SOURCES OF PERSONAL INCOME

Personal income rose \$40.6 billion (annual rate) in October following an increase of \$11.2 billion in September. The increases were affected by several special factors: The Loma Prieta earthquake in October and Hurricane Hugo in September reduced personal income by about \$21.0 billion (annual rate) and \$15.0 billion (annual rate), respectively. Other special factors in October were a large increase in subsidy payments to farm proprietors and bonus payments to employees in the motor vehicle industry. Excluding the impact of the special factors, personal income rose about \$33.0 billion in October, and about \$26.0 billion in September.

¹ Includes all full- and part-time wage and salary workers in nonagricultural establishments who received pay for any part of the pay period which includes the 12th of the month. Excludes proprietors, self-employed persons, domestic servants, and personnel of the Armed Forces. Total derived from this table not comparable with estimates of nonagricultural employment of the civilian labor force, shown on p. 11, which include proprietors, self-employed persons, and domestic servants; which count persons as employed when they are not at work because of industrial disputes, bad

weather, etc., even if they are not paid for the time off; and which are based on a sample of the working-age population, whereas the estimates in this table are based on reports from employing establishments.

² Includes mining, not shown separately.

¹ Data are prorated averages of Wednesday figures for domestically chartered banks and averages of month-end data for foreign-related institutions. Data beginning January 1984 are not strictly comparable with data for earlier periods, largely because beginning January 1984 certain obligations of States and political subdivisions are included in loans rather than in other securities.

² Excludes loans to commercial banks in the United States.
