# THE TOTAL OUTPUT OF THE ECONOMY

## THE NATION'S ECONOMIC ACCOUNTS

Current estimates of total income and expenditures for the first quarter of 1955 reflect the continued rise in over-all economic activity.

# GROSS NATIONAL PRODUCT OR EXPENDITURE

According to current estimates, the gross national product reached \$370 billion (seasonally adjusted annual rate) in the first quarter of 1955. The rise of \$8 billion from the previous quarter was due mainly to increases in consumer expenditures and private domestic investment.

<sup>1</sup> Less Government sales.

<sup>2</sup> Includes expenditures for military services, international security and foreign relations (except foreign loans), development and control of atomic energy, promotion of the merchant marine, promotion of defense production and economic stabilization, and civil defense. For further details, see *Economic Report of the President*, January 1955 (p. 137), and *National Income, 1954 Edition* (p. 148). These expenditures are not comparable with the "national security" category in *The Budget of the U. S. Government for the Fiscal Year Ending June 30, 1955*, and shown on p. 31 of *Economic Indicators*.

NOTE.—Detail will not necessarily add to totals because of rounding.

# PRICES

## CONSUMER PRICES

The average of consumer prices declined fractionally in April, due principally to a reduction in transportation costs as new and used car prices declined.

# GROSS PRIVATE DOMESTIC INVESTMENT

According to current estimates, gross private domestic investment increased by almost \$4 billion (seasonally adjusted annual rate) in the first quarter of 1955. The decline in business inventories which began in late 1953 was reversed during the quarter. The sharp rise in construction outlays was partially offset by a decline in producers' durable equipment.

# EXPENDITURES FOR NEW PLANT AND EQUIPMENT

According to a survey made in April and May, expenditures for new plant and equipment are expected to increase 9 percent between the first and second quarters—the largest quarterly rise since the last half of 1950. Current plans indicate an additional rise of 3 percent in the third quarter to a level of about \$29 billion, equaling the previous peak in the third quarter of 1953.

## NEW CONSTRUCTION

Expenditures for total new construction in May, seasonally adjusted, were at a record annual rate of \$42 billion. During the first 5 months of this year the rate of private residential building remained fairly steady at a high level; private nonresidential building increased sharply in the same period. Construction contracts awarded for the first 5 months of this year were 29 percent higher than for the corresponding period of 1954.

## FARM INCOME

During January-April 1955, farmers received about 3 percent less from cash marketings and Government payments than a year earlier. Receipts from livestock and products were down 8 percent, due largely to lower prices; receipts from crops were up 6 percent, with higher prices overbalancing the effect of reduced marketings.

## CONSUMER CREDIT

Total consumer credit outstanding rose \$700 million during April to a record level of \$30.7 billion. The continued large volume of instalment financing of automobile purchases accounted for most of the rise.

# FEDERAL BUDGET RECEIPTS AND EXPENDITURES

Budget expenditures through April of the current fiscal year were \$2.8 billion lower than a year earlier. Budget receipts were \$4.6 billion lower, reflecting the effect of the 1953-54 business contraction and the 1954 tax reductions. As a result, the cumulative budget deficit at the end of April was \$1.8 billion higher than a year ago.

<sup>1</sup> Revised to include the items classified as "national security" in *The Budget of The United States Government for the Fiscal Year Ending June 30, 1955*. These expenditure items are: Military functions of Defense Department, mutual military program, development and control of atomic energy, and allocation of critical and strategic materials.

<sup>2</sup> Includes guaranteed securities, except those held by the Treasury. Not all of total shown is subject to statutory debt limitation.

NOTE.—Beginning with February 1954, the reporting of budget receipts and expenditures is on a basis consistent with that used in preparing budget estimates. The figures shown above for fiscal years 1953 and 1954 are those published by the Treasury Department on the new basis.

Detail will not necessarily add to totals because of rounding.

# FEDERAL CASH RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

Cash receipts exceeded cash payments by \$4.1 billion in the first quarter of this year. Because of the heavy concentration of corporate tax payments in March, a substantial cash surplus is usual at this time of year.
