CHART SHOWING BY INCOME CLASSES, THE NUMBER OF PERSONAL RETURNS FILED FOR THE CALENDAR YEAR ENDED DECEMBER 31, 1917.

140100-19. (To face page 5.)

STATISTICS OF INCOME, CALENDAR YEAR 1917.

TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER OF INTERNAL REVENUE,
Washington, D. C., October 2, 1919.

HON. CARTER GLASS,
Secretary of the Treasury.

SIR: I have the honor to transmit the following report relating to the statistics of income compiled from the returns of net income (personal, corporate, and partnership) for the calendar year ended December 31, 1917.

PERSONAL INCOME-TAX RETURNS.

Intensive study was made only with respect to those reporting income of \$2,000 or more. This limitation has saved the Bureau the labor and cost of a critical analysis of 1,640,758 returns, the data from which would have been of no practical benefit for the purposes of the statistics.

The total number of personal returns filed for the calendar year ended December 31, 1917, was 3,472,890, reporting net income amounting to \$13,652,383,207. These exceeded those for 1916 by 3,035,854 returns and \$7,353,805,587 in net income reported.

Returns reporting net income of \$2,000 and over numbered 1,832,132, with total net income of \$11,191,246,207. The income-tax (normal tax, surtax, and war-excess profits tax) of these returns amounted to \$675,249,450. The average tax per individual was \$368.56 and the average tax rate 6.03 per cent of the aggregate net income.

The following table visualizes the distribution of the personal returns by income classes, showing the number of returns filed, the amount of net income, and the tax yield; also cumulative totals and relative percentages:

COMPARATIVE TABLES, PERSONAL RETURNS, CALENDAR YEARS 1917 AND 1916.

The following comparative tables show, by income classes and by States, the number of returns filed, the total net income reported, and the tax yield. Among the outstanding features of these tables are the increases for 1917 in the number of returns and total net income reported in the smaller income classes, and the falling off in the larger income classes.

CLASSIFICATION OF PERSONAL RETURNS, BY SEX AND FAMILY RELATIONSHIP.

In studying the nature of the returns in connection with the specific personal exemptions provided by the income-tax law, a distribution of the returns was made according to the status of family relationship, a résumé of which is given in the table below:

Distribution of income from personal returns reporting net incomes of \$2,000 and over, calendar year 1917, by sex and family relationship.—(Summary from Tables 4 and 5.)

SERVICE, BUSINESS, AND PROPERTY AS SOURCES OF INCOME (PERSONAL RETURNS).

The income-producing factors in the United States in so far as they are reflected by the personal returns of net income are exhibited in the following table, which shows both for 1917 and 1916 the aggregate amounts reported under the two main divisions, "Income from personal service" and "Income from property."

Of especial interest is the proportion from each source and the variations in the amounts reported by each source between 1917 and 1916.

² Compiled from returns reporting net incomes of \$2,000 and over.

³ Compiled from returns reporting net incomes of \$3,000 and over.

In the study of the above table it should be observed that in 1917 the figures represent net amounts, the gross income having been reduced by the deductions applicable to each source. The item "General deductions" represents such other deductions as were not chargeable to any of the sources of income and includes interest on personal indebtedness, taxes on dwellings and personal property, and other taxes not reported elsewhere; also other miscellaneous deductions, not including contributions. The amounts shown for 1916 represent gross income, the general deductions not having been allocated to the several sources.

**INCOME FROM PERSONAL SERVICE, BUSINESS, AND PROPERTY BY
INCOME CLASSES (PERSONAL RETURNS).**

A further distribution of income from personal service and business, and income from property is shown by income classes in the succeeding table. This table also shows by percentages the proportion from each source.

Income from personal service and business compared with income from property, by income classes, net incomes of \$2,000 and over, calendar year 1917.—(Summary from Table 7).

PARTNERSHIP WAR EXCESS-PROFITS TAX.

The revenue act of 1917 provides that in addition to the taxes under existing law and under this act, there shall be levied, assessed, collected, and paid for each taxable year upon the income of every corporation, partnership, or individual, a tax known as war excess-profits tax. This is the first income tax specifically assessed on the income of partnerships as such. Previously the income of partnerships was taxed only as reported in the returns of net income of the individual partners.

There were 31,701 partnership war excess-profits tax returns filed, showing total tax of \$103,887,984. (Table 11.)

CORPORATE INCOME-TAX RETURNS.

Corporate income-tax returns for the calendar year 1917, numbered 351,426. Of these 232,079 reported net income aggregating \$10,730,360,211, producing income tax amounting to \$503,698,029, war excess-profits tax of \$1,638,747,740, total, \$2,142,445,769. For the calendar year 1916, the returns numbered 341,253, of which 206,984 reported net income amounting to \$8,765,908,984, yielding a tax of \$171,805,150. The increase over 1916, was 10,173 in total number of returns, 25,095 in the number of returns reporting net income, \$1,964,451,227 in net income and \$1,970,640,619 in taxes.

GROSS INCOME, NET INCOME, AND TAXES (CORPORATE RETURNS).

The great inflation in prices experienced in 1917, and its corresponding effect on business turnover, is forcibly brought to the attention in the accompanying table, in which the corporate income returned for 1917 and 1916 is compared.

RETURNS OF UNDISTRIBUTED NET INCOME.

The revenue act of 1917 required every corporation to file a return and to pay a tax of 10 per cent upon such amount of net income remaining undistributed six months after the end of each calendar or fiscal year as was not actually invested and employed in the business or retained for employment in the reasonable requirements of the business or was not invested in obligations of the United States issued after September 1, 1917.

Number of returns filed 6,038
 Total tax yield \$775,125.12

INCOME RETURNS BY STATES.

COMBINED PERSONAL AND CORPORATE INCOME.

The following table exhibits by States and Territories the combined personal and corporate incomes and income taxes for the calendar year 1917. In regard to this table the following is quoted from the "Statistics of Income, compiled from the returns for 1916":

The figures do not represent, however, what may be called the geographical distribution of income. They are based upon the returns filed in each State. An individual files his income-tax return in the State in which he resides and a corporation files its income tax in the State in which its principal place of business is located. Consequently income reported by an individual or corporation in one State may have been derived from sources in other States.

* * * From the foregoing it will be clear that there is no way of ascertaining from the income-tax returns the amount of income earned in the respective States or the amount of tax paid on that basis.

FOREIGN INVESTMENTS IN THE UNITED STATES.

The income reported by nonresident aliens and corporations controlled by nonresident aliens is shown in Table 21. The number of personal returns was 3,602, reporting net income of \$75,926,572, and total tax (normal, surtax, and war excess-profits tax) amounting to \$7,116,824. The total number of foreign corporations making returns was 838, of which number 706 showed a net income aggregating \$62,692,382, and total tax amounting to \$5,692,224.

PROGRESS OF INCOME TAXATION.

A general review of the increase in the number of returns and income reported for the years since the inception of the present epoch of income taxation is given in the following comparative tables:
