## [Public Law 120-81st Congress; Chapter 237-1st Session] <br> JOINT RESOLUTION [S. J. Res. 55]

To print the monthly publication entitled "Economic Indicators"
Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Joint Committee on the Economic Report be authorized to issue a monthly publication entitled "Economic Indicators," and that a sufficient quantity be printed to furnish one copy to each Member of Congress; the Secretary and the Sergeant at Arms of the Senate; the Clerk, Sergeant at Arms, and Doorkeeper of the House of Representatives; two copies to the libraries of the Senate and House, and the Congressional Library; seven hundred copies to the Joint Committee on the Economic Report; and the required number of copies to the Superintendent of Documents for distribution to depository libraries; and that the Superintendent of Documents be authorized to have copies printed for sale to the public.

Approved June 23, 1949.

## THE TOTAL OUTPUT OF THE ECONOMY THE NATION'S ECONOMIC ACCOUNTS

Economic activity as measured by over-all expenditures and incomes showed very little change during the second quarter of 1954, according to current estimates.

The decline in gross national product, which extended over the preceding 3 quarters, seems to have come to a halt in the secend quarter of this year. A decline in Federal expenditures of $\$ 3.7$ billion (seasonally adjusted annual rate) was chfset by increases in consumption expenditures and private investment.

[Billions of dollars]

1 includes expenditures for military services. international security and foreign relations (except forcigu loans), development and control of atomic energy, promotion of the merchant marime, promotion of defense production and emomomic stabilization, and civil dufense. For further details, see Annual Economic, Report of the President january 1954 (p. 167), and Suveel of Cuyent Rusiness, July 1953 (p. 10). These espenditures are not comparable with the "national security" category in The Pudget of het U.S. Government for the Fiscal Year Ending June si, 1965 , and shown on p. 31 of Economic Indicafors.

Note.-The national income and expenditure series have been revised by the Department of Commerce. For details see Survey of Current Business, July 1954. Detail will not necessarily add to totals because of rounding. Source: Department of Commerce.

Consumer prices rose 0.1 percent between May and June. The tiny rise resulted mainly from an increase of 0.4 percent in food prices. For the first time in years, average rents were unchanged.

## PRICES RECEIVED AND YAID EY tAKivikio

Prices received by farmers declined slightly during the month ended July 15. Decreases in the prices of beef cattle, hogs, and deciduous fruits were largely offset by higher prices for commercial vegetables, milk, wheat, and eggs. Prices paid also declined slightly and the parity ratio remained at 88.

## NUNAGKICULI'URAL EMPLOYMENT - SELECTED INDUSTRIES

In July, employment fell seasonally in government and trade and somewhat more than seasonally in durable goods manufacturing. It continued to rise in finance, services, and construction.

TThousands of wage and salary workers ${ }^{1}$ ]

## AVERAGE WEEKLY HOURS - Stituraid indusiritis

The average workweek of factory production workers in July was 39.4 hours, 0.2 hours less than in June. The decrease was less than usually occurs between June and July.

[Hours per week, for production workers or nonsupervisory employees]

## 

Average hourly earnings in manufacturing in July were practically the same as in June.

[For production workers or nonsupervisory employees]

## rKUDUC゙IIUN AND BUSLINESS ACMIVITY INDUSTRIAL PRODUCTION

The industrial production index in June remained at the May level of 124 (1947-49=100). Indications are that the index continued steady in July, as most industries showed about the usual seasonal declines.

[^1]Source: Board of Gorernors of the feveral Reserve System.

## WEEKLY PRODUCTION - SELECTED INDICATORS

The cutback in steel production and auto assemblies in July reflected the holiday and vacations. Electric power distribution continued to exceed the levels of a year earlier.

| Period | Steel |  | Electric power, by utilities (millions of kilowatt-hours) | Bituminous coal (thousands of short tons) ${ }^{2}$ | $\begin{aligned} & \text { Cars and } \\ & \text { trucks } \\ & \text { (number) } \end{aligned}$ |

${ }^{1}$ Excludes agriculture.
${ }^{2}$ Commercial and other incledes trade, service, finance, communications, and construction.
A nnual total is sum of seasonally unadjusted quarterly expenditures; it does not necessarily coincide with average of seasonally adjusted figures, in part because of adjustments when necessary for systematic tendencies in anticipatory data

- Estimates based on anticipated capital expenditures as reported by business in A pril and May 1954.

Note.-These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the atter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

Detail will not necessarily add to totals because of rounding.
Sources: Securities and Exchange Commission and Department of Commerce.

## NEVN CUNSH'KUCHIUN

New construction expenditures, seasonally adjusted, remained at a monthly rate of above $\$ 3$ billion during July. The total for the first 7 months of this year reached a new high and was about 3 percent above the corresponding period of 1953. The increase occurred almost entirely in private building.

## NEW HOUSING STARTS

Nonfarm housing starts rose 12 percent in June to a total of 120,000 , the peak month thus far this year. On a seasonally adjusted basis, private starts were at an annual rate of $1,206,000$ units, well above the rate for any June since 1950, and greater than any month since Janucry 1951.

## INVENTORIES AND SALES

Total June sales were about $\$ 800$ million (seasonally adjusted) higher than a month earlier, with increcses occurring at both the manufacturers' and distributors' levels. Manufacturers' new orders rose slightly. A decline of $\$ 400$ million in total manufacturing and trade inventories during June brought the total decline for the first 6 months of this year to $\$ 2.1$ billion. Most of the decrease during the half year occurred in stocks of durable goods manufacturers.

## PURCHASING POWER

## NATIONAL INCOME

National income rose slightly between the first and second quarters of this year, according to current estimates. Proprietors' income declined slightly due to a fall in farmers' income. Other major components moved up a trifle.

[Billions of dollars]

| Period | Total national income | Compensation of employees | Proprietors' (business, professional, farm) and rental income | Net interest | Corporate profite and inventory valuation adjustment |  |  |

## CREDIT, MONEY, AND FEDERAL FINANCE BANK LOANS AND INVESTMENTS

Total loans and investments of commercial banks rose $\$ 600$ million in June. Investments accounted for practically all of the increase. Loans, on the average, changed very little, with a sharp rise during the first half of the month being offset by a decline in the last half.

## CONSUMER CREDIT

Consumer credit outstanding, increasing for the third consecutive month, totaled $\$ 27.8$ billion at the end of June, or a quarter billion dollars more than a month earlier. The rise in instalment credit, largely seasonal, resulted from increases in automobile credit and personal loans. All types of noninstalment credit also rose.

BUND YIELDS AND INIERESI RATES
During July, yields on both long-term public and private securities declined. On the other hand, the yield on 3-month Treasury bills continued the increase started in mid-June. The prime commercial paper rate dropped to a new low for the year.

## MONEY SUPPLY

The increase of $\$ 1.7$ billion in total deposits and currency during June brought the total increase since mid- 1953 to $\$ 8.7$ billion. Most of the growth over the year occurred in time deposits. U. S. Government deposits were $\$ 2.6$ billion above their level of a year earlier.

## FEDERAL BUDGET RECEIPTS AND EXPENDITURES

Total budget expenditures increased in June, largely due to heavy interest payments at the end of the fiscal year. Budget receipts also rose, reflecting the quarterly income tax payments. The budget deficit for the fiscal year 1954 was $\$ 3.0$ billion, compared to a deficit of $\$ 9.4$ billion for fiscal 1953.
