## SOURCES OF PERSONAL INCOME

Personal income rose \$48.8 billion (annual rate) in January, following an increase of \$35.4 billion in December. Wages and salaries increased \$35.3 billion in January, following an increase of \$8.1 billion in December. Personal income in January was affected by several special factors. It was boosted by cost-of-living adjustments to Federal transfer programs and by pay raises for Federal civilian and military personnel. It was reduced by changes in personal social insurance contributions, by Federal farm subsidy payments, and by lump-sum social security payments that had boosted personal income in December. Excluding special factors, personal income increased \$40.6 billion in January and \$25.8 billion in December.

<sup>1</sup> Includes all full- and part-time wage and salary workers in nonagricultural establishments who received pay for any part of the pay period which includes the 12th of the month. Excludes proprietors, self-employed persons, domestic servants, and personnel of the Armed Forces. Total in this table not comparable with estimates of nonagricultural employment of the civilian labor force, shown on p. 11, which include proprietors, self-employed persons, and domestic servants; which count persons as employed when they are not at work because of industrial disputes, bad weather, etc., even if they are not paid for the time off; and which are based on a sample

of the working-age population, whereas the estimates in this table are based on reports from employing establishments. In the series shown here, persons who work at more than one job are counted each time they appear on a payroll, in contrast to the series shown on p. 11, where persons are counted only once—as employed, unemployed, or not in the labor force.

<sup>2</sup> Includes mining, not shown separately.

<sup>1</sup> Output refers to real gross domestic product originating in the sector.

<sup>2</sup> Hours of all persons engage in the sector, including hours of proprietors and unpaid family workers. Estimates based primarily on establishment data.

<sup>3</sup> Wages and salaries of employees plus employers' contributions for social insurance and private benefit plans. Also includes an estimate of wages, salaries, and supplemental payments for the self-employed.

<sup>4</sup> Hourly compensation divided by the consumer price index for all urban consumers (CPI-U) for recent quarters. The trend from 1978-99 is based on the consumer price index research series (CPI-U-RS). Data for 2000 revised to reflect annual CPI-U revisions released February

21, 2001.

<sup>5</sup> Current dollar gross domestic output divided by the output index.

NOTE.—Data relate to all persons engaged in the sector.

Percent changes are from preceding period and are based on original data; they therefore may differ slightly from percent changes based on indexes shown here.
