## [Public Law 120-81st Congress; Chapter 237-1st Session]

## JOINT RESOLUTION [S. J. Res. 55]

To print the monthly publication entitled "Economic Indicators"
Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Joint Committee on the Economic Report be authorized to issue a monthly publication entitled "Economic Indicators," and that a sufficient quantity be printed to furnish one copy to each Member of Congress; the Secretary and the Sergeant at Arms of the Senate; the Clerk, Sergeant at Arms, and Doorkeeper of the House of Representatives; two copies to the libraries of the Senate and House, and the Congressional Library; seven hundred copies to the Joint Committee on the Economic Report; and the required number of copies to the Superintendent of Documents for distribution to depository libraries; and that the Superintendent of Documents be authorized to have copies printed for sale to the public.

Approved June 23, 1949.
Cbarts drawn by Grapbics Unit, Office of the Secretary, Department of Commerce

## THE TOTAL OUTPUT OF THE ECONOMY THE NATION'S ECONOMIC ACCOUNTS

On the basis of national income and expenditure accounts, consumer saving almost offset the excess of business investment over retained earnings in the first quarter of 1952. Government (Federal, State, and local) expenditures for goods and services were approximately equal to receipts, when adjusted for transfer payments.

## GROSS NATIONAL PRODUCT

Gross national product in the first quarter of 1952 was at an annual rate of $\$ 4 \frac{1}{2}$ billion higher than in the fourth quarter of last year according to preliminary estimates. Most of the increase was in national security expenditures, but personal consumption expenditures also rose.

## PRICES

## CONSUMERS' PRICES

Consumers' prices, which had declined in February, rose 0.1 percent in March. Food prices, on the average, were stable; rents increased; and the prices of appare! and housefurnishings dropped a little.

| Period | All items | Food | Apparel | Rent | Fuel, electricity, and refrigeration | Housefurnishings | Miscellane- ous |

## WHOLESALE PRICES

In March, wholesale prices generally were a little lower than in February. Farm prices increased slightly, while processed food and industrial prices edged downward. Week-to-week changes during April indicated some further weakening of food prices and a minor decline in the prices of farm products.

## EMPLOYMENT AND WAGES

## CIVILIAN LABOR FORCE

The 400,000 rise in civilian employment in April resulted from a seasonal increase in agricultural employment. There was practically no change in total nonagricultural employment. Unemployment dropped to 1.6 million, or 2.6 percent of the civilian labor force.

* 14 years of age and over.

## NONAGRICULTURAL EMPLOYMENT - SELECTED INDUSTRIES

Manufaciuring employment declined slightly in March and was almost 250,000 below a year earlier. Reduced output of consumers' hard and soft goods was chiefly responsible for the March-to-March decline. However, defenserelated industries recorded significant employment gains over the year.

## AVERAGE WEEKLY EARNINGS - SELECTED INDUSTRIES

Reflecting the decline in the length of the workweek since December, average weekly earnings in March were slightly lower than at the end of 1951, in spite of a slow increase in average hourly earnings.

## PRODUCTION AND BUSINESS ACTIVITY

## INDUSTRIAL PRODUCTION

Total industrial production in April was more than 1 percent below the March level, according to preliminary estimates. About one-half of the decline was due to the loss of steel output when furnaces were banked early in the month in expectation of a strike. Production of nondurable goods and of minerals also declined.

| Period | Total industrial production | Manufactures |  |  | Minerals |

## WEEKLY PRODUCTION - SELECTED INDICATORS

After the drop in steel production early in April, previous record weekly levels were almost regained, only to have another shutdown disrupt production in the final days of the month. In April, electric power production continued the seasonal decline begun in March. Bituminous coal output decreased, and was below April a year ago. At the end of the month motor vehicle production reached the highest point since last September.

## PRODUCTION OF SELECTED MANUFACTURES

In March, there was little change in the output of iron and steel and nonferrous metals. Lumber production fell 3 percent, and machinery also declined. The output of petroleum and coal products, chemicals; and textiles decreased. Manufactured food production increased moderately.

## GROSS PRIVATE DOMESTIC INVESTMENT

In the first quarter of 1952, the rate of inventory accumulation continued to drop, while investment in plant and equipment and expenditures for residential construction were higher than in the fourth quarter of 1951.

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

Expenditures for new plant and equipment for the first quarter of 1952 were estimated to be about 24 percent above actual expenditures in the first quarter of 1951. Business plans to spend this year a total of $\$ 24.1$ billion for new plant and equipment, or about 4 percent above the previous high in 1951, according to the latest survey (made in February). Expenditures of only commercial and miscellaneous businesses are expected to be significantly less in 1952 than in 1951.

## NEW CONSTRUCTION

New construction expenditures, seasonally adjusted, fell in April after rising continuously during the preceding 5 months. A drop of $\$ 17$ million in total public construction and $\$ 60$ million in private nonfarm residential was partially offset by a rise of $\$ 19$ million in "other" private construction.

${ }^{1}$ Preliminary estimates.
Source: Department of Labor,

## INVENTORIES AND SALES

Business sales, seasonally adjusted, declined in March at the retail, wholesale, and manufacturing levels; inventories showed little change.

[^5]
## MERCHANDISE EXPORTS AND IMPORTS

In February, exports of all classes of commodities except crude materials increased over January levels. Total imports declined slightly but no more than could be explained by the shortness of the month. On a working-day basis, imports of semimanufactured goods fell but other categories of imports rose.

## PURCHASING POWER

## NATIONAL INCOME

In the first quarter of 1952, national income increased at an annual rate of $\$ 3$ billion above the fourth quarter of last year. Compensation of employees, with the largest increase since the second quarter of last year, rose at a rate of $\$ 31 / 2$ billion while proprietors' and rental income declined from the peak level reached in the fourth quarter of 1951. Other major components showed no significant changes.

[^7]CORPORATE PROFITS
In the first quarter of 1952, corporate profits before taxes were slightly above the fourth quarter of 1951 but were considerably below the peak reached a year ago, according to preliminary estimates. Corporate profits after taxes were virtually unchanged, reflecting for the first time the full impact of the 1951 tax increase.

## PERSONAL INCOME

The small drop in personal income for March primarily reflected lower proprietors' income. Salaries and wages were unchanged; dividends increased.

[^9]
## FARM INCOME

In March, farm income was about 2 percent higher than in February, in both current and constant prices. This rise was far short of the February-March gain in 1951.

[^10]${ }^{2}$ Farm income in current dollars divided by parity index on base $1951=100$.
${ }_{8}$ Preliminary estimates.
Note.-Farm income includes cash receipts from marketings and Government payments.
Source: Department of Agriculture.

## CREDIT, MONEY, AND FEDERAL FINANCE BANK LOANS AND INVESTMENTS

Bank loans rose during March at the same moderate rate as in February. Investments expanded slightly, as increased holdings of corporate and State and local securifies more than offset declines in holdings of $U$. S. Government issues.

## CONSUMER CREDIT

Consumer credit outstanding declined about $\$ 150$ million during March, largely because of a reduction in charge accounts. At the end of March, total consumer credit was more than $\$ 1$ billion, or 5 percent, below the December 1951 level.

## BOND YIELDS AND INTEREST RATES

Yields on Treasury bills and corporate bonds and the rate on prime commercial paper fell slightly in April. Reported yields on Government bonds showed a more substantial decline, but part of the drop reflected a change. in the issues included in the averages.

[1'ercent per annum]

## MONEY SUPPLY

The total money supply, including Government deposits, climbed $\$ 800$ million during March. However, the privately held money supply decreased $\$ 500$ million as tax payments resulted in a transfer of funds from private to Government balances.

## FEDERAL BUDGET RECEIPTS AND EXPENDITURES

Budget expenditures in April rose to $\$ 6.0$ billion, or 50 percent more than in April 1951. On the receipts side, there was a smaller-than-seasonal decline from March to April. The cumulative budget deficit for the first 10 months of the current fiscal year was $\$ 5.0$ billion, compared to a cumulative surplus of $\$ 3.8$ billion at the same time last year.

## FEDERAL CASH RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

The sharp seasonal rise in cash receipts in the first quarter of 1952 resulted in a large cash surplus. However, the surplus was less than three-fourths as large as in the first quarter of last year. Cash payments were $\$ 5.7$ billion higher than a year ago, while cash receipts were $\$ 3.8$ billion higher. There was a cumulative cash deficit of $\$ 0.6$ billion in the first three quarters of the current fiscal year.
