[Public Law 120—81st Congress; Chapter 237—1st Session]

JOINT RESOLUTION [S. J. Res. 55]

To print the monthly publication entitled "Economic Indicators"

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Joint Committee on the Economic Report be authorized to issue a monthly publication entitled "Economic Indicators," and that a sufficient quantity be printed to furnish one copy to each Member of Congress; the Secretary and the Sergeant at Arms of the Senate; the Clerk, Sergeant at Arms, and Doorkeeper of the House of Representatives; two copies to the libraries of the Senate and House, and the Congressional Library; seven hundred copies to the Joint Committee on the Economic Report; and the required number of copies to the Superintendent of Documents for distribution to depository libraries; and that the Superintendent of Documents be authorized to have copies printed for sale to the public.

Approved June 23, 1949.

THE TOTAL OUTPUT OF THE ECONOMY

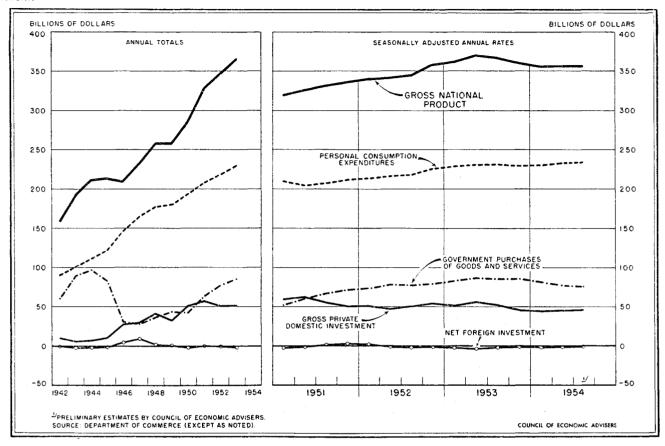

THE NATION'S ECONOMIC ACCOUNTS

Preliminary estimates of total income and expenditures in the third quarter reflect the continued stability of over-ail economic activity since the early part of the year.

GROSS NATIONAL PRODUCT

The gross national product remained unchanged between the second and third quarters, according to preliminary estimates. A further decline in Federal expenditures was offset by increases in consumer expenditures and investment.

¹ Includes expenditures for military services, international security and foreign relations (except foreign loans), development and control of atomic energy, promotion of the merchant marine, promotion of defense production and economic stabilization, and civil defense. For further details, see Annual Economic Report of the President, January 1954 (p. 167), and Survey of Current Rusiness, July 1953 (p. 10). These expenditures are not comparable with the "national security" category in The Budget of the U. S. Government for the Fiscal Year Ending June 30, 1966, and shown on p. 31 of Economic Indicators.

2 Preliminary estimates by Council of Economic Advisers.

Note.—The national income and expenditure series have been revised by the Department of Commerce. For details see Survey of Current Business, July 1954.

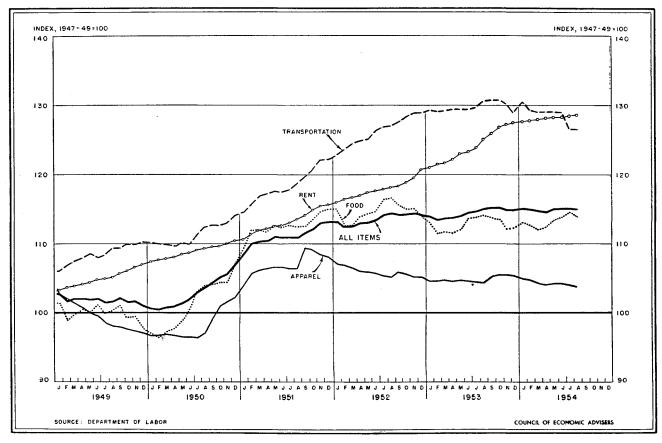

Detail will not necessarily add to totals because of rounding.

Source: Department of Commerce (except as noted).

PRICES

CONSUMER PRICES

Consumer prices declined 0.2 percent in August, largely because of a drop of 0.6 percent in food prices—the first decline in the food index since March.

WHOLESALE PRICES

The average level of wholesale prices declined somewhat in September, due to a drop in the prices of farm products and processed foods.

PRICES RECEIVED AND PAID BY FARMERS

Prices received by farmers declined 2 percent during the month ended September 15. Lower prices for hogs, eggs, chickens, soybeans, and potatoes more than offset the higher prices for cattle, milk, cotton, wheat, and tobacco. Prices paid by farmers decreased 1 percent and the parity ratio dropped 1 point to 88.

EMPLOYMENT AND WAGES

LABOR FORCE

Unemployment declined between early August and early September, as is usual for this time of the year. There was also a fall in employment, but it was smaller than the normal seasonal amount.

Includes part-time workers and those with jobs but not at work for such reasons as vacation, illness, bad weather, temporary layoff, and industrial disputes.

The number of temporary layoffs, which the Census Bureau includes in the employment figure (see footnote 1), is shown separately so as to afford a basis for further analysis of employment and unemployment.

See footnote 2.

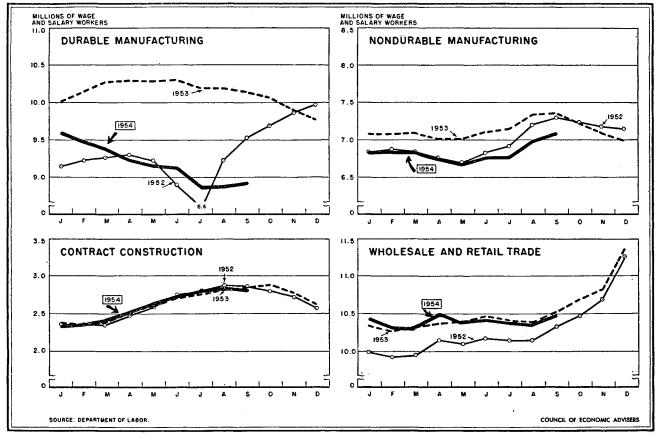

All programs. Weekly average for period. For description of series, see Labor Market and Employment Security, April 1954.

Pertains to labor force data only. Data prior to 1953 not comparable with subsequent data.

Sources: Department of Commerce (labor force) and Department of Labor (insured unemployment).

NONAGRICULTURAL EMPLOYMENT - SELECTED INDUSTRIES

Employment in nonagricultural establishments, taken as a whole, increased by more than the normal seasonal amount between the middle of August and the middle of September. In manufacturing, employment rose seasonally in the durable goods sector and more than seasonally in the nondurable goods sector.

Includes all full- and part-time wage and salary workers in nongricultural establishments who worked during or received pay for any part of the pay period ending nearest the 15th of the month. Excludes proprietors, self-employed persons, domestic servants, and personnel of the armed forces. Total derived from this table not comparable with estimates of nongricultural employment of the civilian labor force reported by the Department of Commerce (p. 7) which include proprietors, self-employed persons, and domestic servants; which count persons as employed when they are not at work because of industrial disputes; and which are based on ne enumeration of population, whereas the estimates in this table are based on reports from employing establishments.

Source: Department of Labor.

Note .- Beginning with 1951 , data have been adjusted to first quarter 1953 benchmark levels.

AVERAGE WEEKLY HOURS - SELECTED INDUSTRIES

The average workweek of factory production workers in September was 39.7 hours, the same as in August. A very slight increase is usual at this time of the year.

EXPENDITURES FOR NEW PLANT AND EQUIPMENT

According to a survey made in August, business expenditures for new plant and equipment in 1954 are expected to total \$26.7 billion, or \$1.7 billion less than in 1953. Business firms anticipate spending \$26.8 billion and \$26.0 billion (seasonally adjusted annual rates) in the third and fourth quarters of this year, respectively.

Sources: Securities and Exchange Commission and Department of Commerce

¹ Excludes agriculture.

² Commercial and other includes trade, service, finance, communications, and construction.

³ Annual total is sum of seasonally unadjusted quarterly expenditures; it does not necessarily coincide with average of seasonally adjusted figures, in part because of adjustments when necessary for systematic tendencies in anticipatory data.

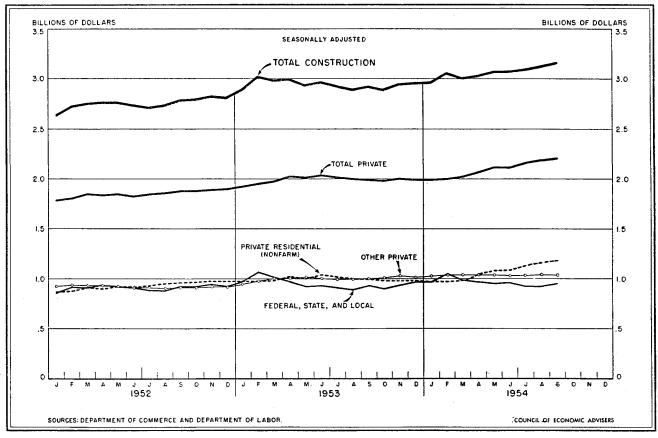

⁴ Estimates based on anticipated capital expenditures as reported by business in August 1954.

Note.—These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

Detail will not necessarily add to totals because of rounding.

NEW CONSTRUCTION

Expenditure for new construction, seasonally adjusted, reached a new record level in September. In that month, it was 8 percent above a year earlier.

CORPORATE PROFITS

Corporate profits, both before and after taxes, in the first half of this year were well below a year ago. Abolition of the excess profits tax contributed to the relatively favorable showing of profits after taxes.

FEDERAL BUDGET RECEIPTS AND EXPENDITURES

Total budget expenditures increased almost \$2 billion in August, largely due to repurchases from private banks of Commodity Credit Corporation loans. Budget receipts rose by about \$1 billion. The cumulative budget deficit for the first 2 months of the current fiscal year was \$4.8 billion, reflecting to a considerable degree the reduced receipts of the Treasury in the first half of the fiscal year.

¹ Revised to include the items classified as "national security" in The Pudget of The United States Government for the Fiscal Year Ending June 80,1986. These expenditure items are: Military services, foreign military assistance, development and control of atomic energy, and allocation of critical and strategic materials.

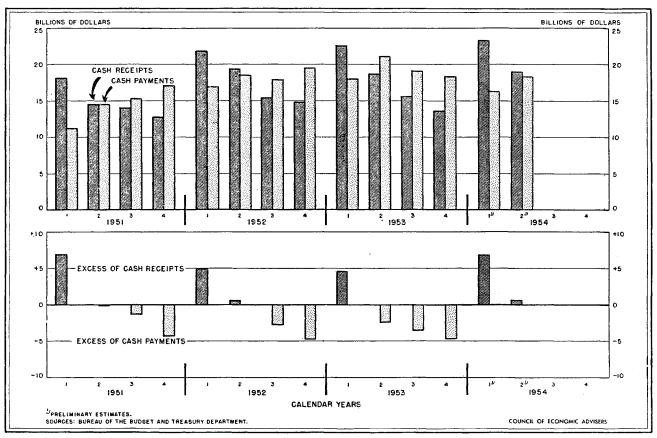

2 Includes guaranteed securities, except those held by the Treasury. Not all of total shown is subject to statutory debt limitation.

3 Beginning with February 1984, the reporting of budget receipts and expenditures has been changed to a basis consistent with that used in preparing budget estimates. For comparative purposes, figures for fiscal 1983 are shown on a like basis.

Note.—Data for earlier months have not been published by the Treasury Department. Sources: Treasury Department and Bureau of the Budget. Detail will not necessarily add to totals because of rounding.

FEDERAL CASH RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

The cash deficit for the fiscal year ending in June was one-half billion dollars.
