[PUBLIC LAW 120—81ST CONGRESS; CHAPTER 237—1ST SESSION]

JOINT RESOLUTION [S. J. Res. 55]

To print the monthly publication entitled "Economic Indicators"

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Joint Committee on the Economic Report be authorized to issue a monthly publication entitled "Economic Indicators," and that a sufficient quantity be printed to furnish one copy to each Member of Congress; the Secretary and the Sergeant at Arms of the Senate; the Clerk, Sergeant at Arms, and Doorkeeper of the House of Representatives; two copies to the libraries of the Senate and House, and the Congressional Library; seven hundred copies to the Joint Committee on the Economic Report; and the required number of copies to the Superintendent of Documents for distribution to depository libraries; and that the Superintendent of Documents be authorized to have copies printed for sale to the public.

Approved June 23, 1949.

THE TOTAL OUTPUT OF THE ECONOMY

THE NATION'S ECONOMIC ACCOUNTS

Economic activity as measured by over-all expenditures and incomes declined moderately in the fourth quarter of 1953.

GROSS NATIONAL PRODUCT

Gross national product was down about 1½ percent in the fourth quarter of 1953, according to current estimates. Private gross fixed investment was relatively unchanged but a decline in inventory investment caused total private investment to drop sharply. Consumer expenditures were off slightly from the rate of the preceding quarter, while government expenditures were stable.

¹ Includes expenditures for military services, international security and foreign relations (except foreign loans), development and control of atomic energy, promotion of the merchant marine, promotion of defense production and economic stabilization, and civil defense. For further details, see *Annual Economic Report of the President*, January 1954 (p. 167), and *Survey of Current Business*, July 1953 (p. 10). These expenditures are not comparable with the "national security" category in *The Budget of the U. S. Government for the Fiscal Year Ending June 30, 1955*, and shown on p. 31 of *Economic Indicators*.

NOTE.—Detail will not necessarily add to totals because of rounding.

PRICES

CONSUMER PRICES

Consumer prices, after declining for 2 months, rose 0.3 percent between mid-December and mid-January. Price increases of 0.7 percent for food and of 1.2 percent for transportation were mainly responsible for the upturn.

WHOLESALE PRICES

Average wholesale prices in early February registered a small drop from the January level. Since then they have been relatively steady. During February, farm prices increased while industrial prices decreased fractionally. Prices for processed foods on the average were lower than a month earlier.

PRICES RECEIVED AND PAID BY FARMERS

Prices received by farmers declined on the average very slightly during the month ended February 15, with lower prices of commercial vegetables, dairy products, fruits, poultry, and eggs being offset in part by increases in meat animal, cotton, and wheat prices. Prices paid were practically unchanged from the January level. The parity ratio dropped back 1 index point to the December 1953 level.

¹ Includes all full- and part-time wage and salary workers in nonagricultural establishments who worked during or received pay for any part of the pay period ending nearest the 15th of the month. Excludes proprietors, self-employed persons, domestic servants, and personnel of the Armed Forces. Total derived from this table not comparable with estimates of nonagricultural employment of the civilian labor force reported by the Department of Commerce (p. 7) which include proprietors, self-employed persons, and domestic servants; which count persons as employed when they are not at work because of industrial disputes; and which are based on an enumeration of population, whereas the estimates in this table are based on reports from employing establishments.

² Preliminary estimates.

AVERAGE WEEKLY HOURS - SELECTED INDUSTRIES

The average workweek of factory production workers in February was fractionally higher than in January, reflecting a moderate rise in the nondurable goods area. However, since February 1953 the average workweek has been shortened by 1.4 hours.

[Hours per week, for production workers or nonsupervisory employees]

WEEKLY PRODUCTION - SELECTED INDICATORS

Steel production dropped during February and was scheduled at less than 70 percent of the new theoretical capacity in the first part of March. Auto assemblies, averaging somewhat lower than in January, were about 10 percent less than in February 1953. Electric power distribution receded from its record reached in mid-January.

Period	Steel		Electric power, by utilities (millions of kilowatt-hours)	Bituminous coal (thousands of short tons) ²	Cars and trucks (number)
	Thousands of net tons	Percent of theoretical capacity ¹

GROSS PRIVATE DOMESTIC INVESTMENT

Gross private domestic investment in the fourth quarter decreased almost \$6 1/2 billion (seasonally adjusted annual rate), according to current estimates. Inventory liquidation accounted for nearly all of the drop. Investment in producers' durable equipment was off somewhat, while construction increased slightly.

[Billions of dollars]

EXPENDITURES FOR NEW PLANT AND EQUIPMENT

Business plans call for expenditures of \$27.2 billion on new plant and equipment in 1954, according to a survey made in February and early March. This would be 4 percent less than the amount spent in 1953.

[Billions of dollars]

¹ Excludes agriculture.

² Commercial and other includes trade, service, finance, communications, and construction.

³ Annual total is sum of seasonally unadjusted quarterly expenditures; it does not necessarily coincide with average of seasonally adjusted figures, in part because of adjustments when necessary for systematic tendencies in anticipatory data.

⁴ Estimates based on anticipated capital expenditures reported by business in February 1954.

NOTE.—These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

Estimates after 1951 have been revised. Data became available after chart was prepared.

Detail will not necessarily add to totals because of rounding.

Sources: Securities and Exchange Commission and Department of Commerce.

NEW CONSTRUCTION

Total new construction, seasonally adjusted, increased somewhat in February, with activity at both the private and the public levels sharing in the increase.

INVENTORIES AND SALES

Total business inventories (seasonally adjusted) continued to decline in January and were about 1½ percent below the September peak. Both manufacturers and retailers reduced their stocks while wholesalers expanded theirs slightly. Business sales at both the manufacturers' and distributors' level dropped in January. However, preliminary reports indicate a 1 percent rise in retail sales in February.

CORPORATE PROFITS

Third quarter 1953 aggregate corporate profits, both before and after taxes, are estimated to have been below those in the second quarter, according to current estimates. Although profits probably declined further in the fourth quarter, the 1953 total is estimated to have been above that for 1952.

FEDERAL BUDGET RECEIPTS AND EXPENDITURES

The decline of Federal expenditures in January was due to a drop in interest payments from their seasonal high in December and to lower national security spending. With budget receipts less than expenditures, the cumulative fiscal year deficit rose to \$9.7 billion by the end of the month.

[Billions of dollars]

¹ Revised to include the items classified as "national security" in *The Budget of The United States Government for the Fiscal Year Ending June 30, 1955*. These expenditure items are: Military services, foreign military assistance, development and control of atomic energy, and allocation of critical and strategic materials.

² Includes guaranteed securities, except those held by the Treasury. Not all of total shown is subject to statutory debt limitation.

³ Data for fiscal year not strictly comparable with monthly figures.

⁴ February data not available. Budget receipts and expenditures previously shown daily in the Treasury statement will be reported separately, once a month, with the mid-month issue of the *Daily Treasury Statement*.

⁵ Preliminary estimates.

NOTE.—Detail will not necessarily add to totals because of rounding.
