# **Publications on Employment Developments**

**Available from  
the Bureau of Labor Statistics**

The Bureau of Labor Statistics program in the measurement and analysis of employment trends includes (1) the preparation of current monthly statistics on employment, labor turnover, and hours and earnings in major industries, States and areas; (2) the interpretation of these employment trends; (3) the analysis of long-term trends in employment in major occupations and industries; and (4) the preparation of estimates of manpower requirements for the defense mobilization program and estimates of prospective labor supply. Employment statistics are prepared in cooperation with State agencies.

*Listed below and continued on the (inside) back cover are the major reports available to the public. Distribution is free unless otherwise noted. Requests for these publications specifying exact titles, should be addressed to the Bureau of Labor Statistics, U. S. Department of Labor, Washington 25, D. C.*

**EMPLOYMENT AND PAYROLLS**—Employment figures presented for approximately 200 individual industries, for 48 States and the District of Columbia and for selected areas, in varying industry detail. Report also contains analysis of latest monthly employment trends and current and anticipated developments in selected industries. Turnover data on hiring, quits, layoffs, and discharges shown for 125 manufacturing and selected nonmanufacturing industries on a national basis only. Separate press releases on employment and labor turnover giving analysis of current trends in broad industry groups based on preliminary data are available earlier. All reports are published monthly. Separate data for manufacturing industries showing turnover rates for men and women and employment of women are available quarterly.

**HOURS AND EARNINGS**—Average weekly earnings, average weekly hours, and average hourly earnings for approximately 300 industries, and for States and selected areas. Press release, giving analysis of current trends in broad industry groups based on preliminary data, available approximately 2 weeks earlier. Both reports published monthly.

These publications prepared by

# Employment Trends

## MANUFACTURING DECLINES AS OTHER FIELDS EXPAND SEASONALLY

The nonagricultural employment total showed little change between September and October. At 49.6 million, the number of employees on nonfarm payrolls was at a record high for October, and about half a million above last year's figure, but slightly down from September. The major developments over the month were employment advances in retail trade and State and local government, and declines in manufacturing. Construction employment, which usually goes down at this time of year, stayed at the September level, reflecting continued record rates of construction activity.

Employment in manufacturing industries declined by 200,000 between September and October. Decreases occurred in most industry groups, with the most pronounced declines—apart from a seasonal reduction in food processing—reported in metals and metal products, textiles, and leather. The ordnance, instruments, printing and publishing, chemicals, and miscellaneous manufacturing industry groups showed little change or small increases in their employment over the month.

The September-to-October decrease in factory employment was among the largest for these months

in recent years. It was also the third consecutive month in which the manufacturing employment trend was slightly down, after allowance for seasonal factors. Nevertheless, the October manufacturing employment total was at a post-World War II peak for the month and almost a quarter million higher than in October 1952. This reflected the maintenance of very high employment levels following the sharp increases of late 1952.

Over the year, appreciable gains in factory employment—2 percent or more—were reported by the ordnance, electrical machinery, miscellaneous manufacturing, transportation equipment, fabricated metals, instruments, paper, and printing and publishing industry groups. The largest relative gains were 17 percent in ordnance and almost 7 percent in electrical machinery. On the other hand, the tobacco, lumber, textiles, and leather industry groups reduced their work force by from 2 to 4 percent between October 1952 and October 1953.

Between September and October, retail stores added about 130,000 employees, as the fall shopping season got under way. October employment in retail trade, at more than 7.8 million, was an all-time high for the month and about 160,000 above the year-ago level.

The increase in State and local government employment over the month occurred primarily in educational activities, with the start of the school year. In comparison with October 1952, the number of employees on State and local government payrolls, almost 4.6 million this October, was up by 200,000.

Construction contractors employed 2.7 million workers this October—virtually the same number as in October of last year. This total was within 3 percent of the all-time peak for the month reported in 1951.

Employment in the transportation and public utilities, finance, and service industries this October was up from year-ago levels. Mining employment was lower, however, mainly because of continued employment declines in bituminous coal mining. An over-the-year decrease also occurred in Federal employment.

#### FACTORY HIRING DOWN LAYOFFS UP SLIGHTLY

Layoff rates in manufacturing, which have been at generally low levels during the past 3 years, rose from 13 to 15 per 1,000 employees between August and September 1953. Hiring rates declined from 43 to 40 per thousand for the same period, while the rate at which workers quit jobs increased slightly from 29 to 31 per 1,000.

Layoffs in manufacturing plants have been rising since midyear from the low postwar rates prevailing during the latter part of 1952 and the first half of 1953. The increase has been more pronounced in the durable goods industries than in the nondurable goods groups, re-

flecting some reduction from peak output levels in the automobile industry, some machinery industries, and the primary metals. Layoffs have also been fairly substantial in the textiles, rubber, and leather industries, but on the other hand, were quite low in the apparel, tobacco, and paper industries.

The average hiring rate in manufacturing plants was lower than in earlier postwar Septembers. Among industries with the lowest rates were lumber, furniture, primary metals, transportation equipment, instruments, food, textiles, chemicals, and paper.

A rise in quit rates usually occurs at this time of year when students and teachers leave their summer factory jobs. A slight downtrend in these rates has been evident in recent months as fewer alternate job opportunities were available for employed workers.

#### HOURLY EARNINGS UP IN SEPTEMBER

The nearly 14 million production workers employed in the Nation's factories in mid-September 1953 earned an average of \$1.78 per hour—including overtime and other premium pay. Since the beginning of this year, hourly earnings have advanced moderately, rising four cents between January and September.

From August to September the increase was one cent, principally reflecting the effects of recently negotiated wage agreements and cost-of-living adjustment provisions in existing wage contracts. Average hourly earnings increased four cents or more in printing and publishing, petroleum, and primary metals industry groups. New contract provisions

were also a factor in the rise of two to three cents in hourly earnings in chemicals, food, and paper.

The September seasonal pickup in the workweek and accompanying premium overtime pay usually contributes to a relatively large increase in hourly earnings. This September, a smaller rise resulted in part from reduced overtime premium payments because of shutdowns in many industries over Labor Day.

Factory hourly earnings in September were highest in the petroleum products, printing and publishing, primary metals, and transportation equipment industry groups, where the averages ranged between \$2.07 and \$2.29. The lowest hourly

earnings--between \$1.18 and \$1.39--were reported in leather, textiles, apparel, and tobacco. The differences in the earnings structure reflected variations in basic wages, as well as in the amount of overtime work.

The average workweek of production workers declined to 39.9 hours in September, a decrease of a half hour from the previous month. The decrease primarily reflected Labor Day shutdowns.

The average factory worker earned \$71.02 in September. A small decline from the previous month resulted from the drop in hours. Nevertheless, average weekly earnings were \$1.39 more than in September 1952.

April.....	13,758	111.2	150.0
May.....	13,699	110.8	149.9
June.....	13,787	111.5	150.8
July.....	13,666	110.5	148.9
August.....	13,862	112.1	151.4
September.....	13,829	111.8	150.0

## Industry Indexes

**Table A-5: Indexes of all employees in selected manufacturing industries**

(1951 average = 100.0)

Industry	1953			1952	
	July	June	May	July	June
<b>FOOD AND KINDRED PRODUCTS:</b>					
Meat packing, wholesale.....	97.6	96.9	95.8	100.5	98.4
Sausages and casings.....	108.9	107.1	105.4	104.2	102.4
Condensed and evaporated milk.....	102.5	102.9	100.2	103.0	103.9
Ice cream and ices.....	113.4	110.5	103.2	116.0	112.0
Sea food, canned and cured.....	116.5	108.5	103.4	109.7	105.5
Canned fruits, vegetables, and soups.....	120.8	71.4	68.4	118.7	81.9
Flour and other grain-mill products.....	99.3	97.9	97.2	104.2	101.4
Prepared feeds.....	107.7	109.0	103.1	106.3	105.3
Bread and other bakery products.....	104.0	103.6	102.3	104.0	100.8
Biscuits, crackers, and pretzels.....	100.2	100.0	98.1	101.8	95.0
Cane-sugar refining.....	104.6	97.5	95.8	99.0	100.4
Beet sugar.....	66.8	63.7	56.4	68.4	65.8
Confectionery.....	83.9	88.4	87.9	86.2	89.8
Bottled soft drinks.....	118.9	116.3	106.9	119.1	113.6
Malt liquors.....	107.5	102.6	104.6	112.1	106.0
Distilled, rectified, and blended liquors...	84.2	84.8	85.6	86.4	84.3
Corn syrup, sugar, oil, and starch.....	98.8	99.6	98.8	105.3	97.2
Manufactured ice.....	112.3	105.6	93.9	115.8	107.0
<b>TEXTILE-MILL PRODUCTS:</b>					
Yarn mills.....	93.4	96.0	94.6	91.6	92.7
Thread mills.....	82.9	85.8	86.3	86.3	86.9
Cotton, silk, synthetic fiber.....	92.1	93.2	92.9	91.4	91.1
Woolen and worsted.....	81.5	83.7	82.4	83.4	81.9
Full-fashioned hosiery.....	85.6	89.0	89.1	89.3	92.2
Seamless hosiery.....	103.8	104.7	104.7	98.5	99.8
Knit outerwear.....	127.3	130.8	128.7	108.8	109.2
Knit underwear.....	107.1	109.6	108.6	94.2	95.1
Dyeing and finishing textiles (except wool).....	97.8	99.7	99.4	95.0	95.4
Wool carpets, rugs, and carpet yarn.....	90.3	92.6	92.2	69.0	58.0
Felt goods (except woven felts and hats)....	99.2	102.0	101.6	88.4	92.8
Lace goods.....	86.3	96.4	94.8	86.0	88.5
Paddings and upholstery filling.....	112.2	119.0	115.4	83.3	88.8
Processed waste and recovered fibers.....	93.2	95.7	93.4	87.7	86.5
Artificial leather, oilcloth, and other coated fabrics.....	104.7	104.9	103.3	96.3	98.1
Cordage and twine.....	81.6	91.2	92.1	91.1	84.7
<b>APPAREL AND OTHER FINISHED TEXTILE PRODUCTS:</b>					
Shirts, collars, and nightwear.....	104.4	107.1	106.5	94.8	96.1
Separate trousers.....	100.6	111.6	112.2	97.5	98.1
Work shirts.....	112.2	109.4	108.5	106.3	104.8
Women's dresses.....	86.7	89.2	95.8	85.2	89.4
Household apparel.....	105.3	108.9	113.8	102.3	105.3
Women's suits, coats, and skirts.....	103.9	85.0	56.4	109.3	80.0
Underwear and nightwear, except corsets....	100.6	101.3	105.6	95.2	98.2
Corsets and allied garments.....	110.0	115.4	114.9	104.3	107.3
Curtains, draperies, and other house- furnishings.....	96.0	97.7	99.7	94.5	95.6
Textile bags.....	84.9	87.6	89.8	87.4	88.1
Canvas products.....	107.4	110.8	109.3	96.4	102.9
<b>LUMBER AND WOOD PRODUCTS (EXCEPT FURNITURE):</b>					
Sawmills and planing mills, general.....	96.4	97.5	95.4	99.6	98.6
Millwork.....	90.4	93.8	93.8	93.2	91.7
Plywood.....	96.9	100.3	98.6	93.7	94.3
Wooden boxes, other than cigar.....	98.1	99.0	98.7	94.0	97.3

Industry Indexes

**Table A-5: Indexes of all employees in selected manufacturing industries - Continued**

(1951 average = 100.0)

Industry	1953			1952	
	July	June	May	July	June
<b>ELECTRICAL MACHINERY:</b>					
Wiring devices and supplies.....	97.4	98.8	99.2	88.5	92.0
Carbon and graphite products (electrical)...	104.1	103.1	103.3	100.1	100.6
Electrical indicating, measuring, and recording instruments.....	121.8	123.1	122.4	115.3	114.2
Motors, generators, and motor-generator sets.....	113.0	113.2	113.0	96.2	101.7
Power and distribution transformers.....	109.6	111.0	111.7	101.0	103.5
Switchgear, switchboard, and industrial controls.....	112.7	112.8	112.2	102.0	103.5
Electrical welding apparatus.....	116.7	117.4	120.1	111.6	117.4
Radios, phonographs, television sets, and equipment.....	132.4	136.8	139.4	107.4	107.8
Radio tubes.....	122.8	122.1	123.0	105.5	106.8
Telephone, telegraph, and related equipment.....	120.5	118.8	118.8	117.0	116.0
Storage batteries.....	100.9	97.1	95.3	99.9	95.2
Primary batteries (dry and wet).....	113.1	116.5	117.0	108.6	107.2
X-ray and non-radio electronic tubes.....	98.9	99.7	99.9	117.1	106.3
<b>TRANSPORTATION EQUIPMENT:</b>					
Motor vehicles, bodies, parts, and accessories.....	115.6	115.9	117.3	78.0	96.4
Truck and bus bodies.....	88.0	90.5	93.9	82.8	94.3
Trailers (truck and automobile).....	101.2	104.0	108.5	85.3	84.6
Locomotives and parts.....	79.1	99.0	101.2	79.0	108.2
Railroad and street cars.....	121.7	120.6	113.5	104.9	104.2
<b>MISCELLANEOUS MANUFACTURING INDUSTRIES:</b>					
Jewelry and findings.....	100.3	104.2	102.8	88.1	89.9
Silverware and plated ware.....	90.2	93.9	93.0	82.7	85.0
Games, toys, dolls, and children's vehicles.....	122.6	121.4	118.5	107.5	107.0
Sporting and athletic goods.....	111.3	115.5	116.5	90.5	91.3

## Ship Building

**Table A-6: Employees in the ship building and repairing industry,  
by region**

(In thousands)

Region <sup>1/</sup>	1953			1952	
	September	August	July	September	August
ALL REGIONS.....	240.4	243.9	249.0	269.3	269.3
PRIVATE YARDS.....	122.9	122.5	125.6	135.3	134.0

NORTH ATLANTIC.....	112.3	114.3	115.7	128.9	129.1
Private yards.....	58.3	58.9	60.6	67.6	67.4
Navy yards <sup>2/</sup> .....	54.0	55.4	55.1	61.3	61.7
SOUTH ATLANTIC.....	42.7	43.1	43.8	45.3	45.6
Private yards.....	20.7	20.2	20.2	20.6	20.6
Navy yards.....	22.0	22.9	23.6	24.7	25.0
GULF:					
Private yards.....	20.1	20.5	20.2	22.0	21.2
PACIFIC.....	55.3	55.9	57.8	61.2	61.0
Private yards.....	13.8	12.8	13.1	13.2	12.4
Navy yards.....	41.5	43.1	44.7	48.0	48.6
GREAT LAKES:					
Private yards.....	4.6	4.6	6.2	7.4	7.8
INLAND:					
Private yards.....	5.4	5.5	5.3	4.5	4.6

<sup>1/</sup> The North Atlantic region includes all yards bordering on the Atlantic in the following States: Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont.

The South Atlantic region includes all yards bordering on the Atlantic in the following States: Florida, Georgia, North Carolina, South Carolina, and Virginia.

The Gulf region includes all yards bordering on the Gulf of Mexico in the following States: Alabama, Florida, Louisiana, Mississippi, and Texas.

The Pacific region includes all yards in California, Oregon, and Washington.

The Great Lakes region includes all yards bordering on the Great Lakes in the following States: Illinois, Michigan, Minnesota, New York, Ohio, Pennsylvania, and Wisconsin.

The Inland region includes all other yards.

<sup>2/</sup> Data include Curtis Bay Coast Guard Yard.

**Table A-7: Federal civilian employment**

(In thousands)

Branch and agency	1953			1952	
	September	August	July	September	August
	2,220	2,248	2,271	2,368	2,387
<b>TOTAL FEDERAL 1/.....</b>					
Executive 2/.....	2,194.6	2,221.6	2,241.5	2,341.6	2,360.7

Government.....	17.4	17.0	18.2	Service.....	2.0	1.9	1.8				

\* Finance and government conform with definitions used for national series as shown in Glossary.

1/ Revised series; not strictly comparable with previously published data.

2/ Includes mining.

3/ Not available.

4/ Includes mining and finance.

5/ Subarea of New York-Northeastern New Jersey.

6/ Includes mining and government.

## Labor Turnover

**Table B-1: Monthly labor turnover rates in manufacturing industries,  
by class of turnover**

Year	(Per 100 employees)											
	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
<b>Total separation</b>												
1939.....	3.2	2.6	3.1	3.5	3.5	3.3	3.3	3.0	2.8	2.9	3.0	3.5

Rubber products.....	2.8	1.9	2.4	4.2	2.9	3.8
Leather and leather products.....	3.6	2.6	3.9	4.6	3.9	4.8

1/ These figures are based on a slightly smaller sample than those in tables B-1 and B-2, inasmuch as some firms do not report separate data for women.

# APPENDIX

## Section A - EMPLOYMENT

### Purpose and Scope of the BLS Employment Statistics Program

Employment statistics for nonfarm industries presented in this monthly Report are part of the broad program of the Bureau of Labor Statistics to provide timely, comprehensive, accurate, and detailed information for the use of businessmen, government officials, legislators, labor unions, research workers, and the general public. Current employment statistics furnish a basic indicator of changes in economic activity in various sectors of the economy and are widely used in following business developments and in making decisions in fields of marketing, personnel, plant location, and government policy. The BLS employment statistics program, providing data used in making official indexes of production, productivity and national income, forms an important part of the Federal statistical system.

The BLS publishes monthly the national total of employees in nonagricultural establishments, giving totals by eight major industry divisions: manufacturing; mining; contract construction; transportation and public utilities; wholesale and retail trade; finance, insurance, and real estate; service and miscellaneous; and government. Series on "all employees" and "production and related workers" are presented for the durable goods and nondurable goods subdivisions of manufacturing, 21 major industry groups in manufacturing, 131 manufacturing sub-groups and also for selected mining industries. "All employees" only are published for over 40 industry groups among the nonmanufacturing divisions. Statistics on the number and proportion of women employees in manufacturing industries are published quarterly. In addition, the Bureau of Labor Statistics publishes monthly employment data by industry division for State and local areas, compiled by cooperating State agencies.

Current national, State, and area statistics are published monthly in the Employment and Payrolls Report. Employment data for 13 months are presented in the Current Statistics Section of each issue of the Monthly Labor Review. Each of the series, from the earliest available period to date, may be obtained by writing to the BLS Division of Manpower and Employment Statistics. Such requests should specify the industry series desired. Similar information is available for States and areas. A detailed explanation of the technique of preparing employment statistics will be sent upon request.

### Definition of Employment

BLS employment statistics represent the number of persons employed in establishments in nonagricultural industries in the continental United States during a specified payroll period. Employment data for nongovernmental establishments refer to persons who worked during, or received pay for, any part of the pay period ending nearest the 15th of the month. Current data for Federal Government establishments generally refer to persons who worked on, or received pay for, the last day of the month; for State and local government, persons who received pay for any part of the pay period ending on, or immediately prior to, the last day of the month.

Employed persons include those who are working full- or part-time, on a temporary or permanent basis. Persons on an establishment payroll who are on paid sick-leave, paid holiday or paid vacation, or who work during a part of a specified pay period and are unemployed or on strike during the other part of the period are considered employed. Persons on the payroll of more than one establishment during the pay period are counted each time reported. On the other hand, persons who are laid off or are on leave without pay, who are on strike for the entire pay period, or who are hired but do not report to work during the pay period are not considered employed. Since proprietors, self-employed persons, and unpaid family workers do not have the status of "employee," they are not covered by BLS reports. Persons working as farm workers or as domestic workers in households are not within the scope of data for nonagricultural establishments. Government employment statistics refer to civilian employees only and hence exclude members of the Armed Forces.

Beginning with January 1952, the data for Federal employment are not strictly comparable with those for prior years, primarily as a result of changes in definition. The following changes were made starting with that month: (1) data refer to the last day of the month rather than the first of the month; (2) employment of the Federal Reserve Banks and of the mixed ownership banks of the Farm Credit Administration transferred from the Federal total and the Executive Branch to the "Banks and Trust Companies" group of the "Finance, Insurance, and Real Estate" division; (3) fourth-class postmasters formerly included only in the table showing Federal civilian employment, now included in all tables showing government series except for States and areas; (4) employment in the General Accounting Office and Government Printing Office excluded from the Executive Branch and included in the Legislative Branch; (5) the "Defense agencies" category replaced by one showing employment in the Department of Defense only.

### Collection of Establishment Reports

The BLS, with the cooperation of State agencies, collects current employment information for most industries by means of "shuttle" schedules (BLS 790 Forms) mailed monthly to individual establishments. State agencies mail most of the forms and when returned, examine them for consistency, accuracy, and completeness. States use the information to prepare State and area series and send the schedules to the BLS Division of Manpower and

Employment Statistics for use in preparing the national series. Each questionnaire provides a line for the State agency to enter data for December of the previous year, as well as lines for the cooperating establishment to report for each month of the current calendar year. The December data, copied from the completed previous year's form, give the reporter a means for comparison when reporting for January as an aid to collection of consistent data. The same form is returned each month to the reporting establishment to be completed. Definitions of terms are described in detail in the instructions on each form. This "shuttle" schedule, which has been used by BLS for more than 20 years, is designed to assist firms to report consistently, accurately, and with a minimum of cost.

An establishment is defined as a single physical location, such as a factory, mine, or store where business is conducted. In the case of a company with several plants or establishments, the BLS endeavors to obtain separate reports from each business unit which maintains separate payroll records, since each may be classified in a different industry.

#### Coverage of Establishment Reports

The Bureau of Labor Statistics obtains monthly reports from approximately 155,000 establishments, distributed by industry as shown by the following table. The table also shows the approximate proportion of total employment in each industry division covered by the group of establishments furnishing monthly employment data. The coverage for individual industries within the divisions may vary from the proportions shown.

Approximate size and coverage of monthly sample  
used in BLS employment and payroll statistics

Division or industry	Number of establishments	Employees	
		Number in sample	Percent of total
Mining.....	3,300	440,000	50
Contract construction.....	19,700	783,000	28
Manufacturing.....	44,100	11,207,000	68
Transportation and public utilities:			
Interstate railroads (ICC).....	---	1,357,000	96
Other transportation and public utilities (BLS).....	13,600	1,430,000	51
Wholesale and retail trade.....	60,300	1,889,000	19
Finance, insurance, and real estate....	10,600	486,000	25
Service and miscellaneous:			
Hotels and lodging places.....	1,300	145,000	31
Personal services:			
Laundries and cleaning and dyeing plants.....	2,300	99,000	19
Government:			
Federal (Civil Service Commission)....	---	2,368,000	100
State and local (Bureau of the Census- quarterly).....	---	2,760,000	67

## Classification of Establishment Reports

To present meaningful tabulations of employment data, establishments are classified into industries on the basis of the principal product or activity determined from information on annual sales volume for a recent year. In the case of an establishment making more than one product, the entire employment of the plant is included under the industry indicated by the most important product. The titles and descriptions of industries presented in the 1945 Standard Industrial Classification Manual, Vol. I (U. S. Bureau of the Budget, Washington, D. C.) are used for classifying reports from manufacturing establishments; the 1942 Industrial Classification Code, (U. S. Social Security Board) for reports from nonmanufacturing establishments.

## Benchmark Data

Basic sources of benchmark information are periodic tabulations of employment data, by industry, compiled by State agencies from reports of establishments covered under State unemployment insurance laws. Supplementary tabulations prepared by the U. S. Bureau of Old Age and Survivors Insurance are used for the group of establishments exempt from State unemployment insurance laws because of their small size. For industries not covered by either of the two programs, benchmarks are compiled from special establishment censuses: for example, for interstate railroads, from establishment data reported to the ICC; for State and local government, from data reported to the Bureau of the Census; for the Federal government, from agency data compiled by the Civil Service Commission. Establishments are classified into the same industrial groupings for benchmark purposes as they are for monthly reporting.

## Estimating Method

The estimating procedure for industries for which data on both "all employees" and "production and related workers" are published (i.e. manufacturing and selected mining industries) is outlined below; the first step of this method is also used for industries for which only figures on "all employees" are published.

The first step is to compute total employment (all employees) in the industry for the month following the benchmark period. The all-employee total for the benchmark period (March) is multiplied by the percent change over the month of total employment in a group of establishments reporting for both March and April. Thus, if firms in the BLS sample report 30,000 employees in March and 31,200 in April, the percentage increase would be 4 percent (1,200 divided by 30,000). If the all-employee benchmark in March is 40,000, the all-employee total in April would be 104 percent of 40,000 or 41,600.

The second step is to compute the production-worker total for the industry in the month following the benchmark period. The all-employee total for the month is multiplied by the ratio of production workers to all employees. This ratio is computed from those establishment reports which

show data for both items. Thus, if these firms in April report 24,400 production workers and a total of 30,500 employees, the ratio of production workers to all employees would be .80 (24,400 divided by 30,500). The production-worker total in April would be 33,280 (41,600 multiplied by .80).

Figures for subsequent months are computed by carrying forward the totals for the previous month according to the method described above. When annual benchmark data become available, the BLS employment figures for the benchmark period are compared with the total count. If differences are found the BLS series are adjusted to agree with the benchmark count.

#### Comparability With Other Employment Estimates

Data published by other government and private agencies differ from BLS employment statistics because of differences in definition, sources of information, and methods of collection, classification, and estimation. BLS monthly figures are not comparable, for example, with the estimates of the Bureau of the Census Monthly Report on the Labor Force. Census data are obtained by personal interviews with individual members of a sample of households and are designed to provide information on the work status of the whole population, classified into broad social and economic groups. The BLS, on the other hand, obtains by mail questionnaire data on employees, based on payroll records of business units, and prepares detailed statistics on the industrial and geographic distribution of employment and on hours of work and earnings.

Since BLS employment figures are based on establishment payroll records, persons who worked in more than one establishment during the reporting period will be counted more than once in the BLS series. By definition, proprietors, self-employed persons, domestic servants, and unpaid family workers are excluded from the BLS but not the MRLF series. The two series also differ in date of reference, BLS collecting data for the pay period ending nearest the 15th of the month (except for government), while the MRLF relates to the calendar week containing the 8th day of the month.

Employment estimates derived by the Bureau of the Census from its quinquennial census and annual sample surveys of manufacturing establishments also differ from BLS employment statistics. Among the important reasons for disagreement are differences in industries covered, in the business units considered parts of an establishment, and in the industrial classification of establishments.

#### Employment Statistics for States and Areas

State and area employment statistics are collected and prepared by State agencies in cooperation with the Bureau of Labor Statistics. The names and addresses of these agencies are listed on the last page of the Report. State agencies use the same basic schedule as the Bureau of Labor Statistics in collecting employment statistics. State series are adjusted

to benchmark data from State unemployment insurance agencies and the Bureau of Old Age and Survivors Insurance. Because some States have more recent benchmarks than others and use slightly varying methods of computation, the sum of the State figures differs from the official U. S. totals prepared by the Bureau of Labor Statistics. State and area data in greater industry detail and for earlier periods may be secured directly upon request to the appropriate State agency or to the Bureau of Labor Statistics.

## Section B - LABOR TURN-OVER

### Definition of Labor Turnover

"Labor turnover," as used in this series, refers to the gross movement of wage and salary workers into and out of employment status with respect to individual firms. This movement is subdivided into two broad types: accessions (new hires and rehires) and separations (terminations of employment initiated by either the employer or the employee). Each type of action is cumulated for a calendar month and expressed as a rate per 100 employees. Rates of accession and separation are shown separately.

Both the types of movement and the employment used as the base for computing labor turnover rates relate to all employees, including executive, office, sales, and other salaried personnel as well as production workers. All groups of employees - full- and part-time, permanent and temporary - are included. Transfers from one establishment to another within a company are not considered to be turnover items.

A relatively large percent of all personnel turnover is often confined to particular groups of employees, such as new workers, trainees, extra, part-time, and temporary workers. Turnover rates (especially for periods longer than a month) should not be interpreted as the exact proportion of the total number of persons employed at any point in time who change jobs during a subsequent time interval. For example, a quit rate of 25 per 100 for an annual period (computed by adding the 12 monthly rates) does not mean that 25 percent of all the persons employed at the beginning of a year left their jobs by the end of the year.

The terms used in labor turnover statistics are defined below:

Separations are terminations of employment during the calendar month and are classified according to cause: quits, discharges, layoffs, and miscellaneous separations (including military), as defined below.

Quits are terminations of employment during the calendar month initiated by employees for such reasons as: acceptance of a job in another company, dissatisfaction, return to school, marriage, maternity, ill health, or voluntary retirement where no company pension is provided. Failure to report after being hired and unauthorized absences of more than seven consecutive calendar days are also classified as quits. Prior to 1940, miscellaneous separations were also included in this category.

Discharges are terminations of employment during the calendar month initiated by the employer for such reasons as employees' incompetence, violation of rules, dishonesty, insubordination, laziness, habitual absenteeism, or inability to meet physical standards.

Layoffs are terminations of employment during the calendar month lasting or expected to last more than seven consecutive calendar days without pay, initiated by the employer without prejudice to the worker, for such

reasons as lack of orders or materials, release of temporary help, conversion of plant, introduction of labor-saving machinery or processes, or suspensions of operations without pay during inventory periods.

Miscellaneous separations (including military) are terminations of employment during the calendar month because of permanent disability, death, retirement on company pension, and entrance into the Armed Forces expected to last more than thirty consecutive calendar days. Prior to 1940, miscellaneous separations were included with quits. Beginning September 1940, military separations were included here.

Persons on leave of absence (paid or unpaid) with the approval of the employer are not counted as separations until such time as it is definitely determined that such persons will not return to work. At that time, a separation is reported as one of the above types, depending on the circumstances.

Accessions are the total number of permanent and temporary additions to the employment roll during the calendar month, including both new and rehired employees. Persons returning to work after a layoff, military separation, or other absences who have been counted as separations are considered accessions.

#### Source of Data and Sample Coverage

Labor turnover data are obtained each month from a sample of establishments by means of a mail questionnaire. Schedules are received from approximately 7,100 cooperating establishments in the manufacturing, mining, and communication industries (see below). The definition of manufacturing used in the turnover series is more restricted than in the BLS series on employment, hours, and earnings because of the exclusion of certain manufacturing industries from the labor turnover sample. The major industries excluded are: printing, publishing, and allied industries (since April 1943); canning and preserving fruits, vegetables, and sea foods; women's and misses' outerwear; and fertilizer.

#### Approximate coverage of BLS labor turnover sample

Group and industry	Number of establishments	Employees	
		Number in sample	Percent of total
Manufacturing .....	6,600	4,800,000	34
Durable goods .....	4,000	3,400,000	38
Non-durable goods .....	2,600	1,400,000	27
Metal mining .....	130	63,000	60
Coal mining:			
Anthracite .....	40	30,000	45
Bituminous .....	275	120,000	33
Communication:			
Telephone .....	(1/)	582,000	89
Telegraph .....	(1/)	28,000	60

1/ Data are not available.

### Method of Computation

To compute turnover rates for individual industries, the total number of each type of action (accessions, quits, etc.) reported for a calendar month by the sample establishments in each industry is divided by the total number of employees (both wage and salary workers) reported by these establishments who worked during, or received pay for, any part of the pay period ending nearest the 15th of that month. To obtain the rate, the result is multiplied by 100.

For example, in an industry sample, the total number of employees who worked during, or received pay for, the week of January 12-18 was reported as 25,498. During the period January 1-31 a total of 284 employees in all reporting firms quit. The quit rate for the industry is:

$$\frac{284}{25,498} \times 100 = 1.1$$

To compute turnover rates for industry groups, the rates for the component industries are weighted by the estimated employment. Rates for the durable and nondurable goods subdivisions and manufacturing division are computed by weighting the rates of major industry groups by the estimated employment.

### Industry Classification

Beginning with final data for December 1949, manufacturing establishments reporting labor turnover are classified in accordance with the Standard Industrial Classification (1945) code structure. Definitions of nonmanufacturing industries are based on the Social Security Board Classification Code (1942).

The durable goods subdivision of manufacturing includes the following major groups: ordnance and accessories; lumber and wood products (except furniture); furniture and fixtures; stone, clay, and glass products; primary metal industries; fabricated metal products (except ordnance, machinery, and transportation equipment); machinery (except electrical); electrical machinery; transportation equipment; instruments and related products; and miscellaneous manufacturing industries. The nondurable goods subdivision includes the following major groups: food and kindred products; tobacco manufactures; textile-mill products; apparel and other finished textile products; paper and allied products; chemicals and allied products; products of petroleum and coal; rubber products; and leather and leather products.

### Comparability With Earlier Data

Labor turnover rates are available on a comparable basis from January 1930 for manufacturing as a whole and from 1943 for two coal mining and two communication industries. Because of a major revision, labor turnover rates for many individual industries and industry groups for the period prior to December 1949 are not comparable with the rates for the subsequent period.

The revision of the turnover series involved (1) the adoption of the Standard Industrial Classification (1945) code structure for the manufacturing industries, providing new industry definitions and groupings (the industry definitions of the Social Security Board Classification Code (1942) were used in the series beginning in 1943 and of the Census of Manufactures in series prior to 1943), and (2) the introduction of weighting (according to employment in the component industries) in the computation of industry-group rates. In the Bureau's previous series, industry-group rates were computed directly from the sample of reporting establishments without regard to the relative weight of the component industries.

#### Comparability With Employment Series

Month-to-month changes in total employment in manufacturing industries reflected by labor turnover rates are not comparable with the changes shown in the Bureau's employment series for the following reasons:

(1) Accessions and separations are computed for the entire calendar-month; the employment reports, for the most part, refer to a 1-week pay period ending nearest the 15th of the month.

(2) The turnover sample is not as large as the employment sample and includes proportionately fewer small plants; certain industries are not covered (see paragraph on source of data and sample coverage).

(3) Plants are not included in the turnover computations in months when work stoppages are in progress; the influence of such stoppages is reflected, however, in the employment figures.

#### Publications

Additional information on concepts, methodology, etc., is given in a "Technical Note on Measurement of Labor Turnover," which is available upon request. This note appeared in the May 1953 Monthly Labor Review (pp. 519-522). Summary tables showing monthly labor turnover rates in each of the selected industry groups and industries for earlier years are available upon request. Such requests should specify the industry series desired.

## GLOSSARY

**ALL EMPLOYEES** - Includes production and related workers as defined below and workers engaged in the following activities: executive, purchasing, finance, accounting, legal, personnel (including cafeterias, medical, etc.), professional and technical activities, sales, sales-delivery, advertising, credit collection, and in installation and servicing of own products, routine office functions, factory supervision (above the working foreman level). Also includes employees on the establishment payroll engaged in new construction and major additions or alterations to the plant who are utilized as a separate work force (force-account construction workers). Proprietors, self-employed persons, domestic servants, unpaid family workers, and members of the Armed Forces are excluded.

**CONTRACT CONSTRUCTION** - Covers only firms engaged in the construction business on a contract basis for others. Force-account construction workers, i.e., hired directly by and on the payroll of Federal, State, and local government, public utilities, and private establishments, are excluded from contract construction and included in the employment for such establishments.

**DURABLE GOODS** - The durable goods subdivision includes the following major industry groups: ordnance and accessories; lumber and wood products (except furniture); furniture and fixtures; stone, clay, and glass products; primary metal industries; fabricated metal products (except ordnance, machinery, and transportation equipment); machinery (except electrical); electrical machinery; transportation equipment; instruments and related products; and miscellaneous manufacturing industries.

**FINANCE, INSURANCE, AND REAL ESTATE** - Covers establishments operating in the fields of finance, insurance, and real estate, and beginning January 1952, also includes the Federal Reserve Banks and the mixed-ownership banks of the Farm Credit Administration for national estimates. However, in State and area estimates the latter two agencies will be included under Government until revisions are made in series prepared by cooperating State agencies.

**GOVERNMENT** - Covers Federal, State, and local government establishments performing legislative, executive, and judicial functions, including Government corporations, Government force-account construction, and such units as arsenals, navy yards, and hospitals. Fourth-class postmasters are included in the national series, but will be excluded from State and area estimates pending revisions in series prepared by cooperating State agencies. State and local government employment excludes, as nominal employees, paid volunteer firemen and elected officials of small local units.

**MANUFACTURING** - Covers only private establishments. Government manufacturing operations such as arsenals and navy yards are excluded from manufacturing and included under Government.

**MINING** - Covers establishments engaged in the extraction from the earth of organic and inorganic minerals which occur in nature as solids, liquids, or gases; includes various contract services required in mining operations, such as removal of overburden, tunneling and shafting, and the drilling or acidizing of oil wells; also includes ore dressing, beneficiating, and concentration.

**NONDURABLE GOODS** - The nondurable goods subdivision includes the following major industry groups: food and kindred products; tobacco manufactures; textile-mill products; apparel and other finished textile products; paper and allied products; printing, publishing, and allied industries; chemicals and allied products; products of petroleum and coal; rubber products; and leather and leather products. Labor turnover data exclude printing, publishing, and allied industries.

**PAYROLL** - Private payroll represent weekly payroll of both full- and part-time production and related workers who worked during, or received pay for, any part of the pay period ending nearest the 15th of the month, before deduction for old-age and unemployment insurance, group insurance, withholding tax, bonds, and union dues; also, includes pay for sick leave, holidays, and vacations taken. Excludes cash payments for vacations not taken, retroactive pay not earned during period reported, value of payments in kind, and bonuses, unless earned and paid regularly each pay period. The index in table A-4 represents production-worker average weekly payroll expressed as a percentage of average weekly payroll for the 1947-49 period. Aggregate weekly payroll for all manufacturing is derived by multiplying gross average weekly earnings by production-worker employment.

**PRODUCTION AND RELATED WORKERS** - Includes working foremen and all nonsupervisory workers (including lead men and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial, watchman services, products development, auxiliary production for plant's own use (e.g., power plant), and record-keeping and other services closely associated with the above production operations. The index in table A-4 represents the number of production and related workers in manufacturing expressed as a percentage of average monthly production-worker employment in the 1947-49 period.

**SERVICE AND MISCELLANEOUS** - Covers establishments primarily engaged in rendering services to individuals and business firms, including automotive repair services. Excludes domestic service workers. Nongovernment schools, hospitals, museums, etc. are included under service and miscellaneous; similar Government establishments are included under Government.

**TRANSPORTATION AND PUBLIC UTILITIES** - Covers only private establishments engaged in providing all types of transportation and related services; telephone, telegraph, and other communication services; or providing electricity, gas, steam, water, or sanitary service. Similar Government establishments are included under Government.

**WHOLESALE AND RETAIL TRADE** - Covers establishments engaged in wholesale trade, i.e., selling merchandise to retailers, and in retail trade, i.e., selling merchandise for personal or household consumption, and rendering services incidental to the sales of goods. Similar Government establishments are included under Government.
