[Public Law 120—81st Congress; Chapter 237—1st Session]

JOINT RESOLUTION [S. J. Res. 55]

To print the monthly publication entitled "Economic Indicators"

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Join Economic Committee be authorized to issue a monthly publication entitled "Economic Indicators," and that a sufficient quantity be printed to furnish one copy to each Member of Congress; the Secretary and the Sergeant at Arms of the Senate; the Clerk, Sergeant at Arms, and Doorkeeper of the House of Representatives; two copies to the libraries of the Senate and House, and the Congressional Library; seven hundred copies to the Joint Economic Committee; and the required number of copies to the Superintendent of Documents for distribution to depository libraries; and that the Superintendent of Documents be authorized to have copies printed for sale to the public.

Approved June 23, 1949.

TOTAL OUTPUT, INCOME, AND SPENDING

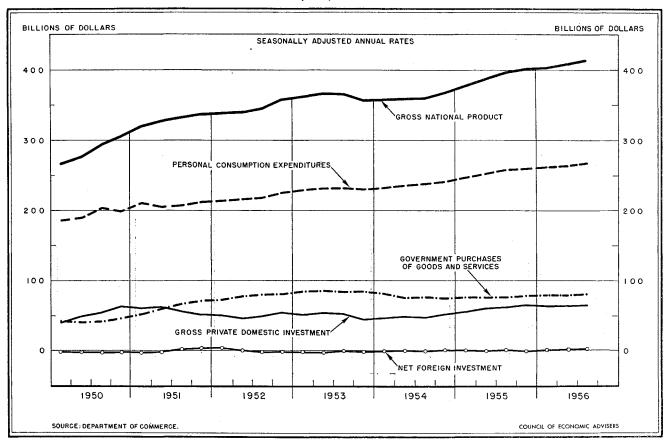

THE NATION'S INCOME, EXPENDITURE, AND SAVING

Current estimates of total income and expenditures show a continued rise in over-all economic activity between the second and third quarters of 1956.

GROSS NATIONAL PRODUCT OR EXPENDITURE

The gross national product rose \$5.5 billion (seasonally adjusted annual rate) between the second and third quarters of 1956 to \$414 billion. Increases occurred in every major sector.

Less Government sales.

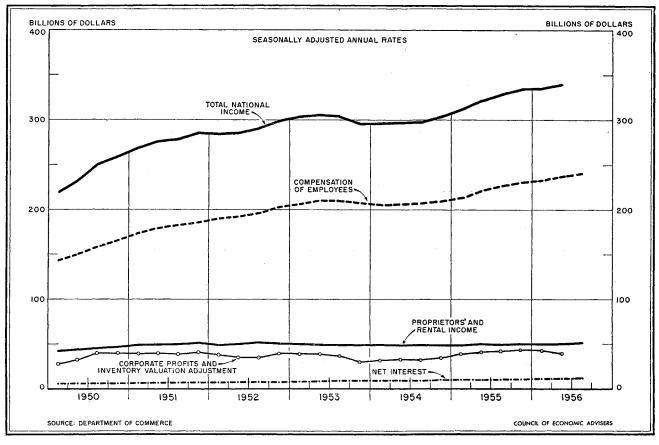

Includes expenditures for military services, international security and foreign relations (except foreign loans), development and control of atomic energy, promotion of the merchant marine, promotion of defense production and economic stabilization, and civil defense. For further details, see Economic Report of the President, January 1955 (p. 137), and National Income, 1954 Edition (p. 148). These expenditures are not comparable with the "major national security" category in The Budget of the U. S. Government for the Fiscal Year Ending June 30, 1957, and shown on p. 31 of Economic Indicators.

Income less taxes.
 Dollar estimates in current prices divided by consumer price index on a 1955 base.
 Includes armed forces overseas. Annual data as of July 1; quarterly data centered in the middle of the period, interpolated from monthly figures.

FARM INCOME

Gross farm income (seasonally adjusted annual rate) rose \$300 million from the second to the third quarter of 1956. Since farm production expenses remained unchanged, there was a corresponding rise in net farm income.

Source: Department of Agriculture (except as noted).

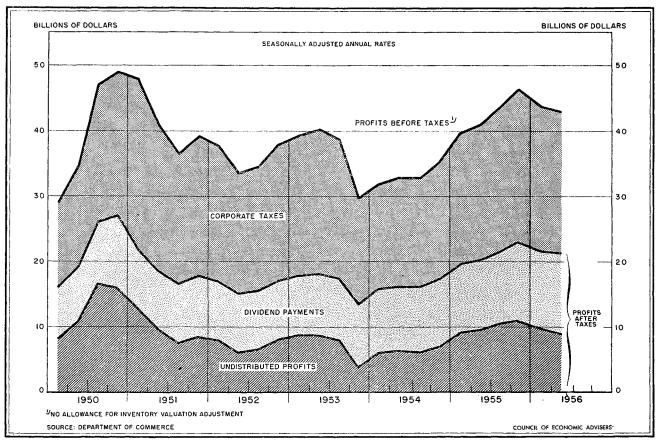

tarin indisensities, gross femal value of farm dwellings, and dovernment payments to farmers.

2 Realized gross farm income less farm production expenses. Excludes farm wages paid to workers living on farms and any income to farm people from nonfarm sources, which in 1955 amounted to 1.7 billion dollars and 6.1 billion dollars,

Data prior to 1952 differ from farm proprietors' income on pages 3 and 4 because of revisions by the Department of Agriculture not yet incorporated into the national income accounts of the Department of Commerce.
 Dollar estimates in current prices divided by the index of prices paid by farmers for items used in family living, on a 1955 base.
 The number of farms is held constant within a given year.
 Estimate by Council of Economic Advisers.

CORPORATE PROFITS

Corporate profits (seasonally adjusted) in the second quarter were below the first quarter of 1956 but appreciably above the second quarter of 1955.

EXPENDITURES FOR NEW PLANT AND EQUIPMENT

The July-August survey of business expenditures on plant and equipment indicates a continued increase in outlays through the rest of the year, bringing the expected total for 1956 to \$35.3 billion. This represents a gain of 23 percent over the 1955 total.

Sources: Securities and Exchange Commission and Department of Commerce.

Excludes agriculture.

Commercial and other includes trade, service, finance, communications, and construction.

Estimates based on anticipated capital expenditures as reported by business in late July and August 1956.

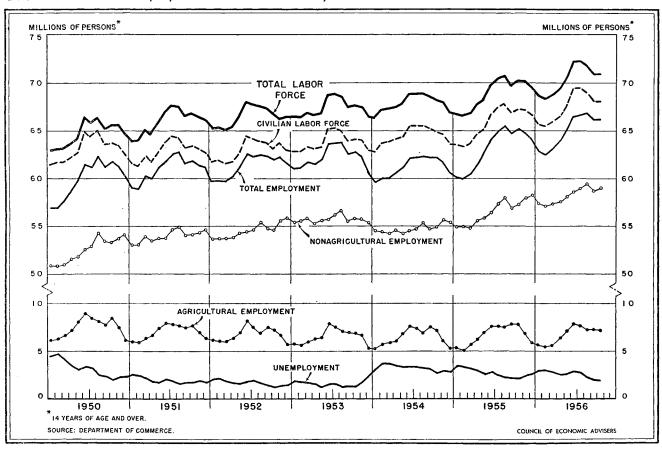

Annual total is the sum of seasonally unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures, which include adjustments, when necessary, for systematic tendencies in anticipatory data.

Note.—These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

Detail will not necessarily add to totals because of rounding.

EMPLOYMENT, UNEMPLOYMENT, AND WAGES STATUS OF THE LABOR FORCE

Unemployment declined in October. At 1.9 million or 2.8 percent of the civilian labor force, it was at its lowest for October since 1953. Employment rose about seasonally and was 1 million above October 1955.

WEEKLY INDICATORS OF PRODUCTION

As measured by various weekly indicators, production continued to increase during October. Steel production was maintained close to the peak rate reached in early October. Electric power distribution, bituminous coal mining, freight carloadings, and paperboard production also averaged higher than during September. Production of automobiles increased rapidly as model changeovers were completed.

NEW CONSTRUCTION

According to revised estimates, total construction expenditures (seasonally adjusted) declined between September and October, but were at a higher level than last year. The value of contract awards also fell.

¹ Includes U. S. Government deposits at Federal Reserve banks and commercial and savings banks, and U. S. Treasurer's time deposits, open account.

2 Includes deposits and currency held by State and local governments.

3 Includes demand deposits, other than interbank and U. S. Government, less cash items in process of collection.

4 Includes deposits in commercial banks, mutual savings banks, and Postal Savings System, but excludes interbank deposits.

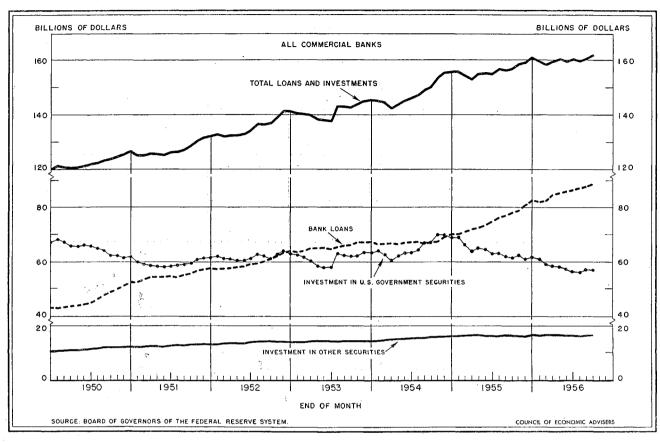

4 Prollimitary setting.

5 Preliminary estim

Note—Detail will not necessarily add to totals because of rounding.

BANK LOANS, INVESTMENTS, AND RESERVES

During September, loans of commercial banks rose \$1.0 billion, compared to a \$0.4 billion increase in August and a \$1.1 billion increase in September 1955. Member bank borrowings at Federal Reserve Banks and the average reserve deficiency of member banks (borrowings at the Federal Reserve less excess reserves) declined again in October.

¹ Member banks include, besides all national banks, those State banks that have taken membership in the Federal Reserve System.

¹ Commercial, industrial, and agricultural loans; revised series beginning January 1952 and again October 1955. Such loans by weekly reporting member banks represent approximately 70 percent of business loans by all commercial banks.

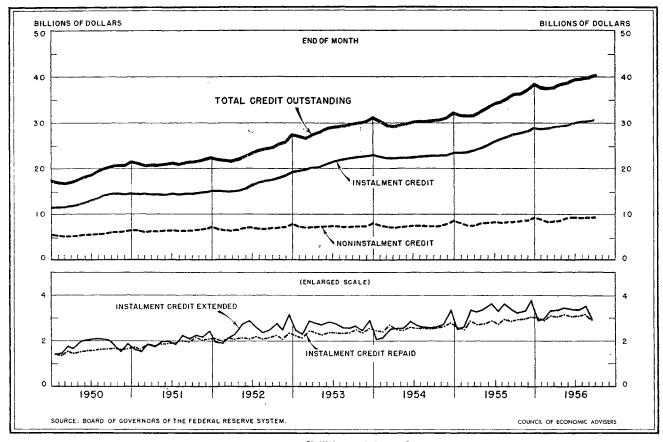

¹ Data are averages of daily figures on balances and borrowings during the period.

[·] Preliminary estimates.

NOTE.—Detail will not necessarily add to totals because of rounding.

CONSUMER CREDIT

In September, total consumer credit outstanding increased \$200 million, compared to \$400 million in August of this year and \$640 million in September of last year. All types of credit shared in the rise.

Note.—Data beginning with 1948 have been revised. See Federal Reserve Bulletin, October 1956.

BOND YIELDS AND INTEREST RATES

Yields on new Treasury bills averaged higher during October, as did yields on high grade municipal and corporate bonds. The prime commercial paper rate was increased again in early October. Yields on Federal bonds averaged about the same in October as in September.
