Price Movements

March 1978

Summary

The Producer Price Index for Finished Goods moved up 0.6 percent from February to March on a seasonally adjusted basis. This was considerably less than the 1.1 percent advance in February but was about the same as in each month during the October-to-January period (table A). The Finished Goods Price Index reflects only changes in prices received by producers for goods that are in the form in which they eventually are sold to final users. (See "Brief Explanation of Producer Price Indexes," page 78.)

Prices of food products continued their rise begun late last year. Food items at the finished and crude stages of processing, however, rose much less in March than in February. This slowdown was partly caused by an improvement in supplies of some items that had been limited earlier by severe winter weather. Price increases for non-food commodities at the intermediate (semifinished) stage

of processing also moderated, largely because of slower advances for steel and construction materials. Finished and crude nonfood products increased about the same as in most recent months.

Among finished goods, prices for consumer foods rose 0.8 percent, much less than in February. The indexes for other consumer goods and finished producer goods moved up about as much as in recent months (table B). The index for intermediate materials rose 0.8 percent, nearly as much as in February and January. (Intermediate materials are semifinished commodities that have been processed but require further processing before they become finished goods.) The Producer Price Index for crude materials increased 1.6 percent over the month—the sixth consecutive monthly advance, although smaller than those recorded in February and January. (Crude materials are products entering the market for the first time which have not been

manufactured or fabricated but will be processed before becoming intermediate or finished goods.)

Before seasonal adjustment, the Producer Price Index for Finished Goods increased 0.4 percent to 189.0 (1967=100). Over the year, the Finished Goods Price Index was up 6.5 percent. The finished producer goods index rose 7.6 percent from March 1977 to March 1978, the consumer foods index was up 7.2 percent, and the index for consumer finished goods excluding foods was 5.3 percent higher than a year earlier. The Producer Price Index for intermediate materials increased 6.0 percent over the past year, and the crude materials price index was up 5.1 percent.

Finished goods

Consumer finished goods. The Producer Price Index for consumer finished goods (those eventually sold to retailers) moved up much less in March (0.5 percent) than in February (1.3 percent), principally because of a deceleration in price increases for consumer foods. On the other hand, durable good prices rose more in March than in the preceding month, and prices for nondurable goods increased about the same as in February.

The index for consumer foods rose 0.8 percent over the month, following advances of 2.9 and 1.1 percent in February and January, respectively. Prices turned down after increasing in the previous month for pork, processed poultry, refined sugar in consumer-size packages, and fresh fruits. Prices rose less in March than in February for beef and veal, eggs, and dairy products. On the other hand, prices turned up in March after February declines for vegetable oil end products, flour base mixes and

doughs, and milled rice. Confectionery end products increased after no change in February. Prices for roasted coffee fell less in March than in the previous month.

The consumer durables index increased 0.6 percent in March, more than in February (0.3 percent) and nearly as much as in January (0.7 percent). Jewelry prices turned up following a decrease in February, and prices for household appliances rose much more in March than in the preceding month. Increases for passenger cars, mobile homes, and floor coverings were about the same as in February. Prices moved up more slowly than in February for home electronic equipment and household furniture.

Prices for consumer nondurable goods other than foods rose 0.3 percent over the month, about the same as in each month since October. Higher prices were recorded for cosmetics and other toilet preparations, pharmaceutical preparations, sanitary papers and health products, alcoholic beverages, and luggage and small leather goods. Prices were lower for gasoline, home heating oil, and tires and tubes.

Finished producer goods. The Producer Price Index for finished producer goods advanced 0.6 percent in March, the same as the average monthly increase during the past 12 months. Some of the largest price increases were registered for food products, machinery, commercial furniture, mining machinery and equipment, machine shop products, machine tools, and industrial material handling equipment.

Intermediate materials

The Producer Price Index for intermediate materials, supplies, and components rose 0.8 percent over the month

after seasonal adjustment, about the same as in February and January but much more than the changes in any of the 8 months prior to that.

The index for intermediate materials, excluding materials used in food manufacturing and manufactured animal feeds moved up 0.5 percent over the month, less than the February and January increases. The March deceleration was largely caused by smaller increases for steel mill products and construction-related materials such as millwork, fabricated structural metal products, and concrete products. Prices of coke, synthetic rubber, and motor vehicle parts also moved up less than in February. Prices for inedible fats and oils declined slightly in March after 5 months of steep increases, and prices for residual fuel and diesel fuel also moved down. On the other hand, precious metals, some aluminum products, electric power, and gray fabrics rose more than in the preceding month.

The index for intermediate foods and feeds (a composite index introduced this month, combining stage-of-processing categories for intermediate materials for food manufacturing and manufactured animal feeds) advanced 5.4 percent in March, seasonally adjusted, considerably more than the increases of 2.1 and 1.8 percent in February and January, respectively. Prices of soybean meal, crude vegetable oils, flour, and confectionery materials turned up following February declines. Prices of refined sugar used in food manufacturing, however, followed the reverse pattern, falling in March after rising in the previous month.

Crude materials

The Producer Price Index for crude materials for further processing moved up 1.6 percent in March, seasonally adjusted, less than the 3.2 and 2.0 percent advances registered in February and January, respectively. The slowdown was due to smaller price rises for crude foodstuffs and feedstuffs, which rose 1.8 percent in March after much larger increases in the first 2 months of the year. Prices of hay, raw cane sugar, and live poultry moved down following several months of generally rising prices, and green coffee decreased for the third consecutive month. Hog prices continued to rise but much less than in recent months. On the other hand, prices for grains, fluid milk, and cattle rose more than in the previous month; cocoa bean and oilseed prices turned up after February declines.

Crude materials other than crude foodstuffs and feedstuffs rose 1.5 percent over the month, somewhat more than in February but about the same as in January. Prices of natural gas, crude petroleum, and plant and animal fibers advanced more than in most recent months. The coal index rose nearly as much as in the preceding month, when it recorded the largest increase since February 1977. On the other hand, nonferrous scrap prices fell for the first time since last September, and wastepaper declined much more than in February.

¹ Commodities at the subproduct class (6-digit) level are assigned to stage of processing (SOP) indexes according to the amount of processing, manufacturing, or assembling to which those commodities are subjected before they enter the market. The weight of each subproduct class is allocated among the various SOP indexes in accordance with the relative proportion of output consumed at each level of processing. SOP allocations are placed within parentheses for those commodity groupings whose subproduct classes are not uniformly divided among different stage of

processing categories. Such figures indicate the weighted average allocated to a particular stage of processing category as of December 1977.

¹ Seasonal commodity—no price available this month.

² Some of the titles of the individual commodity price indexes included in this grouping are not shown.

³ Not available.

⁴ Prices for some items in this grouping are lagged 1 month.

⁵ Regional price indexes for bituminous coal, industrial sizes, contract are presented in table 8 of this report.

⁶ Prices for natural gas (05-31) are lagged 1 month.

⁷ Includes only domestic production.

⁸ Prices for gasoline (05-71), light distillate (05-72), middle distillate (05-73), and residual fuels (05-74) are lagged 1 month.

⁹ Regional refined petroleum product prices and price indexes are presented in table 7 of this report.

¹⁰ Some prices for industrial chemicals (05-1) are lagged 1 month.

Table 10. Producer price indexes: Changes in commodity specifications, March 1978

Commodity code	New specification	Old specification
03-43-03-26	100% textured polyester doubleknit twill stitch or interlock, 10½-12 ounces/linear yard, 60" - 64"; manufacturer to manufacturer, 10,000 yards or more, f.o.b. mill or freight allowed, per yard.	100% textured polyester piece dyed double knit twill stitch, 10½-12 ounces/linear yard, 60" dark shades; manufacturer to manufacturer, 10,000 yards or more, f.o.b. mill or freight allowed, per yard.
06-36-04-32	Other analgesic tablets or powders, containers of 6-12; manufacturer to wholesaler, f.o.b. destination or delivered, per dozen containers.	Other analgesic tablets, containers of 12; manufacturer to wholesaler, f.o.b. destination or delivered, per dozen containers.
06-51-01-06	Mixed fertilizer, 10-20-20, Pennsylvania, 80 # paper bags; manufacturer to retailer, carload lots, f.o.b. factory, per net ton.	Mixed fertilizer, Pennsylvania, 5-10-10 in 100 # paper bags; producer to agent, carload lots, f.o.b. factory, per net ton.
11-35-01-17	End milling cutter, high speed steel, two flute double end mill, flattened straight shank, overall length 3¾" to 4½", length of cut 1½" to 1¾", shank diameter ½", cutter diameter ½"; manufacturer to user or distributor, f.o.b. factory or f.o.b. destination, each.	End milling cutter: high speed steel, two-flute double end mill, flattened straight shank, overall length 3¾" or 3½", length of cut 1½", shank diameter ½", cutter diameter ½"; manufacturer to user or distributor, f.o.b. factory or f.o.b. destination, each.
11-35-01-21	Round adjustable die, nominal size ½", 1¼" to 2" O.D., ½" thick, 13 threads per inch N.C., carbon steel; manufacturer to distributor, f.o.b. factory, with varying freight allowance, each.	Round adjustable die, nominal size ½", 1½" O.D., ½" thick, 13 threads per inch N.C., carbon steel; Manufacturer to distributor, f.o.b. factory, with varying freight allowance, each.
11-43-01-04	Vane type pump, fixed volume, 35 to 45 GPM, 1,000 to 1,500 psi, at 1,200 RPM; manufacturer to original equipment manufacturer in various quantities, f.o.b. factory, each.	Vane type pump, fixed volume, 35 to 45 GPM, 1,000 to 1,500 psi, at 1,200 RPM; manufacturer to original equipment manufacturer in lots of 100 to 249, f.o.b. factory, each.
11-43-01-09	Axial piston type pump, variable volume, 35 to 45 GPM, 2,500 to 3,000 psi, 1,200 to 1,800 RPM; manufacturer to original equipment manufacturer in various quantities, f.o.b. factory, each.	Axial piston type pump, variable volume, 35 to 45 GPM, 2,500 to 3,000 psi, 1,200 to 1,800 RPM; manufacturer to original equipment manufacturer in lots of 1-99, f.o.b. factory, each.
11-44-02-41	Portable belt conveyor, electric motor, 24" or 36" width, 30' or 60' length; manufacturer to distributor, f.o.b. factory, each.	Portable belt conveyor, 10 h.p. electric motor, mounted overhead, 24" belt, conveyor length 60 feet; manufacturer to distributor, f.o.b. factory, each.
11-44-03-74	Platform truck, hand, wood platform, 27" x 54" to 30" x 60", two swivel wheels and two rigid wheels; manufacturer to user or distributor, f.o.b. factory, each.	Platform truck, hand, wood platform, 27" x 54" to 30" x 60", two end racks; manufacturer to user or distributor in various quantities, f.o.b. factory, each.
11-48-05-07	Refrigeration condensing unit, air-cooled, hermetic, over 3 to 15 h.p.; manufacturer to distributor, f.o.b. plant, each.	Refrigeration condensing unit, air-cooled, hermetic, 4-15 h.p.; manufacturer to distributor, f.o.b. plant, each.
11-78-25-21	Magnetic tape cassette, audible range, C-60, low noise ferric oxide, in box; manufacturer to distributor or dealer in various quantities, f.o.b. factory or shipping point with freight prepaid on specified quantities, each.	Magnetic tape, audible range, ¼" wide by 1,800 feet long by 1 mil thick, polyester base, on 7-inch plastic reel, in box; manufacturer to distributor, in various quantities, f.o.b. factory or shipping point with freight prepaid on specified quantities, each.
13-22-01-31	Cement, Portland, types I and II; producer to dealer, carlots, bulk, f.o.b. mill, per ton.	Cement, Portland, types I and II; producer to dealer, carlots, bulk, f.o.b. mill, per cwt.

¹ Standard Transportation Commodity Code.

² The price index for total railroad freight also includes STCC groups not shown separately.

NOTE: The index is designed to measure changes in the prices of shipping goods by rail in

the United States. The representative prices and sample used for the index reflect the railroads' prices for shipping a fixed set of commodities under specified and unchanging conditions. The index is not intended to measure changes in railroad revenue or in shipper costs that result from changes in services or mode.

Brief Explanation of Producer Price Indexes

Producer Price Indexes measure average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. These data were previously presented as the Wholesale Price Index. The name "Producer Price Indexes" is now being used to reflect more accurately the coverage of the data. The sample used for calculating these indexes continues to contain nearly 2,800 commodities and about 10,000 quotations selected to represent the movement of prices of all commodities produced in the manufacturing, agriculture, forestry, fishing, mining, gas and electricity, and public utilities sectors. The universe includes all commodities produced or imported for sale in commercial transactions in primary markets in the United States.

Producer Price Indexes can be organized by stage of processing or by commodity. The stage of processing structure organizes products by degree of fabrication (i.e., finished goods, intermediate or semifinished goods, and crude materials). The commodity structure organizes products by similarity of end-use or material composition.

Finished goods are commodities that will not undergo further processing and are ready for sale to the ultimate user, either an individual consumer or a business firm. Producer finished goods, frequently called capital equipment or producers' durable equipment, include commodities such as motor trucks, farm equipment, and machine tools. Consumer finished goods include foods and other types of goods eventually purchased by retailers and used by consumers. Consumer foods include unprocessed foods

such as eggs and fresh vegetables, as well as processed foods such as bakery products and meats. Other consumer finished goods include durables—such as automobiles, household furniture, and jewelry—and nondurables—such as apparel and gasoline.

Intermediate materials, supplies, and components are commodities that have been processed but require further processing before they become finished goods. Examples of such semifinished goods include flour, cotton yarns, steel mill products, belts and belting, lumber, liquefied petroleum gas, paper boxes, and motor vehicle parts.

Crude materials for further processing include products entering the market for the first time which have not been manufactured or fabricated but will be processed before becoming finished goods. Scrap materials are also included. Crude foodstuffs and feedstuffs include items such as grains and livestock. Examples of crude nonfood materials include raw cotton, crude petroleum, natural gas, hides and skins, and iron and steel scrap.

For analysis of general price trends, stage of processing indexes are more useful than commodity grouping indexes. This is because commodity grouping indexes sometimes produce exaggerated or misleading signals of price changes by reflecting the same price movement through various stages of processing. For example, suppose that a price rise for steel scrap results in an increase in the price of steel sheet and then an advance in prices of automobiles produced from that steel. The All Commodities Wholesale Price Index and the Industrial Commodities Price Index

would reflect the same price movement three times—once for the steel scrap, once for the steel sheet, and once for the automobiles. This multiple counting occurs because the weighting structure for the All Commodities WPI uses the total shipment values for all commodities at all stages of processing. On the other hand, the Finished Goods Price Index would reflect the change in automobile prices, the Intermediate Materials Price Index would reflect the steel sheet price change, and the Crude Materials Price Index would reflect the rise in the price of steel scrap. (See illustration.)

To the extent possible, prices used in calculating Producer Price Indexes apply to the first significant commercial transaction in the United States, from the production or central marketing point. Price data are generally collected monthly, primarily by mail questionnaire. Respondents are asked to provide net prices or to provide all applicable discounts. BLS attempts to base Producer Price Indexes on actual transaction prices; however, list or book prices are used if transaction prices are not available. Most prices are obtained directly from pro-

ducing companies on a voluntary and confidential basis, but some prices are taken from trade publications or from other Government agencies. Prices generally are reported for the Tuesday of the week containing the 13th day of the month.

In calculating Producer Price Indexes, price changes for the various commodities are averaged together with weights representing their importance in the total net selling value of all commodities as of 1972. The detailed data are aggregated to obtain indexes for stage of processing groupings, commodity groupings, durability of product groupings, and a number of special composite groupings. Each index measures price changes from a reference period which equals 100.0 (usually 1967, as designated by the Office of Management and Budget). An increase of 85 percent from the reference period in the Finished Goods Price Index, for example, is shown as 185.0. This change can also be expressed in dollars, as follows: "The price of a representative sample of finished goods sold in primary markets in the United States has risen from \$100 in 1967 to \$185."

A Note about Calculating Index Changes

Movements of price indexes from one month to another are usually expressed as percent changes rather than changes in index points because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The following example illustrates the computation of index point and percent changes. (See box.)

Percent changes for 3-month and 6-month periods are expressed as annual rates that are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

<i>Index Point Change</i>	
Finished Goods Price Index	185.5
less previous index	<u>184.5</u>
equals index point change	1.0
<i>Index Percent Change</i>	
Index point change	<u>1.0</u>
divided by the previous index	184.5
equals	0.005
result multiplied by 100	0.005 x 100
equals index percent change	0.5

A Note on Seasonally Adjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted data usually are preferred because they eliminate the effect of changes that normally occur at about the same time and in about the same magnitude every year—such as price movements resulting from normal weather patterns, regular production and marketing cycles, model changeovers, seasonal discounts, and holidays.

For this reason, seasonally adjusted data more clearly reveal the underlying cyclical trends. Seasonally adjusted data are subject to revision when seasonal factors are revised each year.

The unadjusted data are of primary interest to users who need information which can be related to the actual dollar values of transactions. Individuals requiring this information include marketing specialists, purchasing agents, budget and cost analysts, contract specialists, and commodity traders. Unadjusted data generally are used in escalating contracts such as purchase agreements or real estate leases.

Bulletin 1966

The 1977 edition of the *Handbook of Labor Statistics* makes available in one volume the major series produced by the Bureau of Labor Statistics and supplements the 1975 historical edition of the *Handbook*. Generally, each table in the 1977 *Handbook* begins with 1967 data and runs through calendar year 1976. Related series from other governmental agencies and foreign countries are included.

Tables include data on:

- Labor Force
- Employment
- Unemployment
- Hours
- Productivity and Unit Labor Costs
- Compensation
- Prices and Living Conditions
- Unions and Industrial Relations
- Foreign Labor Statistics
- General Economic Data
