Exports and imports of less than 500 short tons are not subdivided by commodity group; color indicates predominant commodity group only. For exports, a dominant commodity group is at least 30% of the total for exports; for imports, 40%.

All tonnage data based on sea and air trade only; shipments to and from Canada and Mexico by rail and truck are excluded due to unavailability of tonnage data; value data, however, does include land shipments to and from Canada and Mexico.

Boundary representation is not necessarily authoritative.
