SPECIAL CHART SERIES...

A series of charts on manufacturing employment, by region, showing trends from 1952 through April 1958, begins on page 111.

NEXT MONTH...

The Annual Supplement Issue of Employment and Earnings will contain revised national employment, hours, and earnings data. The revised series are based on first quarter 1957 benchmark levels.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. Subscription price: \$3.50 a year; \$1 additional for foreign mailing. Single copies vary in price. This issue is 40 cents.

REGIONAL TRENDS IN MANUFACTURING EMPLOYMENT

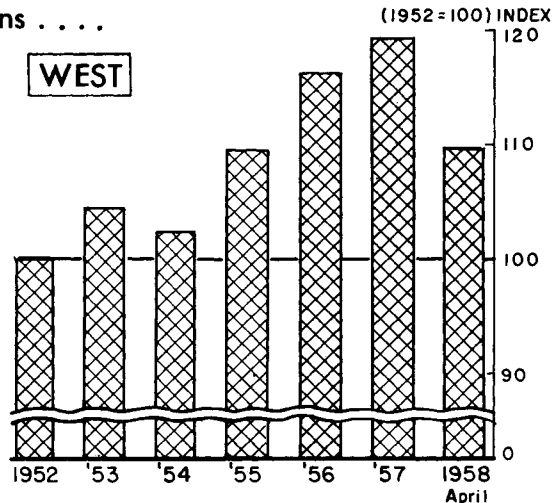

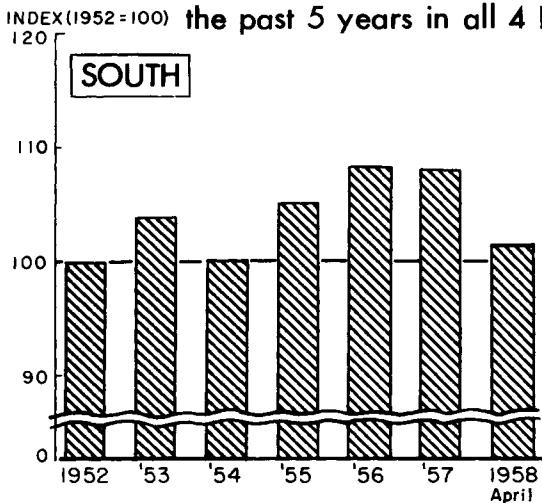

UNITED STATES DEPARTMENT OF LABOR
BUREAU OF LABOR STATISTICS

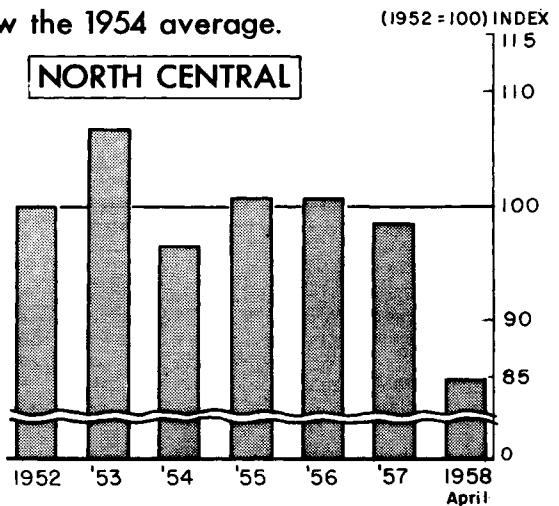

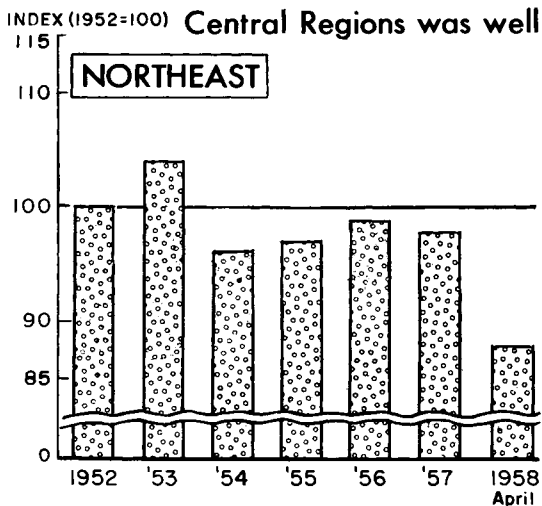

UNITED STATES DEPARTMENT OF LABOR
BUREAU OF LABOR STATISTICS

* APRIL 1958 PRELIMINARY

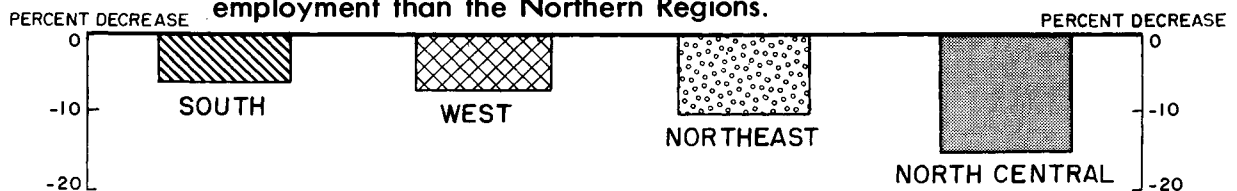

In spite of the recent decline, the number of factory jobs in the Southern and Western States was, in April 1958, still above the average level of 1954, uniformly the lowest of the past 5 years in all 4 Regions

but factory employment in the Northeastern and North Central Regions was well below the 1954 average.

The South and West also experienced smaller over-the-year (April 1957 to April 1958) decreases in manufacturing employment than the Northern Regions.

Employment Highlights

MAY 1958

Total nonagricultural employment rose by 260,000 to 50.5 million from April to May 1958, the first better-than-seasonal rise since last August. Employment in manufacturing, where the major part of the drop since last August has occurred, declined only slightly more than is usual for this month. Most of the job increase in May occurred in contract construction, where employment rose more than seasonally for the third successive month.

The factory workweek moved up seasonally by 0.2 hours to 38.5 hours, while hourly earnings remained steady at \$2.11. Weekly earnings rose slightly to \$81.24 as a result of the longer workweek.

Nonmanufacturing Jobs Rise

In contract construction, employment continued to expand in both building and in highway and street construction. Other nonmanufacturing industries expanded seasonally, except for mining and transportation, where small losses were reported.

Job Decline in Manufacturing is Small

Employment in manufacturing declined by 67,000 over the month to 15.0 million. Most of the drop, 44,000, occurred in durable-goods manufacturing; this was only slightly more than is usual for the month.

Weakness continued in the machinery industry, particularly among producers of construction and industrial machinery. Fabricated metals also showed a slight drop, especially in metal stampings. Although employment in steel mills was steady over the month, other sectors of the primary

metals industry showed slight declines. Automobile employment in the midweek of May remained about at the April level, following several months of sharp declines. In the soft-goods industries, employment changes were mainly seasonal.

Nonfarm Employment Down 2 Million Over Year

Total nonagricultural employment this month was 2 million under May of a year ago, with most of the loss--1.7 million--in manufacturing. Virtually every manufacturing industry has shown an employment loss over the year. More than four-fifths of the drop in factory employment was centered in durable-goods industries, primarily in metals, machinery, automobiles, and aircraft.

Outside of manufacturing, over-the-year declines in employment also occurred in transportation (down 250,000), construction and trade (down 130,000 each), and mining (down 90,000). However, over-the-year gains were reported by State and local government (up 260,000), service (up 100,000), and finance (up 35,000).

Workweek Up 0.2 Hours

Average weekly hours of work in manufacturing rose by 0.2 in May to 38.5 hours. At the same time, overtime work increased by 0.1 hours to 1.6 hours.

As compared with a year ago, the workweek was down by 1.2 hours. Half of this decline--0.6 hours--occurred in overtime hours paid for at premium rates.

Average hourly earnings remained at \$2.11 over the month. Weekly earnings rose by 43 cents to \$81.24 because of the slight increase in the workweek.

NOTE: Data for the current month are preliminary.

1/ Not available.

2/ Data relate to employees in such occupations in the telephone industry as switchboard operators; service assistants; operating room instructors; and pay-station attendants. In 1957, such employees made up 39 percent of the total number of nonsupervisory employees in establishments reporting hours and earnings data.

3/ Data relate to employees in such occupations in the telephone industry as central office craftsmen; installation and exchange repair craftsmen; line, cable, and conduit craftsmen; and laborers. In 1957, such employees made up 29 percent of the total number of nonsupervisory employees in establishments reporting hours and earnings data.

4/ Data relate to domestic nonsupervisory employees except messengers.

5/ Money payments only; additional value of board, room, uniforms, and tips, not included.

* Formerly titled "Automobiles." Data not affected.

1/ Derived by assuming that the overtime hours shown in table C-2 are paid at the rate of time and one-half.

2/ Average hourly earnings, excluding overtime, are not available separately for the printing, publishing, and allied industries group, as graduated overtime rates are found to an extent likely to make average overtime pay significantly above time and one-half. Inclusion of data for the group in the nondurable-goods total has little effect.
