[3] Estimates based on expected capital expenditures as reported by business in late July and August 1971. Includes adjustments when necessary for systematic tendencies in expectations data.

NOTE.—Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures.

These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.
