## STATISTICS OF INCOME, CALENDAR YEAR 1921.

TREASURY DEPARTMENT,  
OFFICE OF COMMISSIONER OF INTERNAL REVENUE,  
*Washington, D. C., October 4, 1923.*

SIR: I have the honor to transmit the following statistical report of economic data compiled from the returns of individuals, corporations, and partnerships reporting net income for the calendar year ended December 31, 1921. There are also included herein tables prepared from the Federal estate-tax returns filed during the year.

### RETURNS FILED.

The number of individuals who filed income-tax returns for the calendar year ended December 31, 1921, was 6,662,176. The aggregate net income reported by these returns was \$19,577,212,528, and the tax (normal tax and surtax) amounted to \$719,387,106. As compared with 1920, the above figures show a falling off of 597,768 in the number of returns filed, and a reduction in the total net income reported amounting to \$4,158,416,655, as well as a decrease of \$355,666,580 in the total tax.

The number of corporation income-tax returns for the calendar year 1921, other than those of personal service corporations, was 356,397. Of these, 171,239 reported net income amounting to \$4,336,047,813; income tax \$366,443,621; war-profits and excess-profits tax \$335,131,811; total tax \$701,575,432.

For the calendar year 1920 the number of corporation returns was 345,595, of which 203,233 reported net income totaling \$7,902,654,813 and tax aggregating \$1,625,234,643.

The aggregate net income and total tax (individuals and corporations) for each of the years 1917-1921, inclusive, are as follows:

Year.	Net income.	Increase or decrease.	Income and profits tax.	Increase or decrease.
1917.....	\$24,382,743,418		\$2,833,938,723	
1918.....	24,286,150,604	-96,592,814	4,286,486,257	\$1,452,547,534
1919.....	29,270,909,906	4,984,759,302	3,444,971,682	-841,514,575
1920.....	31,638,283,996	2,367,374,090	2,700,288,329	-744,683,353
1921.....	23,913,260,341	-7,725,023,655	1,420,962,538	-1,278,325,791

### PERSONAL INCOME-TAX RETURNS.

In the following table is visualized the distribution of the personal returns by States and Territories, as well as the per capita income and tax, according to the population reported by the Fourteenth Census of the United States, 1920. As relating to the entire popu-

lation of the United States subject to Federal income tax, the proportion filing returns was 6.28 per cent. The per capita net income reported was \$184.65 and the per capita income tax was \$6.79.

On the basis of returns filed, the average net income reported for 1921 was \$2,938.56, the average amount of tax \$107.98, and the average tax rate 3.67 per cent.

## INCOME FROM BUSINESS (PERSONAL RETURNS).

The income reported by individuals as having been derived from business, other than from partnerships, is shown according to industrial divisions in the following table. These data represent only such amounts reported by individuals as were derived from business operations conducted as sole proprietors and do not necessarily indicate the principal occupations of, or the total income reported by, the persons making the returns.

## PARTNERSHIPS AND PERSONAL SERVICE CORPORATIONS.

Returns filed by partnerships and personal service corporations are not subject to tax as such, the income reported being included in the returns of net income filed by the individual members or stockholders according to their distributive share, whether distributed or not.

The number of returns of net income for 1921 filed by these two forms of association was:

Partnerships.....	259,359
Personal service corporations.....	5,500
<b>Total.....</b>	<b>264,859</b>

## CORPORATION INCOME TAX RETURNS.

The table immediately following shows the returns of corporations distributed by industrial groups and segregated according to those reporting net income and those reporting no net income. In the "Transportation and Other Public Utilities" group, both gross income and general deductions should be greatly in excess of the amounts shown. This is due to railroad and other utility corporations, to a large extent, reporting on the face of the return merely the amount of net income or deficit.

To have inspected the numerous supporting schedules of these returns for the purpose of compiling the gross income and general deductions was inexpedient, due to the cost and the additional time that it would have required.

## INCOME RETURNS BY STATES.

## COMBINED PERSONAL AND CORPORATION INCOME AND TAX.

The following table exhibits by States and Territories the combined personal and corporation incomes and income taxes for the calendar year 1921. The amounts do not represent, however, what may be called the geographical distribution of income. The figures are compiled from the returns filed in each State. An individual files his income-tax return in the district in which his legal residence or principal place of business is located, and a corporation files its income-tax return in the district in which its principal place of business

or the principal office or agency is located. Consequently, income reported by an individual or corporation in one State may have been derived from sources in other States.

From the foregoing it will be clear that there is no way of ascertaining from the income-tax returns the amount of income earned in the respective States or the amount of tax paid on that basis.

<sup>1</sup> In 1916 the net income on returns filed separately by husband and wife is combined and the total appears as one return. In all other years the returns of married women filed separately are included in their individual income classes independently of husband's income.

NOTE.—The returns for 1913 are omitted, as they pertain only to the last 10 months of that year.

In the study of the foregoing table it should be observed that in all the years excepting 1916 the figures for each source of income are the positive gain items reported, and represent the gross income, less losses and other deductions applicable to each source. Wherever schedules within the returns showed net losses, such losses are included in general deductions, which represent in addition to these losses such other deductions as were not chargeable to any of the sources of income.

The source of income items for 1916 represent gross income, the deductions not having been allocated to the several sources but reported in lump sum in the returns under the heading "General deductions."

**PERSONAL RETURNS BY COUNTIES AND CITIES.**

The number of personal returns filed for the calendar year 1921 in each county of the United States, as well as in each city having a population of 5,000 or over, are shown elsewhere in this publication. The compilation does not represent an exact count of the returns for each of the counties or cities but is a very close approximation of the number filed and is arrived at as follows: Index cards are prepared in the offices of the collectors of internal revenue for the returns of net income filed in each collection district. These cards are arranged by counties and cities and the number is ascertained by measurement on the basis of a certain number of cards to the inch.

**FEDERAL ESTATE TAX RETURNS.**

There are printed on the following pages a series of statistical tables prepared from an inspection of estate tax returns filed from January 16, 1922, to December 31, 1922, inclusive. These tables are based on estate tax returns actually filed with the bureau during this period as distinguished from the number of taxable estates originating within the period (the returns not being due until one year after the date of death), and the tables are in continuance of the estate tax tables previously published, which covered returns filed from September 9, 1916, the effective date of the original estate tax act, to January 15, 1922, the date as of which the first statistical analysis of estate tax returns was made.

The Federal estate tax as imposed by the several revenue acts is a tax levied on the transfer of the net estate of a decedent as defined by the statute, and the tax is graduated according to the size of the net estate. In these tables the size of the net estate is divided into blocks corresponding to the successive taxable blocks as fixed by the revenue acts. The tax, while popularly referred to as a Federal inheritance tax, is an estate tax and not an inheritance tax, the distinction being that the tax is levied on an estate in its entirety, whereas in the case of inheritance taxes the tax is generally levied on the share received by the individual legatee or beneficiary and is measured by that amount. The net estate as reflected in these tables is the gross estate less the sum of the authorized deductions, including in the case of resident decedents a specific exemption of \$50,000 which does not apply in the case of nonresident decedents. The gross estate represents the estate of the decedent within the usual meaning of that term, together with certain items of property specifically included by statute as in the case of transfers made in contemplation of death or intended to take effect at or after death. For further explanation, reference should be made to Regulations 63 relating to estate tax.

The two statistical analyses made of returns filed for the period from September 9, 1916, to December 31, 1922, show the following totals:

	Returns filed.	Tax.
Previous statistics as published.....	45, 126	\$356, 516, 251
Present compilation.....	13, 506	118, 776, 541
<b>Total.....</b>	<b>58, 632</b>	<b>475, 292, 792</b>

The tables are based on the data given in the returns as filed but not as audited. The tax shown does not correspond with actual collections made during this period for the reason that payment may be made at a later date than when the returns are filed and for the further reason that field investigation and office audit may disclose additional tax which is not reflected in these tables.

Table A covers only returns filed for estates of resident decedents, and gives a detailed statistical analysis showing the distribution of the gross estate into the several forms of wealth owned by the decedents or into the several classifications specifically included as taxable, as in the case of taxable transfers, and the distribution of the deductions according to the several classifications entered on the returns and established by the revenue acts. The table further shows this distribution according to the size of the net estate into taxable blocks, and the relative percentages of the several classifications. This analysis, which has not been attempted before, presents an authentic and representative statement showing the distribution of estates into the several forms of wealth owned by the decedents in the case of all estates amounting to more than \$50,000 for which returns were filed during this period. These returns are rendered more valuable for this purpose inasmuch as they represent estates having their situs in every collection district within the United States and this composite picture of the distribution of national wealth in estates of this importance affords a unique opportunity to obtain an accurate survey which is not only of great value to the administrative officers of the bureau but should prove of general interest as an important contribution to the statistics of wealth.

Table B is a statistical analysis of returns filed for the estates of nonresident decedents which shows the distribution by the size of the net estate. A detailed analysis as in the case of Table A was not attempted as to these returns; the experience of the bureau, however, in their audit shows that the property of nonresident decedents consists largely of cash and securities.

Tables C and D show by collection districts the total number of returns, the aggregate gross estate, the total amount of deductions, the total net estate subject to tax, and the total tax. If a summary for any particular State is desired it can be obtained by combining the data for the collection districts within the State as in the case of the two California districts.

Table E shows the simple and cumulative distribution by size of the net estate and is of interest and importance as indicating the source from which the principal part of the tax is actually collected and also as indicating for administrative purposes the relative importance of the net estates falling within the several blocks.
