GROSS NATIONAL PRODUCT OR EXPENDITURE

Gross national product rose in the second quarter to an annual rate of \$505 billion (seasonally adjusted), according to current estimates. Increases in personal consumption expenditures, net exports, and State and local purchases were partly offset by decreases in domestic investment and Federal purchases.

¹ Realized gross farm income less farm production expenses. Excludes farm wages paid to workers living on farms and any income to farm people from nonfarm sources, which in 1959 amounted to \$1.8 billion and \$6.8 billion, respectively.

CORPORATE PROFITS

Corporate profits before taxes in the first quarter of 1960 rose \$4.0 billion (seasonally adjusted annual rate), or about 9 percent. On an after-tax basis, the increase in earnings was almost entirely retained by corporations.

EXPENDITURES FOR NEW PLANT AND EQUIPMENT

The July-August survey of business expenditures on plant and equipment indicates a moderate rise in planned expenditures in third quarter followed by a leveling off in fourth quarter. Current anticipations for 1960 are about \$1½ billion lower than reported in the April-May survey.

¹ Excludes agriculture.

² Commercial and other includes trade, service, finance, communications, and construction.

³ Estimates based on anticipated capital expenditures as reported by business in late July and August 1960. Includes adjustments when necessary for systematic tendencies in anticipatory data.

NOTE.—Quarterly anticipated data are rounded to nearest \$100 million; beginning 1959 all other quarterly data rounded to nearest \$50 million.

Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures.

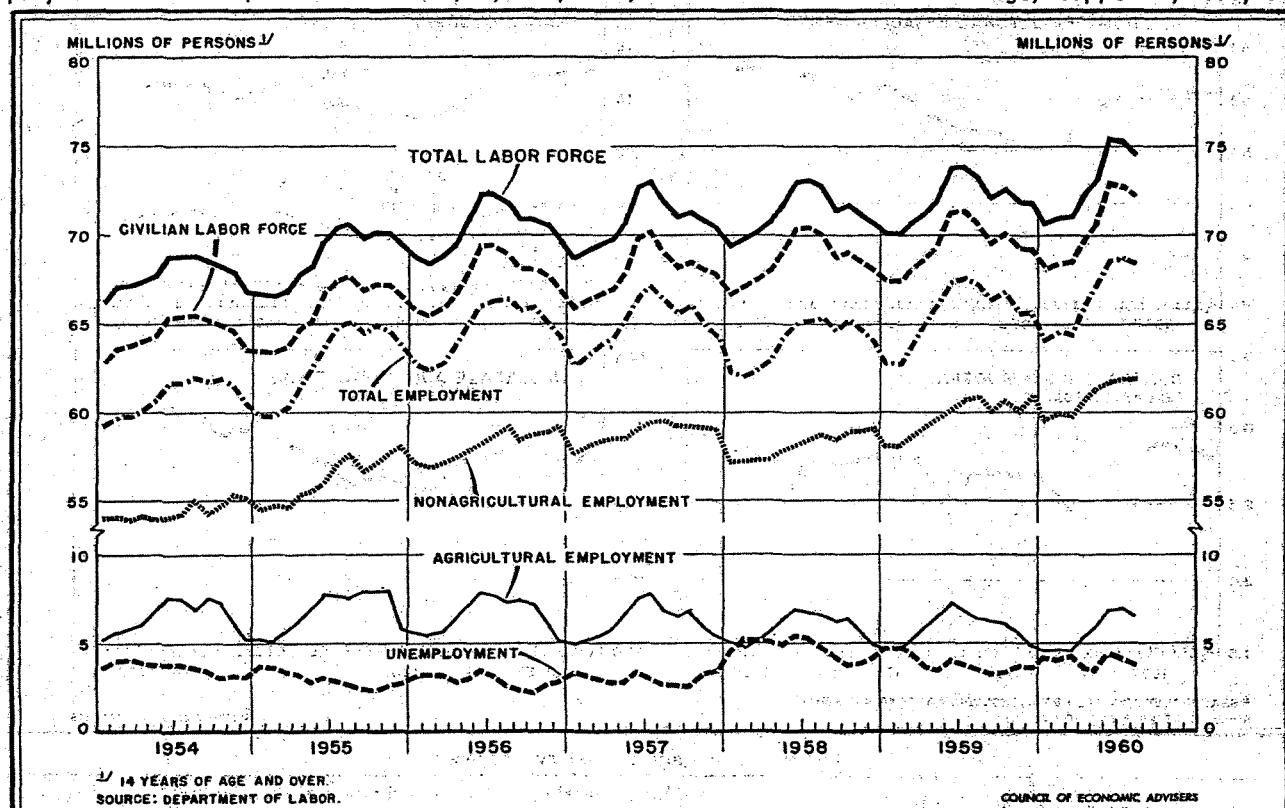

These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

SALES AND INVENTORIES—MANUFACTURING AND TRADE

Manufacturing and trade sales (seasonally adjusted) in July fell about \$900 million or about 1½ percent. Inventories were reduced after seven successive months of accumulation and manufacturing new orders declined by \$700 million. Preliminary August estimates of retail sales indicate no change from July.
