AND LIVING CONDITIONS**
W. John Layng, Assistant Commissioner

Producer Prices and Price Indexes is a monthly report on producer price movements including statistical tables and technical notes. It may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Subscription Price:
\$16 a year domestic (includes
one supplement)
\$4 additional foreign

Single copy \$1.80.
Supplement \$2.70.

July 1979

The Secretary of Labor has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department. Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through July 1983. Controlled circulation postage paid at Washington, D.C. Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics.

3. Crude materials price index and its components, 1969-79, 3-month annual rates of change	6	11. Producer price indexes for the output of selected SIC industries	65
Tables:		12. Percent changes in producer price indexes for the output of selected SIC industries	68
1. Producer price indexes and percent changes by stage of processing	7	13. Producer price indexes for the output of selected census product classes	71
2. Producer price indexes and percent changes for selected commodity groupings by stage of processing	8	14. Producer price indexes for the net output of selected industries and products	81
3. Producer price indexes and percent changes for selected stage-of-processing groupings, seasonally adjusted	12	15. Price indexes and percent changes for total railroad freight and selected STCC groups	82
4. Producer price indexes and percent changes for commodity groupings	13	Technical note: Test data for producer price index revision	83
5. Producer price indexes by durability of product	14	Brief explanation of producer price indexes	85
6. Producer prices and price indexes for commodity groupings and individual items	15		

Price Movements

May 1979

The Producer Price Index for Finished Goods moved up 0.4 percent from April to May on a seasonally adjusted basis. This was considerably less than in any month since August 1978 (table A). Consumer food prices fell much more than in the preceding month, but prices for other consumer goods continued to increase at a rapid pace. Prices for capital equipment rose more slowly than in April (table B).

Prices for intermediate (semifinished) goods rose less than in April but about as much as in each of the first 3 months of the year. Prices for crude materials turned up after a slight decline in the preceding month, although the May advance was smaller than most monthly increases during the past year.

Before seasonal adjustment, the Producer Price Index for Finished Goods rose 0.6 percent to 212.4 (1967=100). Over the year, the Finished Goods Price Index increased 10.0 percent. The finished consumer foods index was up 9.6 percent from May 1978 to May 1979, the index for finished consumer goods excluding foods rose 10.8 percent,

and capital equipment prices were 9.0 percent higher than a year ago. The Producer Price Index for intermediate goods increased 11.1 percent over the year, and crude material prices advanced 17.0 percent.

Finished goods

Finished consumer goods. The Producer Price Index for finished consumer goods (those eventually sold to retailers) rose 0.3 percent in May. During the first 4 months of the year, this index had risen at a seasonally adjusted annual rate of 14.0 percent. Prices for finished consumer foods declined sharply in May, and prices for nonfood consumer goods increased at about the same rapid rate as in April.

The finished consumer foods index fell 1.3 percent, after declining 0.3 percent a month earlier. The May decrease was the largest since February 1976. Beef and veal prices fell substantially after 5 consecutive months of large increases. Prices also turned down sharply after rising in April for fresh fruits, eggs, and vegetable oil end products. Pork

Table A. Percent changes from preceding month in selected stage-of-processing price indexes, seasonally adjusted¹

report may differ from those previously reported. All data are subject to revision 4 months after original publication.
r= revised.

prices fell even more sharply than in the previous 2 months. On the other hand, prices turned up after declining in April for roasted coffee and refined sugar in consumer size packages. Prices for fish and dairy products also rose.

Prices for consumer nondurables other than foods rose 1.6 percent in May, the third consecutive large monthly increase. In the 3 months ended in May, these prices advanced at a seasonally adjusted annual rate of 20.1 percent, the fastest rate for any 3 month period since the summer of 1974. Prices continued to moved up rapidly for gasoline (4.2 percent) and home heating oil (5.4 percent). Increases were also registered for tires and tubes, consumer plastics, leather footwear, and beverages.

The index for consumer durables advanced 0.7 percent, somewhat less than the 0.9 percent rise in April but about the same as the increases in March and February. The slowdown in May was mostly due to a smaller rise in passenger car prices. Prices were higher for household flatware, luggage and small leather goods, lawnmowers, and jewelry.

Capital equipment. The Producer Price Index for capital equipment increased 0.7 percent, much less than in April (1.1 percent) but about the same as in March (0.6 percent). Motor truck prices rose but considerably less than in April. Other capital goods which recorded smaller increases in May included hand tools, industrial process furnaces, pumps and compressors, industrial material handling equipment, special industry machinery, and mining machinery. On the other hand, prices for oil field machinery rose considerably more than in the preceding month, and agricultural machinery prices advanced substantially for the second consecutive month.

Intermediate materials

The Producer Price Index for intermediate materials, supplies, and components rose 1.0 percent in May, seasonally adjusted. Although this increase was smaller than the 1.5 percent jump in April, it was substantially larger than most of the increases registered in 1978. The index for intermediate materials less foods and feeds also advanced 1.0 percent. Continued sharp rises for fuels and other petroleum-related products partly offset slower price increases for many construction materials and durable manufacturing materials.

The processed fuels and lubricants group advanced 4.3 percent, even more than the 3.2 percent increase in April. Prices continued to climb rapidly for commercial jet fuel, residual fuel, diesel fuel, and liquefied petroleum gas. The electric power index rose sharply after showing relatively small changes in each of the first 4 months of the year.

Prices for nondurable manufacturing materials rose substantially for the third consecutive month. The indexes for industrial chemicals and plastic resins and materials (both of which are derived from petroleum) continued their recent pattern of rapid advances. Price increases accelerated for leather, synthetic rubber, and synthetic fibers. Paperboard and woodpulp prices registered smaller rises than in the preceding month, however, and prices for inedible fats and oils fell after 4 months of sharp increases.

The construction materials index edged up 0.1 percent; these prices had advanced at a seasonally adjusted annual rate of 13.1 percent in the first 4 months of the year. Lower prices for millwork, plywood, gypsum products, and nonferrous wire and cable offset advances for fabri-

cated structural metal products, plastic construction products, and asphalt roofing.

The index for durable manufacturing materials also rose considerably less than in recent months. Prices for copper fell sharply following a 9 month period of generally rapid increases. The finished steel products index moved up less than in April, while sharp increases were recorded for precious metals, nickel, and pig iron and ferroalloys. Prices were also higher for laminated plastic sheets, foamed plastic products, and jewelers' materials and findings.

Among manufacturing components, prices for internal combustion engines and switchgear and switchboards advanced, while bearings declined. Among other intermediate nonfood goods, higher prices were registered for glass containers, metal cutting machine tool parts, nonfarm tractor parts, arc welding electrodes, and plastic packaging products.

The intermediate foods and feeds index moved down 0.7 percent, the first decline since August 1978. Prices fell for animal fats and oils and refined vegetable oils. In contrast, prices for flour and confectionery materials rose sharply.

Crude materials

The Producer Price Index for crude materials for further processing moved up 0.8 percent in May on a seasonally

adjusted basis, following a small decline in April. The turnaround was due to an upturn in prices for nonfood materials.

The index for crude nonfood materials moved up 2.3 percent over the month, following a 0.5 percent decrease in April. The largest increases in May occurred for natural gas and crude petroleum, both of which rose more than in any month since February 1977. Substantially higher prices were also registered for raw cotton, aluminum base scrap, and leaf tobacco. Hides and skins prices moved up after falling substantially last month, but the May increase was much smaller than those in the first 3 months of the year. Prices fell for copper base scrap, iron and steel scrap, natural rubber, and wastepaper.

The index for crude foodstuffs and feedstuffs declined 0.3 percent, seasonally adjusted, the same as in April. Livestock prices were responsible for much of the decline: Cattle prices fell for the first time since last November, and hog prices moved down sharply for the third consecutive month. Prices were also lower for soybeans and raw sugar. In contrast, wheat prices moved up nearly 12 percent, more than double their April increase, and green coffee prices rose much more than in any month since last September. Increases were also recorded for corn, live poultry, and fluid milk. Cocoa bean prices turned up following 3 months of sharply lower prices.

¹ Comprehensive relative importance figures are computed once each year in December. Data shown are expressed as a percent of total finished goods, total intermediate materials, or total crude materials. Data shown will not add up to 100.000 because not all commodity components of each stage-of-processing (SOP) index are shown; relative importance figures shown assume for about 67 percent of total finished goods, about 90 percent of total intermediate materials, and about 87 percent of total crude materials. For each commodity component of the finished goods index which is allocated to both capital equipment and finished consumer goods excluding foods, the relative importance figure shown reflects only the share allocated to

this SOP grouping under which it is noted. For example, the relative importance figure shown for household furniture under the SOP grouping for finished consumer goods excluding foods includes the share allocated to that SOP grouping but not the share allocated to capital equipment.

² All data are subject to revision 4 months after original publication.

³ Not seasonally adjusted.

⁴ Not available.

Table 3. Producer price indexes and percent changes for selected stage-of-processing groupings, seasonally adjusted

(1957=100)

Grouping	Index				Percent change at annual rate for—					
	Feb. 1979	Mar. 1979	Apr. 1979	May 1979	3 months ending—				6 months ending—

0163 .01	STEREOPHONIC, 33 1/3 R. P. M.	EA.		102.7	102.7	(⁴)	
1599	FIRE EXTINGUISHERS						
0173 .10	PRESSURIZED DRY CHEMICALS TYPE, HAND	EA.		102.0	107.4	107.4	
				151.4	154.0	154.0	

¹ Data for January 1970 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.

² Seasonal commodity—no price available this month.

³ Some of the titles of the individual commodity price indexes included in this grouping are not shown.

⁴ Not available.

⁵ Prices for some items in this grouping are lagged 1 month.

⁶ Regional price indexes for bituminous coal, industrial class, cement are presented in table 5 of

this report.

⁷ Prices for natural gas (05-31) are lagged 1 month.

⁸ Includes only domestic production.

⁹ Prices for gasoline (05-71), light distillate (05-72), middle distillate (05-73), and residual fuels (05-74) are lagged 1 month.

¹⁰ Regional refined petroleum product prices and price indexes are presented in table 7 of this report.

¹¹ Some prices for industrial chemicals (05-1) are lagged 1 month.

Table 7. Producer prices and price indexes for refined petroleum products by region

¹ Data for January 1970 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication. All prices have been lagged 1 month since February 1973.
² Caution should be used in interpreting month-to-month changes, because of low response

rates from the sample of reporters which ranged from 30 to 60 percent for these particular indexes.
³ Not available.

Table 8. Producer price indexes for bituminous coal by region

(June 1970=100)

Code No.	Commodity	1979 ¹			Code No.	Commodity	1979 ¹		
		Jan.	Apr.	May			Jan.	Apr.	May
0512 03	Bituminous coal, industrial sizes				0302	Manufacturing	117.4	116.8	117.7
	contract	124.1	126.0	127.3	02	South Appalachia	(²)	(²)	(²)
0301	Steam electric utility	139.2	143.9	146.2	03	Midwest	120.6	121.3	121.9
01	North Appalachia	139.0	142.6	145.7	04	West	130.9	132.0	132.2
02	South Appalachia	146.2	151.5	151.1	0303	Metallurgical, high volatile	105.6	104.1	104.4
03	Midwest	139.3	142.9	147.7	02	South Appalachia	105.4	103.8	103.8
04	West	125.9	135.5	132.9	03	Midwest	(²)	(²)	(²)

¹ Data for January 1970 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.
² Not available.

NOTE: These indexes are designed to measure changes in the price of coal sold in contract sales transactions (excluding captive production) in various domestic mining regions. Prices are reported by coal operators or sales agents, f.o.b. mine, per net short ton.

Table 9. Producer price indexes for special commodity groupings¹

(1957=100 unless otherwise indicated)

Commodity grouping	1978		1979		
	Annual average	May	Jan. ²	Apr. ²	May ²
All commodities, less farm products	200.4	200.7	219.3	227.7	229.7
All foods	200.4	200.5	219.9	227.5	228.4
Processed foods	200.7	207.0	219.0	227.7	227.6
Industrial commodities, less fuels and power	167.2	195.3	207.3	214.3	215.5
Selected textile mill products (Dec. 1978=100)	123.9	136.5	109.0	111.9	112.5
Hosiery	100.3	100.5	110.1	110.5	110.4
Underwear and nightwear	150.9	157.3	164.0	167.3	167.7
Chemicals and allied products, including synthetic rubber and synthetic fibers and yarns	190.5	190.3	190.3	203.7	207.3
Pharmaceutical preparations	140.0	139.7	140.1	150.0	150.1
Lumber and wood products, excluding millwork	290.2	291.0	314.0	325.1	325.0
Special metals and metal products	209.0	207.5	252.0	231.0	231.9
Fabricated metal products	210.5	214.2	227.0	233.0	234.0
Copper and copper products	155.0	155.9	160.0	212.1	199.4
Machinery and motive products	190.4	180.4	199.0	203.7	204.0
Machinery and equipment, except electrical	214.3	211.7	224.9	229.3	231.1
Agricultural machinery, including tractors	210.3	212.0	227.0	220.0	230.9
Metalworking machinery	220.0	225.1	245.2	251.0	253.9
Numerically controlled machine tools (Dec. 1971=100)	179.1	175.1	160.9	192.0	194.4
Total tractors	220.7	225.0	240.0	243.4	246.0
Industrial valves	232.3	220.0	245.4	250.5	253.5
Industrial fittings	232.7	229.2	249.9	252.5	259.3
Abrasive grinding wheels	200.1	204.5	220.2	220.3	221.0
Construction materials	220.3	220.2	241.4	249.7	250.1
Agricultural machinery and equipment, less parts	212.7	200.9	223.5	225.0	227.0
Farm and garden tractors, less parts	210.1	211.9	225.0	220.4	229.9
Agricultural machinery excluding tractors, less parts	210.7	212.3	229.5	231.0	231.9

¹ These indexes are calculated by combining the indexes listed below by commodity code after each special commodity grouping (titles in table 8). The weights are those used for the comprehensive All Commodities Index.

² Data for January 1979 have been revised to reflect the availability of less reports and corrections by respondents. All data are subject to revision 4 months after original publication.

All commodities, less farm products: 02 through 16

All foods: 01-1, 01-7, and 02 less 02-01, 02-02, and 02-0

Processed foods: 02 less 02-0, 02-01, and 02-02

Industrial commodities, less fuels and power: 03, 04, and 05 through 15

Selected textile mill products: 03-27, 03-37-01-05, 03-37-01-07, 03-37-01-09, 03-37-01-11, 03-37-03-42, 03-4, 03-01-01-05, 03-01-01-72, 03-01-01-73, 03-01-02-35, 03-01-02-72, 03-01-02-74, 03-01-02-08, 03-01-02-04, 03-02-02-12, 03-02-02-22, and 13-31

Hosiery: 03-01-01-72, 03-01-01-73, 03-01-02-74, 03-01-02-04

Underwear and nightwear: 03-01-01-74, 03-01-01-75, 03-01-01-76, 03-01-01-77, 03-01-01-78, 03-01-02-74, 03-01-02-75, 03-01-02-73, and 03-01-02-02

Chemicals and allied products, including synthetic rubber and synthetic fibers: 03-1, 07-11-02 and 08 less 03-4

Pharmaceutical preparations: 03-36 and 03-38

Lumber and wood products, excluding millwork and other wood products: 03-1 and 03-3

Special metals and metal products: 10, 11-1, and 14-1

Fabricated metal products: 10-3, 10-4, 10-5, 10-6, 10-7, and 10-8

Copper and copper products: 10-22-01-08, 10-22-01-09, 10-22-01-13, 10-23-01, 10-24-01-08, 10-25-02, and 10-20-01

Machinery and motive products: 11 and 14

Machinery and equipment, except electrical: 11-1, 11-2, 11-3, 11-4, 11-5, 11-6

Agricultural machinery, including tractors: 11-11, 11-12 less 11-11-01 and 11-12-01

Metalworking machinery: 11-02, 11-33-04, 11-37, and 11-38

Numerically controlled machine tools: 11-37-11-11, 11-37-11-12, 11-37-14-11, and 11-37-16

Total tractors: 11-11 and 11-38 less 11-11-01

Industrial valves: 11-40-01-01 through 11-40-01-05, 11-40-01-16 through 11-40-01-18, 11-40-01-21 through 11-40-01-27

Industrial fittings: 11-40-01-11 through 11-40-01-14

Abrasive grinding wheels: 11-05-11, 11-05-12, 11-05-13, 11-30-14, 11-30-15

Agricultural machinery and equipment, less parts (old commodity code 11-1): 11-1 less 11-11-01 and 11-13-01

Farm and garden tractors, less parts (old commodity code 11-11): 11-11 less 11-11-01

Agricultural machinery excluding tractors, less parts (old commodity code 11-12): 11-12 less 11-13-01

Construction materials: 03-21, 07-31, 09-11, 09-12-01-01, 09-12-01-03, 09-12-01-31, 09-12-01-71, 09-2, 09-3, 09-2, 10-13-02-35, 10-13-02-40, 10-13-02-03, 10-13-02-03, 10-13-03-05, 10-13-03-71, 10-13-02-06, 10-13-05-01, 10-15-01-31, 10-15-01-03, 10-15-01-03, 10-20-01-01, 10-20-01-09, 10-20-01-04, 10-20-01-08, 10-20-01-17, 10-20-01-16, 10-20-01-18, 10-20-01-21, 10-20-01-33, 10-20-02-01, 10-20-02-02, 10-20-02-05, 10-20-01-05, 10-20-01-07, 10-20-01-08, 10-20-01-11, 10-23-02-07, 10-33-02-71, 10-41-01, 10-5, 10-6, 10-72, 10-73-01-01, 10-73-01-05, 10-73-01-11, 10-73-01-12, 10-73-01-13, 10-73-01-14, 10-73-01-15, 10-73-01-08, 10-73-01-07, 10-74-01-01, 10-74-01-21, 10-74-01-01, 10-74-01-02, 10-74-01-07, 10-74-01-01, 10-74-01-08, 10-01-01-46, 10-03-01-01, 10-03-01-08, 10-03-01-08, 10-03-01-07, 10-03-01-08, 10-03-01-11, 10-30-01-31, 10-03-01-23, 10-03-01-31, 10-03-01-03, 10-03-01-35, 10-03-01-37, 10-03-01-41, 10-03-01-46, 10-03-01-48, 10-33-01-35, 10-05-01-33, 10-03-01-01, 11-42, 11-47, 11-49-01-02, 11-49-01-08, 11-49-01-12, 11-49-01-15, 11-71-01-01, 11-71-01-08, 11-71-01-08, 11-71-01-04, 11-71-02-05, 11-71-03-71, 11-71-02-73, 13-11-01-05, 13-32, 13-11-01-01, 13-11-02-07, 13-2, 13-3, 13-4, 13-5, 10-7, 13-01, 13-02, 13-03

Table 10. Producer price indexes: Changes in commodity specifications, May 1979

Commodity code	New specification	Old specification
02-44-01-37	Tomato catsup, 32 oz. bottle, 12 bottles to case; canner to wholesaler, retail chain store, or distributor, f.o.b. cannery, dozen bottles.	Tomato catsup, 20 oz. bottles, 12 bottles to case; canner to wholesaler, chain retailer, or distributor, f.o.b. cannery, dozen bottles.
07-13-04-77	Air hose, 3/4" inside diameter, spiral or 2 braid rayon reinforcement, general purpose type, 250-300 pounds internal working pressure maximum; manufacturer to distributor or jobber, f.o.b. factory freight allowed on specified weight, 100 feet.	Air hose, 3/4" inside diameter, spiral or 2 braid rayon reinforcement, general purpose type, 250 pounds internal working pressure maximum; manufacturer to distributor or jobber, f.o.b. factory freight allowed on specified weight, 100 feet.
07-13-04-78	Water hose, 1 1/2" inside diameter, 2 ply braided reinforcement 150-250 pound working pressure, for industrial use; manufacturer to distributor or jobber, f.o.b. plant, freight allowed on specified weight, 100 feet.	Water hose, 1 1/2" inside diameter, 2 ply braided reinforcement, 150 pound working pressure maximum, for industrial use; manufacturer to distributor or jobber, f.o.b. plant, freight allowed on specified weight, 100 feet.
10-13-02-55	Bars, reinforcing, carbon steel, no. 5 or no. 6 x 60' lengths with 10% shorts, ASTM specification A-15, 62T, or ASTM A-615, grade 40, base quantity 40,000 lbs. and over; mill to user, f.o.b. mill, 100 pounds.	Bars, reinforcing, carbon steel, no. 6 x 60' long with 10% shorts, specification: ASTM A-15, 62T or ASTM A-615, grade 40, base quantity 40,000 pounds or over; mill to user, f.o.b. mill, 100 pounds.
10-71-01-32	Aluminum storm door combination window and screen, made of 6063-T5 alloy extruded aluminum, size 36" wide by 80" high, including mounting and/or tubular frames, 2 lights (safety glass inserts) mesh aluminum screen, standard door knob or latch, door hinges, check wind chain, door sill sweep; manufacturer to dealer, various specified quantities, f.o.b. plant or f.o.b. destination, each.	Aluminum storm door combination window and screen, made of 6063-T5 alloy extruded aluminum, size 36" wide by 80" high, includes mounting frame, 2 lights (safety glass inserts), mesh aluminum screen, standard door knob or latch, door hinges, check wind chain, door sill sweep; manufacturer to dealer, various specified quantities, f.o.b. plant or f.o.b. destination, each.
10-83-01-63	Flood light, mercury vapor, sports and general area, 400 watt, wide beam, 16" to 18" diameter or 7 1/2 - 12 1/2" by 18 1/2 - 21" rectangular face, less lamp; manufacturer to distributor and major oil companies, in any quantity, f.o.b. point of shipment, freight allowed or prepaid on specified amounts, each.	Flood light, mercury vapor, sports and general area, 400 watt, wide beam, various sizes, less lamp; manufacturer to distributor and major oil companies, in any quantity, f.o.b. point of shipment, freight allowed on specified amounts, each.
10-83-01-64	Flood light, mercury vapor, general area lighting suitable for industrial applications, 1,000 watt, wide beam 18" to 22" in diameter, or 24" x 11" rectangular face, less lamp; manufacturer to distributor, in any quantity, f.o.b. point of shipment, freight allowed or prepaid on specified amounts, each.	Mercury vapor flood light, general area lighting suitable for industrial applications, 1,000 watt, wide beam 18" to 22" diameter, less lamp; manufacturer to distributor, in any quantity, f.o.b. point of shipment, freight allowed on specified amounts, each.
11-12-03-25	Manure spreader, 130 bushels or over capacity, PTO driven, single beater, two or four wheels, with or without tires; manufacturer to dealer, f.o.b. plant, each.	Manure spreader, 130-150 bushel capacity, PTO driven, single beater, two wheels with or without tires; manufacturer to dealer, f.o.b. plant, each.
11-13-01-01	Incubator-hatcher, 30,000 - 100,000 eggs capacity; manufacturer to user; delivered or f.o.b. factory, each.	Incubator-hatcher, capacity 65,000 - 100,000 eggs; manufacturer to user; delivered or f.o.b. factory, each.

Table 11. Producer price indexes for the output of selected SIC industries

(1967=100 UNLESS OTHERWISE INDICATED)

1972 SIC CODE	INDUSTRY DESCRIPTION	OTHER INDEX BASES	PRICE INDEX				
			1978		1979

¹ Standard Transportation Commodity Code.

² The figure shown for each item is its percent of total railroad freight.

³ The price index for total railroad freight also includes STCC groups not shown separately.

⁴ Dec. 1978=100.

NA= Not available.

™ revised.

NOTE: The index is designed to measure changes in the prices of shipping goods by rail in the United States. The representative prices and sample used for the index reflect the railroads' prices for shipping a fixed set of commodities under specified and unchanging conditions. The index is not intended to measure changes in railroad revenue or shipper costs that result from changes in services or mode.

Introducing a New Sample for the Railroad Freight Index

Railroad freight indexes in table 15 are based on a sample of freight shipments for 1976, which replaces the old sample of freight shipments for 1969. Indexes based on the new sample have been linked with indexes based on the old sample to provide a continuous measure of price change for railroad freight. In addition, beginning this month, indexes will be published for more subgroups of the industry than in the past.

Indexes based on the new sample have been calculated for January through May 1979. December 1978 was the month in which the new indexes were linked to the old indexes. All new indexes which were linked to old indexes have an index base of 1969=100; all new indexes for the new publication areas (for example, STCC group 0113) were not linked to any old index and have an index base of December 1978=100. Revised indexes for January, February, March, and April 1979 replace indexes previously released for those months as the official indexes. The methodology used to introduce the new sample will be described in the next issue of this periodical. A description of this methodology is currently available, upon request, from the Division of Industrial Prices and Price Indexes, Office of Prices and Living Conditions, Bureau of Labor Statistics, Washington, D.C. 20212.

Technical Note: Test Data for Producer Price Index Revision

Test data from the pilot survey for the Producer Price Index (PPI) revision have been developed for the period beginning January 1978 and are published each month in table 14, "Producer price indexes for the net output of selected industries and products," in this report. The revision is being undertaken as a comprehensive effort to make major improvements in the measurement of price changes by domestic producers of goods and services. The data now available are from a pilot survey conducted to test the methods and procedures for the comprehensive revision. The revision will be conducted on an industry-by-industry basis. The results for the first industries in the full-scale survey will be available in the fall of 1979. Coverage of all mining and manufacturing industries is scheduled for completion in 1984.

The four industries covered in the pilot survey are: Soybean oil mills (SIC 2075), newspaper printing and publishing (SIC 2711), concrete products other than block and brick (SIC 3272), and household laundry equipment (SIC 3633). These industries were selected because they offered a wide range of pricing problems on which to test the new techniques. Indexes covering some of these same industries will continue to be calculated under the old program. The new indexes will not begin replacing the old ones in the Producer Price Index until early 1980.

These pilot survey indexes differ from indexes in the current Producer Price Index in a number of important respects:

- (1) They are *industry-based* indexes. The entire output of each industry is sampled, including secondary production and miscellaneous receipts. The current Producer Price Indexes are based on a sample of major products. Even the Industry-Sector Price Indexes (ISPI's) are derived from these product indexes. The current ISPI's do not price miscellaneous receipts, and the prices for primary and secondary production are obtained from any producer of the product even if that producer does not belong to the industry. The newly published pilot survey indexes are derived from prices supplied strictly by producers within the industry. As a result, the pilot product indexes apply only to the production within the industry. After all mining and manufacturing industries are covered by the revision, product indexes will be constructed covering all production of the product.

- (2) These new indexes are classified in accordance with the *Standard Industrial Classification* (SIC) system and incorporate most features of the Census of Manufactures product code extensions of the SIC. The coding will make the data easier to use in conjunction with other industry-oriented economic data.
- (3) *Net output values of shipments* are used as weights in preparing the index. Net output values refer to the value of shipments leaving the industry. In contrast, the weights used in the current PPI's and ISPI's are gross shipment values, which include shipments *within* an industry. The resulting multiple counting of price changes is one of the major defects of the current indexes. The current stage-of-processing indexes partially correct this defect, but the new indexes consistently correct it at all levels.
- (4) Increased emphasis is being given to obtaining actual *transaction prices at the time of shipment*. Although it has been a general objective of the current program to obtain transaction prices, they have not been obtained for significant portions of the index. In addition, some products in the current PPI intentionally have been priced at order prices rather than shipment prices.
- (5) *Probability sampling* was used to select the firms to be asked to report prices. As a result, firms of all sizes are included in the sample. In addition, within the firm, the individual items to be priced and the terms of the transaction were chosen using probability techniques. In the current PPI, major companies selected on a judgment basis are asked to report prices for volume-selling items under "typical" transaction terms.

Since this is a pilot survey, a number of changes will be introduced as the full-scale survey is put in place. These changes include the following:

- (1) Greater product detail will generally be available because of larger sample sizes and increased capabilities to combine product areas that are not publishable by themselves. The 5-digit product class indexes, which cannot now be calculated, will be produced.
- (2) Ultimately, the survey will cover all shipments by all 493 industries in mining and manufacturing. The present PPI's cover only about 50 percent of

this value; the pilot survey covers about 2 percent of it.

- (3) Improved calculation techniques will be introduced, including the use of Census of Manufactures shipment data to weight the 7-digit product indexes to higher levels. The pilot indexes rely on the estimated relative importance of products based on shipment data derived from the survey itself.

- (4) Estimates of sampling error will be published.

For further information on the underlying concepts and methodology of the Producer Price Index revision, see "Improving the Measurement of Producer Price Change," by John F. Early, in the April 1978 issue of the *Monthly Labor Review*. Reprints are available from the Bureau of Labor Statistics upon request.

Brief Explanation of Producer Price Indexes

Producer Price Indexes measure average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. These data were previously presented as the Wholesale Price Index. The name "Producer Price Indexes" is now being used to reflect more accurately the coverage of the data. The sample used for calculating these indexes continues to contain nearly 2,800 commodities and about 10,000 quotations selected to represent the movement of prices of all commodities produced in the manufacturing, agriculture, forestry, fishing, mining, gas and electricity, and public utilities sectors. The universe includes all commodities produced or imported for sale in commercial transactions in primary markets in the United States.

Producer Price Indexes can be organized by stage of processing or by commodity. The stage of processing structure organizes products by degree of fabrication (i.e., finished goods, intermediate or semifinished goods, and crude materials). The commodity structure organizes products by similarity of end-use or material composition.

Finished goods are commodities that will not undergo further processing and are ready for sale to the ultimate user, either an individual consumer or a business firm. Capital equipment (formerly called producer finished

goods) includes commodities such as motor trucks, farm equipment, and machine tools. Finished consumer goods include foods and other types of goods eventually purchased by retailers and used by consumers. Consumer foods include unprocessed foods such as eggs and fresh vegetables, as well as processed foods such as bakery products and meats. Other finished consumer goods include durables such as automobiles, household furniture, and jewelry, and nondurables such as apparel and gasoline.

Intermediate materials, supplies, and components are commodities that have been processed but require further processing before they become finished goods. Examples of such semifinished goods include flour, cotton yarns, steel mill products, belts and belting, lumber, liquefied petroleum gas, paper boxes, and motor vehicle parts.

Crude materials for further processing include products entering the market for the first time which have not been manufactured or fabricated but will be processed before becoming finished goods. Scrap materials are also included. Crude foodstuffs and feedstuffs include items such as grains and livestock. Examples of crude nonfood materials include raw cotton, crude petroleum, natural gas, hides and skins, and iron and steel scrap.

For analysis of general price trends, stage of processing indexes are more useful than commodity grouping indexes. This is because commodity grouping indexes sometimes produce exaggerated or misleading signals of price changes by reflecting the same price movement through various stages of processing. For example, suppose that a price rise for steel scrap results in an increase in the price of steel sheet and then an advance in prices of automobiles produced from that steel. The All Commodities Price Index and the Industrial Commodities Price Index would reflect the same price movement three times—once for the steel scrap, once for the steel sheet, and once for the automobiles. This multiple counting occurs because the weighting structure for the All Commodities Index uses the total shipment values for all commodities at all stages of processing. On the other hand, the Finished Goods Price Index would reflect the change in automobile prices, the Intermediate Materials Price Index would reflect the steel sheet price change, and the Crude Materials Price Index would reflect the rise in the price of steel scrap. (See illustration.)

To the extent possible, prices used in calculating Producer Price Indexes apply to the first significant commercial transaction in the United States, from the production or central marketing point. Price data are generally collected monthly, primarily by mail questionnaire. Re-

spondents are asked to provide net prices or to provide all applicable discounts. BLS attempts to base Producer Price Indexes on actual transaction prices; however, list or book prices are used if transaction prices are not available. Most prices are obtained directly from producing companies on a voluntary and confidential basis, but some prices are taken from trade publications or from other Government agencies. Prices generally are reported for the Tuesday of the week containing the 13th day of the month.

In calculating Producer Price Indexes, price changes for the various commodities are averaged together with weights representing their importance in the total net selling value of all commodities as of 1972. The detailed data are aggregated to obtain indexes for stage of processing groupings, commodity groupings, durability of product groupings, and a number of special composite groupings. Each index measures price changes from a reference period which equals 100.0 (usually 1967, as designated by the Office of Management and Budget). An increase of 85 percent from the reference period in the Finished Goods Price Index, for example, is shown as 185.0. This change can also be expressed in dollars, as follows: "The price of a representative sample of finished goods sold in primary markets in the United States has risen from \$100 in 1967 to \$185."

A Note about Calculating Index Changes

Movements of price indexes from one month to another are usually expressed as percent changes rather than changes in index points because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The box below shows the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates that are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

<i>Index Point Change</i>	
Finished Goods Price Index	185.5
less previous index	<u>184.5</u>
equals index point change	1.0
<i>Index Percent Change</i>	
Index point change	<u>1.0</u>
divided by the previous index	184.5
equals	0.005
result multiplied by 100	0.005 x 100
equals index percent change	0.5

A Note on Seasonally Adjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted data usually are preferred because they eliminate the effect of changes that normally occur at about the same time and in about the same magnitude every year—such as price movements resulting from normal weather patterns, regular production and marketing cycles, model changeovers, seasonal discounts, and holidays. For this reason, seasonally adjusted data more clearly reveal the underlying cyclical trends. Seasonally adjusted data are subject to revision when seasonal factors are revised each year.

The unadjusted data are of primary interest to users who need information which can be related to the actual dollar values of transactions. Individuals requiring this information include marketing specialists, purchasing agents, budget and cost analysts, contract specialists, and commodity traders. Unadjusted data generally are used in escalating contracts such as purchase agreements or real estate leases.
