## COUNCIL OF ECONOMIC ADVISERS

(Created pursuant to Sec. 4 (a) of Public Law 304, 79th Cong.)
LEON H. KEYSERLING, Cbairman
JOHN D. CLARK
ROY BLOUGH
[Public Law 120-81st Congress; Chapter 237-1st Session]
JOINT RESOLUTION [S. J. Res. 55]
To print the monthly publication entitled "Economic Indicators"
Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Joint Committee on the Economic Report be authorized to issue a monthly publication entitled "Economic Indicators," and that a sufficient quantity be printed to furnish one copy to each Member of Congress; the Secretary and the Sergeant at Arms of the Senate; the Clerk, Sergeant at Arms, and Doorkeeper of the House of Representatives; two copies to the libraries of the Senate and House, and the Congressional Library; seven hundred copies to the Joint Committee on the Economic Report; and the required number of copies to the Superintendent of Documents for distribution to depository libraries; and that the Superintendent of Documents be authorized to have copies printed for sale to the public.

Approved June 23, 1949.
Cbarts drawn by Grapbics Unit, Office of the Secretary, Department of Commerce

## THE TOTAL OUTPUT OF THE ECONOMY THE NATION'S ECONOMIC BUDGET

The government cash surplus of $\$ 6.7$ billion (seasonally adjusted annual rate) in the first half of 1951 was replaced by a deficit of $\$ 5.1$ billion in the second half.

## GROSS NATIONAL PRODUCT

Gross national product in the first quarter of 1952 was at an annual rate of $\$ 4 \frac{1}{2}$ billion higher than in the fourth quarter of last year according to preliminary estimates. Most of the increase was in national security expenditures, but personal consumption expenditures also rose.

## PRICES

## CONSUMERS' PRICES

Between January 15 and February 15 consumers' prices took their biggest month-to-month drop in more than 2 years, mainly because of a 2 -percent decline in retail food prices. However, the latter had begun to inch up again by mid-March, according to a special survey.

## WHOLESALE PRICES

In February, wholesale prices of farm products and processed foods continued the decline which began at the end of last year; average prices of industrial products were unchanged. Weekly data for March (based on percentage changes from February) indicated little week-to-week change but a lower price level for the month.

## STOCK PRICES

After dropping in February, stock prices rallied during March. Only the utilities and the frade, finance, and service categories failed to show definite gains by the end of the month.

## EMPLOYMENT AND WAGES

## CIVILIAN LABOR FORCE

The civilian labor force declined more than 300,000 in March. Total civilian employment remained practically unchanged. Unemployment fell by almost 300,000 to 1.8 million, the lowest March level since World War Il.

## AVERAGE WEEKLY HOURS - SElected industries

The average manufacturing workweek of 40.8 hours in February was practically the same as a year ago, with a slight rise in durable goods groups being counter-balanced by a decline of one-half hour in nondurable goods industries.

## PRODUCTION AND BUSINESS ACTIVITY INDUSTRIAL PRODUCTION

Total industrial production in March continued at the February level of 222 percent of the 1935-39 average. Rising output of autos, steel, and military equipment increased the durable goods index by about 1 percent; nondurable goods production declined about 1 percent chiefly because of a renewed slackening in textile mill activity. The drop in the output of minerals reflected a decline in coal mining partially offset by a rise in crude petroleum.

## WEEKLY PRODUCTION - SELECTED INDICATORS

In March, scheduled output of steel broke records for 4 successive weeks and motor vehicle assemblies rose to their highest level in 6 months. Electric power production averaged 8 percent above March of 1951. For the seventh week in a row, bituminous coal production was below the levels for the corresponding weeks of 1951.

## PRODUCTION OF SELECTED MANUFACTURES

In February, output of machinery resumed its upward climb; lumber production rose again; iron and steel and nonferrous metals showed no change. In the nondurable goods sector, there were moderate rises in several major industries, but chemical production was off, falling to the level of early 1951.

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

Expenditures for new plant and equipment for the first quarter of 1952 were estimated to be about 24 percent above actual expenditures in the first quarter of 1951. Business plans to spend this year a total of $\$ 24.1$ billion for new plant and equipment, or about 4 percent above the previous high in 1951, according to the latest survey (made in February). Expenditures of only commercial and miscellaneous businesses are expected to be significantly less in 1952 than in 1951.

## MERCHANDISE EXPORTS AND IMPORTS

In January, the export surplus dropped by nearly 50 percent from its 1951 high in December. Exports, especially of raw cotton and automobiles, declined, while all commodity categories of imports rose. The largest increase of imports occurred in unmanufactured rubber.

## PURCHASING POWER

## NATIONAL INCOME

In the first quarter of 1952, national income increased at an annual rate of $\$ 3$ billion above the fourth quarter of last year. Compensation of employees, with the largest increase since the second quarter of last year, rose at a rate of $\$ 3 / 2$ billion while proprietors' and rental income declined from the peak level reached in the fourth quarter of 1951. Other major components showed no significant changes.

## CORPORATE PROFITS

In the first quarter of 1952 , corporate profits before taxes were slightly above the fourth quarter of 1951 but were cansiderably below the peak reached a year ago, according to preliminary estimates. Corporate profits after taxes were virtually unchanged, reflecting for the first time the full impact of the 1951 tax increase.

[Billions of dollars]

[^10]
## PERSONAL INCOME

In February, total personal income declined for the second consecutive month. A rise in labor income, dividends, and interest was more than offset by a sharp decline in farm proprietors' income and transfer payments.

${ }^{1}$ Excludes employee contributions for social insurance, and self-employed contributions (which became effective January 1952 ).
${ }^{2}$ Includes $\$ 2.7$ biliion National Service Life Insurance dividend, most of which was paid in the first half of the year.
2 Preliminary estimates.
Note.-Detail will not necessarily add to totals because of rounding.
Source: Departm ont of Commerce.

## CONSUMER INCOME, SPENDING, AND SAVING

With expenditures for nondurable goods and services rising slightly in the first quarter of 1952 and disposable income declining a little, personal saving fell somewhat below the very high levels prevailing during the previous 9 months.

| Period | Disposable personal income ${ }^{1}$ | Less: Personal consumption expenditures |  |  |  | Equals: <br> Personal net saving | Net saving as percent of disposable income |

## FEDERAL CASH RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

The seasonal rise in cash receipts in the first quarter of 1952 resulted in a large cash surplus. The surplus almost equalled the total deficit for the preceding two quarters, but it was smaller than the surplus in the first quarter of 1951. Cash payments were $\$ 5.4$ billion higher than a year ago, while cash receipts were $\$ 3.8$ billion higher.

[Millions of dollars]

| Calendar year | Federal cash receipts from the public | Federal cash payments to the public | Excess of receipts ( + ) or payments (一) |
| :---: | :---: | :---: | :---: |
| Calendar year total: |  |  |  |
| 1946 | 41, 441 | 41,399 | +42 |
