GROSS PRIVATE DOMESTIC INVESTMENT

The \$2½ billion (seasonally adjusted annual rate) increase in gross private domestic investment in the first quarter was considerably below the \$9½ billion rise in the preceding quarter, according to preliminary estimates. A rise of \$5½ billion in business fixed investment and \$1 billion in residential construction was partially offset by a decline of \$4¼ billion in inventory accumulation.

¹ Excludes agriculture.

² Commercial and other includes trade, service, finance, communications, and construction.

³ Estimates based on anticipated capital expenditures as reported by business in late January and February 1969. Includes adjustments when necessary for systematic tendencies in anticipatory data.

NOTE.—Beginning 1959 all quarterly data are rounded to nearest \$50 million.

Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures.

These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.
