¹ Data from the establishment survey. Includes all full- and part-time wage and salary workers in nonagricultural establishments who received pay for any part of the pay period that includes the 12th of the month. Excludes proprietors, self-employed persons, unpaid family workers, and private household workers. Data from the household survey shown on p. 11 include those workers and also count persons as employed when they are not at work because of industrial disputes, bad weather, etc., even if they are not paid for the time off. In the series shown here, persons who work at more than one job are counted each time they appear on a payroll, in contrast to the series shown on p. 11 where persons are counted only once—as employed, unemployed, or not in the labor force. See *Employment and Earnings* for details.

² Includes natural resources and mining, not shown separately.

³ Includes wholesale trade, transportation and warehousing, and utilities, not shown separately.

NOTE.—Data classified by industry based on the 2007 North American Industry Classification System (NAICS). For details see *Employment and Earnings*.

NOTE.—The employment cost index is a measure of the change in the cost of labor, free from the influence of employment shifts among occupations and industries.

Data exclude farm and household workers.

Data beginning 2001 are based on the 2002 North American Industry Classification (NAICS); data prior to 2001 are based on the Standard Industrial Classification (SIC). For details on industry classification and other details see *Employment Cost Index*, release dated April 28, 2006.
