# SOURCES OF PERSONAL INCOME

**Personal income rose $40.6 billion (annual rate) in February following an increase of $31.2 billion in January. The increases were affected by several special factors. Subsidy payments to farm proprietors raised the February change and lowered the January change. A pay raise for Federal Government employees raised the changes in both months. The January change was also boosted by cost-of-living adjustments to several transfer payment programs and was lowered by an increase in personal contributions for social insurance. Excluding these special factors, personal income increased $33.8 billion in February and $18.8 billion in January.**

[1] Includes all full- and part-time wage and salary workers in nonagricultural establishments who received pay for any part of the pay period which includes the 12th of the month. Excludes proprietors, self-employed persons, domestic servants, and personnel of the Armed Forces. Total derived from this table not comparable with estimates of nonagricultural employment of the civilian labor force, shown on p. 11, which include proprietors, self-employed persons, and domestic servants; which count persons as employed when they are not at work because of industrial disputes, bad weather, etc., even if they are not paid for the time off; and which are based on a sample of the working-age population, whereas the estimates in this table are based on reports from employing establishments.

[2] Includes mining, not shown separately.

[1] Output refers to gross domestic product originating in the sector in 1982 dollars.

[2] Hours of all persons engaged in the sector, including hours of proprietors and unpaid family workers. Estimates based primarily on establishment data.

[3] Wages and salaries of employees plus employers' contributions for social insurance and private benefit plans. Also includes an estimate of wages, salaries, and supplemental payments for the self-employed.

[4] Hourly compensation divided by the consumer price index for all urban consumers.

[5] Current dollar gross domestic product divided by constant dollar gross domestic product.

NOTE.—Data relate to all persons engaged in the sector.

Percent changes are from preceding period and are based on original data; they therefore may differ slightly from percent changes based on indexes shown here.

Beginning with data released August 3, 1989, hours of labor input are defined as hours at the work site rather than hours paid.

* Data do not reflect GNP revisions of March 28, 1990.

[1] Data are prorated averages of Wednesday figures for domestically chartered banks and averages of month-end data for foreign-related institutions. Data beginning January 1984 are not strictly comparable with data for earlier periods, largely because beginning January 1984 certain obligations of States and political subdivisions are included in loans rather than in other securities.

[2] Excludes loans to commercial banks in the United States.

NOTE.—Series revised. Data prior to March 1989 are not yet available.

[1] Includes Department of Defense Military Assistance Program grant-aid shipments.
[2] Includes undocumented exports to Canada through 1989.
[3] Total arrivals of imported goods other than intransit shipments.
[4] Total includes revisions not reflected in detail.
[5] Total exports are on a revised statistical month basis; end-use categories are on a statistical month basis.

** Beginning 1990, undocumented exports to Canada and reexports are distributed to the appropriate end-use category. For earlier periods they are included in the "other" export category. Therefore, the categories beginning 1990 are not directly comparable with those for earlier periods. The 1989 figures for undocumented exports ($16 billion) and for reexports ($14.3 billion) will be distributed to the appropriate end-use categories later this year.

NOTE.—Seasonally adjusted data revised beginning 1988. See also footnote **.
Data shown include trade of the U.S. Virgin Islands.
