[Public Law 120-81st Congress; Chapter 237-1st Session]
JOINT RESOLUTION [S. J. Res. 55]
To print the monthly publication entitled "Economic Indicators"
Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Joint Committee on the Economic Report be authorized to issue a monthly publication entitled "Economic Indicators," and that a sufficient quantity be printed to furnish one copy to each Member of Congress; the Secretary and the Sergeant at Arms of the Senate; the Clerk, Sergeant at Arms, and Doorkeeper of the House of Representatives; two copies to the libraries of the Senate and House, and the Congressional Library; seven hundred copies to the Joint Committee on the Economic Report; and the required number of copies to the Superintendent of Documents for distribution to depository libraries; and that the Superintendent of Documents be authorized to have copies printed for sale to the public.

Approved June 23, 1949.

## THE TOTAL OUTPUT OF THE ECONOMY

## THE NATION'S ECONOMIC ACCOUNTS

On the basis of the income and product accounts, the approximate balance between government expenditures and receipts in the first quarter changed to an excess of expenditures of $\$ 3$ billion (seasonally adjusted annual rate) in the second quarter.

## GROSS NATIONAL PRODUCT

In the second quarter of 1952, gross national product was almost $\$ 4$ billion higher (seasonally adjusted annual rate) than in the previous quarter. National security expenditures increased about $\$ 4$ billion, while the rise of about $\$ 2$ billion in personal consumption was approximately offset by a decrease in other government expenditures and in investment (domestic and foreign).

## WHOLESALE PRICES

Average wholesale prices in June were a little lower than in May as a result of slight declines in farm and industrial prices. Week-to-week changes during July, however, were upward; all three major wholesale price sectors showed increases.

| Period |  |
| ---: | ---: | ---: | ---: | ---: |

## PRICES RECEIVED AND PAID BY FARMERS

From mid-June to mid-July, prices received by farmers increased 1 percent while prices paid by farmers did not change. Thus the parity ratio rose to 103 , its highest level since January.

## EMPLOYMENT AND WAGES

## CIVILIAN LABOR FORCE

Total employment declined almost 340,000 in July to 62.2 million. An increase of over 225,000 in nonagricultural employment was not offset-due partially to the steel strike-by a seasonal decrease of about 575,000 workers in agriculture. A rise of about 125,000 in unemployment brought the total to 1.9 million, or 3 percent of the total civilian labor force.

[^3]Note.-Detail will not necessarily add to totals because of rounding.

The usual June rise in manufacturing employment did not occur, primarily because of the steel strike.

${ }^{1}$ Includes all full- and part-time wage and salary workers in nonagricultural establishments who worked or received pay during the pay period ending nearest the 15 th of the month. Excludes proprietors, selfemployed persons, domestic servants, and personnel of the armed forces. Total derived from this table not comparable with estimates of nonagricultural employment of the civilian labor force reported by the Department of Commerce (p. 7) which include proprietors, selfemployed persons, and domestic servants; which count persons as employed when they are not at work because of industrial disputes; and which are based on an enumeration of population, whereas the estimates in this table are based on reports from employing establishments.
${ }^{2}$ Preliminary estimates.

## AVERAGE WEEKLY HOURS - SElected industries

Average weekly hours in manufacturing increased slightly in June. The textile and leather industries showed the most significant gains.

## AVERAGE HOURLY EARNINGS - SELECTED INDUSTRIES

Average hourly earnings increased in most industries during June. However, the withdrawal from the payrolls ot the relatively high-paid steelworkers caused the average for manufacturing industries to remain unchanged.

## PRODUCTION AND BUSINESS ACTIVITY

## INDUSTRIAL PRODUCTION

In July, the index of total industrial production declined about 10 points to 192 percent of the 1935-39 average, according to preliminary estimates. The decrease reflected curtailments in steel-consuming industries and reduced operations because of vacation schedules in some other industries.

$[1935-39=100$, seasonally adjusted]

## WEEKLY PRODUCTION - SELECTED INDICATORS

The low level of activity in the steel mills was reflected in reduced output of bituminous coal and motor vehicles during July. Generation of electric power continued at a level well above that of last year.

| Period | Steel ${ }^{1}$ |  | Electric power, by utilities (millions of kilowatt-hours) | Bituminous coal (thousands of short tons) ${ }^{2}$ | Cars and trucks (number) |

## PRODUCTION OF SELECTED MANUFACTURES

Output of machinery held steady in June but was slightly below the level of the first quarter of this year. Among the nondurable manufactures, higher output of textiles and petroleum and coal products was noteworthy.

[1935-39 $=100$, seasonaily adjusted]

## GROSS PRIVATE DOMESTIC INVESTMENT

The small decline in total investment from the first to the second quarter was due to a drop in the rate of business inventory accumulation, as other components remained stable.

[Billions of dollars]

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

Expenditures for new plant and equipment during the first half of 1952 are estimated to have been about 11 percent above the first half of 1951. Expenditures for the third quarter, while slightly below the second quarter, are expected to exceed the level of the third quarter of last year by about 6 percent.

## PURCHASING POWER

## NATIONAL INCOME

National income rose about $\$ 3 / 2$ billion (seasonally adjusted annual rate) during the second quarter. Compensation of employees rose by an equal amount, while a small decrease in proprietors' income was offset by an increase in net interest. Corporate profits after adjustment for inventory valuation were unchanged from the first quarter level.

[^11]
## CORPORATE PROFITS

The annual rate of corporate profits before taxes declined about $\$ 1 \frac{1}{2}$ billion from the first to the second quarter of this year, according to preliminary estimates. Dividend payments increased, while undistributed profits fell.

## BOND YIELDS AND INTEREST RATES

During July, a sharp climb in yields on new issues of Treasury bills resulted in the highest monthly average since March 1933. The rate on commercial paper and yields on long-term Government bonds were unchanged; yields on corporate bonds rose slightly.

[Percent per annum]

| Period |  | U. S. Government security yields |  | Corporate Aaa bonds (Moody's) | Prime commercial paper, 4-6 months |

## FEDERAL BUDGET RECEIPTS AND EXPENDITURES

Total budget expenditures declined from June to July. The large seasonal drop in interest payments was partly offset by the increase in spending for national security. Spending for the latter purpose was almost 40 percent higher than in July 1951. July receipts were seasonally low, but higher than a year ago. The public debt rose to $\$ 263$ billion during the month.

[Billions of dollars]
