GROSS PRIVATE DOMESTIC INVESTMENT

Gross private domestic investment fell \$9.5 billion (seasonally adjusted annual rate) in the first quarter of 1958, according to current estimates. A reduction in inventories accounted for about two-thirds of the decline. Outlays for producers' durable equipment fell \$2.5 billion.

² Commercial and other includes trade, service, finance, communications, and construction.

³ Estimates based on anticipated capital expenditures as reported by business from late January to early March 1958.

Note.—Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures, which include adjustments, when necessary, for systematic tendencies in anticipatory data.

These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.
