[1] Includes all full- and part-time wage and salary workers in nonagricultural establishments who worked during or received pay for any part of the pay period which includes the 12th of the month. Excludes proprietors, self-employed persons, domestic servants, and personnel of the Armed Forces. Total derived from this table not comparable with estimates of nonagricultural employment of the civilian labor force, shown on p. 11, which include proprietors, self-employed persons, and domestic servants: which count persons as employed when they are not at work because of industrial disputes, bad weather, etc., even if they are not paid for the time off; and which are based on a sample of the working-age population, whereas the estimates in this table are based on reports from employing establishments.

[2] Includes mining, not shown separately.

NOTE.—Series revised beginning 1979 to reflect benchmark revisions; in addition, seasonally adjusted data revised beginning 1976.

U.S. INTERNATIONAL TRANSACTIONS

In the first quarter of 1981, the merchandise trade deficit declined by $1 billion to $4.6 billion as a large increase in exports, following several quarters of little change, more than offset an increase in imports associated with the strong growth of activity in the U.S. The current account registered a surplus of $3.1 billion as net investment income rose slightly to $8.9 billion.

U.S. INTERNATIONAL TRANSACTIONS—Continued

In the capital account, U.S. official reserve assets increased $4.5 billion in the first quarter, reflecting transactions on the foreign exchange markets plus an allocation of Special Drawing Rights (SDRs) by the IMF. Foreign official assets in the U.S. increased $5.4 billion, due almost entirely to an increase in OPEC holdings.
