Sergeant at Arms, and-Doorkeeper of the House of Representatives; two copies to the libraries of the Senate and House, and the Congressional Library; seven hundred copies to the Joint Committee on the Economic Report; and the required number of copies to the Superintendent of Documents for distribution to depository libraries; and that the Superintendent of Documents be authorized to have copies printed for sale to the public.

Approved June 23, 1949.
Cbarts drawn by Grapbics Unit, Office of the Secretary, Department of Commerce

## THE TOTAL OUTPUT OF THE ECONOMY

## THE NATION'S ECONOMIC BUDGETT

The government cash surplus of $\$ 6.7$ billion (seasonally adjusted annual rate) in the first half of 1951 was replaced by a deficit of $\$ 5.1$ billion in the second half.

## billions of dollars

SOURCE: ANNUAL ECONOMIG REPORT OF THE PRESIDENT, JANUARY 1952, APPENDIX A

## GROSS NATIONAL PRODUCT

Gross national product rose at an annual rate of $\$ 5$ billion from the third to the fourth quarter of 1951, according to revised estimates. National security expenditures rose by about $\$ 2$ billion; personal consumption also expanded.

[Billions of dollars]

## PRICES

## CONSUMERS' PRICES

Between December 15 and January 15 consumers' prices stopped rising for the first time in 5 months, partly because of lower prices for apparel and housefurnishings and almost no change in food prices. However, according to a special survey, food prices dropped more than 2 percent between January 15 and February 15.

## WHOLESALE PRICES

A major revision of the wholesale price index was put into effect in February. The latest weekly figures indicate a continuation of the moderate wholesale price decline which both the old and the new monthly index showed during January.

## NONAGRICULTURAL EMPLOYMENT - SELECTED INDUSTRIES

Nonagricultural employment declined in all major industries in January. The largest decreases, which were recorded in contract construction, trade, and government, were due to seasonal influences. Since Janvary 1951, significant increases have occurred in the number of workers in defense-related industries and in the Federal Government.

## AVERAGE WEEKLY HOURS - SELLETED INDUSTRIES

A half-hour drop in the manufacturing workweek in January was attributed to inventory-taking and a seasonal slackening in many industries. Despite the drop, the average workweek in durable industries was above the high levels of January 1951 because of scheduled overtime in defense-connected industries.

## AVERAGE HOURLY EARNINGS - SELECTED INDUSTRIES

Average hourly earnings in durable goods industries rose about $1 / 2$ cent in January and in nondurable goods industries almost 1 cent. These increases reflected cost-of-living adjustments and higher wage rates in many industries.

1 current dollars divided ay consumers' price index on base $1951=100$. source : department of labor.

## AVERAGE WEEKLY EARNINGS - SELECTED INDUSTRIES

Although average weekly earnings in both durable and nondurable manufacturing industries dropped in January because of the shorter average workweek, average manufacturing earnings were $\$ 3.03$ higher than a year ago. This increase reflected not only cost-of-living and other wase adjustments allowed over the year but also the larger percentage of workers in higher paid defense-related industries.

## PRODUCTION AND BUSINESS ACTIVITY INDUSTRIAL PRODUCTION

The index of total industrial production remained in February at about the same level as that of the last 5 months. Durable goods output rose slightly, primarily because of increased automobile production. Production of nondurable goods remained at the somewhat improved January level. Among the minerals industries, rising petroleum output was offset by a decline in coal production.

## WEEKLY PRODUCTION - SELECTED INDICATORS

Scheduled steel production continued to rise in February and early March, and reached an all-time high the week ended March 8. Electric power output in February averaged somewhat below the previous month, in line with the seasonal pattern. Bituminous coal production declined, while motor vehicle output rose to the highest weekly rate this year.

| Period | Steel ${ }^{1}$ |  | Electric power, by utilities (millions of kilowatt-hours) | Bituminous coal (thousands of short tons) ${ }^{2}$ | Cars and trucks (number) |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Thousands of net tons | Percent of theoretical capacity |  |  |  |

## PRODUCTION OF SELECTED MANUFACTURES

In the durable goods sector, small increases in production of lumber and nonferrous metals in January were offset by declines in iron and steel and machinery. Among the nondurables, there was a significant increase in textile output from its low December level.

## NEW HOUSING STARTS

New housing starts in January totaled 68,000 units, a counter-seasonal rise of 6,000 over December. January starts, however, were about 21 percent below a year ago.

| Month | New nonfarm units started |  |  |  |  |  |

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

Nonfarm plant and equipment expenditures in the fourth quarier of 1951 were 18 percent higher than they had been a year previous. On the basis of reported business plans, about the same ratio would hold in the first quarter of 1952 also.

## MERCHANDISE EXPORTS AND IMPORTS

December exports, in dollar value, were the second highest on record, having been exceeded only in May 1944. Imports declined again to the second lowest monthly level since July 1950. For 1951 as a whole, merchandise trade set an all-time high in dollar value with exports of $\$ 15$ billion and imports of $\$ 11$ billion. The 1951 export surplus of $\$ 4$ billion compares with $\$ 1.4$ billion in 1950 .

## PERSONAL INCOME

Personal income dropped at an annual rate of about $\$ 1.3$ billion in January to $\$ 257.3$ billion. The drop in farm income and dividends and interest was partly offset by a rise in fransfer payments. Wages and salaries were unchanged.

[^12]CONSUMER INCOME, SPENDING, AND SAVING
Consumption expenditures rose at an annual rate of more than $\$ 2.5$ billion from the third to the fourth quarter of last year, reflecting gains in expenditures for nondurable goods and services. Personal saving continued at the exceptionally high rate of about 9 percent of disposable income, according to revised estimates.

## CREDIT, MONEY, AND FEDERAL FINANCE BANK LOANS AND INVESTMENTS

Bank loans declined $\$ 800$ million during January largely because of seasonal repayments by wholesalers and retailers, commodity dealers, and manufacturers of food and fobacco products. Investments in Government securities rose moderately.

[Billions of dollars]

[^15][^16]
## CONSUMER CREDIT

Total consumer credit outstanding fell nearly $\$ 600$ million during January. The drop, which was largely seasonal, reflected a decline of about $\$ 200$ million in instalment credit and more than $\$ 350$ million in charge accounts.

${ }^{1}$ Includes repair and modernization loans insured by Federal Housing Administration.
Includes loans by pawnbrokers, service credit, and unclassified single-payment loans under $\$ 3,000$ made by commercial banks.
3 Preliminary estimates.
Note.-Detail will notinecessarily add to totals because of rounding.

## BOND YIELDS AND INTEREST RATES

Yields on Treasury bills continued to decline in February, and reached the lowest level since June 1951. The rate on prime commercial paper remained unchanged. Yields on both Government and corporate bonds fell slightly.

[^17]
## MONEY SUPPLY

The privately-held money supply decreased $\$ 600$ million during January, compared with $\$ 1.7$ billion in "the" same month of 1951. Transfers from private to Government accounts in January 1952 were smaller than might have been expected in this period of heavy tax payments. Substantial inflows of gold and foreign funds also served as an offsel to factors drawing down the money supply.

## FEDERAL BUDGET RECEIPTS AND EXPENDITURES

With the beginning of the period of heavy income tax payments, there was a small budget surplus in February. In the first 8 months of fiscal year 1952, expenditures for major security programs were twice as large as a year ago.

1 Includes expenditures for military services, international security and foreign relations, development and control of atomic energy, promotion of the merchant marine, and promotion of defense production and economic stabilization
${ }_{3}^{2}$ Includes guaranteed securities, except those held by the Treasury
Note.-Detail will not necessarily add to totals because of rounding.
4 Less than 50 million dollars.
${ }^{5}$ Preliminary estimates.
Sources: Treasury Department and Bureau of the Budget

FEDERAL CASH RECEIPTS FROM AND PAYMENTS TO THE PUBLIC
The rise in cash payments in the fourth quarter resulted from the continuing advance in national security expenditures. Receipts declined in response to the seasonal drop in individual income tax collections (apart from witheld taxes). The excess of cash payments was far larger than in any quarter since 1945.
