

STATISTICAL Supplement

March 1945

THIS STATISTICAL SUPPLEMENT

to the **FEDERAL HOME LOAN BANK REVIEW** is designed to bring together, in convenient form, a vast quantity of pertinent reference material bearing upon residential construction and home-financing activities.

The Supplement provides statistical information covering approximately a 10-year period, including all revisions made up to the beginning of the current year. Indexes are presented on a base of $1935-1939=100$, to facilitate comparisons. Space is provided in most instances for inserting 1945 data as they become available in regular tables of the REVIEW.

The presentation of this Supplement would not have been possible without the full cooperation of the Division of Operating Statistics of the Federal Home Loan Bank Administration; the Bureau of Labor Statistics in the U. S. Department of Labor; and the Division of Research and Statistics of the Federal Housing Administration. Their contribution is sincerely appreciated.

Explanatory notes on page 3 give a description of the source, coverage, method of computation, and application of the statistical series included on the following pages.

TABLE OF CONTENTS

Explanatory notes.....	3
Table 1.—Indexes of residential construction and selected influencing factors, 1934–1944:	
Residential construction.....	5
Nonfarm foreclosures.....	5
Rental index.....	5
Industrial production.....	5
Manufacturing employment.....	5
National income payments.....	6
Wholesale building material prices.....	6
Wholesale lumber prices.....	6
Savings and loan mortgage lending.....	6
Table 2.—Nonfarm real-estate foreclosures in the U. S., 1935–1944.....	6
Table 3.—Outstanding mortgage loans on 1- to 4-family nonfarm homes, 1933–1943.....	7
Table 4.—New mortgage loans made on 1- to 4-family nonfarm homes, 1933–1943.....	7
Table 5.—Residential real estate owned by selected institutions, 1938–1943.....	7
Table 6.—Indexes of building costs for the standard frame house, 1939–1944.....	7
Table 7.—Indexes of building costs for the standard house in representative cities, 1940–1944.....	8–9
Table 8.—New residential construction in all urban areas, 1940–1944, by FHLB District and State.....	10
Table 9.—New private 1- and 2-family dwellings provided in all urban areas, 1940–1944, by FHLB District and State.....	11
Table 10.—New residential construction in all urban areas during 1943–1944, by months, and by FHLB District and State.....	12–13
Table 11.—New residential construction in all urban areas of the U. S., 1933–1944.....	14
Table 12.—New residential construction in all urban areas of the U. S., 1943–1944, by months.....	14
Table 13.—New residential construction in all nonfarm areas of the U. S., 1933–1944.....	14
Table 14.—New home-mortgage loans by all savings and loan associations, by purpose and class of association, 1940–1944.....	15
Table 15.—New home-mortgage loans by all savings and loan associations, by FHLB District and class of association, 1940–1944.....	16–19
Table 16.—Nonfarm mortgages recorded by type of mortgagee, 1939–1944.....	20
Table 17.—Nonfarm mortgages recorded by FHLB District and State, and by type of mortgagee, 1941–1944.....	21–23
Table 18.—Summary of FHLB advances for the U. S., by months, 1936–1944.....	24
Table 19.—Balance of advances outstanding for each Federal Home Loan Bank, by months, 1936–1944.....	24–25
Table 20.—Progress of institutions insured by the Federal Savings and Loan Insurance Corporation, by quarters, 1941–1944.....	26
Table 21.—Progress of membership in the Federal Home Loan Bank System, 1934–1944.....	27
Table 22.—Home mortgages insured by the Federal Housing Administration, 1937–1944.....	27
Table 23.—FHA insured home mortgages held, by class of institution, 1938–1944.....	27

Explanatory Notes

Page 5

RESIDENTIAL CONSTRUCTION: Compiled by the *Division of Operating Statistics, FHLBA*, from building permits reported to the U. S. Department of Labor, based on estimates of the number of 1- and 2-family, privately financed dwelling units provided in all urban areas. The index data, adjusted for normal seasonal fluctuations, reveal essential movements in the volume of new housing facilities which are being currently provided.

NONFARM FORECLOSURES: Compiled by the *Division of Operating Statistics, FHLBA*. This index, adjusted for normal seasonal variations, is based on data reported monthly from approximately 1,900 counties, cities, townships, or other governmental divisions and measures the number of properties acquired monthly through foreclosures. Approximately 80 percent of all nonfarm dwellings are included in this sample. Although non-residential and multi-family foreclosures comprise about 15 percent of the totals used, this index is a gauge of the ability of home owners to meet obligations.

RENTAL INDEX: Compiled by the *Bureau of Labor Statistics*, based on rent data for all types of family dwellings occupied by tenants, exclusive of boarding houses, rooming houses and light housekeeping rooms. Data are collected from tenants in 34 large cities. This series is part of the comprehensive cost-of-living data recorded by the BLS.

INDUSTRIAL PRODUCTION: Compiled by the *Division of Research and Statistics, Board of Governors of the Federal Reserve System*. The index is an over-all measure of changes in the physical volume of production of manufactures and minerals; it does not cover other types of goods and services nor reflect changes in prices. It is derived from 100 individual series—16 groups of manufacturing industries and two groups of mining industries.

MANUFACTURING EMPLOYMENT: Compiled by the *Bureau of Labor Statistics* on the basis of 1939=100, converted and adjusted for seasonal variations by the Division of Operating Statistics, FHLBA. A further breakdown between employment in durable and nondurable goods industries is available from the BLS.

Page 6

NATIONAL INCOME PAYMENTS: Compiled by the *Bureau of Foreign and Domestic Commerce* and adjusted for seasonal variations. Data for 1942 and 1943 were revised in March 1945. (See *Survey of Current Business* for that month.) It is made up of estimates of the income received from salaries and wages, dividends and interest, direct or other relief payments, social security benefits and other labor income, entrepreneurial income and net rents and royalties. The index is useful primarily in indicating the changes in the dollar volume of income payments. However, because it does not reflect changes in the basic price levels, this index does not provide a measure of the purchasing power of a given income.

¹All indexes are on the basis of 1935-1939=100.

WHOLESALE BUILDING-MATERIAL PRICES: Compiled by the *Bureau of Labor Statistics* on an original base of 1926=100, converted by the Division of Operating Statistics, FHLBA. It is one of the 10 major classifications included in the weekly price series based on 889 commodities, prepared by the BLS. The composite building-material index does not pertain strictly to home building but provides the best available guide to the fluctuations in wholesale prices of materials which loom large in the construction of residential structures.

WHOLESALE LUMBER PRICES: Compiled by the *Bureau of Labor Statistics* on an original base of 1926=100, converted by the Division of Operating Statistics, FHLBA. This index is one of the component parts of the wholesale building-material price index mentioned above. In all, about 45 different lumber items are included in this series. Because of the important bearing of the lumber factor upon the total cost of the typical single-family home, price fluctuations evidenced in this series are of particular significance to home-financing institutions.

SAVINGS AND LOAN MORTGAGE LENDING: Compiled by the *Division of Operating Statistics, FHLBA*, from monthly reports of cooperating savings and loan associations. For complete description of source see the note on savings and loan mortgage-lending statistics on page 4. The index, adjusted for seasonal variations and computed from data on the total loans made by all savings and loan associations, is an important yardstick in measuring the activity of these institutions against influencing factors in the real-estate and home-financing fields.

Note—Current data for each of the foregoing indexes may be found in the Monthly Survey section of the REVIEW.

NONFARM FORECLOSURES: Compiled by the *Division of Operating Statistics, FHLBA*. These statistics represent the estimated number of foreclosures in the United States in all nonfarm areas, and are based on data reported monthly from approximately 1,900 counties, cities, townships, or other political divisions. About 80 percent of all nonfarm dwellings are located in the areas included in this sample. (See REVIEW, Table 15—quarterly from February.)

Page 7

NONFARM HOME-MORTGAGE DEBT: Compiled by the *Division of Operating Statistics, FHLBA*, from special studies and reported statistics of various types of mortgage-lending institutions. The data are confined to loans on 1- to 4-family homes in order to eliminate mortgages on farm or commercial properties. Estimates for 1944 will not be available until about August 1945. For a complete description of the sources and methods used in arriving at the total mortgages held by each type of lender, see REVIEW, November 1939, p. 51.

NONFARM HOME-MORTGAGE LENDING: Compiled by the *Division of Operating Statistics, FHLBA*. Based on mortgages recorded throughout the country by type of mortgagee, and special studies and reported statistics of various types of mortgage-lending institutions. The data are confined to loans on 1- to 4-family homes and do not

include mortgage loans made on farm or commercial properties. The category "individuals and others" includes fiduciaries, real-estate and bond companies, title and mortgage companies, philanthropic and educational institutions, fraternal organizations, construction companies, RFC Mortgage Company, etc.

RESIDENTIAL REAL ESTATE OWNED BY SELECTED INSTITUTIONS: Compiled by the *Division of Operating Statistics, FHLBA*. Based on annual reports of savings and loan members of the Federal Home Loan Bank System; statistics of reporting life insurance companies holding about 95 percent of all life insurance company resources; reports of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Home Owners' Loan Corporation, and state supervisory authorities. Estimates for life insurance companies exclude housing projects built by these companies for investment.

INDEX OF BUILDING COSTS FOR THE STANDARD HOUSE: Compiled by the *Division of Operating Statistics, FHLBA*. This index is designed to measure the changes in the cost of constructing a standard frame house and to provide a basis for the study of the *trend of costs* within an individual community or in different cities. The various units of materials and labor are selected in accordance with their contribution to the total cost of the completed dwelling.

Material costs are based on prices for a limited bill of the more important items. Current prices are furnished by the Bureau of Labor Statistics and are based on information from a group of dealers in each city who report on prices for material delivered to job site, in average quantities, for residential construction. Because of wartime conditions, some of the regular items are not available at times and, therefore, substitutions must be made of similar products which are currently being sold.

Labor costs are based on the rates prevailing for residential construction and reflect total earning including overtime and bonus pay. Either union or non-union rates are used according to which prevails in the majority of cases within the community.

Figures presented in these tables include all revisions up to the present time. Revisions are unavoidable, however, as more complete information is obtained. All current changes are indicated in the regular monthly table (Table 3) appearing in the REVIEW.

Page 7: These combined indexes for all cities represent a three months' moving average of costs for approximately 50 cities reporting in three-month intervals.

Pages 8 and 9: This table shows the trend of costs in the individual cities for which data are available. Cities in FHLB Districts 2, 6, 8 and 11 report in January, April, July and October of each year; those in Districts 3, 5, 9 and 12 report in February, May, August and November; and those in Districts 1, 4, 7 and 10 report in March, June, September and December.

Pages 10, 11, 12, 13, and 14

RESIDENTIAL CONSTRUCTION: Compiled by the *Bureau of Labor Statistics*, from building permits received from more than 2,000 cities and towns. Calculations since 1940 are based on the population figures of the 1940 Census. Figures for 1939 and prior years are based on the 1930 Census.

Page 10: This table presents, by states and FHLB Districts, the annual estimates of the number and cost of *all* new residential construction for which building permits were issued in all urban areas of the United States.

Page 11: To bring the residential-construction statistics closer to the actual operations of savings and loan associations, this table analyzes the number and cost of *privately constructed* 1- and 2-family dwellings—the type accepted as security for the vast majority of their mortgage loans.

Pages 12 and 13: To facilitate the comparison of 1945 building with previous years, this table presents the estimated number of dwelling units built in all urban communities (2,500 or more population) during each month of 1943 and 1944 and provides space to insert similar data for the current year. (See REVIEW, Table 1.)

Page 14: The tables on this page include summaries of new residential-construction volume and give some indication of the proportion of building which is undertaken in urban and nonfarm areas. Tables 11 and 12 are summaries of all construction in urban areas of the United States, by type of construction and source of finance. Estimates for years prior to 1936 were made by the National Bureau of Economic Research. (See REVIEW, Table 2.)

Table 13 is a summary of total *nonfarm* residential construction.

Pages 15, 16, 17, 18, and 19

SAVINGS AND LOAN MORTGAGE-LENDING STATISTICS: Compiled by the *Division of Operating Statistics, FHLBA*, from the monthly reports of cooperating savings and loan associations. Approximately 3,100 Federal, state-member, and nonmember associations whose assets represent about 78 percent of the total assets of all savings and loan associations are included in the sample of institutions upon which the final estimates are based.

Table 14 shows a breakdown of the total loans by purpose and by class of association originating the loans. The percent distribution indicates the relation of that purpose or class to the aggregate loans for the year.

Table 15 shows volume of loans by FHLB Bank Districts. (See REVIEW, Tables 6 and 7.)

Pages 20, 21, 22 and 23

MORTGAGE-RECORDING DATA: Compiled by the *Division of Operating Statistics, FHLBA*, from monthly reports prepared by cooperating institutions. The coverage on which final estimates are based includes approximately 625 areas which contain more than two-thirds of the total nonfarm population. To relate mortgage recording to the financing of 1- to 4-family homes, only mortgages of \$20,000 or less on properties in nonfarm areas are counted.

Since almost every mortgage is recorded, this series provides an adequate means of appraising the role being played by various types of lenders. It should be noted, however, that assignments of mortgages are not reflected in this series. To the extent that certain lenders (e. g., insurance companies) purchase mortgages originated and recorded by other lenders (e. g., mortgage companies) recording statistics may overstate or understate the importance of a particular type of lender as the ultimate source of mortgage credit.

(Continued on p. 28)

Explanatory Notes

(Continued from p. 4)

It should also be pointed out that mortgage-recording data are not directly comparable with the estimates on home-mortgage lending presented in Tables 14 and 15. The periods covered are not necessarily the same. Lending statistics are reported as of the date of loan commitment, while recording figures reflect the actual date of mortgage registrations. Further, alterations in the terms of an existing contract may necessitate a new registration. In the case of refinancing an institution's own mortgage, for example, the face amount of the instrument would appear in the recording totals whereas only that portion which represented an increase of funds loaned would be included in the monthly lending figures.

Table 16 shows the estimated amount of mortgages recorded throughout the United States by each type of lender in each month since January 1941. It also shows the relationship of the business done by each type of mortgagee to the total volume of business for any given month as well as for the annual total. (See REVIEW, Table 9.)

Table 17 provides a detailed summary of the annual recordings made by each type of mortgagee from 1941 through 1944, broken down by FHLB Districts and by individual states. The percentage figures relate to the share of the total mortgage-recording business in a given area. (See REVIEW, Table 8.)

Pages 24 and 25

FEDERAL HOME LOAN BANK ADVANCES: Compiled by the *Bank Operations Section, FHLBA*. The ability of the FHLB System to serve as a credit reservoir for its member institutions is best demonstrated by the volume of Federal Home Loan Bank advances. Table 18 shows, by months, the amount of new advances made, repayments on old balances, and advances still outstanding at the end of the period.

Table 19 indicates the balance outstanding at the end of each month for each of the 12 regional FHL Banks. (See REVIEW, Table 12.)

Page 26

PROGRESS OF INSURED ASSOCIATIONS: Compiled by the *Division of Operating Statistics, FHLBA*, from the monthly reports required of all institutions insured by the Federal Savings and Loan Insurance Corporation. The selected balance-sheet items presented are as of the end of the reporting period. Data on operations represent the quarterly total of new mortgage loans made, and the total amount of new

private investments and repurchases. The repurchase ratio is obtained by dividing the repurchases for the quarter by the total new investments received and it would be possible, therefore, for this figure to exceed 100 percent if there were a net decline in share capital. The resulting ratio measures the flow of capital into and out of insured associations. (See REVIEW, Table 13.)

Page 27

FEDERAL HOME LOAN BANK SYSTEM: Compiled by the *Division of Operating Statistics, FHLBA*. This table, showing the number and assets of all member institutions of the FHLB System, is based on reports submitted by members of the Bank System, and is broken down into the various types of institutions. (See REVIEW, Table 18—quarterly from March.)

INSURED MORTGAGE OPERATIONS: Compiled by the *Division of Research and Statistics, Federal Housing Administration*. This table shows the number of mortgages which became premium-paying (i. e., actually in effect) from 1937 through 1944. The various Titles indicate the part of the National Housing Act under which they were processed. Not all Titles have been in effect during the entire period. All data are for mortgages on 1- to 4-family houses. Figures represent the gross insurance written during the period and do not take account of principal repayments on previously insured loans. Title VI loans are all on newly constructed homes. Title II loans may be either on new or existing dwellings. (See REVIEW, Table 11.)

INSURED MORTGAGE HOLDINGS: Compiled by the *Division of Research and Statistics, Federal Housing Administration*. Based on the original face amount of instruments, this table shows the insured mortgages held by the various classes of institutions. Figures do not include terminated mortgages or cases in transit to or being audited by the FHA. They include only the mortgages on 1- to 4-family homes insured under Titles II and VI. The Federal agency classification includes the RFC Mortgage Company, Federal National Mortgage Association, and the U. S. Housing Corporation. The "other" classification includes mortgage companies, finance companies, endowed institutions, private and state benefit funds, etc. December 1944 figures were not available in time for inclusion in the Supplement. They will, however, be found in the March 1945 issue of the REVIEW, Table 19, which is carried semi-annually.
