² Prior to 1959, this category corresponds closely with budget expenditures for national defense, shown on p. 35. Beginning with 1959, they differ because of inclusion of space program expenditures in this table; these expenditures, small in 1959-61, amounted to \$1.6 billion in 1962.

SOURCES OF PERSONAL INCOME

Personal income rose \$2 3/4 billion (seasonally adjusted annual rate) in January. Two unusual factors affecting the rise were a speed-up payment of \$2 billion in veterans' life insurance dividends and a drop of \$3/4 billion in dividend payments by corporations from the extraordinarily high year-end rate.

EXPENDITURES FOR NEW PLANT AND EQUIPMENT

Plant and equipment outlays, according to the November survey, are expected to be \$400 million (seasonally adjusted annual rate) less in the fourth quarter of 1963 than anticipated in August. Plans for 1964 call for no change in the first quarter from the fourth quarter level but for an increase of \$950 million in the second quarter.

¹ Excludes agriculture.

² Commercial and other includes trade, service, finance, communications, and construction.

³ Estimates based on anticipated capital expenditures as reported by business in November 1963. Includes adjustments when necessary for systematic tendencies in anticipatory data.

NOTE.—Beginning 1959 all quarterly data are rounded to nearest \$50 million.

Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures.

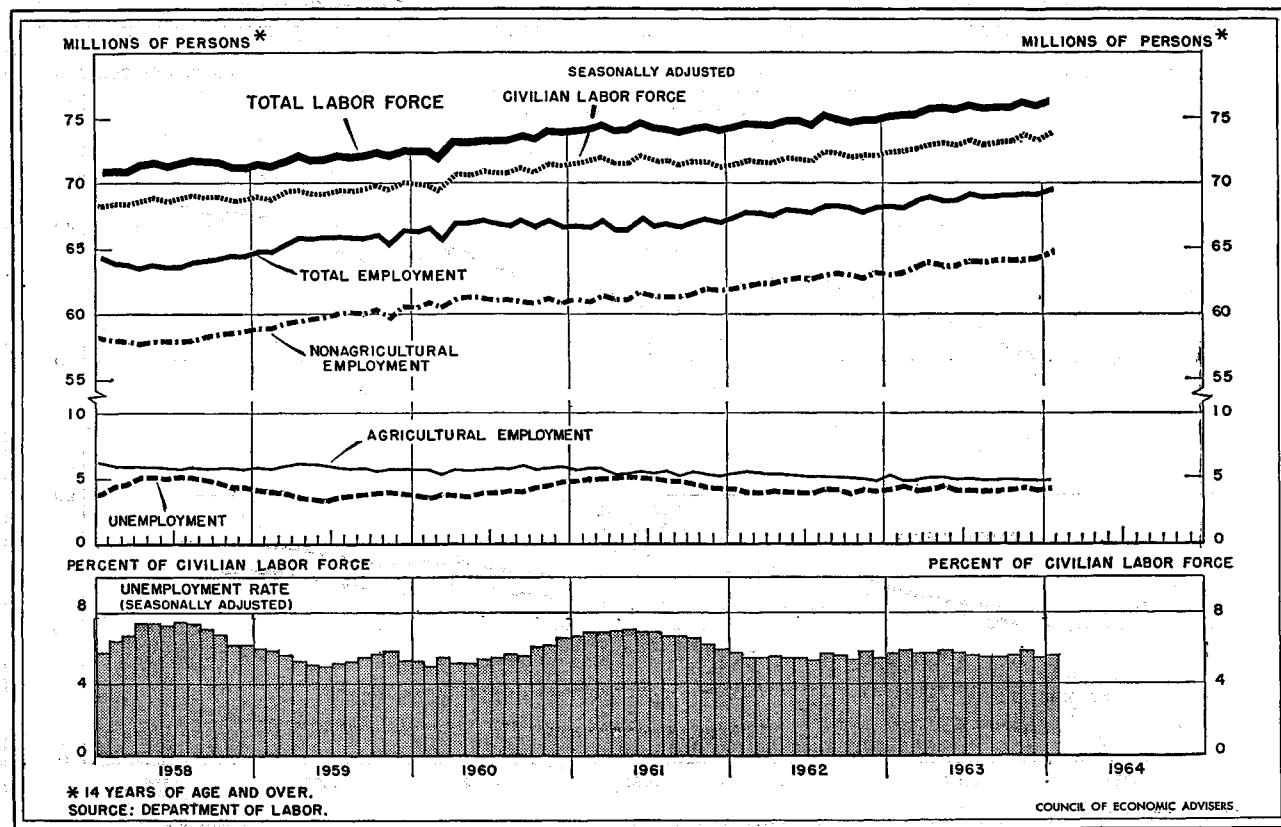

These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.
