| Buttons | 10.1 | 10.1 | 10.5 | 12.3 |

/ Estimates for the major industry groups (titles of which have been capitalized), have been edjusted to final data for 1941 and preliminary data for the second quarter of 1942 made available by the Bureau of Employment Security of the Federal Security Agency, and are not comparable with data in mimeographed releases for months prior to January 1943 and in issues of the Monthly Labor Review prior to March 1943. Comparable series for earlier months are available upon request. Estimates for individual industries have been adjusted to levels indicated by the 1939 Census of Manufactures, but not to Federal Security Agency data. For this reason, together with the fact that this Bureau has not prepared estimates for certain industries, and does not publish wage earners in war industries, the sum of the individual industry estimates will not agree with totals shown for the major industry groups.

Unpublished information concerning the following war industries may be obtained by authorized agencies upon request: Aircraft engines; aircraft and parts, excluding engines; alloying; aluminum manufactures; ammition; cars, electricand steam-railroad; comminication equipment; electrical equipment; engines and turbines; explosives and safety fuses; fire extinguishers; firearms; fireworks; locomotives; machine-tool accessories; optical instruments and ophthalmic goods; professional and scientific instruments and fire control equipment; radios and phonographs; and shipbuilding.

3/ Revisions have been made as follows in the data published for earlier months: Corsets and allied garments - May 1943 wnge earners to 16.7.

Table 2. - Indexes of Wage-Earner Employment and of Wage-Enrner Pay Roll in Manufacturing Industries I/ - Continued

1/ Indexes for the major industry groups (titles of which have been eapitalized), have been adjusted to final data for 1941 and preliminary data for the second quarter of 1942 made available by the Bureau of Employnent Security of the Federal Security Agency, and are not comparablé with data in mimoographed releases for months prior to January 1943 and in issucs of the Monthly Lebor Review prior to March 1943. Comperable series for earlier months are available upon request. Indexes for individual industries have been adjusted to levels indicated by the 1939 Census of danufactures, but not to Federal Security Agency data.

Unpublished information concerning the following war industries may be obtained by authorized agencies upon request: Aircraft engines; aircraft and parts, excluding engines; alloying; aluminum manfactures; ammition; cars, electricand steam-railroad; communication equipment; electrical equipment; engines and turbines; explosives and safety fuses; fire extinguishers; firearms; fireworks; locomotives; machine tool accessories; optical instruments and ophthelriic goods; professional and scientific instruments and fire control equipment; radios and phonographs; and shipbuilding.

3/: Revisions have been made as follows in the data published for earlier months: Malleable-iron castings - May 1943 employment and pay-roll indexes to 149.1 and 275.8.

Corsets and allied garments - May 1943 employnent index to 88.8. Nay, June, and July l9a3 pay-roll indexes to $139.5,137.5$, and 130.3 .
