## [Public Law 120-81st Congress; Chapter 237-1st Session] IOINT RESOLUTION [S. J. Res. 55]

To print the monthly publication entitled "Economic Indicators"
Resolved by the Senate and House of Representatives of the United States of America in Congress assembled. That the Joint Committee on the Economic Report be authorized to issue a monthly publication entitled "Economic Indicators," and that a sufficient quantity be printed to furnish one copy to each Member of Congress; the Secretary and the Sergeant at Arms of the Senate; the Clerk, Sergeant at Arms, and Doorkeeper of the House of Representatives; two copies to the libraries of the Senate and House, and the Congressional Library: seven hundred copies to the Joint Committee on the Economic Report; and the required number of copies to the Superintendent of Documents for distribution to depository libraries; and that the Superintendent of Documents be authorized to have copies printed for sale to the public.

Approved June 23, 1949.

## NATIONAL INCOME

According to preliminary estimates, national income increased about $\$ 51 / 2$ billion (seasonally adjusted annual rate) between the third and fouth quarters of last year. Compensation of employees accounted for most of the rise, although there were substantial gains in farm proprietors' income and net interest.

## SOURCES OF PERSONAL INCOME

Personal income rose $\$ 3$ billion (seasonally adjusted annual rate) between November and December. The largest part of the rise stemmed from special year-end and extra dividends.

[^0]
## DISPOSITION OF PERSONAL INCOME

Disposable personal income rose $\$ 5$ billion (seasonally adjusted annual "rate) ?between the third and fourth quarters of 1955 , while consumbtion expenditures increased only $\$ 11 / 2$ billion. Personal disposable income in the third quarter to 7 percent in the fourth.

## EXPENDITURES FOR NEW PLANT AND EQUIPMENT

According to a survey taken last October and November, business expenditures on plant and equipment were expected to total $\$ 28.3$ billion in 1955 , about $\$ 11 / 2$ billion more than in 1954 . These expenditures were expected to reach $\$ 30.9$ billion (seasonally adjusted annual rate) in the fourth quarter of 1955 and $\$ 31.6$ billion in the first quarter of 1956.

${ }^{1}$ Excludes agriculture.
Commercial and other includes trade, service, inance, communications, and construction
3 Estimates based on anticipated capital expenditures as reported by business in late October and November 1955.
4 Annual total is sum of seasonally unadjusted expenditures; it does not necessarily coincide with average of seasonaliy adjusted figures, which include adjustments, when necessary, for systematic tendencies in anticipatory data.

Note.-These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

Detail will not necessarily add to totals because of rounding.
Sources: Securities and Exchange Commission and Department of Commerce.

## EMPLOYMENT, UNEMPLOYMENT, AND WAGES STATUS OF THE LABOR FORCE

In line with seasonal expectations, the number of people employed (including those in agriculture) declined by about $11 / 4$ million between December and January. Unemployment increased by almost $1 / 2$ million, as Christmas work ended in retail trade and the postal service and as further winter cutbacks were made in various outdoor activities.

[^2]12th of month; previously, for week containing 8th of month.

Preliminary estimate.
rces: Department of Commerce (labor force and Department of Labor (insured unemploymant).

## NONAGRICULTURAL EMPLOYMENT

Employment in nonagricultural establishments declined by about $13 / 4$ million between December and January in line with normal seasonal movements. However, the decline in both durable and nondurable goods manufacturing was somewhat greater than seasonal.

## AVERAGE WEEKLY HOURS - SELECTED INDUSTRIES

The average workweek of factory production workers declined from 41.3 hours in December to 40.6 hours in January. The decline in durable goods was larger than usual for this time of year; in nondurable goods the decline was seasonal,

## PRODUCTION OF SELECTED MANUFACTURES

In January, production of most manufacturing industries was maintained at about the December levels. An appreciable decline in automobile production is reflected in the indexes for transportation equipment and consumer durable goods.

## WEEKLY INDICATORS OF PRODUCTION

Production of steel reached an all-time high in January. Electric power distributed and freight carloadings also rose. Passenger car assemblies dropped while truck assemblies increased.

## NEW CONSTRUCTION

The rate of total construction (seasonally adjusted) declined during January due to lower resideniial outlays. Private nonresidential construction remained unchanged and public construction increased. Contract awards advanced sharply.

## SALES AND INVENTORIES - MANUFACTURING AND TRADE

Sales of both manufacturers and distributors (secsonally adjusted) were unchanged in December from the November levels. According to preliminary estimates, January retail sales were unchanged for the fourth consecutive month. Manufacturers' new orders rose in December and continued to exceed sales. Inventories of manufacturers and retailers increased.

| Period | Manufacturing and trade |  | Manufacturing |  |  | Wholesale |  | Retail |  | Department stores |  |

1 Beginning with 1950, figures include oniy Department of Defense shipments of grant-aid military supplies and equipuent under the Mutual Security Program. Shipments for the first 6 months of the program (July-December 1950) amonnted to 282 million dollars.
3 Preliminary estimates.

## PRICES

CONSUMER PRICES
The average of consumer prices fell 0.3 percent between November and December. Reductions in prices'for transportation, food, and housing more than offset higher costs of medical and personal care.

## CONSUMER CREDIT

At the end of 1955 , total consumer credit outstanding was $\$ 36.2$ billion- $\$ 6.1$ billion higher than a year earlier. In Jecember, total consumer credit rose $\$ 1.2$ billion, due mainly to increases in noninstalment credit and in instalment zredit used for purchases of consumer durable goods other than automobiles.

## FEDERAL FINANCE BUDGET RECEIPTS AND EXPENDITURES

The cumulative budget deficit for the first half of the current fiscal year was $\$ 7.9$ billion, due primarily to seasonally low tax collections. For the same period last year, the budget deficit amounted to $\$ 9.3$ billion.
