## Preface

The Statistical Supplement to the Federal Reserve Bulletin is a continuation of the Financial and Business Statistics section that appeared in each month's issue of the Federal Reserve Bulletin. Starting with the winter 2004 issue, the Bulletin is now published on a quarterly basis.

Published monthly, the new Statistical Supplement is designed as a compact source of economic and financial data. The tables that appeared in the Federal Reserve Bulletin, including the annual and quarterly special tables, now appear in the Statistical Supplement. All statistical series are published with the
same frequency that they had in the Bulletin, and the numbering system for the tables remains the same.

Separate subscriptions for the quarterly Federal Reserve Bulletin and the monthly Statistical Supplement are available. Subscription information for the Statistical Supplement is on the inside front cover. For subscription information about the Bulletin, contact Publications Fulfillment at (202) 452-3245, or send an e-mail to publications-bog @frb.gov.

If you have questions regarding the tables in the Statistical Supplement, please send a fax to (202) 785-6092 or (202) 728-5886.

[^0]1.15 RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS

|  |
| :--- | :--- |
|  |

NOTE. Required reserves must be held in the form of vault cash and, if vault cash is insufficient, also in the form of a deposit with a Federal Reserve Bank. An institution that is a member of the Federal Reserve System must hold that deposit directly with a Reserve Bank: an institution that is not a member of the System can maintain that deposit directly with a Reserve Bank or with another institution in a pass-through relationship. Reserve requirements Rese iman on when a paving banks soving and loan associations, credit , song saring unions, U.S. branches and agencies of foreign banks. Edge Act corporations, and agreenent corporations

1. Total transaction accounts consist of demand deposits, automatic transfer service (ATS) accounts, NOW accounts, share draft accounts, telephone or preauthorized transfer accounts, ineligible acceptances, and obligations issued by affiliates maturing in seven days or less. Net transaction accounts are total transaction accounts less amounts due from other depository institutions and less cash items in the process of collection.

For a more detailed description of these deposit types, see Form FR 2900 at ww.federalreserve.gov/boarddocs/reportforms.
2. The amount of net transaction accounts subject to a reserve requirement ratio of zero percent (the "exemption amount") is adjusted each year by statute. The exemption amount is adjusted upward by 80 percent of the previous year's (June 30 to June 30 ) rate of increase in total reservable liabilities at all depository institutions. No adjustment is made in the event of a decrease in such liabilities.
3. The amount of net transaction accounts subject to a reserve requirement ratio of 3 percent is the "low reserve tranche." By statute, the upper linnit of the low reserve tranche is adjusted each year by 80 percent of the previous year's (June 30 to June 30 ) rate of increase or decrease in net transaction accounts held by all depository institutions.
1.17 FEDERAL RESERVE OPEN MARKET TRANSACTIONS ${ }^{1}$

Millions of dollars

1. Sales, redemptions, and negative figures reduce holdings of the System Open Market Account; all other figures increase such holdings
2. Transactions exclude changes in compensation for the effects of inflation on the principal of inflation-indexed securities. Transactions include the rollover of inflation compensation into new securities.

1. Latest monthly and biweekly figures are available from the Board's H. 3 (502) weekly statistical release, available at www.federalreserve.gov/releases. Historical data starting in 1959 and estimates of the effect on required reserves of changes in reserve requirements are available from the Monetary and Reserve Analysis Section, Division of Monetary Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551
2. Figures reflect adjustments for discontinuities, or "breaks," associated with regulatory changes in reserve requirements. (See also table 1.10.)
3. Seasonally adjusted, break-adjusted total reserves equal seasonally adjusted, breakadjusted required reserves (line 3) plus excess reserves (line 13).
4. Seasonally adjusted, break-adjusted nonborrowed reserves equal seasonally adjusted, break-adjusted total reserves (line 1) less total borrowings of depository institutions from the Federal Reserve (line 14).
5. The seasonally adjusted, break-adjusted monetary base consists of (1) seasonally adjusted, break-adjusted total reserves (line 1), plus (2) the seasonally adjusted currency component of the money stock, plus (3) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all those weekly reporters whose vault cash exceeds their required reserves) the seasonally adjusted, break-adjusted difference between current vault cash and the amount applied to satisfy current reserve requirements.
6. Break-adjusted total reserves equal break-adjusted required reserves (line 7) plus excess reserves (line 13).
7. To adjust required reserves for discontinuities that are due to regulatory changes in reserve requirements, a multiplicative procedure is used to estinate what required reserves
would have been in past periods had current reserve requirements been in effect. Breakadjusted required reserves include required reserves against transactions deposits and nonpersonal time and savings deposits (but not reservable nondeposit liabilities)
8. The break-adjusted monetary base equals (1) break-adjusted total reserves (line 5), plus (2) the (unadjusted) currency component of the money stock, plus (3) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all those weekly reporters whose vault cash exceeds their required reserves) the break-adjusted difference between current vault cash and the amount applied to satisfy cument reserve requirements.
9. Reflects actual reserve requirements, including those on nondeposit liabilities, with no adjustments to eliminate the effects of discontinuities associated with regulatory changes in reserve requirements.
10. Reserve balances with Federal Reserve Banks plus vault cash used to satisfy reserve requirements.
11. The monetary base, not break-adjusted and not seasonally adjusted, consists of (1) total reserves (line 9), plus (2) required clearing balances and adjustments to compensate for float at Federal Reserve Banks. plus (3) the currency component of the money stock, plus (4) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all those weekly reporters whose vault cash exceeds their required reserves) the difference between current vault cash and the amount applied to satisfy cument reserve requirements. Since February 1984, currency and vault cash figures have been measured over the computation periods ending on Mondays
12. Unadjusted total reserves (line 9) less unadjusted required reserves (line 11).

1.26 COMMERCIAL BANKS IN THE UNITED STATES Assets and Liabilities ${ }^{1}$ —Continued

## F. Memo items

Billions of dollars

Note. Tables 1.26. 1.27, and 1.28 have been revised to reflect changes in the Board's H. 8 statistical release, "Assets and Liabilities of Conmercial Banks in the United States," which is available at www.federalreserve.gov/releases. Table 1.27, "Assets and Liabilities of Large Weekly Reporting Commercial Banks," and table 1.28, "'Large Weekly Reporting U.S. Branches and Agencies of Foreign Banks," are no longer being published in the Statistical Supplement. Instead, abbreviated balance sheets for both large and small domestically chartered banks have been included in table 1.26 , parts $C$ and $D$. Data are both mergeradjusted and break-adjusted. In addition, data from large weekly reporting U.S. branches and agencies of foreign banks have been replaced by balance sheet estimates of all foreign-related institutions and are included in table 1.26, part E. These data are break adjusted.

1. Covers the following types of institutions in the fifty states and the District of Columbia: domestically chartered conmercial banks that submit a weekly report of condition (large domestic): other domestically chartered commercial banks (small domestic): branches and agencies of foreign banks, and Edge Act and Agreement corporations (foreign-related institutions). Excludes international banking facilities. Data are Wednesday values or pro rata averages of Wednesday values. Large domestic banks constitute a universe: data for small domestic banks and foreign-related institutions are estimates based on weekly samples and on quarter-end condition reports. Data are adjusted for breaks caused by reclassifications of assets and liabilities.

The data for large and small domestic banks presented on pp. 17-19 are adjusted to remove the estimated effects of mergers between these two groups. The adjustment for mergers changes past levels to make them comparable with current levels. Estimated quantities of balance sheet items acquired in mergers are removed from past data for the bank group that contained the acquired bank and put into past data for the group containing the acquiring bank. Balance sheet data for acquired banks are obtained from Call Reports, and a ratio procedure is used to adjust past levels.
2. Treasury securities are liabilities of the U.S. Treasury. Agency securities are liabilities of U.S. government agencies and U.S. government-sponsored enterprises. 3. Excludes federal funds sold to, reverse RPs with, and loans made to commercial banks in the United States, all of which are included in "Interbank loans."
4. Consists of reverse RPs with brokers and dealers and loans to purchase and carry securities.
5. Includes vault cash, cash items in process of collection, balances due from depository institutions, and balances due from Federal Reserve Banks.
6. Excludes the due-from position with related foreign offices, which is included in "Net due to related foreign offices.
7. Excludes unearned income, reserves for losses on loans and leases, and reserves for transfer risk. Loans are reported gross of these items

1.42 U.S. GOVERNMENT SECURITIES DEALERS Transactions ${ }^{1}$

Millions of dollars, daily averages

Note. Major changes in the report form filed by primary dealers induced a break in the dealer data series as of the week ending July 4, 2001. Current weekly data may be found at the Federal Reserve Bank of New York website (www.ny.frb.org/narkets/primarydealers.html) under the Primary Dealer heading.

1. The figures represent purchases and sales in the market by the primary U.S. government securities dealers reporting to the Federal Reserve Bank of New York. Outright transactions include all U.S. government, federal agency, government-sponsored enterprise, mortgage-
backed, and corporate securities scheduled for immediate and forward delivery, as well as all U.S. government securities traded on a when-issued basis between the announcement and issue date. Data do not include transactions under repurchase and reverse repurchase (resale) agreements. Averages are based on the number of trading days in the week.
2. Outright Treasury inflation-protected securities (TIPS) transactions are reported at principal value, excluding accrued interest, where principal value reflects the original issuance par amount (unadjusted for inflation) times the price times the index ratio.

[^3]1.52 DOMESTIC FINANCE COMPANIES Owned and Managed Receivables ${ }^{1}$

Billions of dollars, amounts outstanding

Note. This table has been revised to incorporate several changes resulting from the benchmarking of finance company receivables to the June 1996 Survey of Finance Compamies. In that benchmark survey, and in the monthly surveys that have followed, more-detailed breakdowns have been obtained for some components. In addition, previously unavailable data on securitized real estate loans are now included in this table. The new information has resulted in some reclassification of receivables among the three major categories (consumer, real estate, and business) and in discontinuities in some component series between May and June 1996.

Includes finance company subsidiaries of bank holding companies but not of retailers and banks. Data in this table also appear in the Board's G. 20 (422) monthly statistical release, available at www.federalreserve.gov/releases.

1. Owned receivables are those carried on the balance sheet of the institution. Managed receivables are outstanding balances of pools upon which securities have been issued; these balances are no longer carried on the balance sheets of the loan originator. Data are shown
before deductions for unearned income and losses. Components may not sum to totals because of rounding.
2. Excludes revolving credit reported as held by depository institutions that are subsidiaries of finance companies.
. Includes personal cash loans, mobile home loans, and loans to purchase other types of consumer goods, such as appliances, apparel, boats, and recreation vehicles.
3. Outstanding balances of pools upon which securities have been issued; these balances are no longer carried on the balance sheets of the loan originator.
4. Credit arising from transactions between manufacturers and dealers--that is. floor plan financing.
5. Includes loans on commercial accounts receivable, factored commercial accounts, and receivable dealer capital; small loans used primarily for business or farm purposes; and wholesale and lease paper for mobile homes, campers, and travel trailers.

Note. The statistics in the G. 17 statistical release cover output, capacity, and capacity utilization in the industrial sector, which the Federal Reserve defines as manufacturing, mining, and electric and gas utilities. Manufacturing consists of those industries included in the North American Industry Classification System, or NAICS, manufacturing plus those industries-logging and newspaper, periodical, book, and directory publishing-that have traditionally been considered manufacturing and included in the industrial sector

Data in this table also appear in the Board's G. 17 (419) monthly statistical release, on
the Board's website www.federalreserve.gov/releases/g17. The latest historical revision of the
industrial production index and the capacity utilization rates was released in December 2004 The recent annual revision is described in the Winter 2005 issue of the Bulletin.
2. Monthly highs. 1978-80; monthly lows. 1982.
2. Monthly highs. 1978-80; monthly lows. 1982.
3. Monthly highs, 1988-89: monthly lows, 1990-91.
4. Capacity utilization is calculated as the ratio of the Federal Reserve's seasonally adjusted index of industrial production to the corresponding index of capacity.

1. Averages of certified noon buying rates in New York for cable transfers. Data in this table also appear in the Board's G. 5 (405) monthly statistical release, available at www.federalreserve.gov/releases.
2. U.S. cents per currency unit.
3. The euro is reported in place of the individual euro area currencies. By convention, the rate is reported in U.S. dollars per euro. The bilateral currency rates can be derived from the euro rate by using the fixed conversion rates (in currencies per euro) as shown below:
1.936.27 Italian lire
40.3399 Luxembourg francs
2.20371 Netherlands guilders
200.482 Portuguese escudos 166.386 Spanish pesetas
4. Starting with the January 2004 Statistical Supplement to the Federal Reserve Bulletin, revised index values resulting from the periodic revision of data that undertie the calculated trade weights are reported. For more infommation on the indexes of the foreign exchange value of the dollar, see Federal Reserre Bulletin, vol. 84 (October 1998), pp. 81 1-818.
5. Weighted average of the foreign exchange value of the U.S. dollar against the currencies of a broad group of U.S. trading partners. The weight for each currency is computed as an average of U.S. bilateral import shares from and export shares to the issuing countiy and of a measure of the importance to U.S. exporters of that country's trade in third country markets. The source for exchange rates not listed in the table above but used in the calculation of this index is Reuters Limited.
6. Weighted average of the foreign exchange value of the U.S. dollar against a subset of broad index currencies that circulate widely outside the country of issue. The weight for each currency is its broad index weight scaled so that the weights of the subset of currencies in the index sum to one.
7. Weighted average of the foreign exchange value of the U.S. dollar against a subset of broad index currencies that do not circulate widely outside the country of issue. The weight for each currency is its broad index weight scaled so that the weights of the subset of currencies in the index sum to one. The source for exchange rates not listed in the table above but used in the calculation of this index is Reuters Limited.

[^9]4.23 TERMS OF LENDING AT COMMERCIAL BANKS Survey of Loans Made, May 2-6, 2005—Continued
F. Commercial and industrial loans by date pricing terms were set and commitment status

Note. The Survey of Terms of Business Lending collects data on gross loan extensions made during the first full business week in the mid-month of each quarter. The authorized panel size for the survey is 348 domestically chartered commercial banks and 50 U.S. branches and agencies of foreign banks. The sample data are used to estimate the terms of loans extended during that week at all domestic commercial banks and all U.S. branches and agencies of foreign banks. Note that the terms on loans extended during the survey week may differ from those extended during other weeks of the quarter. The estimates reported here are not intended to measure the average terms on all business loans in bank portfolios. The data in this table also appear in the Board's E. 2 statistical release, available on the Board's website at: www.federalreserve.gov/releases.

1. As of March 31,2003, assets of the large banks were at least $\$ 3.7$ billion. Median total assets for all insured banks were roughly $\$ 93$ million. Assets at all U.S. branches and agencies averaged $\$ 3.3$ billion.
2. The "maturity/repricing" interval measures the period from the date the loan is made until it first may be repriced or matures. For floating-rate loans that are subject to repricing at any time-such as many prime-based loans-the maturity/repricing interval is zero. For floating-rate loans that have a scheduled repricing interval, the maturity/repricing interval measures the number of days between the date the loan is made and the date on which it is next scheduled to reprice. For loans having rates that remain fixed until the loan matures (fixed-rate loans), the "maturity/repricing" interval measures the number of days between the date the loan is made and the date on which it matures. Loans that reprice daily mature or reprice on the business day after they are made. Owing to weekends and holidays, such loans may have "maturity/repricing" intervals in excess of one day; such loans are not included in the 2 to 30 day category.
3. A complete description of these risk categories is available on the Board's website at 'http://www.federalreserve.gov/boarddocs/reportforms/ReportDetail.cfin?WhichFormId=

FR_2028a/s." The category "Moderate risk" includes the average loan, under average economic conditions, at the typical lender. The "Other" category includes loans rated "Acceptable" as well as special mention or classified loans. The weighted-average risk rating published for loans in rows 31-36 are calculated by assigning a value of "1" to minimal risk loans; "2" to low risk loans; " 3 " to moderate risk loans, "4" to acceptable risk loans; and " 5 " to special mention and classified loans. These values are weighted by loan amount and exclude loans with no risk rating. Some of the loans in table rows $1,6,11,16,21,26$, and 31-36 are not rated for risk.
4. Effective (compounded) annual interest rates are calculated from the stated rate and other tems of the loans and weighted by loan amount. The standard error of the loan rate for all commercial and industrial loans in the current survey (line 1 , column 1) is 0.22 percentage point. The chances are about two out of three that the average rate shown would differ by less than this amount from the average rate that would be found by a complete survey of the universe of all banks.
5. Average maturities are weighted by loan amount and exclude loans with no stated maturities.
6. For loans made under formal commitments, the average time interval between the date on which the loan pricing was set and the date on which the loan was made, weighted by the loan amount. For loans under informal commitment, the time interval is zero.
7. Prime-based loans are based on the lending bank's own prime rate, any other lender's prime rate, a combination of prime rates, or a publicly reported prime rate. Loans with "other" base rates include loan rates expressed in terns of any other base rate (e.g., the federal funds rate or LIBOR) and loans for which no base rate is used to determine the loan rate.
8. For loans made under formal commitments.

* The number of loans was insufficient to provide a meaningful value.

1. Data are aggregates of categories reported on the quarterly form FFIEC 002, "Report of Assets and Liabilities of U.S. Branches and Agencies of Foreign Banks." The form was first used for reporting data as of June 30, 1980, and was revised as of December 31, 1985. From November 1972 through May 1980. U.S. branches and agencies of foreign banks had filed a monthly FR 886a report. Aggregate data from that report were available through the Federal Reserve monthly statistical release G. 11, last issued on July 10, 1980. Data in this table and in the G. 11 tables are not strictly comparable because of differences in reporting panels and in definitions of balance sheet items.
2. Includes the District of Columbia.
3. Effective December 1981, the Federal Reserve Board amended Regulations D and Q to pernnit banking offices located in the United States to operate international banking facilities (IBFs). Since December 31, 1985, data for IBFs have been reported in a separate column. These data are either included in or excluded from the total columms as indicated in the headings. The notation "n.a." indicates that no IBF data have been reported for that item,
either because the item is not an eligible IBF asset or liability or because that level of detail is not reported for IBFs. From December 1981 through September 1985, IBF data were included in all applicable items reported.
4. Total assets and total liabilities include net balances, if any, due from or owed to related banking institutions in the United States and in foreign countries (see note 5). On the former monthly branch and agency report, available through the G. 11 monthly statistical release, gross balances were included in total assets and total liabilities. Therefore, total asset and total liability figures in this table are not comparable to those in the G. 11 tables.
5. Related depository institutions includes the foreign head office and other U.S. and foreign branches and agencies of a bank, a bank's parent holding company, and majorityowned banking subsidiaries of the bank and of its parent holding company (including subsidiaries owned both directly and indirectly).
6. In some cases, two or more offices of a foreign bank within the same metropolitan area file a consolidated report.
