¹ Excludes agriculture.

² Commercial and other includes trade, service, finance, communications, and construction.

³ Estimates based on anticipated capital expenditures as reported by business in late February 1963. Includes adjustments when necessary for systematic tendencies in anticipatory data.

NOTE.—Beginning 1959 all quarterly data are rounded to nearest \$50 million.

Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures.

These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

TRADE SALES AND INVENTORIES

In March, retail sales were almost ½ percent above the February level, and sales of wholesalers were almost the same as in February. Retail inventories rose sharply while at the wholesale level there was a small drop. Preliminary data indicate retail sales in April dropped 1 percent and were about at the December 1962 level.
