CHECK PAYMENTS 11 OTHER CITIES

Prepared by Federal Reserve Bank of St. Louis

Released: October 31, 1969

The Data

These data are presented as an aid for the analysis of economic developments in the Central Mississippi Valley. The emphasis is on economic activity in the metropolitan areas and five states completely or partially within the Eighth Federal Reserve District. Because of the complexity of the economic process, a more meaningful analysis can be made by considering the entire set of indicators for a particular area rather than relying on any single one. Moreover, there may be technical shortcomings in some series.

All area data are presented in both unadjusted and adjusted-for-seasonal-variation form. Index numbers are on a 1957-59 base. In addition, in order to smooth erratic fluctuations, the index of check payments is an average of the indexes for three months and is centered on the middle month.

Basic employment data are developed by the respective State Employment Security Offices.

The data for total loans and total deposits of member banks are averages of data for the last Wednesday of the preceding month, the Wednesday preceding the 15th of the current month, and the last Wednesday of the current month.

Footnotes for charts:

1. All member banks
2. Three-month moving averages (except latest month, which is a two-month average)

Check payments are reported monthly by all or a sample of commercial banks in each area. Check payments are debits to demand deposit accounts, except interbank and U.S. Government accounts, and the index is also adjusted for number of trading days in each month.

The consolidated employment indexes are based on combined data from the metropolitan areas. The consolidated index for check payments is based on reports from the 8 metropolitan areas and 11 other centers and includes 138 respondent banks. The consolidated banking indexes include all member banks in the Eighth Federal Reserve District.

National data are from reports of the Department of Labor and the Board of Governors of the Federal Reserve System.

Basic state personal income figures are obtained from Business Week, and farm cash receipts data are developed by the U. S. Department of Agriculture.

3. Annual figures are totals for the year. Monthly figures are cumulative (year to date).
4. Millions of dollars
n.a. - Not available

Explanatory Comments

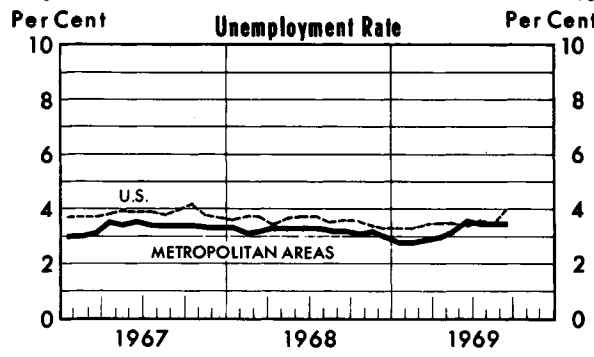

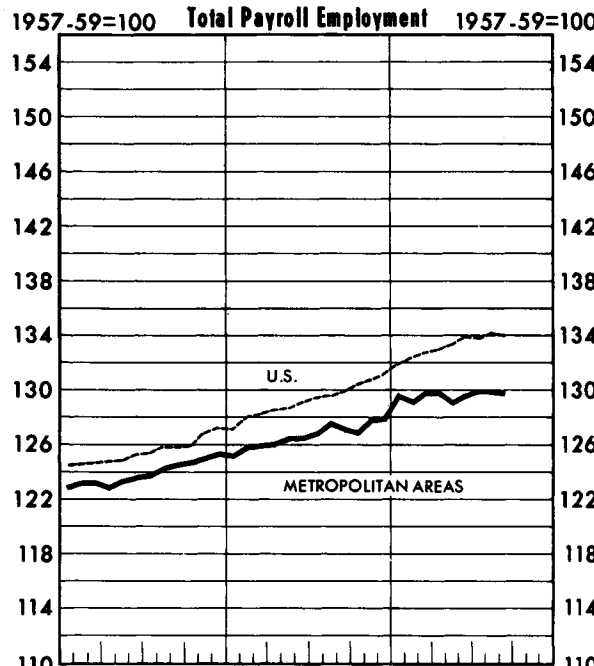

Beginning with July 1969, loans are reported gross, rather than net of valuation reserves as done previously.
