¹ Output is measured by gross domestic product of nonfinancial corporate business in 1987 dollars.

² This is equal to the deflator for gross domestic product of nonfinancial corporate business with the decimal point shifted two places to the left.

³ Indirect business tax and nontax liability plus business transfer payments less subsidies.

⁴ With inventory valuation and capital consumption adjustments.

SOURCES OF PERSONAL INCOME

Personal income rose \$49.2 billion (annual rate) in December after falling \$7.6 billion in November. The changes were affected by a number of special factors. The December increase reflected increases in farm subsidy payments and in unemployment insurance benefit payments, and December bonus payments to employees in the motor vehicle industry. The November decrease reflected a decrease in farm subsidy payments, October bonus payments to employees in the motor vehicle industry, and October restitution payments to Japanese-Americans; these factors were partly offset by uninsured losses resulting from the fire in Oakland, California, which reduced October personal income. Excluding these special factors, personal income increased \$23.0 billion in December and \$11.6 billion in November.

¹ The total of wage and salary disbursements and other labor income differs from compensation of employees (see p. 4) in that it excludes employer contributions for social insurance and the excess of wage accruals over wage disbursements.

² Consists primarily of employer contributions to private pension and private welfare funds.

³ With inventory valuation and capital consumption adjustments.

⁴ With capital consumption adjustment.

⁵ Consists mainly of social insurance benefits, direct relief, and veterans payments.

⁶ Personal income exclusive of farm proprietors' income, farm wages, farm other labor income, and agricultural net interest.

¹ Includes all full- and part-time wage and salary workers in nonagricultural establishments who received pay for any part of the pay period which includes the 12th of the month. Excludes proprietors, self-employed persons, domestic servants, and personnel of the Armed Forces. Total derived from this table not comparable with estimates of nonagricultural employment of the civilian labor force, shown on p. 11, which include proprietors, self-employed persons, and domestic servants; which count persons as employed when they are not at work because of industrial disputes, bad

weather, etc., even if they are not paid for the time off; and which are based on a sample of the working-age population, whereas the estimates in this table are based on reports from employing establishments.

² Includes mining, not shown separately.

¹ Output refers to gross domestic product originating in the sector in 1987 dollars.

² Hours of all persons engaged in the sector, including hours of proprietors and unpaid family workers. Estimates based primarily on establishment data.

³ Wages and salaries of employees plus employers' contributions for social insurance and private benefit plans. Also includes an estimate of wages, salaries, and supplemental payments for the self-employed.

⁴ Hourly compensation divided by the consumer price index for all urban consumers.

⁵ Current dollar gross domestic product divided by constant dollar gross domestic product.

NOTE.—Data relate to all persons engaged in the sector.

Percent changes are from preceding period and are based on original data; they therefore may

differ slightly from percent changes based on indexes shown here.

Data reflect the recent comprehensive (benchmark) revision of the national income and product accounts by the Department of Commerce, Bureau of Economic Analysis (BEA). BEA data for output and compensation for the first three quarters of 1991 incorporate benchmarking to unemployment insurance (UI) records. However, the detailed UI information needed by the Bureau of Labor Statistics to measure employment and hours for 1990 and 1991 is not yet available. Therefore, movements in measures based on hours of labor input should be interpreted with caution for 1990 and 1991.

¹ Data are prorated averages of Wednesday figures for domestically chartered banks and averages of month-end data for foreign-related institutions. Data beginning January 1984 are not strictly comparable with data for earlier periods, largely because beginning January 1984 certain obligations of States and political subdivisions are included in loans rather than in other securities.

² Excludes loans to commercial banks in the United States.

U.S. INTERNATIONAL TRANSACTIONS

There was a current account deficit of \$10.5 billion in the third quarter of 1991, compared with a surplus of \$3.0 billion in the second quarter. The merchandise trade deficit increased and net unilateral transfers shifted from inflows to outflows, as cash contributions from coalition partners in Operation Desert Storm decreased and grants forgiving outstanding debt were provided to several countries, including Poland.
