BUREAU OF LABOR STATISTICS
Janet L. Norwood, Commissioner

**OFFICE OF PRICES
AND LIVING CONDITIONS**
W. John Layng, Assistant Commissioner

Producer Prices and Price Indexes is a monthly report on producer price movements including statistical tables and technical notes. It may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Subscription Price:
\$17 a year domestic (includes
one supplement)
\$4.25 additional foreign

Single copy \$2.25.
Supplement \$2.75.

February 1980

The Secretary of Labor has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department. Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through July 1983. Controlled circulation postage paid at Washington, D.C. Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics.

6. Producer prices and price indexes for commodity groupings and individual items	15		

Price Movements

December 1979

The Producer Price Index for Finished Goods advanced 0.8 percent from November to December on a seasonally adjusted basis. The December rise was much less than the 1.3 percent increase in November and was the smallest since June. Prices for intermediate (semifinished) goods rose 1.2 percent, somewhat more than the 0.9 percent advance in November and the same as the average monthly increase in 1979. Crude material prices rose 1.1 percent following larger increases in each of the previous 3 months (table A).

The slowdown in the rate of increase for finished goods occurred because prices for consumer foods edged down after rising unusually rapidly in November. However, the index for finished consumer goods other than food rose 1.3 percent, somewhat more than in November. Capital equipment prices rose 0.9 percent, much more than in November (table B).

Before seasonal adjustment, the Producer Price Index for Finished Goods moved up 0.8 percent to 227.8 (1967=100). Over the year, the Finished Goods Price Index rose

12.5 percent. The finished energy goods index climbed 62.7 percent from December 1978 to December 1979, consumer food prices rose 7.5 percent, the index for finished consumer goods other than food and energy increased 9.3 percent, and capital equipment prices were up 8.7 percent. The Producer Price Index for intermediate goods rose 15.9 percent over the year, and crude material prices advanced 17.5 percent.

Finished goods

Finished consumer goods. The Producer Price Index for finished consumer goods rose 0.8 percent in December following an increase of 1.6 percent in November and 1.0 percent in October. The December slowdown was due to a downturn for consumer foods, particularly beef and poultry. However, the index for finished consumer goods other than foods advanced 1.3 percent, somewhat more than the 1.0 percent rise in November.

The finished consumer foods index edged down 0.1 percent, following a 2.6 percent increase in November.

Table A. Percent changes from preceding month in selected stage-of-processing price indexes, seasonally adjusted¹

Month	Finished goods			Intermediate goods			Crude goods

² Intermediate materials for food manufacturing and manufactured animal feeds.
r=revised.

Prices for processed poultry, which had risen 21.5 percent in November, moved down 0.1 percent; prices for beef and veal, which had risen 6.0 percent in November, fell 4.3 percent. Prices also turned down sharply for fresh and dried vegetables following a large increase in November, milled rice prices fell much more than in the previous month, and roasted coffee prices dropped slightly after rising rapidly in November. Also contributing to the slowdown in food prices were smaller increases for pork and eggs. On the other hand, prices for fresh fruits turned up sharply after declining in November, and prices for refined sugar in consumer size packages rose much more than in the preceding month.

The index for consumer durables rose 1.5 percent, after advancing 0.8 percent in November. Most of the acceleration was due to a 17.7 percent advance for precious metal jewelry. Prices also rose for dinnerware, household scissors, household glassware, and household furniture. Passenger car prices rose only slightly for the second consecutive month.

The index for consumer nondurables other than foods rose 1.3 percent, compared with increases of 1.1 percent in November and 1.8 percent in October. Prices for energy goods rose 2.4 percent, about the same as in November but much less than in most other months in 1979. Gasoline prices rose 3.4 percent, the same as a month earlier; prices for finished lubricants moved up 0.5 percent after a 5.0-percent advance; and home heating oil prices were virtually unchanged for the second consecutive month. Prices for tobacco products, sanitary papers, and textile housefurnish-

ings moved up after little or no change in November. Prices for disposable plastic dinnerware and prescription drugs turned up after declining in the previous month. On the other hand, tires and tubes rose much less than in any of the 7 preceding months.

Capital equipment. The index for capital equipment advanced 0.9 percent in December, following increases of 0.5 and 1.2 percent in November and October, respectively. Motor truck prices, which had edged down in November, rose 0.7 percent. Prices rose faster than in November for construction machinery, metal cutting machine tools, pumps and compressors, unitary air conditioners, oilfield machinery, and commercial furniture.

Intermediate materials

The Producer Price Index for intermediate materials, supplies, and components advanced 1.2 percent in December, seasonally adjusted, more than in November but the same as the average monthly increase in 1979. Accelerating price increases were widespread, with the largest increases registered for precious metals. Energy prices continued to rise substantially, although less than in most other months in 1979. However, the index for construction materials was virtually unchanged for the second consecutive month.

The index for intermediate materials less food and energy rose 0.9 percent, somewhat more than in November. The sharpest acceleration was within the durable manufacturing materials group, which moved up 1.5 percent following a 0.4 percent rise. Silver prices increased 23 percent, and gold was up 15 percent; the index for jewelers'

report may differ from those previously reported.

r=revised.

materials and findings advanced 16.5 percent. Prices for copper, aluminum, tin, nickel, and zinc also rose substantially. On the other hand, prices for steel mill products moved up much less than in November.

Among nondurable manufacturing materials, prices rose substantially for paperboard, woodpulp, phosphates, nitrates, industrial chemicals, synthetic rubber, leather, animal hide glue, and gray fabrics. However, inedible fats and oils prices declined for the second consecutive month.

The construction materials and components index edged up 0.1 percent, following a 0.2 percent rise in November. Softwood lumber and plywood prices both fell more sharply than in the previous month. These declines were offset by advances in prices for clay tile, concrete products, Portland cement, heating equipment, valves and fittings, wiring devices, nonferrous wire and cable, and prepared paint.

Large price increases were registered for several manufacturing components, including switchgear and switchboards, ball and roller bearings, fluid power equipment, motor vehicle parts, and electronic components. Other intermediate nonfood nonenergy goods which rose sharply included photographic supplies, glass containers, nonfarm tractor parts, machine tool parts, cutting tools, abrasive products, and unsupported plastic film and sheeting.

The rate of increase in the intermediate energy index continued to slow in December. Prices rose less than in the previous month for residual fuel, commercial jet fuel, liquefied petroleum gas, and lubricating oil materials. Diesel fuel prices increased slightly for the second consecutive month following 8 months of much larger advances. On the other hand, electric power prices advanced more than in any other month during 1979.

The intermediate foods and feeds index turned up after declining in November. Prices rose very sharply for refined sugar for use in food manufacturing. Increases were also

recorded for flour and animal fats and oils. However, prices for manufactured animal feeds and crude and refined vegetable oils continued to fall.

Crude materials

The Producer Price Index for crude materials for further processing rose 1.1 percent on a seasonally adjusted basis, following a 2.0 percent increase in the previous month. Price indexes for crude foodstuffs and for crude materials other than agricultural products and energy fell slightly following large November increases, but crude energy materials rose more than in the preceding month.

The index for crude foodstuffs and feedstuffs edged down 0.1 percent, following a 2.0 percent rise in November. Much of the deceleration was due to a fall in cattle prices, which had risen in the previous month. Wheat and soybean prices also decreased. Live poultry and hog prices moved up, but much more slowly than in November. On the other hand, cocoa bean and raw cane sugar prices, which had dropped in November, rose 14.7 and 11.2 percent, respectively. Prices for corn and green coffee also advanced following November declines.

The index for crude materials less agricultural products and energy moved down 0.3 percent after climbing 3.9 percent in November. The downturn was caused by prices for ferrous and nonferrous scrap, which moved down after rising substantially in the previous month. On the other hand, prices for natural rubber and hides and skins turned up after falling in November. Prices for cotton, wastepaper, and sand, gravel, and crushed stone also rose.

Prices for crude energy materials moved up 4.1 percent over the month, following 2 months of much smaller increases. Natural gas prices rose 5.2 percent, the largest advance since May, and crude petroleum prices increased 4.5 percent, somewhat more than in either of the previous 2 months.

¹Comprehensive relative importance figures are computed once each year in December. Data shown are expressed as a percent of total finished goods, total intermediate materials, or total crude materials. Data shown will not add up to 100.000 because not all commodity components of each stage-of-processing (SOP) index are shown; relative importance figures shown account for about 87 percent of total finished goods, about 90 percent of total intermediate materials, and about 97 percent of total crude materials. For each commodity component of the Finished Goods Index which is allocated to both capital equipment and finished consumer goods ex-

cluding foods, the relative importance figure shown reflects only the share allocated to the SOP grouping under which it is listed. For example, the relative importance figure shown for household furniture under the SOP grouping for finished consumer goods excluding foods includes the share allocated to that SOP grouping but not the share allocated to capital equipment.

²All data are subject to revision 4 months after original publication.

³Not seasonally adjusted.

⁴Not available.

Table 3. Producer price indexes and percent changes for selected stage-of-processing groupings, seasonally adjusted

Grouping	Index				Percent change at annual rate for:

¹Dec. 1975=100.

²Prices for some items in this grouping are lagged 1 month.

³Prices for natural gas (05-31) are lagged 1 month.

⁴Includes only domestic production.

⁵Prices for gasoline (05-71), light distillate (05-72), middle distillate (05-73), and residual fuels (05-74) are lagged 1 month.

⁶Some prices for industrial chemicals (06-1) are lagged 1 month.

⁷Dec. 1969=100.

⁸Dec. 1970=100.

⁹Dec. 1968=100.

Table 5. Producer price indexes by durability of product
(1967=100)

Grouping	1978		1979		
	Annual average	Dec.	Aug. ¹	Nov. ¹	Dec. ¹
All commodities	209.3	217.6	238.3	246.9	249.4

¹Data for August 1979 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.

²Seasonal commodity—no price available this month.

³Some titles of individual commodity price indexes included in this grouping are not shown.

⁴Not available.

⁵Prices for some items in this grouping are lagged 1 month.

⁶Regional price indexes for bituminous coal, industrial sizes, contract are

presented in table 8 of this report.

⁷Prices for natural gas (05-31) are lagged 1 month.

⁸Includes only domestic production. Some prices are lagged one month.

⁹Prices for gasoline, (05-71), light distillate (05-72), middle distillate (05-73), and residual fuels (05-74) are lagged 1 month.

¹⁰Regional refined petroleum product prices and price indexes are presented in table 7 of this report.

¹¹Some prices for industrial chemicals (06-1) are lagged 1 month.

Table 7. Producer prices and price indexes for refined petroleum products by region
(Price per gallon, July 1975=100 unless otherwise indicated)

¹ Data for August 1979 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication. All prices are lagged 1 month.

² Caution should be used in interpreting month-to-month changes because of low response rates, which ranged from 30 to 60 percent for these indexes.

³ Not available.

Table 8. Producer price indexes for bituminous coal by region
(June 1976=100)

Code	Commodity and region	1979 ¹			Code	Commodity and region	1979 ¹		
		Aug.	Nov.	Dec.			Aug.	Nov.	Dec.
0512 03	Bituminous, industrial sizes				0302	Manufacturing	116.9	116.8	116.8

Special metals and metal products.....	209.6	218.1	234.9	244.2	245.9
Fabricated metal products.....	216.2	224.4	239.8	244.8	245.6
Copper and copper products.....	155.6	164.2	197.1	213.6	216.1
Machinery and motive products.....	198.4	197.9	207.2	214.0	215.4
Machinery and equipment, except electrical.....	216.3	225.1	236.2	242.0	244.1
Agricultural machinery, including tractors.....	216.3	226.5	238.4	247.9	250.0
Metalworking machinery.....	228.8	242.5	261.7	272.5	276.2
Numerically controlled machine tools (Dec. 1971=100).....	179.1	186.2	204.2	209.0	211.3
Total tractors.....	228.7	239.3	253.8	260.9	264.9
Industrial valves.....	232.3	241.6	258.2	261.1	265.2
Industrial fittings.....	232.7	247.3	262.3	276.8	276.8
Abrasive grinding wheels.....	208.1	220.2	224.6	235.3	239.0
Construction materials.....	228.3	237.2	254.3	256.5	255.3
Agricultural machinery and equipment, less parts.....	212.7	222.3	233.7	242.4	244.6
Farm and garden tractors, less parts.....	216.1	224.8	237.6	248.8	250.4
Agricultural machinery excluding tractors, less parts.....	216.7	228.1	239.2	247.4	250.0

¹These indexes are calculated by combining the indexes listed below by commodity code after each special commodity grouping (titles in table 6). The weights are those used for the comprehensive All Commodities Index.

²Data for August 1979 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.

All commodities, less farm products: 02 through 15

All foods: 01-1, 01-7, and 02 less 02-61, 02-62, and 02-9

Processed foods: 02 less 02-9, 02-61, and 02-62

Industrial commodities, less fuels and power: 03, 04, and 06 through 15

Selected textile mill products: 03-27, 03-37-01-05, 03-37-01-07, 03-37-01-09, 03-37-01-11, 03-37-03-42, 03-4, 03-81-01-55, 03-81-01-72, 03-81-01-73, 03-81-02-39, -3-81-02-72, 03-81-02-74, 03-81-03-62, 03-81-03-64, 03-82-01-02, 03-82-01-32, 03-82-01-33, 03-82-01-52, 03-82-02-12, 03-82-02-32, 03-83-03-22, 03-83-03-42, and 12-31

Hosiery: 03-81-01-72, 03-81-01-73, 03-81-02-74, 03-81-03-64

Underwear and nightwear: 03-81-01-74, 03-81-01-75, 03-81-01-76, 03-81-01-77, 03-81-01-78, 03-81-02-74, 03-81-02-75, 03-81-02-78, and 03-81-03-62

Chemicals and allied products, including synthetic rubber and synthetic fibers: 03-1, 07-11-02 and 06 less 06-4

Pharmaceutical preparations: 06-35 and 06-36

Lumber and wood products, excluding millwork and other wood products: 08-1 and 08-3

Special metals and metal products: 10, 11-1, and 14-1

Fabricated metal products: 10-3, 10-4, 10-5, 10-6, 10-7, and 10-8

Copper and copper products: 10-22-01-06, 10-22-01-08, 10-22-01-13, 10-23-01, 10-24-01-06, 10-25-02, and 10-26-01

Machinery and motive products: 11 and 14

Machinery and equipment, except electrical: 11-1, 11-2, 11-3, 11-4, 11-6, 11-9

Agricultural machinery, including tractors: 11-11, 11-12 less 11-11-51 and

11-12-51

Metalworking machinery: 11-32, 11-33-04, 11-37, and 11-38

Numerically controlled machine tools: 11-37-11-11, 11-37-11-12, 11-37-14-11, and 11-37-16

Total tractors: 11-11 and 11-28 less 11-11-51

Industrial valves: 11-49-01-01 through 11-49-01-06, 11-49-01-16 through 11-49-01-19, 11-49-01-21 through 11-49-01-27

Industrial fittings: 11-49-01-11 through 11-49-01-15

Abrasive grinding wheels: 11-36-11, 11-36-12, 11-36-13, 11-36-14, 11-36-15

Agricultural machinery and equipment, less parts (old commodity code 11-1): 11-1 less 11-11-51 and 11-12-51

Farm and garden tractors, less parts (old commodity code 11-11): 11-11 less 11-11-51

Agricultural machinery excluding tractors, less parts (old commodity code 11-12): 11-12 less 11-12-51

Construction materials: 06-21, 07-21, 08-11, 08-12-01-01, 08-12-01-02, 08-12-01-31, 06-12-01-71, 08-2, 08-3, 09-2, 10-13-02-39, 10-13-02-48, 10-13-02-55, 10-13-02-63, 10-13-02-69, 10-13-02-71, 10-13-02-89, 10-13-02-91, 10-15-01-31, 10-15-01-32, 10-15-01-33, 10-25-01-01, 10-25-01-03, 10-25-01-04, 10-25-01-05, 10-25-01-17, 10-25-01-18, 10-25-01-19, 10-25-01-21, 10-25-01-23, 10-25-02-51, 10-25-02-52, 10-25-19-93, 10-26-01-06, 10-26-01-07, 10-26-01-09, 10-26-01-11, 10-26-02-67, 10-26-02-71, 10-41-01, 10-5, 10-6, 10-71, 10-73-01-01, 10-73-01-06, 10-73-01-11, 10-73-01-12, 10-73-01-13, 10-73-01-14, 10-73-01-15, 10-73-01-55, 10-73-01-57, 10-74-01-01, 10-74-01-31, 10-74-01-81, 10-74-01-82, 10-74-01-87, 10-74-01-91, 10-74-01-95, 10-81-01-46, 10-83-01-01, 10-83-01-03, 10-83-01-05, 10-83-01-07, 10-83-01-09, 10-81-01-11, 10-83-01-21, 10-83-01-23, 10-83-01-31, 10-83-01-33, 10-83-01-35, 10-83-01-37, 10-83-01-41, 10-83-01-46, 10-83-01-48, 10-89-01-26, 10-89-01-33, 10-89-01-51, 11-42, 11-47, 11-49-01-02, 11-49-01-06, 11-49-01-12, 11-49-01-15, 11-71-01-01, 11-71-01-02, 11-71-01-03, 11-71-01-04, 11-71-02-65, 11-71-02-71, 11-71-02-73, 12-11-01-06, 12-32, 13-11-01-01, 13-11-02-07, 13-2, 13-3, 13-4, 13-6, 13-7, 13-91, 13-92, 13-93

Table 10. Producer price indexes: Changes in commodity specifications, December 1979

Commodity code	New specification	Old specification
03-37-01-13	Sateen: 58 to 64 inches, 1.17-1.22 yards/pound, 94-96x52-64; manufacturer to manufacturer, converter, or user, any quantity, f.o.b. mill or freight allowed, yard.	Sateen: 58 inches, 1.21-1.22 yards/pound, 96x52-64; manufacturer to manufacturer, converter, or user, 10,000 yards or more, f.o.b. mill or freight allowed, yard.
10-61-01-02	Heating boiler, cast iron, gas fired with burner and controls, 84-117.6 1,000 BTU/hour gross output rating; manufacturer to wholesaler, distributor or jobber, C/L or T/L lots, f.o.b. factory with varying freight allowances, each.	Heating boiler, cast iron, gas fired with burner and controls, 84-120 1,000 BTU/hour gross output water rating; manufacturer to wholesaler, distributor or jobber, C/L or T/L lots, f.o.b. factory with varying freight allowances, each.
11-48-06-14	Factory-assembled water cooling tower, 100 tons; manufacturer to contractor or user, f.o.b. plant, each.	Factory-assembled water cooling tower, 100 tons; manufacturer to user, f.o.b. plant, each.
11-78-27-02	Dual-in-line wire wrap socket; manufacturer to distributor, f.o.b. factory, each.	Tube relay socket, 78-58, octal socket, retainer ring mount; manufacturer to distributor, f.o.b. factory, each.

¹Standard Transportation Commodity Code.

²The figure shown for each item is its percent of total railroad freight.

³The price index for total railroad freight also includes STCC groups not shown separately.

⁴Dec. 1978 = 100.

NA = Not available.

NOTE: The index is designed to measure changes in prices of shipping goods by rail in the United States. The representative prices and sample used for the index reflect the railroads' prices for shipping a fixed set of commodities under specified and unchanging conditions. The index is not intended to measure changes in railroad revenue or shipper costs that result from changes in services or mode.

Technical Note: Test Data for Producer Price Index Revision

Test data from the pilot survey for the Producer Price Index (PPI) revision have been developed for the period beginning January 1978 and are published each month in table 14, "Producer price indexes for the net output of selected industries and products," in this report. The revision is being undertaken as a measurement of price changes by domestic producers of goods and services. The data now available are from a pilot survey conducted to test the methods and procedures for the comprehensive revision. The revision will be conducted on an industry-by-industry basis. The results for the first industries in the full-scale survey will be available in early 1980. Coverage of all mining and manufacturing industries is scheduled for completion in 1985.

The four industries covered in the pilot survey are: Soybean oil mills (SIC 2075), newspaper printing and publishing (SIC 2711), concrete products other than block and brick (SIC 3272), and household laundry equipment (SIC 3633). These industries were selected because they offered a wide range of pricing problems on which to test the new techniques. Indexes covering some of these same industries will continue to be calculated under the old program.

These pilot survey indexes differ from indexes in the current Producer Price Index in a number of important respects:

- (1) They are *industry-based* indexes. The entire output of each industry is sampled, including secondary production and miscellaneous receipts. The current Producer Price Indexes are based on a sample of major products. Even the Industry-Sector Price Indexes (ISPI's) are derived from these product indexes. The current ISPI's do not price miscellaneous receipts, and the prices for primary and secondary production are obtained from any producer of the product even if that producer does not belong to the industry. The newly published pilot survey indexes are derived from prices supplied strictly by producers within the industry. As a result, the pilot product indexes apply only to the production within the industry. After all mining and manufacturing industries

are covered by the revision, product indexes will be constructed covering all production of the product.

- (2) These new indexes are classified in accordance with the *Standard Industrial Classification* (SIC) system and incorporate most features of the Census of Manufactures product code extension of the SIC. The coding will make the data easier to use in conjunction with other industry-oriented economic data.
- (3) *Net output values of shipments* are used as weights in preparing the index. Net output values refer to the value of shipments leaving the industry. In contrast, the weights used in the current PPI's and ISPI's are gross shipment values, which include shipments *within* an industry. The resulting multiple counting of price changes is one of the major defects of the current indexes. The current stage-of-processing indexes partially correct this defect, but the new indexes consistently correct it at all levels.
- (4) Increased emphasis is being given to obtaining actual *transaction prices at the time of shipment*. Although it has been a general objective of the current program to obtain transaction prices, they have not been obtained for significant portions of the index. In addition, some products in the current PPI intentionally have been priced at order prices rather than shipment prices.
- (5) *Probability sampling* was used to select the firms to be asked to report prices. As a result, firms of all sizes are included in the sample. In addition, within the firm, the individual items to be priced and the terms of the transaction were chosen using probability techniques. In the current PPI, major companies selected on a judgment basis are asked to report prices for volume-selling items under "typical" transaction terms.

Since this is a pilot survey, a number of changes will be introduced as the full-scale survey is put in place. These changes include the following:

- (1) Greater product detail will generally be

available because of larger sample sizes and increased capabilities to combine product areas that are not publishable by themselves. The 5-digit product class indexes, which cannot now be calculated, will be produced.

- (2) Ultimately, the survey will cover all shipments by all 493 industries in mining and manufacturing. The present PPI's cover only about 50 percent of this value; the pilot survey covers about 2 percent of it.
- (3) Improved calculation techniques will be introduced, including the use of Census of

Manufactures shipment data to weight the 7-digit product indexes to higher levels. The pilot indexes rely on the estimated relative importance of products based on shipment data derived from the survey itself.

- (4) Estimates of sampling error will be published.

For further information on the underlying concepts and methodology of the Producer Price Index revision, see "Improving the Measurement of Producer Price Change," by John F. Early, in the April 1978 issue of the *Monthly Labor Review*. Reprints are available from the Bureau of Labor Statistics upon request.

Brief Explanation of Producer Price Indexes

Producer Price Indexes measure average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. These data were previously presented as the Wholesale Price Index. The name "Producer Price Indexes" is now being used to reflect more accurately the coverage of the data. The sample used for calculating these indexes continues to contain nearly 2,800 commodities and about 10,000 quotations selected to represent the movement of prices of all commodities produced in the manufacturing, agriculture, forestry, fishing, mining, gas and electricity, and public utilities sectors. The universe includes all commodities produced or imported for sale in commercial transactions in primary markets in the United States.

Producer Price Indexes can be organized by stage of processing or by commodity. The stage of processing structure organizes products by degree of fabrication (i.e., finished goods, intermediate or semifinished goods, and crude materials). The commodity structure organizes products by similarity of end-use or material composition.

Finished goods are commodities that will not undergo further processing and are ready for sale to the ultimate user, either an individual consumer or a business firm. Capital equipment (formerly called producer

finished goods) includes commodities such as motor trucks, farm equipment, and machine tools. Finished consumer goods include foods and other types of goods eventually purchased by retailers and used by consumers. Consumer foods include unprocessed foods such as eggs and fresh vegetables, as well as processed foods such as bakery products and meats. Other finished consumer goods include durables such as automobiles, household furniture, and jewelry, and nondurables such as apparel and gasoline.

Intermediate materials, supplies, and components are commodities that have been processed but require further processing before they become finished goods. Examples of such semifinished goods include flour, cotton yarns, steel mill products, belts and belting, lumber, liquefied petroleum gas, paper boxes, and motor vehicle parts.

Crude materials for further processing include products entering the market for the first time which have not been manufactured or fabricated but will be processed before becoming finished goods. Scrap materials are also included. Crude foodstuffs and feedstuffs include items such as grains and livestock. Examples of crude nonfood materials include raw cotton, crude petroleum, natural gas, hides and skins, and iron and steel scrap.

For analysis of general price trends, stage of processing indexes are more useful than commodity grouping indexes. This is because commodity grouping indexes sometimes produce exaggerated or misleading signals of price changes by reflecting the same price movement through various stages of processing. For example, suppose that a price rise for steel scrap results in an increase in the price of steel sheet and then an advance in prices of automobiles produced from that steel. The All Commodities Price Index and the Industrial Commodities Price Index would reflect the same price movement three times—once for the steel scrap, once for the steel sheet, and once for the automobiles. This multiple counting occurs because the weighting structure for the All Commodities Index uses the total shipment values for all commodities at all stages of processing. On the other hand, the Finished Goods Price Index would reflect the change in automobile prices, the Intermediate Materials Price Index would reflect the steel sheet price change, and the Crude Materials Price Index would reflect the rise in the price of steel scrap. (See illustration.)

To the extent possible, prices used in calculating Producer Price Indexes apply to the first significant commercial transaction in the United States, from the production or central marketing point. Price data are generally collected monthly, primarily by mail ques-

tionnaire. Respondents are asked to provide net prices or to provide all applicable discounts. BLS attempts to base Producer Price Indexes on actual transaction prices; however, list or book prices are used if transaction prices are not available. Most prices are obtained directly from producing companies on a voluntary and confidential basis, but some prices are taken from trade publications or from other Government agencies. Prices generally are reported for the Tuesday of the week containing the 13th day of the month.

In calculating Producer Price Indexes, price changes for the various commodities are averaged together with weights representing their importance in the total net selling value of all commodities as of 1972. The detailed data are aggregated to obtain indexes for stage of processing groupings, commodity groupings, durability of product groupings, and a number of special composite groupings. Each index measures price changes from a reference period which equals 100.0 (usually 1967, as designated by the Office of Management and Budget). An increase of 85 percent from the reference period in the Finished Goods Price Index, for example, is shown as 185.0. This change can also be expressed in dollars, as follows: "The price of a representative sample of finished goods sold in primary markets in the United States has risen from \$100 in 1967 to \$185."

A Note about Calculating Index Changes

Movements of price indexes from one month to another are usually expressed as percent changes rather than changes in index points because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The box below shows the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates that are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

<i>Index Point Change</i>	
Finished Goods Price Index	185.5
less previous index	<u>184.5</u>
equals index point change	1.0
<i>Index Percent Change</i>	
Index point change	<u>1.0</u>
divided by the previous index	184.5
equals	0.005
result multiplied by 100	0.005 x 100
equals index percent change	0.5

A Note on Seasonally Adjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted data usually are preferred because they eliminate the effect of changes that normally occur at about the same time and in about the same magnitude every year—such as price movements resulting from normal weather patterns, regular production and marketing cycles, model changeovers, seasonal discounts, and holidays. For this reason, seasonally adjusted data more clearly reveal the underlying cyclical trends. Seasonally adjusted data are subject to revision when seasonal factors are revised each year.

The unadjusted data are of primary interest to users who need information which can be related to the actual dollar values of transactions. Individuals requiring this information include marketing specialists, purchasing agents, budget and cost analysts, contract specialist, and commodity traders. Unadjusted data generally are used in escalating contracts such as purchase agreements or real estate leases.
