¹ Cash receipts from farm marketings, value of farm products consumed in farm households, gross rental value of farm dwellings, and Government payments to farmers.

² Realized gross farm income less farm production expenses. Excludes farm wages paid to workers living on farms and any income to farm people from non-farm sources, which in 1957 amounted to \$1.8 billion and \$6.3 billion, respectively.

³ Data prior to 1946 differ from farm proprietors' income on pages 3 and 4 because of revisions by the Department of Agriculture not yet incorporated into the national income accounts of the Department of Commerce.

⁴ Dollar estimates in current prices divided by the index of prices paid by farmers for items used in family living on a 1957 base.

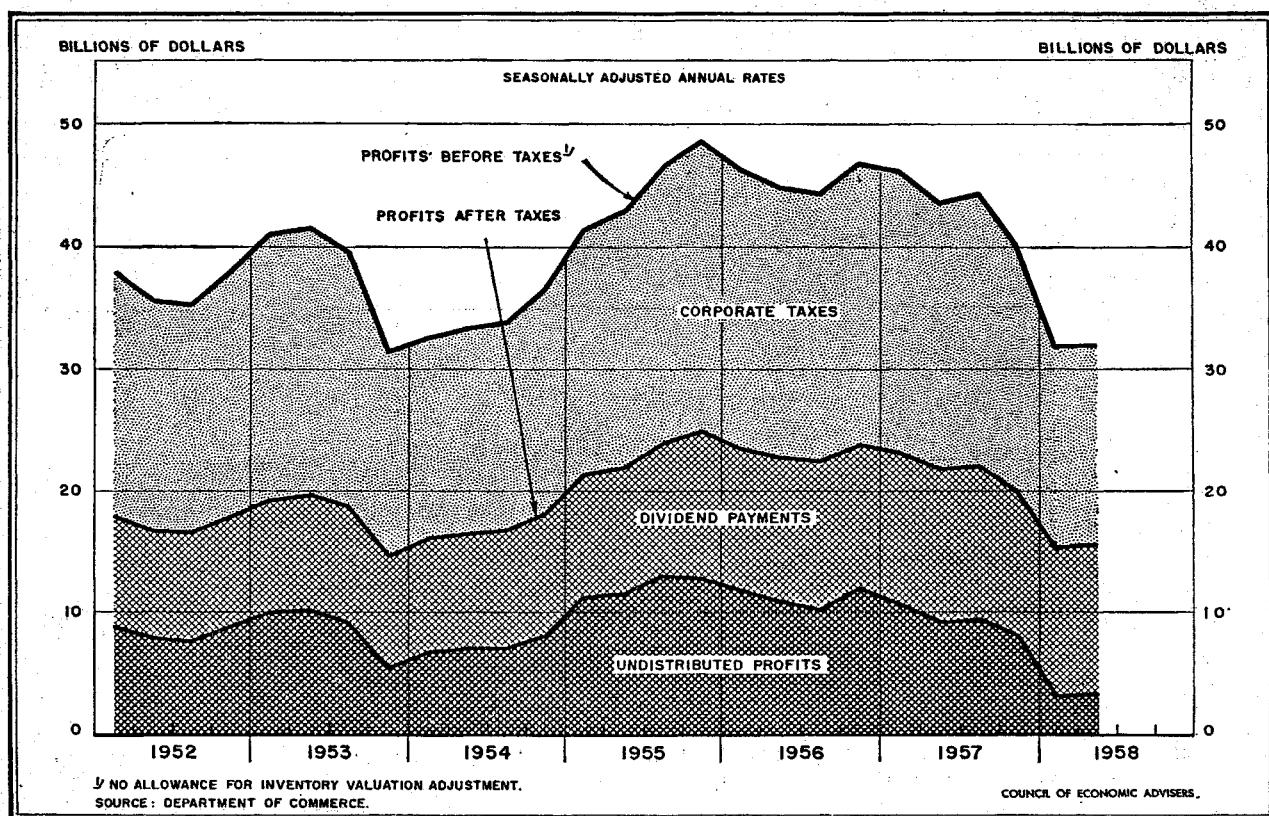

⁵ The number of farms is held constant within a given year.

EXPENDITURES FOR NEW PLANT AND EQUIPMENT

The July-August survey of business expenditures on plant and equipment indicates that anticipated capital outlays in the third quarter will be \$30.3 billion (seasonally adjusted annual rate), the same as expenditures in the second quarter. A moderate rise to \$31.0 billion in the last quarter of the year is expected.

¹ Excludes agriculture.

² Commercial and other includes trade, service, finance, communications, and construction.

³ Estimates based on anticipated capital expenditures as reported by business in late July and August 1958.

Note.—Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures, which include

adjustments, when necessary, for systematic tendencies in anticipatory data.

These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

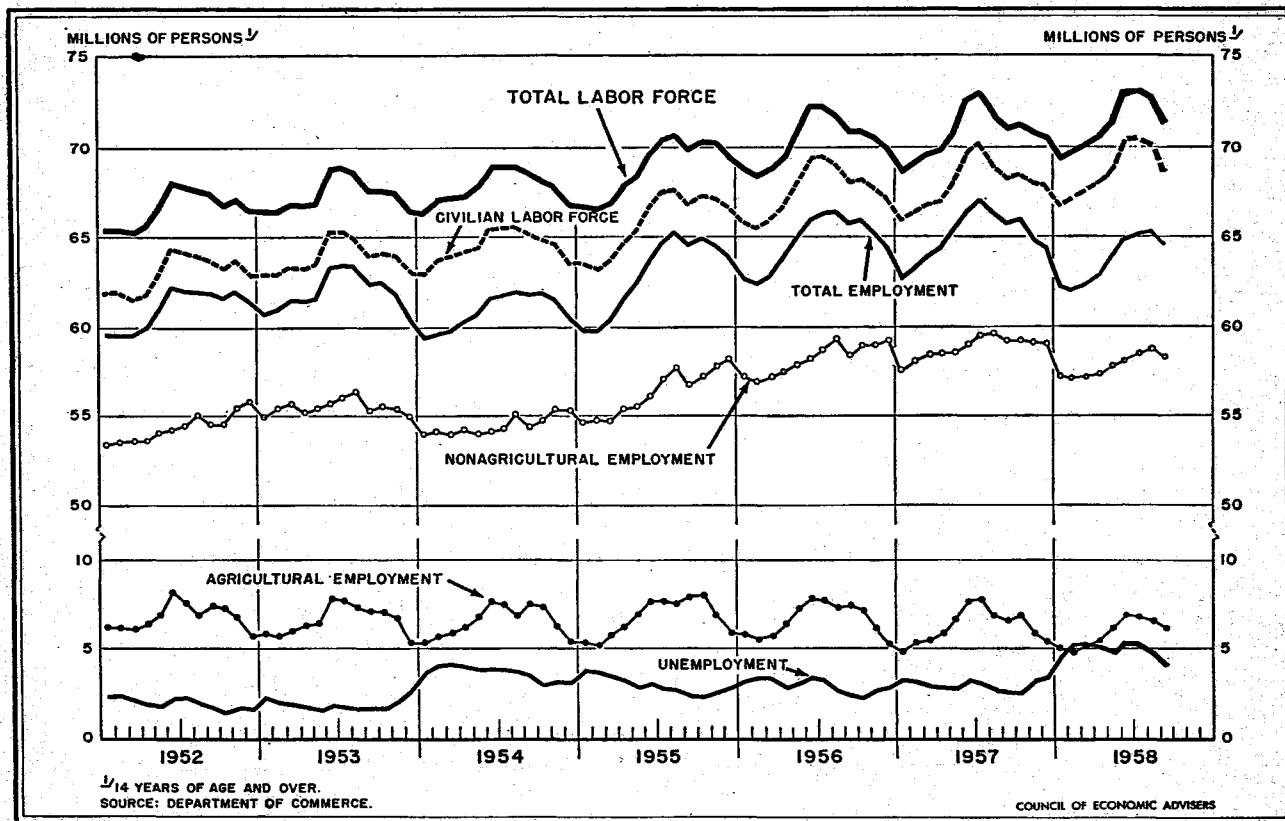

Detail will not necessarily add to totals because of rounding.
