ECONOMIC UPDATE: EL PASO

El Paso non-farm employment increased in December at a 3.6 percent annualized rate. Overall in 2007, El Paso added 3,000 new jobs, representing a 1.1 percent increase. During December, the job gains were widespread among sectors with only the information, and leisure and hospitality sectors registering job losses. In spite of job gains in December, the unemployment rate jumped to 6 percent, from 5.6 percent in November. In December, retail sales tax rebates increased by 2.6 percent. The El Paso Business-cycle Index increased at a 3.1 percent annualized rate in December. On a year-over-year basis, the El Paso Business-cycle Index posted an increase of almost 2 percent, indicating a solid growth rate.

February 26, 2008
Juarez employment decreased in January at a 4.5 percent annualized rate. In 2007, total payroll increased by almost 8,000 jobs, representing a 2.1 percent increase. The job losses were widespread across sectors during January. Only the construction, trade and services sectors posted job gains. On the other hand, manufacturing posted a decline of 12.6 percent, translating into a loss of approximately 2,700 jobs. This decline is related to the slowdown in industrial activity in the U.S. during the last quarter of 2007. In December, retail sales declined by 6.3 percent. U.S. industrial production registered a 2.1 percent year-over-year increase in January. Mexico’s industrial production grew at a 1.0 percent rate in December. As the chart below shows, there is a close relationship between maquiladora employment and U.S. and Mexico manufacturing indices, which have posted sluggish growth rates in the recent months; thus, it is likely that the maquiladora industry in Ciudad Juarez will follow suit in the next few months.
