JOINT RESOLUTION [S. J. Res. 55]
To print the monthly publication entitled "Economic Indicators"
Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Joint Committee on the Economic Report be authorized to issue a monthly publication entitled "Economic Indicators," and that a sufficient quantity be printed to furnish one copy to each Member of Congress; the Secretary and the Sergeant at Arms of the Senate; the Clerk, Sergeant at Arms, and Doorkeeper of the House of Representatives; two copies to the libraries of the Senate and House, and the Congressional Library; seven hundred copies to the Joint Committee on the Economic Report; and the required number of copies to the Superintendent of Documents for distribution to depository libraries; and that the Superintendent of Documents be authorized to have copies printed for sale to the public.

Approved June 23, 1949.

## THE TOTAL OUTPUT OF THE ECONOMY

## THE NATION'S ECONOMIC ACCOUNTS

On the basis of national income and expenditure accounts, consumer saving almost offset the excess of business investment over retained earnings in the first quarter of 1952. Government (Federal, State, and local) expenditures for goods and services were approximately equal to receipts, when adjusted for fransfer payments.

## GROSS NATIONAL PRODUCT

In the first quarter of 1952, gross national product was at an annual rate of $\$ 5$ billion higher than in the fourth quarter of last year, according to revised estimates. Both national security and personal consumption expenditures rose at an annual rate of about $\$ 3$ billion, while gross private domestic investment dropped.

## PRICES

## CONSUMERS' PRICES

Consumers' prices, which had advanced 0.1 percent from February 15 to March 15, rose 0.4 percent between March 15 and April 15, mainly because of higher retail food prices. The latter, according to a special survey, continued to increase from mid-April to mid-May.

## WHOLESALE PRICES

The April wholesale price index was 0.4 percent lower than in March, with declines in processed food and industrial prices outweighing increases in farm prices. Between the first and the last week of May all three major price groups strengthened slightly.

## PRICES RECEIVED AND PAID BY FARMERS

In April, the parity ratio rose from 100 to 101 —the first increase since December 1951. The "prices received" index advanced 1 percent while "prices paid" remained unchanged.

## STOCK PRICES

In May, stock prices partly regained their losses of the preceding month, but the monthly average was slightly lower than in April. All groups except mining and trade, finance, and service stocks shared in the moderate upturn.

[^3]
## EMPLOYMENT AND WAGES

 CIVILIAN LABOR FORCEThe civilian labor force expanded by about 1 million in May to 62.8 million. Employment increased seasonally by the same amount to 61.2 million, about equal to that of a year ago and higher than any other May on record. Unemployment at 1.6 million was practically unchanged from the April level.

Note.-Detail will not necessarily add to totals because of rounding.

## NONAGRICULTURAL EMPLOYMENT - SELECTED INDUSTRIES

Total manufacturing employment declined in April as increases in defense and defense-related durablé goods industries were outweighed by reductions in nondurable goods industries. Both contract construction and trade registered significant employment gains over the preceding month.

## AVERAGE WEEKLY HOURS - SEuected industries

The average manufacturing workweek declined about a half-hour in April. The decline was somewhat larger in nondurable goods industries, particularly textiles, than it was in durables.

[Hours per week, selected industries ${ }^{1}$ ]

## PRODUCTION AND BUSINESS ACTIVITY

## INDUSTRIAL PRODUCTION

Total industrial production declined in May, according to preliminary estimates. Decreases in the output of nondurable goods and minerals, particularly petroleum refining (reflecting mainly a work stoppage) and bituminous coal, were chiefly responsible. Among durable goods, there were output declines in major household appliances and lumber.

[1935-39 $=100$, seasonally adjusted]

## WEEKLY PRODUCTION - SELECTED INDICATORS

Steel production rose to near-record levels in the latter part of May after output had been cut sharply by the shutdowns in the early part of the month due to the labor dispute. Electric power output rose in May; bituminous coal production was generally below last month's levels. Motor vehicle assemblies were constant during most of the month.

| Period | Steel ${ }^{1}$ |  | Electric power, by utilities (millions of kilowatt-hours) | Bituminous coal (thousands of short tons) ${ }^{2}$ | Cars and trucks (number) |
| :---: | :---: | :---: | :---: | :---: | :---: |

[^8]
## PRODUCTION OF SELECTED MANUFACTURES

In April, the steel dispute resulted in a sharp drop in the output of the iron and steel industry. Production in other major durable goods industries declined also. In the nondurable goods sector, substantial decreases occurred in the output of textiles and petroleum and coal producis. Production in the chemical industry remained steady.

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

Expenditures for new plant and equipment for the first quarter of 1952 were estimated to be about 24 percent above actual expenditures in the first quarter of 1951. Business plans to spend this year a total of $\$ 24.1$ billion for new plant and equipment, or about 4 percent above the previous high in 1951, according to the latest survey (made in February). Expenditures of only commercial and miscellaneous businesses are expected to be significantly less in 1952 than in 1951.

## PURCHASING POWER

## NATIONAL INCOME

In the first quarter of 1952 , national income was at an annal raie of about $\$ 1 \frac{1}{2}$ billion higher than in the fourth quarter of last year. Compensation of employees, with the largest increase since the second quarter of last year, rose at an annual rate of almost $\$ 4$ billion while proprietors' and renial income declined from the peak level reached in the fourth quarter of 1951.

## CORPORATE PROFITS

In the first quarter of 1952, corporate profits before taxes wère slightly above the fourth quarter of 1951, according to current estimates, but were considerably below the peak reached a year ago. Corporate profits after taxes were virtually unchanged, reflecting for the first time the full impact of the 1951 tax increase.

[^15]
## FARM INCOME

In April, there was a slight decline in farm income, in both current ana constant aollar terms.

[^16]
## CREDIT, MONEY, AND FEDERAL FINANCE BANK LOANS AND INVESTMENTS

Bank loans expanded about $\$ 400$ million during April as a seasonal decline in business loans was more than offset by a rise in other types of advances, particularly loans for purchasing or carrying securities. Investments fell $\$ 600$ million, reflecting reduced holdings of U. S. Government securities.

## MONEY SUPPLY

In April, the total money supply, including Government deposits, remained at about the March level. The privatelyheld money supply expanded $\$ 900$ million as Treasury payments in excess of receipts shifted funds to private balances.

## FEDERAL BUDGET RECEIPTS AND EXPENDITURES

A deficit of $\$ 1.9$ billion in the budget accounts in May raised the cumulative deficit for the first 11 months of the current fiscal year to $\$ 6.9$ billion. Expenditures for major national security programs were unchanged from April to May, but total budget expenditures declined. There was also a decline in budget receipts.

## FEDERAL CASH RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

The sharp seasonal rise in cash receipts in the first quarter of 1952 resulted in a large cash surplus. However, the surplus was less than three-fourths as large as in the first quarter of last year. Cash payments were $\$ 5.7$ billion higher than a year ago, while cash receipts were $\$ 3.8$ billion higher. There was a cumulative cash deficit of $\$ 0.6$ billion in the first three quarters of the current fiscal year.
