Producer Prices and Price Indexes is a monthly report on producer price movements including statistical tables and technical notes. It may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Subscription Price:
\$17 a year domestic (includes
one supplement)
\$4.25 additional foreign

Single copy \$2.25.
Supplement \$2.75.

October 1979

The Secretary of Labor has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department. Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through July 1983. Controlled circulation postage paid at Washington, D.C. Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics.

Producer Prices and Price Indexes

Supplement 1979

Data for 1978

Preface

This report, which the Bureau of Labor Statistics (BLS) publishes once a year, contains annual averages, monthly indexes, and relative importance data for 1978 for Producer Price Indexes of all stage-of-processing groupings, commodity groupings, durability-of-product groupings, and selected Standard Industrial Classification industries and census product classes. Lists of items added, dropped, or reclassified in July 1978 and January 1979 are included in this report, as are tables presenting 1978 data for special commodity groupings, railroad freight, refined petroleum products by region, and bituminous coal by region.

This report also contains for the first time test data

collected under the pilot survey for the Producer Price Index Revision, as well as a technical note describing the program. BLS began collecting these test data in January 1978. In addition, this supplement discusses ways to update relative importance data by using previously published relative importance figures and to calculate composite indexes by combining published Producer Price Indexes.

Data shown in this supplement are the same as revised data already published in monthly issues of this report. All monthly data are subject to revision 4 months after original publication.

Summary of Changes in the Producer Price Index Sample, July 1978 and January 1979

Changes in the sample of commodities used to calculate Producer Price Indexes are made each year when the January index is released in February and again when the July index is released in August. Sample revisions are designed, within the fixed weight concept, to improve primary market coverage and to account for changes in production and marketing patterns.

Additions and deletions are presented under the heading "Sample Changes for Producer Price Indexes by Major Commodity Group, July 1978 and January 1979." Specifications for new commodities are listed in tables 1A and 1B. The number of changes in July 1978 and January 1979 by major commodity group is shown on the following tabulation:

<i>Major commodity group</i>	<i>Com- mod- ity code</i>	<i>Items added</i>	<i>Items dropped</i>
Total		75	83
Farm products	01	0	0
Processed foods and feeds	02	0	0
Textile products and apparel	03	8	3
Hides, skins, leather, and related products	04	0	2
Fuels and related products and power	05	0	0
Chemicals and allied products	06	1	0
Rubber and plastic products	07	20	43
Lumber and wood products	08	0	0
Pulp, paper, and allied products	09	0	0
Metals and metal products	10	0	0
Machinery and equipment	11	0	6
Furniture and household durables	12	1	2
Nonmetallic mineral products	13	0	1
Transportation equipment	14	2	20
Miscellaneous products	15	43	6

In July 1978 and January 1979, 75 products were added to the list of commodities used to calculate Producer Price Indexes, while 83 items were dropped. As a result, the January 1979 sample included 2,765 items, compared with 2,773 in January 1978.

In the Industry-Sector Price Index (ISPI), indexes for 7 more 4-digit industries and 18 additional 5-digit product classes were published for the first time in July 1978 and

January 1979. These Standard Industrial Classification (SIC) and census codes and titles are as follows:

<i>SIC code</i>	<i>Title</i>
2331	Women's and misses' blouses and waists
2361	Children's dresses and blouses
3079	Miscellaneous plastic products
3911	Jewelry, precious metal
3915	Jewelers' findings and materials
3931	Musical instruments
3961	Costume jewelry and costume novelties
22531	Sweaters, knit jackets, and jerseys
23292	Men's and boys' outerwear, not elsewhere classified
23612	Children's and infants' knit sport shirts
30790	Consumer and commercial plastic products
30792	Foamed plastic products
30794	Packaging and shipping containers
30795	Industrial plastic products, except belting
30797	Plastic dinnerware, tableware, and kitchenware
30798	Regenerated cellulosic products
30799	Custom compounding of purchased resins
38423	Personal industrial safety devices
38424	Electronic hearing aids
39112	Jewelry, made of precious metals
39151	Jewelers' findings and materials
39152	Lapidary work and diamond cuttings
39311	Pianos
39314	Other musical instrument and parts
39610	Costume jewelry and costume novelties

Major areas of change

In the stage-of-processing (SOP) category for intermediate materials, supplies, and components, a major reclassification and expansion was made for plastic products. Probability sampling techniques were used to select the sample of company reporters and products. The new sample more accurately reflects the state of today's plastics industry. The range of commodities, and therefore of prices, is very broad; consequently, average prices will not be published. As a result of these sample changes, the comprehensive index for plastic products (commodity code 07-2) was published for the first time in July 1978. The following new commodity groupings are allocated to the SOP category for intermediate goods: Plastic packaging and shipping products; foamed plastic products; and

plastic parts and components for manufacturing. The expanded plastics sample added two new commodity groupings to the SOP category for finished consumer goods: Disposable plastic dinnerware and tableware; and consumer and commercial plastics, not elsewhere classified.

A new product class for industrial safety equipment was also introduced. Most commodity groupings in this product class—such as respiratory protective equipment, eye and face protective equipment, and protective clothing—are allocated to the SOP grouping for intermediate supplies. However, the commodity grouping for mechanical power press guards is allocated to the capital equipment component of finished goods. Also within the capital equipment component, all motor trucks were classified into one of two categories: Motor trucks, 10,000 lbs. GVW and under; and motor trucks, 10,001

lbs. GVW and over. Indexes for both categories were published for the first time in July 1978.

Among finished consumer goods, particularly durables, the jewelry sample was revised extensively with the introduction of 15 new items that represent a broad range of costume and precious metal jewelry. The revised jewelry sample also improved the SOP category for intermediate materials for durable manufacturing, which now includes jewelers' materials and findings. Indexes for jewelry and jewelry products are now published on a base of December 1979=100; indexes before that month are not available. A microwave oven, four musical instruments, and a new commodity grouping for electronic hearing aids were also added to the sample of consumer durables. Seven items of apparel were added to improve the category for nondurable goods other than foods.

Sample Changes for Producer Price Indexes by Major Commodity Group, July 1978 and January 1979

03 Textile products and apparel

Additions: 8 items

03-81-01-32 Women's apparel
Dress slacks
03-81-01-33 Casual slacks, jean-cut
03-81-01-54 Halter and beachwear
03-81-02-23 Men's apparel
Uniform dress trousers
03-81-02-43 Sweaters
03-81-03-02 Infants' and children's apparel
Knit sport shirts
03-81-03-37 Slacks and shorts

03-82-04-62 Decorative pillows

Deletions: 3 items

03-15-01-05 Rayon filament yarn
03-42-03-51 Nylon taffeta
03-81-03-37 Infants' and children's slacks and shorts

04 Hides, skins, leather, and related products

Deletions: 2 items, 1 grouping

04-24 Kid leather
04-24-01-01 Kid leather, upper glazed
04-32-02-32 Women's dress shoe, imported

06 Chemicals and allied products

Addition: 1 item

06-61-01-17 Custom compounded purchased resins

07 Rubber and plastic products

Additions: 20 items, 7 groupings

07-21-06 Plastic construction products
07-21-06-01 Pipes and fittings
07-21-06-02 Other plastic construction products

07-22-01-17 PVC and PVC copolymer
07-22-04-01 Other film and sheeting

07-23-03-01 Laminated plastic sheets

07-24-01-01 Foamed plastic products

07-25-01 Plastic packaging and shipping products
07-25-01-01 Bottles
07-25-01-02 Foamed protective pads and shapes
07-25-01-03 Caps and closures
07-25-01-04 Boxes, cases, and trays
07-25-01-05 Other plastic packaging products

07-26 Plastic parts and components for manufacturing
07-26-01 Parts for transportation equipment
07-26-01-01 Motor vehicle parts, including foamed
07-26-01-02 Other
07-26-02 Other parts and components for manufacturing
07-26-02-01 Parts for office and computing machines
07-26-02-02 Electrical parts
07-26-02-03 Other

07-27-01 Disposable plastic dinnerware and tableware
07-27-01-01 Cups, including foam
07-27-01-02 Other

07-28-01 Consumer and commercial plastics, not elsewhere classified

07-28-01-01 Flower pots and plant containers
07-28-01-02 Other, not elsewhere classified

Deletions: 43 items, 10 groupings

07-11-01-04 Natural rubber, No. 3, thin brown

07-21-01 Plastic construction products
07-21-01-01 Pressure pipes
07-21-01-01 Flexible, PE
07-21-01-02 Rigid, PVC
07-21-02 Non-pressure pipes

07-21-02-11 DWV, ABS
 07-21-02-12 Sewer and drainage P.S. or PVC
 07-21-03 Pressure pipe fittings
 07-21-03-21 Insert, PP or PVC
 07-21-03-22 Coupling, PVC
 07-21-04 Non-pressure pipe fittings
 07-21-04-31 Elbow, ABS
 07-21-04-32 Elbow, polystyrene or PVC
 07-21-05 Structural panels and sheets
 07-21-05-41 Corrugated, FRP, 4 oz.
 07-21-05-42 Rib shapes, FRP, 8 oz.
 07-21-05-43 Siding, PVC
 07-21-05-44 Glazing, acrylic

Unsupported plastic film and sheeting

07-22-01 Vinyl (PVC)
 07-22-01-01 Shower curtains
 07-22-01-02 Wall covering
 07-22-01-03 Pressure sensitive products
 07-22-01-04 Baby pants
 07-22-01-05 Mattress covers
 07-22-01-06 Wall boards
 07-22-01-11 Swimming pool liners
 07-22-01-12 Ring binders
 07-22-01-13 Credit cards
 07-22-01-16 Packaging, stretch/shrink
 07-22-02 Polyethylene
 07-22-02-01 Prime display, packaging
 07-22-02-02 Overwrap, packaging
 07-22-02-03 Laminating, packaging
 07-22-02-04 Liner, unpigmented
 07-22-02-05 Liner, refuse
 07-22-02-06 Building (construction)
 07-22-02-07 Agriculture
 07-22-03 Other plastic film
 07-22-03-01 Polyester, instrumentation tapes
 07-22-03-02 Polyester, boilable food bags
 07-22-03-03 Polyester, photo chemical
 07-22-03-04 Polyester, capacitors
 07-22-03-05 Cellophane, packaging
 07-23-01 Laminated plastic sheets, high pressure
 07-23-01-01 Decorative
 07-23-01-01 Paper/phenolic, 1/16 inch, distributor
 07-23-01-02 Paper/phenolic, 1/16 inch, OEM
 07-23-01-03 Paper/phenolic, 1/32 inch, distributor
 07-23-01-04 Paper/phenolic, 1/32 inch, OEM
 07-23-02 Industrial
 07-23-02-01 Glass/epoxy, copperclad
 07-23-02-02 Paper/phenolic, copperclad
 07-23-02-03 Canvas/phenolic, unclad
 07-23-02-04 Paper/phenolic, unclad

11 Machinery and equipment

Deletions: 6 items

11-11-01-02 Wheel-type farm tractor, gasoline or diesel,
 35-49 PTO h.p.
 11-11-01-03 Wheel-type farm tractor, row crop, gasoline, 50
 or over PTO h.p.
 11-37-14-03 Turret lathe, saddle type
 11-37-14-04 Turret lathe, ram type
 11-67-01-04 Vacuum bagger
 11-93-01-02 Electronic calculator, hand held

12 Furniture and household durables

Addition: 1 item

12-41-01-38 Microwave oven

Deletions: 2 items

12-61-01-21 Plastic dinnerware, 45-piece set
 12-66-01-11 Lawnmower, reel type, powered

13 Nonmetallic mineral products

Deletion: 1 item

13-44-01-11 Structural tile, glaze facing

14 Transportation equipment

Additions: 2 items

Motor trucks

14-11-02-71 10,000 lbs. gross vehicle weight and under
 14-11-02-81 10,001 lbs. gross vehicle weight and over

Deletions: 20 items

14-11-02-XX Motor trucks

15 Miscellaneous products

Additions: 43 items, 15 groupings

15-6 Personal aid equipment
 15-61-01 Electronic hearing aids
 15-61-01-01 Eye-glass type
 15-61-01-03 Behind-the-ear type
 15-61-01-05 In-the-ear type
 15-7 Industrial safety equipment
 15-71-01 Respiratory protective equipment
 15-71-01-01 Respirator, air purifier type
 15-71-01-03 Respirator, supplied air type
 15-71-01-05 Breathing apparatus, self-contained
 15-71-02 Eye and face protective equipment
 15-71-02-01 Safety glasses, clear, less side shields
 15-71-02-02 Goggles, industrial safety
 15-71-02-03 Face shield
 15-71-02-04 Welder's helmet
 15-71-02-05 Emergency eye wash and shower
 15-71-03 Hearing protective equipment
 15-71-03-01 Hearing protector, ear muff type
 15-71-03-03 Hearing protector, plug type
 15-71-04 Guards, mechanical power press
 15-71-04-01 Brake monitor
 15-71-04-02 Brake performance tester
 15-71-04-03 Light curtains
 15-71-04-04 Vertical moving gate
 15-71-04-06 Pull back type
 15-71-04-07 Barrier guard
 15-71-04-11 Miscellaneous types
 15-71-05 Protective clothing
 15-71-05-01 Safety cap or hat
 15-71-05-03 Welder's gloves, leather

15-71-06-(01)	First aid kit	15-94-04-02	Earrings, ladies' costume
15-71-07	Alarms, electronic	15-94-04-03	Earrings, children's costume
15-71-07-01	Back-up alarm, electronic, automatic	15-94-04-04	Necklace, ladies' costume
		15-94-04-05	Neckchain, men's costume
		15-94-04-09	Watchband, men's and women's, metal
15-93-01-04	Electric guitar		
15-93-01-05	Trumpet	15-94-05	Jewelers' materials and findings
15-93-01-06	Drum set	15-94-05-01	Setting, 14 karat gold
15-93-01-07	Piano	15-94-05-03	Finding, gold-filled
15-94-02	Jewelry, platinum and karat gold	15-94-06	Diamonds and lapidary work
15-94-02-01	Ring, ladies', high-fashion	15-94-06-01	Diamond, .25 karat

Table 1A. Specifications for commodities introduced in July 1978

Commodity code	Specification
03-81-01-32	Dress slacks; manufacturer to retailer or wholesaler, f.o.b. plant or delivered, unit.
03-81-01-33	Jean cut casual slacks; manufacturer to retailer or wholesaler, f.o.b. plant or delivered, unit.
03-81-01-54	Halters and beachwear; manufacturer to retailer or wholesaler, f.o.b. plant or delivered, unit.
03-81-02-23	Uniform dress trousers; manufacturer to retailer or wholesaler, or rental laundry, f.o.b. plant or delivered, unit.
03-81-02-43	Sweaters; manufacturer to retailer or wholesaler, f.o.b. plant or delivered, unit.
03-81-03-02	Knit sportshirt; manufacturer to retailer or wholesaler, f.o.b. plant or delivered, unit.
03-81-03-37	Slacks and shorts; manufacturer to retailer or wholesaler, f.o.b. plant or delivered, unit.
03-82-04-62	Decorative pillows; manufacturer to retailer or wholesaler, f.o.b. plant or delivered, unit.
06-61-01-17	Custom compounded resins, produced from purchased resins, pound.
07-21-06	Plastic construction products.
07-21-06-01	Plastic pipes and fittings, unit.
07-21-06-02	Other plastic construction products, unit.
07-22-01-17	PVC and PVC copolymer unsupported film sheeting, unit.
07-22-04-01	Other unsupported plastic film and sheeting, unit.
07-23-03-01	Laminated plastic sheets, unit.
07-24-01-01	Foamed plastic products, unit.
07-25-01	Plastic packaging and shipping products.
07-25-01-01	Plastic bottles, all sizes, unit.
07-25-01-02	Foamed protective shipping pads and shaped packaging, unit.
07-25-01-03	Plastic caps and closures, unit.
07-25-01-04	Plastic boxes, cases, and trays, unit.
07-25-01-05	Other plastic packaging products, unit.
07-26	Plastic parts and components for manufacturing.
07-26-01	Parts for transportation equipment.
07-26-01-01	Plastic components, housing, accessories, and parts for motor vehicles, including foamed parts, unit.
07-26-01-02	Plastic components, housing, accessories, and parts for transportation equipment other than motor vehicles, unit.
07-26-02	Other parts and components for manufacturing.
07-26-02-01	Plastic components, housing, accessories, and parts for office machines, computing machines, cash registers, data processing machines, etc., unit.
07-26-02-02	Plastic electrical parts and components for manufacturing, other than for transportation equipment or office and computing machines, unit.
07-26-02-03	Other plastic parts and components for manufacturing, unit.
07-27-01	Disposable plastic dinnerware and tableware.
07-27-01-01	Plastic disposable cups, including foamed, unit.
07-27-01-02	Plastic disposable dinnerware and tableware, other than cups, unit.
07-28-01	Consumer and commercial plastics, n.e.c.
07-28-01-01	Plastic flower pots and plant containers, unit.
07-28-01-02	Other plastic consumer and commercial products, not elsewhere classified, unit.
14-11-02	Motor trucks.
14-11-02-71	Motor trucks; 10,000 lb. gross vehicle weight and under; manufacturer to dealer, f.o.b. factory, each.
14-11-02-81	Motor truck; 10,001 lb. gross vehicle weight and over; manufacturer to dealer, f.o.b. factory, each.
15-61	Personal aid equipment.

Table 1A. Specifications for commodities introduced in July 1978—Continued

Commodity code	Specification
15-61-01	Electronic hearing aids.
15-61-01-01	Electronic hearing aid, eye-glass type; manufacturer to retail dealer, in various quantities, f.o.b. factory or delivered under specified conditions, each.
15-61-01-03	Electronic hearing aid, behind-the-ear type; manufacturer to retail dealer, in various quantities, f.o.b. factory or delivered under specified conditions, each.
15-61-01-05	Hearing aid, in-the-ear type; manufacturer to retail dealer, in various quantities, f.o.b. factory or delivered under specified conditions, each.
15-71	Industrial safety equipment.
15-71-01	Respiratory protective equipment.
15-71-01-01	Respirator, air purifier type, mask with filter cartridge with various types of purifying agents; manufacturer to other equipment manufacturers, distributors or users in various quantities, f.o.b. factory or shipping point or with freight prepaid under specified conditions, each.
15-71-01-03	Respirator, supplied air type, mask with air line or hose assembly; manufacturer to dealer or distributor in various quantities, f.o.b. factory or shipping point or with freight prepaid under specified conditions, each.
15-71-01-05	Self-contained breathing apparatus, mask with air supply carried by user; manufacturer to dealer, distributor or user in various quantities, f.o.b. factory, each.
15-71-02	Eye and face protective equipment.
15-71-02-01	Glasses, industrial safety, clear lens, without side shields; manufacturer to distributor or user in various quantities, f.o.b. factory or freight prepaid under specified conditions, each.
15-71-02-02	Goggles, industrial safety, clear lens; manufacturer to distributor or user in various quantities, f.o.b. factory or f.o.b. factory with freight prepaid or allowed under specified conditions, each.
15-71-02-03	Face shield, with head gear assembly, clear plastic window, .040" or .060" thick, in various sizes; manufacturer to distributor, wholesaler or user in various quantities, f.o.b. factory or point of shipment, or freight prepaid under specified conditions, each.
15-71-02-04	Helmet, welder's, including head gear and lens, flip-up lens or ratchet gear type; manufacturer to distributor or wholesaler in various quantities, f.o.b. factory or warehouse or with freight prepaid under specified conditions, each.
15-71-02-05	Emergency eye-wash station or combination emergency eye-wash and shower portable and stationary types included; manufacturer to distributor in various quantities, f.o.b. factory, each.
15-71-03	Hearing protective equipment.
15-71-03-01	Hearing protector, ear muff type; manufacturer to distributor or user in various quantities, f.o.b. factory or f.o.b. with freight prepaid under specified conditions, each.
15-71-03-03	Hearing protector, ear plug type, with or without cord; manufacturer to distributor in various quantities, f.o.b. factory or f.o.b. with freight prepaid under specified conditions, each.
15-71-04	Guards, mechanical power press.
15-71-04-01	Brake monitor for mechanical power press, secondary operations; manufacturer to distributor or user in various quantities, f.o.b. factory, each.
15-71-04-02	Brake performance tester, stop-time measuring device for mechanical power press, secondary operations; manufacturer to distributor or user in various quantities, f.o.b. factory, each.
15-71-04-03	Light curtain type presence sensing system for mechanical power press, secondary operations; manufacturer to distributor or user in single units, f.o.b. factory, each.
15-71-04-04	Vertical moving gate for mechanical power press, secondary operations; manufacturer to distributor in any quantity, f.o.b. factory, each.
15-71-04-06	Pull back type, floor mounted, adjustable to various ram stroke lengths, for mechanical power press, secondary operations; manufacturer to distributor or user in a quantity for one, f.o.b. factory, each.
15-71-04-07	Barrier guard for mechanical power press, primary operations; manufacturer to distributor or user in any quantity, f.o.b. factory, each.
15-71-04-11	Composite of miscellaneous types of guards for mechanical power press, secondary operations, unrelated to each other or to other classifications; manufacturer to user or distributor in various quantities, f.o.b. factory, each.
15-71-05	Protective clothing.
15-71-05-01	Safety cap or hat, (hard hat) polyethylene plastic with head band or comparable fitting; manufacturer to distributor, user or wholesaler in various quantities, f.o.b. factory or point of shipment or

Commodity code	Specification
15-71-05-01 —Continued	with freight prepaid under specified conditions, each.
15-71-05-03	Gloves, welder's, all leather with gauntlet, lined; manufacturer to user, jobber, distributor or wholesaler in various quantities, f.o.b. factory or f.o.b. factory with freight prepaid or allowed under specified conditions, each.
15-71-06	First aid kits.
15-71-06-01	First aid kit, industrial, for 10 to 25 people; manufacturer to user, dealer or distributor in various quantities, f.o.b. factory or f.o.b. with freight prepaid under specified conditions, each.
15-71-07	Alarms, electronic.
15-71-07-01	Alarm, back-up, electronic, automatic; manufacturer to distributor, in various quantities, f.o.b. factory or f.o.b. with freight prepaid under specified conditions, each.

Table 1B. Specifications for commodities introduced in January 1979

Commodity code	Specification
12-41-01-38	Microwave oven: Portable countertop unit, with memory; manufacturer to dealer or distributor, f.o.b. plant, each.
15-93-01-04	Electric guitar, with or without case, six or more strings, two or more pickups; manufacturer to dealer or retailer, f.o.b. factory, each.
15-93-01-05	Trumpet, with or without case, student or professional; manufacturer to retailer or dealer, f.o.b. factory, each.
15-93-01-06	Drum set: Includes bass tom-tom, floor tom, snare, foot pedal, hi-hat stand, cymbal stand and other equipment; manufacturer to dealer or retailer, f.o.b. factory, each.
15-93-01-07	Piano, vertical upright, over 37" in height; manufacturer to retailer or distributor, f.o.b. factory, each.
15-94-02	Jewelry, platinum and karat gold.
15-94-02-01	Ring, ladies' high fashion, 10 to 14 karat; manufacturer to retailer or wholesaler in various quantities, f.o.b. plant or delivered, each.
15-94-02-03	Engagement ring, ladies', 14 karat gold; manufacturer to wholesaler, distributor or retailer, f.o.b. plant or delivered, each.
15-94-02-05	Wedding band, gold; manufacturer to retailer or wholesaler in any quantity, f.o.b. plant or delivered, each.
15-94-02-07	Earrings, ladies', 14 karat gold; manufacturer to retailer or wholesaler in various quantities, f.o.b. plant, each.
15-94-03	Other precious metal jewelry.
15-94-03-01	Ring, sterling silver, ladies' and men's; manufacturer to retailer or wholesaler in various quantities, f.o.b. factory, dozen.
15-94-03-03	Bracelet, ladies', gold-filled, various styles; manufacturer to retailer, distributor or wholesaler in various quantities, f.o.b. plant, each.
15-94-04	Costume jewelry.
15-94-04-01	Ring, ladies', costume, various styles; manufacturer to distributor or wholesaler in various quantities, delivered or f.o.b. plant, dozen.
15-94-04-02	Earrings, ladies', costume, various styles; manufacturer to distributor or wholesaler in various quantities, f.o.b. plant or delivered, dozen.
15-94-04-03	Earrings, children's, costume, various styles; manufacturer to distributor, retailer or wholesaler in various quantities, f.o.b. plant or delivered, pair.
15-94-04-04	Necklace, ladies', costume, various styles; manufacturer to distributor or wholesaler in various quantities, f.o.b. plant or delivered, dozen.
15-94-04-05	Neckchain, men's, costume, various styles; manufacturer to retailer, distributor or wholesaler in various quantities, f.o.b. plant, dozen.
15-94-04-09	Watchband, metal, for men and women, various styles; manufacturer to retailer, jobber or wholesaler in various quantities, f.o.b. factory, each.
15-94-05	Jewelers' materials and findings.
15-94-05-01	Setting, 14 karat gold; manufacturer to retailer, distributor or other equipment manufacturer in various quantities, f.o.b. plant or delivered, each.
15-94-05-03	Finding, gold-filled, various items; manufacturer to other equipment manufacturer, distributor or retailer in various quantities, f.o.b. factory or delivered, dozen.
15-94-06	Diamonds and lapidary work.
15-94-06-01	Diamond, .25 carat, grade VS-2, GIA color grade G; cutter to retailer or other equipment manufacturer in various quantities, f.o.b. plant or delivered, each.

Relative Importance of Components in the Producer Price Index

Relative importance of components in the Producer Price Index by stage of processing

Table 2 presents the relative importance of commodity groupings in the Producer Price Index by stage of processing (SOP) in December 1978, before and after the January 1979 sample change. The relative importance of a component represents its value weight that is allocated to a particular SOP category—finished goods, intermediate materials, or crude materials—expressed as a percentage of the total weight of the SOP category. Commodities at the subproduct class (6-digit) level are assigned to SOP indexes according to the class of customer and the amount of processing, manufacturing, or assembling to which those commodities are subjected before they enter the market. The weight of each subproduct class is allocated among the various SOP indexes in accordance with the relative proportion of output accounted for at each level of processing. (For a more detailed explanation, see “Brief Explanation of Producer Price Indexes” on p. 108.)

Relative importance of commodities in the Producer Price Index, all levels

The relative importance of any item or grouping in the Producer Price Index (PPI) represents its value weight expressed as a percent of the total value weight for the All Commodities Index. The relative importance figure for a given commodity represents the value of shipments of that commodity plus the shipment values of unpriced commodities whose price movements are assumed to be similar to those of the given commodity. Weights currently used to combine price changes of individual commodities in the PPI sample are based on shipment values in the 1972 industrial censuses, adjusted for price change between the weight date (1972) and the specified date.

Table 3 shows the relative importance of items and groupings in December 1978 before and after the January 1979 sample change.¹ Relative importance data and descriptions of sample changes each year were published in annual supplements of *Wholesale Prices and Price Indexes* starting in 1972. The 1976 supplement included relative importance data reflecting the major weight revision of December 1975, when 1972 shipment values were substituted as weights for 1963 shipment values. From January 1964 through January 1971, information on annual sample changes and relative importance data

appeared in each January issue of *Wholesale Prices and Price Indexes*. The January 1967 issue included comprehensive information on the major weight revision and commodity reclassification effective in December 1966. Information for earlier periods was published through 1963 in annual bulletins.

Calculation of relative importance data

When prices are changing at different rates, a previously published relative importance figure may be adjusted to derive the relative importance of a given commodity or grouping for any desired month, as illustrated in table A. Calculated relative importance data (column 6) compared with published data (column 7) show that this procedure approximates the true relative importance reasonably well. This procedure will not work, however, when there has been a sample change and/or weight revision affecting the specified commodity or grouping during the selected time span. For example, the relative importance of plastic construction products (commodity code 07-21) for December 1978, based on the published December 1977 relative importance of 0.304, would be 0.283. However, because the entire structure of plastic products (commodity code 07-2) was revised and reweighted in June 1978, the actual December 1978 relative importance of plastic construction products was 0.148.

Any set of commodities or groupings may be subjected to the procedure illustrated in table A, as long as the All Commodities data are included. This procedure reflects relative importance changes which result from different rates of price change among components of the All Commodities Index. The relative importance of any item or grouping will increase if its relative price change over a given period is greater than the relative price change for the All Commodities Index, but will decrease if its relative price change is smaller. Thus, table A shows that the relative importance for meats declined from December 1975 (3.449) to December 1978 (3.188) even though meat prices rose more than 12 percent during that interval, because All Commodities rose nearly 22 percent over the same span.

¹ See “Summary of Changes in the Producer Price Index Sample, July 1978 and January 1979,” p. 1 of this report.

Table A. Calculation of relative importance data for December 1978 (based on 1972 weights)

Commodity (1)	PPI commodity code (2)	Published relative importance, Dec. 1975 (3)	Relative price change, Dec. 1975- Dec. 1978 ^a (4)	Product ^b (5)	Calculated relative importance, Dec. 1978 ^c (6)	Published relative importance, Dec. 1978 ^d (7)
All commodities. . . .		100.000	121.71	121.71	100.000	100.000
Processed foods and feeds	02	14.413	117.02	16.8661	13.858	13.877
Meats	02-21	3.449	112.45	3.8784	3.187	3.188
Veal, prime	02-21-01-09	0.023	125.64	0.0289	0.024	0.024
Lumber and wood products	08	2.232	157.62	3.5181	2.891	2.893
Softwood lumber	08-11	0.872	172.59	1.5050	1.237	1.238

^a Divide the December 1978 Index by the December 1975 Index and multiply the quotient by 100.

^b Multiply the published relative importance (col. 3) by its relative price change (col. 4) and divide by 100.

^c Divide the product for each commodity (col. 5) by the value for the All Commodities Index (121.71), i.e., adjust the value so that the All Commodities Index equals 100.

^d See table 3.

Calculation of special indexes

Users of the PPI are not limited to groupings for which index numbers are published because special purpose indexes can be constructed from published data. Relative importance figures can be used as weights to combine relative changes in prices of selected commodities or to exclude one or more components from a published grouping index as illustrated in tables B and C. All major weight revisions must be taken into account. Therefore, the number of "links" depends on the number of weight revisions between the starting date and the ending date.

Changes in classification also must be taken into account when commodity groupings are combined. In January 1967, the classification structure of the PPI which had been in effect since January 1952 was revised somewhat. Because of these changes, new relative importance figures based on the regrouped indexes were calculated for 1960.² Therefore, considerable caution must be exercised when combining group indexes prior to January 1967. In those cases where the composition of a group index has been affected by reclassification, individual items must be combined.

Table B shows a procedure for combining items into a special grouping; table C, how an item may be excluded from a grouping.

Assume that the index for other grains does not exist and that you want to construct a special index for selected Decembers to include all major weight revisions since 1954. Four major weight revisions between 1954 and 1978 require "linking" in December 1957, 1960, 1966, and 1975. Any item having minor weight adjustments from sample changes in other years must be considered. Linking prevents the weight change from affecting the level of the index when new weights are introduced. In this process, the percent change in price from December forward, computed on the new weights, is applied to the index for December computed on the old weights.

The steps for combining items are: Step (1) Adjust the published December relative importance for the commodities to be included in the special index to total 1.00000. A new set of relative importance figures is required each time a major weight revision was introduced or minor adjustments were made due to a sample change. Such changes effective in January of any year are introduced by linking in the previous December.

Step (2) Relative importance data are appropriate weights for combining indexes only when the index base is the same as the period to which the respective importance data (weights) refer. Therefore, indexes must be rebased if the published base does not conform with the relative importance data to be used to combine the indexes for specified periods. Indexes may be rebased by dividing them by the index for the desired base period and multiplying by 100. All indexes must be on the same base to make such a conversion.

Step (3) The relative weights (step 1) are multiplied by the indexes (step 2), which are price relatives on the same base as the corresponding weights. The sum of the products is the special combined index on a specified base.

Step (4) For comparability throughout the period, indexes from step 3 must be converted to a December 1954 base, the starting point for the index. Indexes already on this base were rounded to one decimal place (step 3-b, columns 1 and 2). The December 1957 index (December 1954=100) was multiplied by the indexes on a December 1957 base (step 3-b, column 3); the December 1960 index (December 1954=100) by the index on a December 1960 base, and so forth until all of the indexes are chained together. Each product in the chaining process is divided by 100 and rounded to one decimal place.

² See *Wholesale Prices and Price Indexes*, January 1967 (final) and February 1967 (final), for a description of the changes and 1960 relative importance figures.

Table B. Calculation of Producer Price Index for Other Grains [Code 01-22]

Steps	1954 December (1)	1957 December (2)	1960 December (3)	1966 December (4)	1967 Average (5)	1975 December (6)	1978 December (7)
Step 1	Published relative importance (weight) in All Commodities adjusted to 1.00000 for group						
Weight base	(1952-53)	(1954)	(1958)	(1963)		(1972)	
Barley	0.11334	0.14174	0.16168	0.11953		0.09150	
Corn	.73200	.70249	.70210	.79527		.83988	
Oats.	.14133	.14019	.12275	.07692		.05991	
Rye.	.01333	.01558	.01347	.00828		.00871	
Other grains (total)	1.00000	1.00000	1.00000	1.00000		1.00000	
Step 2	Published index converted to same base as the base weight values						
	Dec. 1954=100	Dec. 1954=100	Dec. 1957=100	Dec. 1960=100	Dec. 1966=100	Dec. 1966=100	Dec. 1975=100
Barley	100.0	81.6	91.4	128.4	96.5	188.6	76.0
Corn	100.0	78.1	85.6	140.5	90.1	179.1	86.5
Oats.	100.0	82.9	91.1	135.6	95.1	232.3	83.4
Rye.	100.0	102.7	84.9	112.7	95.6	217.7	93.2
Step 3-a	Indexes weighted by relative importance corresponding to base of the index						
Barley	11.334	9.249	12.955	20.760	11.535	22.543	6.954
Corn	73.200	57.169	60.133	98.645	71.654	142.433	72.650
Oats.	14.133	11.716	12.771	16.645	7.315	17.869	4.996
Rye.	1.333	1.369	1.323	1.518	.792	1.803	.812
Other grains (total)	100.000	79.503	87.182	137.568	91.296	184.648	85.412
Step 3-b	Value for other grains divided by corresponding weight (1.00000) from step 1 equals special index on specified base						
Index	100.00 Dec. 1954=100	79.50 Dec. 1954=100	87.18 Dec. 1957=100	137.57 Dec. 1960=100	91.30 Dec. 1966=100	184.65 Dec. 1966=100	85.41 Dec. 1975=100
Step 4-a	Index converted to a December 1954=100 base by chaining together indexes on different bases						
Index (Dec. 1954=100)	100.0	79.5	69.3	95.3	87.0	176.0	150.3
Step 4-b	Index converted to 1967=100 base by dividing indexes on December 1954 base by average of 1967 and multiplying by 100						
Index (1967=100)	114.9	91.4	79.7	109.5	100.0	202.3	172.8

Indexes on the December 1954 base are converted to a 1967 base by dividing each index by the average for the year 1967, and multiplying the result by 100. The indexes may differ slightly from published indexes because of rounding.

The steps necessary to exclude an item are essentially the same as those outlined for combining items. Table C illustrates the various steps. In table B, items are added

to obtain a total; in table C, an item is subtracted from the total group to obtain the new grouping.

Constructing special stage-of-processing indexes

Since early 1978, BLS has emphasized stage-of-processing (SOP) indexes for measuring price changes at the primary market level, rather than traditional commodity grouping indexes such as the All Commodities Index.

Table C. Calculation of Producer Price Index for other grains, less rye [Code 01-22, less 01-22-04-15]

Steps	1954 December (1)	1957 December (2)	1960 December (3)	1966 December (4)	1967 Average (5)	1975 December (6)	1978 December (7)
Step 1	Published relative importance (weight) in All Commodities adjusted to 1.00000 for group						
Weight base	(1952-53)	(1954)	(1958)	(1963)		(1972)	
Other grains, including rye.	1.00000	1.00000	1.00000	1.00000		1.00000	
Rye	.01333	.01558	.01347	.00828		.00872	
Other grains, less rye	.98667	.98442	.98653	.99172		.99128	
Step 2	Published index converted to same base as the weight values						
	Dec. 1954=100	Dec. 1954=100	Dec. 1957=100	Dec. 1960=100	Dec. 1966=100	Dec. 1966=100	Dec. 1975=100
Other grains, including rye.	100.0	79.5	87.1	137.7	91.2	184.5	85.5
Rye	100.0	102.7	84.9	112.7	95.6	217.7	93.2
Step 3-a	Indexes weighted by relative importance corresponding to base of the index						
Other grains, including rye.	100.000	79.500	87.100	137.700	91.200	184.500	85.500
Rye	1.333	1.369	1.323	1.518	.792	1.803	.812
Other grains, less rye	98.667	78.131	85.777	136.182	90.408	182.697	84.688
Step 3-b	Values for other grains, less rye, divided by corresponding weight from step 1 equals special index on specified base						
Index	100.00 Dec. 1954=100	79.19 Dec. 1954=100	87.13 Dec. 1957=100	138.04 Dec. 1960=100	91.16 Dec. 1966=100	184.22 Dec. 1966=100	85.43 Dec. 1975=100
Step 4-a	Index converted to a December 1954=100 base by chaining together indexes on different bases						
Index (Dec. 1954=100)	100.0	79.2	69.0	95.2	86.8	175.4	149.8
Step 4-b	Index converted to 1967=100 base by dividing indexes on December 1954 base by average for 1967 and multiplying by 100						
Index (1967=100)	115.2	91.2	79.5	109.7	100.0	202.1	172.6

One main advantage of SOP indexes is that they partly alleviate multiple-counting of price changes as materials are processed into finished goods.

A method similar to the one previously discussed may be used to construct special stage-of-processing indexes. Allocations of commodity groupings to SOP categories are made at the subproduct class (6-digit code) level; a particular subproduct class may be allocated to more than one SOP category. Therefore, to construct special SOP indexes, SOP relative importance figures such as those in table 2 of this Supplement must be used.

The following example shows how to construct a special

SOP index. Suppose two manufacturing firms in a long term sales contract decided to include an escalation clause to provide for variations in the cost of raw materials other than those produced in the agricultural sector. They wanted a special index for crude nonfood materials less farm products to be the basis for determining the escalation from December 1977 to December 1978. (In fact, such an index is officially published already: Crude materials for further processing, excluding crude foodstuffs and feedstuffs, plant and animal fibers, oilseeds, and leaf tobacco. This index, shown in table 4A of this Supplement, will be used to check the results of this procedure.)

Column A in table D shows the relative importance figures for December 1977 for the indexes concerned. (These were obtained from table 2 of the 1978 Supplement.) The desired special index consists of the crude nonfood materials index minus the eight subproduct classes within the major commodity group for farm products (commodity code 01). In column B, the relative importance figures are normalized, so that crude nonfood materials equals 100, and the other indexes are correspondingly adjusted to remain proportionate. The relative importance for the special index equals 100 minus the sum of the relative importances of the eight excluded subproduct classes. Columns C and D show the index values based on 1967=100 for December 1977 and December 1978, respectively.

Under this procedure as in the one previously described, indexes are rebased to coincide with the month from which the relative importance figures were derived (in this case, December 1977). Column E shows the same indexes as column D, based on December 1977 instead of 1967. Indexes in column E are derived by dividing the indexes in column D by indexes in column C and multiplying

by 100. The normalized relative importance percentages in column B are multiplied by the rebased index values in column E to obtain the weighted index values in column F. As in column B, the sum of the values for the eight subproduct classes in column F is subtracted from the value for crude nonfood materials. The remainder is then divided by the calculated relative importance for the special index in column B. This result is the special index for crude nonfood materials excluding farm products, based on December 1977=100. The value 114.9 matches the PPI for crude materials excluding foodstuffs and feedstuffs, plant and animal fibers, oilseeds, and leaf tobacco, which has also been rebased to December 1977=100 for this example. Thus, the accuracy of this procedure is verified.

This procedure cannot be used to derive special SOP indexes before December 1977 because SOP relative importance data were not published regularly before then. As noted, calculating special historical indexes requires linking indexes whenever a major weight revision occurs. No SOP relative importance data have been published for December 1975, when the last major weight revision took place.

Table D. Calculation of a special stage-of-processing index

Grouping	PPI code	A Relative Importance, Dec. 1977	B Weights Dec. 1977	C Index Dec. 1977 (1967=100)	D Index Dec. 1978 (1967=100)	E Index Dec. 1978 (Dec. 1977=100)	F Weighted Index	G Result (Dec. 1977=100)

¹ The relative importance of a component represents its value weight that is allocated to a particular SOP category—finished goods, intermediate materials, or crude materials—expressed as a percentage of the total weight of the SOP category. See p. 9 of this report.

NOTE: Individual items and subtotals may not add exactly to totals because of rounding differences. The value 0.000 represents percentage less than 0.005.

¹ Monthly data and annual averages have been revised to reflect the availability of late reports and corrections by respondents.

² Seasonal commodity—no price available for this month.

³ Not available.

⁴ Some of the titles of the individual commodity price indexes included in this grouping are not shown.

⁵ Prices for some items in this grouping are lagged one month.

⁶ Regional price indexes for bituminous coal, industrial sizes, contract are pre-

sented in table 8 of this report.

⁷ Prices for natural gas (05-31) are lagged one month.

⁸ Includes only domestic production.

⁹ Prices for gasoline (05-71), light distillate (05-72), middle distillate (05-73), and residual fuels (05-74) are lagged one month.

¹⁰ Regional refined petroleum product prices and price indexes are presented in table 7 of this report.

¹¹ Some prices for industrial chemicals (06-1) are lagged one month.

Table 5. Producer price indexes for special commodity groupings, 1978¹

(1967=100 unless otherwise indicated)

Commodity grouping	Annual average	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
All commodities, less farm products	208.4	200.1	201.7	203.1	205.2	206.7	208.1	209.2	209.9	211.5	213.8	214.8	216.4
All foods	206.4	193.4	198.6	199.3	204.5	206.5	208.9	210.5	206.1	209.6	212.5	211.1	215.6

¹ These indexes are calculated by combining the indexes listed below by commodity code after each special commodity grouping (titles in table 4B). The weights are those used for the comprehensive All Commodities Index.

² Monthly data and annual averages have been revised to reflect availability of late reports and corrections by respondents.

All commodities, less farm products: 02 through 15

All foods: 01-1, 01-7, and 02 less 02-61, 02-62, and 02-9

Processed foods: 02 less 02-9, 02-61, and 02-62

Industrial commodities, less fuels and power: 03, 04, and 06 through 15

Selected textile mill products: 03-27, 03-37-01-05, 03-37-01-07, 03-37-01-09, 03-37-01-11, 03-37-03-42, 03-4, 03-81-01-55, 03-81-01-72, 03-81-01-73, 03-81-02-39, 03-81-02-72, 03-81-02-74, 03-81-03-62, 03-81-03-64, 03-82-02-12, 03-83-03-22, and 12-31. Effective July 1978: 03-82-01-02, 03-81-01-32, 03-82-01-33, 03-82-01-52, 03-83-03-42

Hosiery: 03-81-01-72, 03-81-01-73, 03-81-02-74, 03-81-03-64

Underwear and nightwear: 03-81-01-74, 03-81-01-75, 03-81-01-76, 03-81-01-77, 03-81-01-78, 03-81-02-74, 03-81-02-75, 03-81-02-76, and 03-81-03-62

Chemicals and allied products, including synthetic rubber and synthetic fibers: 03-1, 07-11-02 and 06 less 06-4

Pharmaceutical preparations: 06-35 and 06-36

Lumber and wood products, excluding millwork and other wood products: 08-1 and 08-3

Special metals and metal products: 10, 11-1, and 14-1

Fabricated metal products: 10-3, 10-4, 10-5, 10-6, 10-7, and 10-8

Copper and copper products: 10-22-01-06, 10-22-01-08, 10-22-01-13, 10-23-01, 10-24-01-06, 10-25-02, and 10-26-01

Machinery and motive products: 11 and 14

Machinery and equipment, except electrical: 11-1, 11-2, 11-3, 11-4, 11-6, 11-9

Agricultural machinery, including tractors: 11-11, 11-12 less 11-11-51 and 11-12-51

Metalworking machinery: 11-32, 11-33-04, 11-37, and 11-38

Numerically controlled machine tools: 11-37-11-11, 11-37-11-12, 11-37-14-11, and 11-37-16

Total tractors: 11-11 and 11-28 less 11-11-51

Industrial valves: 11-49-01-01 through 11-49-01-06, 11-49-01-16 through 11-49-01-19, 11-49-01-21 through 11-49-01-27

Industrial fittings: 11-49-01-11 through 11-49-01-15

Abrasive grinding wheels: 11-36-11, 11-36-12, 11-36-13, 11-36-14, 11-36-15

Agricultural machinery and equipment, less parts (old WPI code 11-1): 11-1 less 11-11-51 and 11-12-51

Farm and garden tractors, less parts (old WPI code 11-11): 11-11 less 11-11-51

Agricultural machinery excluding tractors, less parts (old WPI code 11-12): 11-12 less 11-12-51

Construction materials: 06-21, 07-21, 08-11, 08-12-01-01, 08-12-01-02, 08-12-01-31, 08-12-01-71, 08-2, 08-3, 09-2, 10-13-02-39, 10-13-02-48, 10-13-02-55, 10-13-02-63, 10-13-02-69, 10-13-02-71, 10-13-02-89, 10-13-02-91, 10-15-01-31, 10-15-01-32, 10-15-01-33, 10-25-01-01, 10-25-01-03, 10-25-01-04, 10-25-01-05, 10-25-01-17, 10-25-01-18, 10-25-01-19, 10-25-01-21, 10-25-01-23, 10-25-02-51, 10-25-02-52, 10-25-19-93, 10-26-01-06, 10-26-01-07, 10-26-01-09, 10-26-01-11, 10-26-02-67, 10-26-02-71, 10-41-01, 10-6, 10-6, 10-71, 10-73-01-01, 10-73-01-06, 10-73-01-11, 10-73-01-12, 10-73-01-13, 10-73-01-14, 10-73-01-15, 10-73-01-55, 10-73-01-57, 10-74-01-01, 10-74-01-31, 10-74-01-81, 10-74-01-82, 10-74-01-87, 10-74-01-91, 10-74-01-95, 10-81-01-46, 10-83-01-01, 10-83-01-03, 10-83-01-05, 10-83-01-07, 10-83-01-09, 10-83-01-11, 10-83-01-21, 10-83-01-23, 10-83-01-31, 10-83-01-33, 10-83-01-35, 10-83-01-37, 10-83-01-41, 10-83-01-46, 10-83-01-48, 10-89-01-26, 10-89-01-33, 10-89-01-51, 11-42, 11-47, 11-49-01-02, 11-49-01-06, 11-49-01-12, 11-49-01-15, 11-71-01-01, 11-71-01-02, 11-71-01-03, 11-71-01-04, 11-71-02-65, 11-71-02-71, 11-71-02-73, 12-11-01-06, 12-32, 13-11-01-01, 13-11-02-07, 13-2, 13-3, 13-4, 13-6, 13-7, 13-91, 13-92, 13-93

Price Indexes for Railroad Freight

Railroad freight price indexes, which were originally released in June 1975, are published each month in *Producer Prices and Price Indexes*. These indexes are based on a probability sample of actual shipments. The prices are derived from tariffs published by the various bureaus, agents, and/or railroads which are in effect on

the 15th of the month. These indexes are calculated from a Laspeyres fixed-weighted index formula and are available back to January 1969. For a more detailed description and the historical data, see "Introducing Indexes for Railroad Freight," *Monthly Labor Review*, June 1975.

Table 6. Price indexes for total railroad freight and selected STCC¹ groups, 1978

(1969=100)

Code ¹	Description	1969 relative importance ²	Indexes

¹ Standard Transportation Commodity Code.

² The price index for total railroad freight also includes STCC groups not shown separately.

³ On June 29, 1978, the Interstate Commerce Commission ordered a rollback, retroactive to November 30, 1977, of the rate increases authorized under Ex Parte No. 343 from 5 percent to 3 percent for newsprint paper, sulphuric acid, rubber (natural or synthetic), manufactured iron or steel, and recyclables. The rate increases for sodium alkalis and industrial gases were lowered from 5 percent to 2 percent. In view of this decision, the indexes

for STCC groups 28 and 33 and total freight were revised from January through June 1978.

NOTE: The index is designed to measure changes in the prices of shipping goods by rail in the United States. The representative prices and sample used for the index reflect the railroads' prices for shipping a fixed set of commodities under specified and unchanging conditions. The index is not intended to measure changes in railroad revenue or in shipper costs that result from changes in services or mode.

Table 7. Producer price indexes for refined petroleum products by region, 1978¹

¹ All prices have been lagged one month since February 1973. Monthly data and annual averages have been revised to reflect the availability of late reports and corrections by respondents.

² Caution should be used in interpreting month to month changes, because of low response

rates from the sample of reporters which ranged from 30 to 60 percent for these particular indexes.

³ Not available.

Table 8. Producer price indexes for bituminous coal by region, 1978¹

(June 1976=100)

Commodity code	Commodity group	Annual average	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

¹ Data through December 1978 have been revised to reflect the availability of late reports and corrections by respondents.

² Not published.

NOTE: These indexes are designed to measure changes in the price of coal sold in contract sales transactions (excluding captive production) in various domestic mining regions. Prices are reported by coal operators or sales agents, f.o.b. mine, per net short ton.

Relative Importance of Product Classes in the Industry-Sector Price Index

Table 11 shows the relative importance of product classes in the Industry-Sector Price Index in December 1978 after the sample change effective January 1979. The relative importance of a product class represents its basic value weight expressed as a percent of the total industry

weight. The basic value weight currently used is the 1972 value of shipments as reported in the industrial censuses, adjusted for price change between the weight date (1972) and the specified date.

Table 11. Relative importance of product classes in the industry-sector price index, December 1978

Test Data for Producer Price Index Revision

Test data from the pilot survey for the Producer Price Index (PPI) revision have been developed for the period beginning January 1978 and are published in table 12 "Producer price indexes for the net output of selected industries and products," in this report. The revision is being undertaken as a comprehensive effort to make major improvements in the measurement of price changes by domestic producers of goods and services. The data now available are from a pilot survey conducted to test the methods and procedures for the comprehensive revision. The revision will be conducted on an industry-by-industry basis. The results for the first industries in the full-scale survey will be available in the fall of 1979. Coverage of all mining and manufacturing industries is scheduled for completion in 1984.

The four industries covered in the pilot survey are: Soybean oil mills (SIC 2075), newspaper printing and publishing (SIC 2711), concrete products other than block and brick (SIC 3272), and household laundry equipment (SIC 3633). These industries were selected because they offered a wide range of pricing problems on which to test the new techniques. Indexes covering some of these same industries will continue to be calculated under the old program. The new indexes will not begin replacing the old ones in the Producer Price Index until early 1980.

These pilot survey indexes differ from indexes in the current Producer Price Index in a number of important respects:

- (1) They are *industry-based* indexes. The entire output of each industry is sampled, including secondary production and miscellaneous receipts. The current Producer Price Indexes are based on a sample of major products. Even the Industry-Sector Price Indexes (ISPI's) are derived from these product indexes. The current ISPI's do not price miscellaneous receipts, and the prices for primary and secondary production are obtained from any producer of the product even if that producer does not belong to the industry. The newly published pilot survey indexes are derived from prices supplied strictly by producers within the industry. As a result, the pilot product indexes apply only to the production within the industry. After all mining and manufacturing industries are covered by the revision, product indexes will be constructed covering all production of the product.

- (2) These new indexes are classified in accordance with the *Standard Industrial Classification* (SIC) system and incorporate most features of the Census of Manufactures product code extensions of the SIC. The coding will make the data easier to use in conjunction with other industry-oriented economic data.
- (3) *Net output values of shipments* are used as weights in preparing the index. Net output values refer to the value of shipments leaving the industry. In contrast, the weights used in the current PPI's and ISPI's are gross shipment values, which include shipments *within* an industry. The resulting multiple counting of price changes is one of the major defects of the current indexes. The current stage-of-processing indexes partially correct this defect, but the new indexes consistently correct it at all levels.
- (4) Increased emphasis is being given to obtaining actual *transaction prices at the time of shipment*. Although it has been a general objective of the current program to obtain transaction prices, they have not been obtained for significant portions of the index. In addition, some products in the current PPI intentionally have been priced at order prices rather than shipment prices.
- (5) *Probability sampling* was used to select the firms to be asked to report prices. As a result, firms of all sizes are included in the sample. In addition, within the firm, the individual items to be priced and the terms of the transaction were chosen using probability techniques. In the current PPI, major companies selected on a judgment basis are asked to report prices for volume-selling items under "typical" transaction terms.

Since this is a pilot survey, a number of changes will be introduced as the full-scale survey is put in place. These changes include the following:

- (1) Greater product detail will generally be available because of larger sample sizes and increased capabilities to combine product areas that are not publishable by themselves. The 5-digit product class indexes, which cannot now be calculated, will be produced.
- (2) Ultimately, the survey will cover all shipments by all 493 industries in mining and manufacturing. The present PPI's cover only about 50 percent of

this value; the pilot survey covers about 2 percent of it.

- (3) Improved calculation techniques will be introduced, including the use of Census of Manufactures shipment data to weight the 7-digit product indexes to higher levels. The pilot indexes rely on the estimated relative importance of products based on shipment data derived from the survey itself.

- (4) Estimates of sampling error will be published.

For further information on the underlying concepts and methodology of the Producer Price Index revision, see "Improving the Measurement of Producer Price Change," by John F. Early, in the April 1978 issue of the *Monthly Labor Review*. Reprints are available from the Bureau of Labor Statistics upon request.

¹ Price indexes in this table are derived from a pilot survey to test methods and procedures for a comprehensive revision of the Producer Price Indexes. All data have been revised to reflect the availability of late reports and corrections by respondents.

² Some of the individual product indexes included in this industry are not shown; therefore, the published components will not balance.

³ Not available.

Brief Explanation of Producer Price Indexes

Producer Price Indexes measure average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. These data were previously presented as the Wholesale Price Index. The name "Producer Price Indexes" is now being used to reflect more accurately the coverage of the data. The sample used for calculating these indexes continues to contain nearly 2,800 commodities and about 10,000 quotations selected to represent the movement of prices of all commodities produced in the manufacturing, agriculture, forestry, fishing, mining, gas and electricity, and public utilities sectors. The universe includes all commodities produced or imported for sale in commercial transactions in primary markets in the United States.

Producer Price Indexes can be organized by stage of processing or by commodity. The stage of processing structure organizes products by degree of fabrication (i.e., finished goods, intermediate or semifinished goods, and crude materials). The commodity structure organizes products by similarity of end-use or material composition.

Finished goods are commodities that will not undergo further processing and are ready for sale to the ultimate user, either an individual consumer or a business firm. Capital equipment (formerly called producer finished

goods) includes commodities such as motor trucks, farm equipment, and machine tools. Finished consumer goods include foods and other types of goods eventually purchased by retailers and used by consumers. Consumer foods include unprocessed foods such as eggs and fresh vegetables, as well as processed foods such as bakery products and meats. Other finished consumer goods include durables such as automobiles, household furniture, and jewelry, and nondurables such as apparel and gasoline.

Intermediate materials, supplies, and components are commodities that have been processed but require further processing before they become finished goods. Examples of such semifinished goods include flour, cotton yarns, steel mill products, belts and belting, lumber, liquefied petroleum gas, paper boxes, and motor vehicle parts.

Crude materials for further processing include products entering the market for the first time which have not been manufactured or fabricated but will be processed before becoming finished goods. Scrap materials are also included. Crude foodstuffs and feedstuffs include items such as grains and livestock. Examples of crude nonfood materials include raw cotton, crude petroleum, natural gas, hides and skins, and iron and steel scrap.

For analysis of general price trends, stage of processing indexes are more useful than commodity grouping indexes. This is because commodity grouping indexes sometimes produce exaggerated or misleading signals of price changes by reflecting the same price movement through various stages of processing. For example, suppose that a price rise for steel scrap results in an increase in the price of steel sheet and then an advance in prices of automobiles produced from that steel. The All Commodities Price Index and the Industrial Commodities Price Index would reflect the same price movement three times—once for the steel scrap, once for the steel sheet, and once for the automobiles. This multiple counting occurs because the weighting structure for the All Commodities Index uses the total shipment values for all commodities at all stages of processing. On the other hand, the Finished Goods Price Index would reflect the change in automobile prices, the Intermediate Materials Price Index would reflect the steel sheet price change, and the Crude Materials Price Index would reflect the rise in the price of steel scrap. (See illustration on p. 108).

To the extent possible, prices used in calculating Producer Price Indexes apply to the first significant commercial transaction in the United States, from the production or central marketing point. Price data are generally collected monthly, primarily by mail questionnaire. Re-

spondents are asked to provide net prices or to provide all applicable discounts. BLS attempts to base Producer Price Indexes on actual transaction prices; however, list or book prices are used if transaction prices are not available. Most prices are obtained directly from producing companies on a voluntary and confidential basis, but some prices are taken from trade publications or from other Government agencies. Prices generally are reported for the Tuesday of the week containing the 13th day of the month.

In calculating Producer Price Indexes, price changes for the various commodities are averaged together with weights representing their importance in the total net selling value of all commodities as of 1972. The detailed data are aggregated to obtain indexes for stage of processing groupings, commodity groupings, durability of product groupings, and a number of special composite groupings. Each index measures price changes from a reference period which equals 100.0 (usually 1967, as designated by the Office of Management and Budget). An increase of 85 percent from the reference period in the Finished Goods Price Index, for example, is shown as 185.0. This change can also be expressed in dollars, as follows: "The price of a representative sample of finished goods sold in primary markets in the United States has risen from \$100 in 1967 to \$185."

A Note about Calculating Index Changes

Movements of price indexes from one month to another are usually expressed as percent changes rather than changes in index points because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The following example illustrates the computation of index point and percent changes. (See box.)

Percent changes for 3-month and 6-month periods are expressed as annual rates that are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

<i>Index Point Change</i>	
Finished Goods Price Index	185.5
less previous index	<u>184.5</u>
equals index point change	1.0
<i>Index Percent Change</i>	
Index point change	<u>1.0</u>
divided by the previous index	184.5
equals	0.005
result multiplied by 100	0.005 x 100
equals index percent change	0.5

A Note on Seasonally Adjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted data usually are preferred because they eliminate the effect of changes that normally occur at about the same time and in about the same magnitude every year—such as price movements resulting from normal weather patterns, regular production and marketing cycles, model changeovers, seasonal discounts, and holidays. For this reason, seasonally adjusted data more clearly reveal the underlying cyclical trends. Seasonally adjusted data are subject to revision when seasonal factors are revised each year.

The unadjusted data are of primary interest to users who need information which can be related to the actual dollar values of transactions. Individuals requiring this information include marketing specialists, purchasing agents, budget and cost analysts, contract specialists, and commodity traders. Unadjusted data generally are used in escalating contracts such as purchase agreements or real estate leases.

KEEP ABREAST OF THE ECONOMY

mlr supplies data and analysis on both consumer and industrial prices. **mlr** provides analysis and data on employment and unemployment. **mlr** records changes in wages and fringe benefits, hours and earnings, productivity, and unit costs. **mlr** publishes timely reports on collective bargaining, plus monthly listings of major agreements that are expiring. **mlr** features analytical articles on the labor force, industrial relations, and significant court decisions in labor cases. **mlr** offers thoughtful reviews and timely listings of current books in the fields of economics and social sciences.
