## THE TOTAL OUTPUT OF THE ECONOMY

## THE NATION'S ECONOMIC ACCOUNTS

On the basis of the national income and product accounts, the excess of business investment over gross retained earnings rose during the fourth quarter of 1952. The rate of personal saving and the excess of government expenditures over receipts remained at about the levels of the third quarter.

## URUND IVAIIUINAD FKUDUC'I'

In the lourth quarter, gross national product (at seasonally adjusted anneal rates) rose $\$ 17$ billion, according to revised estimates. This was the largest relative gain since the first quarter of 1951.

## PRICES

## CONSUMER PRICES

Consumer prices declined 0.2 percent in January. Food prices fell 0.6 percent, largely as a result of lower meat prices. Apparel prices declined for the fourth consecutive month. The total housing component of the index was steady, although rents rose 0.3 percent.

## EMPLOYMENT AND WAGES <br> CIVILIAN LABOR FORCE

Although nonagricultural employment in January dropped about 750,000 with the usual post-holiday lull in trade and curtailment of construction activity by winter weather, it was at an all-time high for the month. Farm employment also dropped. Unemployment rose to 1.9 million or 3 percent of the civilian labor force-slightly below a year aso.

## NONAGRICULTURAL EMPLOYMENT - SELECTED INDUSTRIES

Manulacturing employment declined by 100,000 from December to January, but was more than 800,000 higher than in Janvary 1952. Most employment reductions during the month were seasonal, although the declines in textile and apparel industries and in contract construction were slightly greater than those usually reported at this time of the year.

## PRODUCTION AND BUSINESS ACTIVITY

## INDUSTRIAL PRODUCTION

Industrial production reached a new post-World War II record level in February, according to preliminary estimates. Increased output of consumer durable goods, particularly automobiles, was the chief factor in the rise.

$[1935-39=100$, seasonally adjusted]

| Period | Total industrial production | Manufactures |  |  | Minerals |

## WEEKLY PRODUCTION - SELECTED INDICATORS

Steel production in February continued at the high January level. Electric power output averaged about 9 percent above that in February 1952, but production of bituminous coal was substantially lower than a year earlier. Assemblies of cars and trucks reached the highest level since April 1951.

| Period | Steel ${ }^{1}$ |  | Electric power, by utilities (millions of kilowatt-hours) | Bituminous coal (thousands of short tons) ${ }^{2}$ | Cars and trucks (number) |

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

Outlays for new plant and equipment in the third quarter were below anticipated expenditures in a survey previously reported. In the fourth quarter, expenditures rose to a new record on a seasonally adjusted basis. Business plans call for a further increase in the first quarter of 1953.

[Billions of dollars]

1 Exciudes agriculture
: Commercial and other includes trade, service, finance, communications, and construction.

- Estimates for fourth quarter 1952 and first quarter 1953 based on anticipated capital expenditures as reported by business in November 1952.

Norz.-Revised series; see Survey of Current Business. August 1952. These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

Detail will not necessarily add to totals because of rounding.

## NEW CONSTRUCTION

New construction expenditures, seasonally adjusted, rose in February to the highest level on record. Both public and private expenditures rose, with residential nonfarm outlays increasing the most- $\$ 62$ million, or $6 \frac{1}{2}$ percent.

## MERCHANDISE EXPORTS AND IMPORTS

December imports reached a high for the year, making the 1952 total of $\$ 10.7$ billion nearly equal to the 1951 record. The 1952 export total of $\$ 15.2$ billion was higher than in the previous year, but commercial exports, which exclude shipments under the Mutual Security Program, were 6 percent lower than in 1951.

## CREDIT, MONEY, AND FEDERAL FINANCE BANK LOANS AND INVESTMENTS

Bank loans declined about $\$ 300$ million during January, largely because of seasonal factors. Investments in U.S. Government securities decreased $\$ 600$ million primarily because of continued sales of Treasury tax anticipation bills which had been purchased in November. There was no change in holdings of other securities.

## CONSUMER CREDIT

Total consumer credit outstanding decreased more than $\$ 200$ million during January, reflecting a post-holiday decline in charge accounts. Installment credit rose for the tenth consecutive month under the impact of a contra seasonal increase in loans on automobiles.

## MONEY SUPPLY

The total money supply dropped nearly $\$ 2$ billion during Janvary from the all-time high reached in December 1952, with most of the decrease occurring in privately held deposits and currency. The reduction in commercial bank loans and in holdings of U.S. Government securities by the banking system were the chief factors in the decline.
