## THE TOTAL OUTPUT OF THE ECONOMY THE NATION'S ECONOMIC ACCOUNTS

Current estimates of total income and expenditures for the first quarter of 1955 reflect the continued rise in over-all economic activity.

## GROSS NATIONAL PRODUCT OR EXPENDITURE

According to current estimates, the gross national product reached $\$ 370$ billion (seasonally adjusted annual rate) in the first quarter of 1955 . The rise of $\$ 8$ billion from the previous quarter was due mainly to increases in consumer expenditures and private domestic investment.

## HKUDUC'I'IUN AND BUSINESS ACTIVITY INDUSTRIAL PRODUCTION

Industrial production increased in April for the eighth consecutive month. The seasonally adjusted index, which was 136 (1947-49 = 100) in April, almost equaled the July 1953 peak.

GROSS PRIVATE DOMESTIC INVESTMENT
According to current estimates, gross private domestic investment increased by almost $\$ 4$ billion (seasonally adjusted annual rate) in the first quarter of 1955. The decline in business inventories which began in late 1953 was reversed during the quarter. Construction outlays, which rose sharply, were offset partially by a decline in producers' durable equipment.

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

According to a survey made in January and February, expenditures for new plant and equipment in 1955 are expected to be $\$ 27$ billion, or about 1 percent more than in 1954. Current plans suggest a 5 percent rise between the first and second quarters, with approximate stability for the rest of the year.

Excludes agriculture.
Commercial and other incledes trade, service, finance, communications, and construction.
Armual total is sum of seasonally unadjusted expenditures; it does not necessarily coincide with average of seasonally adjusted figures, in part because of adjuatments wheh necossary for systematic tendencies in anticipatory data.

Kstmatersham on anticmmated capital expenditures as reported hy business in January and February 1955.
Notk, The. The figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the inttry cever nurteultiral th weatment and also certain equipment and construction outlays charged to current expense.

Detnil will not necressarily add to totals because of rounding.
Bourcer: Ancurtion mud Exchange Commision and Depertment of Commerce.

## NEW CONSTRUCTION

In April, expenditures for total new construction, seasonally adjusted, were at a record annual rate of $\$ 41.6$ billion15 percent higher than in April a year ago. Construction contracts awarded for the first 4 months of this year were about a third higher than for the corresponding period of 1954.

## HOUSING STARTS AND FINANCING APPLICATIONS

In April, the number of nonfarm housing units started was 127,000 , or 18 percent higher than a year earlier. On a seasonally adjusted basis, private starts were at an annual rate of 1.3 million units.

## SALES AND INVENTORIES-mANUFACTURING AND TRADE

Manufacturers' sales (seasonally adjusted) increased sharply in March, as substantial gains were recorded by both durable and nondurable goods industries. Manufacturers' new orders rose substantially. Retail sales in April were at a record level. Total inventories rose in March, with retail stores accounting for most of the increase.

## FARM INCOIME

During January-March 1955, farmers received about 5 percent less from cash marketings and Government payments than a year earlier. Receipts from livestock and products were down 9 percent, due largely to lower prices; receipts from crops were up 1 percent, with higher prices slightly overbalancing the effect of reduced marketings.

## CREDIT, MONEY, AND FEDERAL FINANCE BANK LOANS, INVESTMENTS, AND RESERVES

In March, commercial bank loans increased by $\$ 1.1$ billion. Investments declined by $\$ 2.4$ billion, as the banks continued to reduce their holdings of $U$. S. Government securities. "Free" reserves (excess reserves less borrowings at the Reserve Banks) showed very little change between March and April.

[Billions of dollars]

${ }^{1}$ Commercial, industrial, and agricultural loans; revised sertes beginning January 1952.
Data are averages of daily figures on balances and borrowings during the period. Member banks include, besides all national banks, those State banks that have taken membership in the Federal Reserve System.

## MONEY SUPPLY

The privately held money supply decreased by $\$ 1.6$ billion between February and March. The decline was smaller than usual for this time of the year.

## FEDERAL BUDGET RECEIPTS AND EXPENDITURES

The cumulative budget deficit through March of the current fiscal year was $\$ 5.1$ billion, compared with $\$ 2.3$ billion at the same time last year. A substantial portion of the difference resulted from the deferment of end-of-year individual income tax payments and current declaration payments from March 15 to April 15.

[^12]FEDERAL CASH RECEIPTS FROM AND PAYMENTS TO THE PUBLIC
Cash receipts exceeded cash payments by $\$ 4.1$ billion in the first quarter of this year. Because of the heavy concentration of corporate tax payments in March, a substantial cash surplus is usual at this time of year.

[Millions of dollars]
