¹ Excludes agriculture.

² Commercial and other includes trade, service, finance, communications, and construction.

³ Estimates based on anticipated capital expenditures as reported by business in late July and August 1967. Includes adjustments when necessary for systematic tendencies in anticipatory data.

NOTE.—Beginning 1969 all quarterly data are rounded to nearest \$50 million.

Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures.

These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

¹ Man-hours lost by the unemployed and those on part-time for economic reasons as a percent of total man-hours potentially available to the civilian labor force. Beginning 1963, series reflects whether unemployed persons sought full- or part-time jobs.

² Differs from total nonagricultural employment (p. 13), which includes persons with jobs but not at work for such reasons as vacation, illness, bad weather, and industrial disputes.

³ Includes persons who worked part-time because of slack work, material shortages or repairs, new job started, or job terminated.

⁴ Primarily includes persons who could find only part-time work.

PRODUCTION OF SELECTED MANUFACTURES

Production trends of major manufactures, seasonally adjusted, were mixed in October. The sharpest decline was in machinery. A further decline in motor vehicles was largely offset by an increase in aircraft. Other increases included fabricated and primary metals, instruments, textiles, and foods.
