# EMPLOYMENT and PAY ROLLS

DETAILED REPORT NOVEMBER 1948

United States Department of Labor Bureau of Labor Statistics Prepared by

Division of Employment and Occupational Outlook

Branch of Employment Statistics

Samuel Weiss. Chief

### EMPLOYMENT AND PAY ROLLS

## Detailed Report

November 1948

TABLE	CONTENTS	PAGE
1.	Estimated Number of Wage and Salary Workers in Nonagricultural Establishments, by Industry Division	. 2
2.	Estimated Number of Wage and Salary Workers in Manufacturing Industries, by Major Industry Group	
3.	Estimated Number of Wage and Salary Workers in Selected Nommanufacturing Industries, by Major Industry Group	_
4.	Federal Civilian Employment and Pay Rolls in All Areas and in Continental United States, and Total Civilian Government Employment and Pay Rolls in Washington, D. C	t
5•	Personnel and Pay of the Military Branch of the Federal Government.	. 6
6.	Estimated Number of Wage and Salary Workers in Nonagricultural Establishments for Selected States, October 1948	. 7
7.	Estimated Number of Wage and Salary Workers in Manufacturing Industries, by State, October 1948	3
8.	Estimated Number of Production Workers in Manufacturing Industries	. 10
9.	Estimated Number of Employees in Selected Nomanufacturing Industries	. 16
10.	Indexes of Production-Worker Employment and Weekly Pay Rolls in Manufacturing Industries	B
11.	Indexes of Employment and Weekly Fay Rolls in Selected Wennanufacturing Industries	
	Explanatory Notes	. i

Data for the 2 most recent months
shown are subject to revision

\* \* \* \* \* \* \* \* \* \* \*

Explanatory notes outlining briefly the
concepts, methodology, and sources used
in preparing data for this report appear
in the appendix. See pages 1 - ix.

2.
TABLE 1: Estimated Number of Wage and Salary Workers in Nonagricultural Establishments, by Industry Division

Industry division		1948	1947		
Thousary division	November	October	September	November	October
TOTAL	45,741	45,890	45,889	44,918	44,758
Manufacturing	16,449	16,598	16,697	16,256	16,209
Mining	940	941	948	923	922
Contract construction	2,161	2,206	2,239	2,046	2,099
Transportation and public utilities	4,066	4,090	4,092	4,077	4,097
Trade	10,035	9,889	9,733	9,886	9,684
Finance	1,720	1,723	1,732	1,673	1,671
Service	4,656	4,654	4,647	4,670	4,662
Government	5,714	5,789	5,801	5,387	5,414

TABLE 2: Estimated Number of Wage and Salary Workers in Manufacturing Industries, by
Major Industry Group

Major industry group		1948	1947		
reajor madery group	November	200000	September	November	October
ALL MANUFACTURING	16,449	16,598	16,697	16,256	16,209
DURABLE GOODS	8,301	8,319	8,294	8,194	8,126
Iron and steel and their products Electrical machinery Machinery, except electrical Transportation equipment, except	1,952 736 1,560	1,955 731 1,569	1,945 725 1,569	1,908 772 1,569	1,896 763 1,565

See explanatory notes, sections C, D, and G, and the glossary for definitions.

1/ Estimates for the individual industries comprising the major industry groups have been adjusted to levels indicated by Federal Security Agency data through 1946 and have been carried forward from 1946 bench-mark levels, thereby providing consistent series. Comparable data from January 1939 are available upon request to the Bureau of Labor Statistics. Such requests should specify the series desired.

More recently adjusted data for the individual industries comprising the major industry groups listed below supersede data shown in publications dated prior to:

Major industry group :	Mineographed	release:	Monthly Labor Review
Iron and steel and their products Stone, clay, and glass products	December December		January 1949 January 1949

<sup>2/</sup> Data for earlier months in 1948 have been revised as follows:
Confectionery - June through August to 64.5, 63.0, and 71.6.
Optical instruments and ophthalmic goods - August to 26.0.

3/ Includes all nonsupervisory employees and working supervisors.
4/ Money payments only; additional value of board, room, uniforms, and tips, not included.

### EXPLANATIONY NOTES

- Sec. A. Scope of Employment Revisions The employment estimates shown in this report for the industry divisions (e.g., manufacturing, mining, etc.) and industry groups (e.g., iron and steel, electrical machinery, etc.) have been adjusted to levels indicated by Federal Security Agency data through 1946 and have been carried forward from 1946 bench-mark levels, thereby providing consistent series.
- Sec. B. Sources of Bench-Mark Data In preparing estimates for private employment prior to 1939, the various industrial censuses taken by the Bureau of the Census were used as sources of bench-mark data. Data obtained from the Federal Security Agency are the main bases for 1946 bench marks. Bench marks for State and local government are based on data compiled by the Bureau of the Census, while most of the data on Federal Government employment is made available by the U. S. Civil Service Commission. The Interstate Commerce Commission is the source for railroads, and the U. S. Maritime Commission for water transportation.
- Sec. C. Revisions of Production-Worker Estimates Data for the manufacturing major industry groups have been adjusted to levels indicated by Federal Security Agency data through 1946 and have been carried forward from 1946 bench-mark levels, thereby providing consistent series. Estimates for the individual manufacturing industries, formerly adjusted to data through 1945, are now being adjusted to 1946 bench-mark levels. As these revisions are completed, they are published in this report and indicated by appropriate footnotes. In the nonmanufacturing industries, the entire series of mining industries have been adjusted to 1946 bench-mark levels.

Since the data shown in this report cover only the current months, a set of summary sheets for each industry presenting comparable figures from January 1939 to date, by months, will be provided upon request to the Bureau of Labor Statistics. Such requests should specify the series desired.

Sec. D. How Employment Estimates Are Made - Estimates of changes in the level of employment are based on reports from a sample group of establishments, inasmuch as full coverage is prohibitively costly and time-consuming. In using a sample, it is essential that an accurate base be established from which estimates may be carried forward. This base or "bench mark" is either a complete count or an estimate with a satisfactory degree of accuracy.

When a new bench mark becomes available, estimates prepared since the last bench mark are reviewed to determine if any adjustment of level is required. This is the basic principle of employment estimating used by the BLS. It yields a satisfactory compromise between a slow but highly accurate complete count on the one hand, and a rapid but less accurate sample count on the other.

Briefly, the Bureau of Labor Statistics computes employment estimates as follows: first, a bench mark or level of employment is determined; second, a sample of establishments is selected; and third, changes in employment indicated by this reporting sample are applied to the bench mark to determine the monthly estimates of employment between bench-mark periods. For example, if the latest complete data on employment for an industry were 40,200 in September 1945, and if the industry has a reporting sample of 13 establishments employing 23,200 workers in September and 23,800 in October, the October estimates would be prepared as follows:

$$40,200 \times \frac{23,800}{23,200} = 41,240$$

In general, then, the month-to-month changes in employment reflect the fluctuations shown by establishments reporting to the Bureau of Labor Statistics.

Why Revisions Are Necessary - Because reports are not immediately available from new firms, they are frequently introduced into the BLS sample after they have been in operation for some time. This lapse of time produces a rather consistent understatement which becomes larger from year to year. It is important, therefore, that estimates not be allowed to go uncorrected for too long a period. The most recent revisions correct for the downward bias that had accumulated in the nonmanufacturing series beginning January 1945 and in the manufacturing series beginning January 1946. Revisions in some industry divisions were made in order to incorporate greater refinements in methodology and new source materials that have become available.

Sec. E. Comparability With Other Types of Employment Data - The Bureau of Labor Statistics employment estimates are based upon reports submitted by cooperating establishments and therefore differ from employment information obtained by household interviews, such as the Monthly Report of the Labor Force. The BLS estimates of employment in nonagricultural establishments differ from the Monthly Report of the Labor Force total nonagricultural employment estimates in several important respects.

For example: (1) The BLS estimates cover all full- and part-time wage and salary workers in private nonegricultural establishments who worked or received pay during the pay period ending nearest the 15th of the month; in Federal establishments during the pay period ending just before the first of the month; and in State and local government during the pay period ending on or just before the last of the month. Persons who worked in more than one establishment during the reporting period would be counted more than once; (2) Proprietors, self-employed persons, domestic servants, and unpaid family workers are excluded.

Sec. F. Pay-Roll Indexes - Cooperating establishments are instructed to report pay rolls of production or nonsupervisory workers prior to deduction for old age and unemployment insurance, withholding taxes, bonds, and union dues. Pay for sick leave, holidays, and vacations taken is included. Respondents are instructed to exclude pay for vacations not taken as well as cash estimates of any payments in kind. Bonuses, unless earned and paid regularly each pay period, are also excluded.

The methodology for obtaining pay-roll estimates is similar to that for employment estimates. Sample changes showing monthly movements are used in projecting established bench marks to secure current pay-roll estimates. These pay-roll estimates are converted into indexes, using the 1939 average as a base.

Sec. G. Source of Data - Employment and pay-roll estimates are based on reports from cooperating establishments. The approximate number of establishments, and workers covered, for each industry division is as follows:

Approximate Coverage of BLS Employment and Pay-Roll Sample

Industry division	: Number : Employees or production : of estab- : workers		
	: lishments	: Number	: Percent of total
Manufacturing	34,300	7,542,000	56
Mining	2,700	407,00 <b>0</b> 480,000	52 ~
Contract construction Public utilities	12,700 <b>7,</b> 500	933,000	22 78
Trade:			
Wholesale	12,800	360,000	20
Retail Service:	37,900	1,097,000	2 <b>5</b>
Hotels (year-round) Power laundries and	1,200	131,000	<b>3</b> 5
cleaning and dyeing	1,600	67,000	21

Sec. H. Coverage of Employment Estimates - The employment estimates shown in tables 1, 2, 3, 6, and 7 cover all full-and part-time wage and salary workers who worked or received pay during the pay period ending nearest the 15th of the month. Proprietors, self-employed persons, domestic servants, and personnel of the armed forces are excluded. The estimates and indexes shown in tables 8 and 10 refer to production and related workers as defined in the glossary, page ix.

Sec. I. State Estimates - State estimates are prepared in cooperation with various State Agencies as indicated on page v. The estimates for manufacturing have been adjusted to recent data made available under the Federal Social Security program. Since some States have adjusted to more recent bench-mark data than others, and because varying methods of computation are used, the total of the State estimates differs from the national total (see tables 1 and 2). Because of these recent revisions the State estimates for manufacturing are not consistent with the unrevised data shown prior to June 1947 for total employment in nonagricultural establishments, by State. A number of States also make available more detailed industry data and information for earlier periods which may be secured directly upon request to the appropriate State Agency. Estimates of nonagricultural employment, by State, for those States which are now publishing such estimates are shown in table 6 and are consistent with the manufacturing estimates in table 7. As nonagricultural estimates for additional States become available, they will be shown in table 6.

The following publications are available upon request from the BLS Regional Offices or the Bureau's Washington Office:

Nonagricultural Employment, by State, 1943-1947; Employment in Manufacturing Industries, by State, 1943-1946; Estimates of Total Employment in Manufacturing Industries by State, 1947.

- New England Regional Director, U. S. Bureau of Labor Statistics, Old South Bldg., 294 Washington St., Boston 33, Massachusetts (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont).
- North Atlantic Regional Director, U. S. Bureau of Labor Statistics, 1000 Parcel Post Bldg., 341 Ninth Avenue, New York 1, New York (Delaware, Pennsylvania, New Jersey, New York).
- North Central Regional Director, U. S. Bureau of Labor Statistics, 312 National War Agencies Bldg., 226 W. Jackson Blvd., Chicago 6, Illinois (Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, Ohio, North Dakota, South Dakota, Wisconsin).
- Southern Regional Director, U. S. Bureau of Labor Statistics, 6th
  Floor Silvey Bldg., 114 Marietta Street, N. W., Atlanta 3, Georgia
  (Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North
  Carolina, Oklahoma, South Carolina, Tennessee, Texas).
- Pacific-Rocky Mountain Regional Director, U. S. Bureau of Labor Statistics, 546 Federal Office Bldg., San Francisco 2, California (Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming).

Technical advice and assistance on employment statistics in the states of Virginia, West Virginia, Maryland, and the District of Columbia will be given by the Bureau's Washington Office.

### GLOSSARY

- Continental United States Covers only the 48 States and the District of Columbia.
- Contract construction Covers only firms engaged in the construction business on a contract basis for others. Force-account construction workers, i.e., hired directly by and on the pay rolls of Federal, State, and local government, public utilities, and private establishments, are excluded.
- Defense Agencies Covers civilian employees of the National Military
  Establishment, Maritime Commission, National Advisory Committee for
  Aeronautics, The Panama Canal, Philippine Alien Property Administration, Philippine War Damage Commission, Selective Service System,
  War Assets Administration, Office of Defense Transportation,
  National Security Resources Board, National Security Council.
- Family Allowances Represents the Government's contribution; the amount contributed by the personnel is included under pay rolls.
- Federal Government Executive Branch Includes U. S. Navy Yards,
  Federal arsenals, and force-account construction. Fourth-class
  postmasters are included under the executive branch in table 4,
  but are excluded from the government data shown in tables 1 and 3.

Employment shown here for the executive branch differs from data published by the U.S. Civil Service Commission in the following respects: (1) Employment collected and published by the Civil Service Commission as of the last day of the month, is here presented as of the first day of the next month; (2) substitute rural mail cerriers are excluded; (3) employment in December of each year includes the additional postal employees necessitated by the Christmas season, excluded from published Civil Service Commission figures starting 1942; (4) seamen and trainees who are hired and paid by private steamship companies having contracts with the Maritime Commission are excluded; (5) the Panama Railroad Company is shown here under Government corporations but is included under the executive branch by the Civil Service Commission.

- Finance Covers establishments operating in the fields of finance, insurance, and real estate; excludes the Federal Reserve District Banks and the mixed ownership banks of the Farm Credit Administration.
- Government Covers Federal, State, and local governmental establishments performing legislative, executive, and judicial functions, as well as all government-owned and operated establishments and institutions (arsenals, navy yards, hospitals, etc.), government corporations, and government force-account construction. The data shown in tables 1 and 3 exclude fourth-class postmasters because they presumably have other major jobs.
- Railroad Company, the Federal Reserve banks, and the mixed-owner-ship banks of the Farm Credit Administration. All other corporations are included under the executive branch.
- Indexes of production-worker employment Estimates of productionworker employment expressed as a percentage of the average employment in 1939.
- Indexes of production-worker weekly pay rolls Estimates of production-worker weekly pay rolls expressed as a percentage of the average weekly pay roll for 1.939.
- Leave payments Payments were authorized by Public Law 704 of the 79th Congress and were continued by Public Law 254 of the 80th Congress to enlisted personnel who were discharged prior to September 1, 1946 for accrued and unused leave and to officers and enlisted personnel then on active duty for leave accrued in excess of 60 days. Value of bonds represents face value; interest is paid in addition when bonds are cashed. Lump-sum payments for terminal leave, which were authorized by Public Law 350 of the 80th Congress, and were started October 1947, are excluded here and included under pay rolls.

- Manufacturing Covers only privately owned establishments; governmental manufacturing operations such as arsenals and navy yards are excluded.
- Military personnel Represents persons on active duty as of the first of the month. Reserve personnel are excluded if on inactive duty or if on active duty for a brief training or emergency period.
- Military pay rolls Represent estimated pay roll obligations based on an average monthly personnel count, plus lump-sum payments for terminal leave. Pay rolls for the Navy and Coast Guard include cash payments for clothing-allowance balances in January, April, July, and October.
- Mining Covers establishments engaged in the extraction from the earth of organic and inorganic minerals which occur in nature as solids, liquids, or gases; includes various contract services required in mining operations, such as removal of overburden, tunnelling and shafting, and the drilling or acidizing of oil wells; also includes ore dressing, beneficiating, and concentration.
- Nonagricultural establishments Governmental or private business establishments; (1) that are physically located within continental United States; and (2) whose principal activity can be classified under one of the following industry divisions manufacturing, mining, contract construction, transportation and public utilities, trade, finance, service, or government.
- Pay rolls Private pay rolls represent weekly pay rolls of both full- and part-time production and related workers (or nonsupervisory employees and working supervisors) who worked or received pay for any part of the pay period ending nearest the 15th of the month, before deductions for old-age and unemployment insurance, group insurance, withholding tax, bonds, and union dues, but after deductions for damaged work. Includes pay for sick leave, holidays, and vacations taken. Excludes cash payments for vacations not taken, retroactive pay not earned during period reported, value of payments in kind, and bonuses, unless earned and paid regularly each pay period. In coal mining portal-to-portal pay is included.

Federal civilian pay rolls are for all employees before deductions for income tax, retirement, and bonds, and cover the working days in the calendar month.

- Production and related workers Includes working foremen and all nonsupervisory workers (including lead men and trainees) engaged in
  fabricating, processing, assembling, inspection, receiving, storage,
  handling, packing, warehousing, shipping, maintenance, repair,
  janitorial, watchman services, products development, auxiliary
  production for plant's own use (e.g., power plant), and recordkeeping and other services closely associated with the above
  production operations. Excludes supervisory employees (above
  the working foreman level) and their clerical staffs, routemen,
  salesmen, and other groups of nonproduction workers defined below
  under wage and salary workers.
- Service Covers establishments primarily engaged in rendering services to individuals and business firms. Excludes automobile repair services, government owned and operated hospitals, museums, etc., and domestic service.
- Trade Covers establishments engaged in wholesale trade, i.e., selling merchandise to retailers, and in retail trade, i.e., selling merchandise for personal or household consumption, and rendering services incidental to the sale of goods. Includes autorepair services.
- Transportation and public utilities Covers only privately owned and operated enterprises engaged in providing all types of transportation and related services; telephone, telegraph, and other communication services; or providing electricity, gas, steam, water, or sanitary service. Government owned and operated establishments are included under government.
- Wage and salary workers In addition to production and related workers as defined above, includes workers engaged in the following activities: executive, purchasing, finance, accounting, legal, personnel (including cafeterias, medical, etc.), professional and technical activities, sales, sales-delivery, advertising, credit, collection, and in installation and servicing of own products, routine office functions, factory supervision (above the working foreman level) and other workers not included as production workers. Also includes employees on the establishment pay roll engaged in new construction and major additions or alterations to the plant who are utilized as a separate work force (force-account construction workers).

Wage earner - See production workers.

Washington, D. C. - Data for the executive branch of the Federal
Government also include areas in Maryland and Virginia which are
within the metropolitan area, as defined by the Bureau of the Census.
