## THE TOTAL OUTPUT OF THE ECONOMY THE NATION'S ECONOMIC ACCOUNTS

Economic activity as measured by over-all expenditures and incomes continued at a high level in the third quarter.

## GROSS NATIONAL PRODUCT

Total output of goods and services declined nearly 1 percent in the third quarter, according to current estimates. A lower rate of business inventory accumulation accounted for most of the decline. Total government and consumer expenditures were fully maintained at their second quarter levels.

## PRICES

## CONSUMER PRICES

The consumer price index rose 0.2 percent between mid-September and mid-October. A decline of 0.2 percent in food prices was more than offset by higher prices for other major groups of consumer goods and services.

## WHOLESALE PRICES

Average wholesale prices, which had been drifting downward for 2 months, rose during the last of November and early December. The rise reflected mainly an increase in farm prices. Food prices regained by the end of November a large part of the drop of the earlier weeks of the month. Industrial prices continued stable.

## PRICES RECEIVED AND PAID BY FARMERS

Prices received by farmers dropped between October 15 and November 15. Lower prices for hogs, egss, and cotton were only partially offset by higher prices for milk, wheat, and some commercial vegetables. Prices paid by farmers for production items increased. The parity ratio, continuing to decline, was 8 percent lower han in November 1952.

## EMPLOYMENT AND WAGES

## CIVILIAN LABOR FORCE

Total employment of 61.9 million in November was just below the level of October of this year and of November a year ago. Agricultural employment declined seasonally; nonagricultural employment was little changed from earlier monshs. Although unemployment rose over the month to 1.4 million, or 2.3 percent of the civilian labor force, it was about the same as in November of last year and as low as in any November since World War Il.

[^1] and industrial fisputes.

Note,-Detail will not necessarily add to totals because of rounding.

Manufacturing employment dropped somewhat more than seasonally in November, but it was above any postwar November level except 1952. Trade, with a less than seasonal rise, was the only major industry group to report higher employment in November thon in the preceding month.

## AVERAGE WEEKLY HOURS - selected industries

The decline of almost $1 / 2$ hour in the averace workweek of factory production workers in November to 39.9 hours resulted mainly from Armistice Day shutdonns. However, this was the first November since 1949 in which the workweek was not well above 40 hours.

## AVERAGE WEEKLY EARNINGS - SELECTED INDUSTRIEs

Average weekly earnings in manufacturing industries decreased slightly in November to $\$ 71.02$, reflecting a shorter workweek. Over the year, the gain has been 74 cents, with increased wage rates more than compensating for the reduction in the workweek.

## PRODUCTION AND BUSINESS ACTIVITY

## INDUSTRIAL PRODUCTION

The index of industrial production declined again in November, according to preliminary estimates. Model changeovers in the automobile industry and reduced activity in the steel mills were primarily responsible for the drop in the durable goods sector. Minerals production also was lower, while production of nondurable goods continued at the October level.

## WEEKLY PRODUCTION - SELECTED INDICATORS

Steel mills operated at about 90 percent of capacity in November, and dropped below this figure in early December. Model changeovers accounted for the sharp drop in the number of automobiles being assembled. There was a further decline in coal mining but a small rise in electric power distribution.

## PRODUCTION OF SELECTED MANUFACTURES

In October most durable goods industries equaled or exceeded the September output. In the nondurable goods sector, there were further curtailments in textile, fuel, and chemical industries.

## GROSS PRIVATE DOMESTIC INVESTMENT

Gross private domestic investment decreased $\$ 41 / 2$ billion (seasonally adjusted annual rate), according to current estimates. A lower inventory accumulation rate accounted for most of the drop. Residential construction was slightly lower, while both nonresidential construction and investment in producers' durable equipment were maintained at the high levels of the second quarter.

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

Despite a slight drop in new plant and equipment expenditures in the fourth quarter, as indicated in a recent business survey, outlays for the full year 1953 are expected to reach a record $\$ 27.8$ billion. Expenditures for the first quarter of 1954 are expected to run above the first quarter of 1953 but to be slightly below the level of recent months.

${ }^{1}$ Excludes agriculture.
Commercial and other includes trade, service, finance, communications, and construction.
3 Estimates for fourth quarter of 1953 and first quarter of 1954 based on anticipated capital expenditures reported by business in a November survey.

- Annual total is sum of seasonally unadjusted quarterly expenditures; it does not necessarily coincide with average of seasonally adjusted figures, in part because of adjustments when necessary for systematic tendencies in anticipatory data. s Not available.

Note.-These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover apricultural investment and also certain equipment and construction outlays charged to current expense.

Detail will not necessarily add to totals because of rounding.

## INVENTORIES AND SALES

Total business sales, seasonally adjusted, increased slightly in October. The increase reflected higher wholesale and retail sales. However, sales of retailers dipped below the level of a year aso, while their inventories were higher. Total business inventories declined for the first time since January of this year.

## MERCHANDISE EXPORTS AND IMPORTS

An increase in grant-aid shipments in October accounted for the rise in total exports. With a decline in imports, there was a widening of the gap between commercial exports and imports.

## PURCHASING POWER

## NATIONAL INCOME

High employment and increased wage rates in private industries accounted for the third quarter rise in compensation of employees, according to recent estimates. There was also a small rise in net interest receipts and in rental income, and little change in independent business and professional incomes. The income of farm proprietors was lower.

[Billions of dollars]

## PERSONAL INCOME

The rise of $\$ 1$ billion (seasonally adjusted annual rate) in personal income in October resulted mainly from the payment of a special dividend from the Government life insurance fund to certain World War I veterans. There was little or no change otherwise.

[Billions of dollars]

1 Exclurfas social insurance contributions of employees and, beginning January 1952, of selfemployed persons.
5 Includes $\$ 2.7$ billion National Service Life Insurance dividend, most of which was paid in the first half of the year
8 Preliminary estimates.
Note.-Detail will not necessarily add to totals because of rounding.

## CONSUMER INCOME, SPENDING, AND SAVING

Disposable personal income rose more than consumer spending in the third quarter, according to current estimates. Personal saving during the quarier was $71 / 2$ percent of disposable income.

## FARM INCOME

Although farm income rose in October, reflecting the seasonal increase in marketings, it was 9 percent below the corresponding month of last year. For the first 10 months of this year farmers have received $\$ 24.9$ billion from marketings and Government payments, or about $5 \frac{1}{2}$ percent less than in the corresponding period of 1952.

## CREDIT, MONEY, AND FEDERAL FINANCE BANK LOANS AND INVESTMENTS

Bank loans and investments increased somewhat in October after registering very small decreases in the two preceding months. The loan expansion, which occurred in Agriculture (CCC) and interbank loans, totaled $\$ 800$ million for the month. Investments in Government securities were fractionally higher.

## CONSUMER CREDIT

Consumer credit outstanding at the end of October amounted to $\$ 28.2$ billion, $\$ 187$ million above the previous month-end and $\$ 4.0$ billion above a year earlier. Instalment credit, primarily for automobiles, accounted for most of the expansion. In the noninstalment credit area, a seasonal rise in charge accounts offset in part a decrease in service accounts.
