Supplement to Producer Prices and Price Indexes Data for 1980

DEPOSITORY
NOV 4 1981
LOUISVILLE PUBLIC LIBRARY

U.S. Department of Labor
Bureau of Labor Statistics
October 1981

Producer Prices and Price Indexes is a monthly report on producer price movements including text, tables, and technical notes. An annual supplement contains monthly data for the calendar year, annual averages, and information on weights and changes in the sample. A subscription may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Subscription price:

\$18 a year domestic (includes supplement)

4.50 additional foreign

Single copy \$2.75

Supplement \$3.00

The Secretary of Labor has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department. Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through July 1983. Second-class postage paid at Laurel, Md. Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics.

Supplement to Producer Prices and Price Indexes Data for 1980

U.S. Department of Labor
Raymond J. Donovan, Secretary
Bureau of Labor Statistics
Janet L. Norwood, Commissioner
October 1981

Preface

This annual supplement to *Producer Prices and Price Indexes* presents monthly indexes and annual averages for 1980. In most cases, data are the same as revised data published in successive monthly issues of this periodical. The supplement also provides information on the relative importance of index components at the end of the year. In addition, indexes for selected telephone services are included in this supplement for the first time.

Information on changes in the sample for Producer Price Indexes is no longer being published in the annual supplement. Such information can be found in the July 1980, January 1981, and February 1981 issues.

Material in this publication is in the public domain and may, with appropriate credit, be reproduced without permission.

Contents

	<i>Page</i>		<i>Page</i>
Monthly indexes and annual averages for Producer Price Indexes, 1980	1	10. Selected telephone services	88
Tables:		Relative importance	89
1. Stage-of-processing groupings	2	Tables:	
2. Durability-of-product groupings	3	11. Relative importance of components in the Producer Price Index by stage-of-processing, December 1980	90
3. Commodity groups, subgroups, product classes, and individual items	4	12. Relative importance of commodities included in the Producer Price Index, all levels, December 1980	104
4. Refined petroleum products by region	64	13. Relative importance of product classes in the industry-sector price index, December 1980	139
5. Bituminous coal by region	69		
6. Special commodity groupings	70	Technical notes	173
7. Output of selected SIC industries	72		
8. Output of selected census product classes	75		
9. Total railroad freight and selected STCC groups	87		

Monthly Indexes and Annual Averages for Producer Price Indexes, 1980

Tables 1 through 10 present 1980 monthly indexes and annual averages for all categories covered under the Producer Price Index program. Most data shown are the revised data published in successive monthly issues of *Producer Prices and Price Indexes*. (All monthly data are subject to revision 4 months after original publication.) However, revised stage-of-processing (SOP) indexes in this supplement may differ from those previously reported because SOP indexes

from January 1976 through December 1980 were revised early in 1981 to reflect 1972 input-output relationships. (See the January 1981 issue for further details.)

1980 indexes calculated under the survey for the Producer Price Index Revision program are not presented in this supplement; these data can be found in the monthly issues of this periodical.

Table 1. Producer Price Indexes for stage-of-processing groupings, 1980¹

(1967 = 100)

Grouping	Annual average	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

¹ All monthly data and annual averages have been revised to reflect the availability of late reports and corrections by respondents.

² Seasonal commodity—no price available this month.

³ Not available.

⁴ Regional price indexes for bituminous coal, industrial size contract, are presented in table 5.

⁵ Prices for all items in this grouping are lagged 1 month.

⁶ Regional refined petroleum product prices and price indexes are presented in table 4.

⁷ Prices for some items in this grouping are lagged 1 month.

N.E.C. Not elsewhere classified.

NOTE: Titles of some commodities are not shown in this table because they fail to meet our publication criteria.

Table 4. Producer Price Indexes for refined petroleum products by region, 1980¹

(July 1975 = 100 unless otherwise indicated)

¹ These indexes are calculated by combining the indexes listed below by commodity code after each special commodity grouping (titles in table 3). The weights are those used for the comprehensive All Commodities Index.

² Monthly data and annual averages have been revised to reflect the availability of late reports and corrections by respondents.

All commodities, less farm products: 02 through 15

All foods: 01-1, 01-7, and 02 less 02-61, 02-62, and 02-9

Processed foods: 02 less 02-61, 02-62, and 02-9

Industrial commodities, less fuels and power: 03, 04, and 06 through 15

Selected textile mill products: 03-27, 03-37-01-05, 03-37-01-07, 03-37-01-09, 03-37-01-11, 03-37-03-42, 03-4, 03-81-01-55, 03-81-01-72, 03-81-01-73, 03-81-02-39, 03-81-02-72, 03-81-02-74, 03-81-03-62, 03-81-03-64, 03-82-01, 03-82-02, 03-83-03-22, 03-83-03-42, and 12-31

Hosiery: 03-81-01-72, 03-81-01-73, 03-81-02-74, 03-81-03-64

Underwear and nightwear: 03-81-01-74, 03-81-01-75, 03-81-01-76, 03-81-01-77, 03-81-01-78, 03-81-02-74, 03-81-02-75, 03-81-02-78, and 03-81-03-62

Chemicals and allied products, including synthetic rubber and synthetic fibers: 03-1, 06 less 06-4, and 07-11-02

Pharmaceutical preparations: 06-35 and 06-36

Lumber and wood products, excluding millwork and other wood products: 08-1 and 08-3

Special metals and metal products: 10, 11-1, and 14-1

Fabricated metal products: 10-3, 10-4, 10-5, 10-6, 10-7, and 10-8

Copper and copper products: 10-22-01-06, 10-22-01-08, 10-22-01-13, 10-23-01, 10-24-01-06, 10-25-02, and 10-26-01

Machinery and motive products: 11 and 14

Machinery and equipment, except electrical: 11-1, 11-2, 11-3, 11-4, 11-6, 11-9

Footnotes to table 6—Continued

Agricultural machinery, including tractors: 11-11 and 11-12 less 11-11-51 and 11-12-51

Metalworking machinery: 11-32, 11-33-04, 11-37, and 11-38

Numerically controlled machine tools: 11-37-11-11, 11-37-11-12, 11-37-14-11 and 11-37-16

Total tractors: 11-11 and 11-28 less 11-11-51 and 11-28-51

Industrial valves: 11-49-01-01 through 11-49-01-06, 11-49-01-16 through 11-49-01-19, 11-49-01-21 through 11-49-01-27

Industrial fittings: 11-49-01-11 through 11-49-01-15

Abrasive grinding wheels: 11-36-11, 11-36-12, 11-36-13, 11-36-14, 11-36-15

Agricultural machinery and equipment, less parts (old commodity code 11-1): 11-1 less 11-11-51 and 11-12-51

Farm and garden tractors, less parts (old commodity code 11-11): 11-11 less 11-11-51

Agricultural machinery excluding tractors, less parts (old commodity code 11-12): 11-12 less 11-12-51

Construction materials: 06-21, 07-21, 08-11, 08-12-01-01, 08-12-01-02, 08-12-01-31, 08-12-01-71, 08-2, 08-3, 09-2, 10-13-02-39, 10-13-02-48, 10-13-02-55, 10-13-02-63, 10-13-02-69, 10-13-02-71, 10-13-02-89, 10-13-02-91, 10-15-01-31, 10-15-01-32, 10-15-01-33, 10-25-01-01, 10-25-01-03, 10-25-01-04, 10-25-01-05, 10-25-01-17, 10-25-01-18, 10-25-01-19, 10-25-01-21, 10-25-01-23, 10-25-02-51, 10-25-02-52, 10-25-19-93, 10-26-01-06, 10-26-01-07, 10-26-01-09, 10-26-01-11, 10-26-02-67, 10-26-02-71, 10-41-01, 10-5, 10-6, 10-71, 10-73-01-01, 10-73-01-06, 10-73-01-11, 10-73-01-12, 10-73-01-13, 10-73-01-14, 10-73-01-15, 10-73-01-55, 10-73-01-57, 10-74-01-01, 10-74-01-31, 10-74-01-81, 10-74-01-82, 10-74-01-87, 10-74-01-91, 10-74-01-95, 10-81-01-46, 10-83-01-01, 10-83-01-03, 10-83-01-05, 10-83-01-07, 10-83-01-09, 10-83-01-11, 10-83-01-21, 10-83-01-23, 10-83-01-31, 10-83-01-33, 10-83-01-35, 10-83-01-37, 10-83-01-41, 10-83-01-46, 10-83-01-48, 10-89-01-26, 10-89-01-33, 10-89-01-51, 11-42, 11-47, 11-49-01-02, 11-49-01-06, 11-49-01-12, 11-49-01-15, 11-71-01-01, 11-71-01-02, 11-71-01-03, 11-71-01-04, 11-71-02-65, 11-71-02-71, 11-71-02-73, 12-11-01-06, 12-32, 13-11-01-01, 13-11-02-07, 13-2, 13-3, 13-4, 13-6, 13-7, 13-91, 13-92, 13-93

Table 7. Producer price indexes for the output of selected SIC industries, 1980*

(1967=100 UNLESS OTHERWISE INDICATED)

1972 SIC CODE	INDUSTRY DESCRIPTION	OTHER BASES	ANN AVG	JAN.	FEB.	MAR.	APR.	MAY	JUNE	JULY	AUG.	SEPT.	OCT.	NOV.	DEC.

¹ Standard Transportation Commodity Code.

² The price index for total railroad freight also includes STCC groups not shown separately.

³ December 1978 = 100.

the United States. The representative prices and sample used for the index reflect the railroads' prices for shipping a fixed set of commodities under specified and unchanging conditions. The index is not intended to measure changes in railroad revenue or shipper costs that result from changes in services or mode.

NOTE: The index is designed to measure changes in the prices of shipping goods by rail in

Table 10. Producer Price Indexes for selected telephone services, 1980¹

¹ Monthly data and annual averages have been revised to reflect the availability of late reports and corrections by respondents. Revised indexes may not agree with previously published revised data because of a comprehensive historical revision which became effective with the April 1981 issue of this publication.

² Telephone services contained in the Consumer Price Index cover not only local residential service, but also parts of toll service, equipment leasing (such as extension phones), and nonrecurring charges (such as installation).

Relative importance

Tables 11, 12, and 13 contain relative importance data as of December 1980 by stage-of-processing; by commodity groups, subgroups, product classes, and individual items; and for the output of selected Standard Industrial Classification industries and census product classes.

The relative importance of a category on a specific date represents the value of shipments for that category plus the value of unpriced commodities assumed to have price movements similar to those of the priced items. Relative impor-

tance data are generally expressed as a percentage of the total weight of some composite grouping, such as the All Commodities index, the Finished Goods index, etc.

For a description of the procedures for calculating relative importance data, and explanations on how to combine components to construct special indexes, see *Producer Prices and Price Indexes, Supplement 1979, Data for 1978*, pp. 9-13.

Table 11. Relative importance of components in the Producer Price Index by stage of processing, December 1980¹

¹ The relative importance of a component represents its value weight that is allocated to a particular stage-of-processing (SOP) category—finished goods, intermediate materials, or crude materials—expressed as a percentage of the total weight of the SOP category. See note on relative importance on p. 89.

value 0.000 represents a percentage less than 0.0005. A dash in the "Former" column indicates a new SOP allocation effective January 1981; a dash in the "Revised" column indicates that the series is no longer included in the indicated SOP category.

NOTE: Individual items and subtotals may not add exactly to totals because of rounding differences. The

¹ Comprehensive relative importance figures are computed once each year in December. See note on p. 89. The "Revised" column shows relative importance figures for December 1980 based on 1972 shipment values from the Census of Manufacturers and other sources, after the sample revision effective January 1981; the "Former" relative importance figures are for the same month before the revision

of the index sample. A dash in the "Former" column indicates that series was introduced in January 1981, and a dash in the "Revised" column indicates that the series was discontinued as of January 1981.

² Recoded effective January 1981.

Table 13. Relative importance of product classes in the industry-sector price index, December 1980

CODE	DESCRIPTION	RELATIVE IMPORTANCE (1972 WEIGHT) REVISED DECEMBER 1980
1011	Iron ore	100.000

35992	Pneumatic and hydraulic cylinders	0.369

See footnotes at end of the table.

Table 13. Continued—Relative importance of product classes in the industry-sector price index, December 1980

CODE	DESCRIPTION	RELATIVE IMPORTANCE (1972 WEIGHT) REVISED DECEMBER 1980
3534	Elevators and moving stairways	100.000
	PRIMARY PRODUCTS	
35340	Elevators and moving stairways	98.670
	SECONDARY PRODUCTS	
35361	Hoists	0.269
35362	Overhead traveling cranes and monorail systems	0.164
35493	Welding and cutting apparatus, except electric	0.423
35992	Pneumatic and hydraulic cylinders	0.255
36790	Electronic components, n.e.c.	0.219
3542	Machine tools, metal forming types	100.000
	PRIMARY PRODUCTS	
35421	Punching, shearing, bending, and forming machines	22.799
35422	Presses, including forging presses	30.703
35423	Other metal-forming machine tools, incl. forging machines	20.484
35424	Parts for metal-forming machine tools	24.626
	SECONDARY PRODUCTS	
35414	Grinding and polishing machines	0.576
35418	Other machine tools, incl. those designed for home workshops	0.534
35419	Parts for metal-cutting type machine tools, sold separately	0.280
3546	Power driven hand tools	100.000
	PRIMARY PRODUCTS	
35461	Power driven hand tools, electric	54.488
35462	Power driven hand tools, pneumatic	27.465
	SECONDARY PRODUCTS	
34231	Mechanics', hand service tools	0.836
34232	Edge tools, hand operated	0.260
34233	Files, rasps, and file accessories and other handtools	0.295
34250	Handsaws, saw blades, and saw accessories	2.763
35247	Lawnmowers and snow blowers	4.550
35249	Parts for lawn and garden equipment, for sale separately	2.081
35321	Underground mining & mineral beneficiation machinery/equip.	0.310
35322	Crushing, pulverizing, and screening machinery	0.304
35323	All other mining machinery and equipment	0.393
35324	Parts and attachments for mining machinery and equipment	0.507
35361	Hoists	0.979
35362	Overhead traveling cranes and monorail systems	0.608
35411	Boring machines	0.041
35412	Drilling machines	0.043
35414	Grinding and polishing machines	0.049
35415	Lathes	0.090
35416	Milling machines	0.094
35418	Other machine tools, incl. those designed for home workshops	0.342
35424	Parts for metal-forming machine tools	0.025
35451	Small cutting tools for machine tools/metalworking mach.	0.133
35453	Other attachments and accessories for machine tools	0.107
35531	Woodworking machinery excluding home workshops	0.795
35681	Plain bearings and bushings, unmounted	0.175
35683	Other mechanical power transmission equipment	1.173
35699	All other general industrial machinery, n.e.c.	1.096
3552	Textile machinery	100.000
	PRIMARY PRODUCTS	
35521	Textile machinery	55.622
35522	Parts and attachments for textile machinery	42.186
	SECONDARY PRODUCTS	
33219	Other gray iron castings (except ductile)	1.402
35591	Chemical manufacturing industries mach. & equipment & parts	0.212
35593	Plastics-working mach. & equipment, excl. patterns & molds	0.578
3553	Woodworking machinery	100.000
	PRIMARY PRODUCTS	
35531	Woodworking machinery excluding home workshops	81.007
35532	Woodworking machinery for home workshops	15.643
	SECONDARY PRODUCTS	
35195	Outboard motors	0.822

See footnotes at end of table.

Table 13. Continued—Relative importance of product classes in the industry-sector price index, December 1980

CODE	DESCRIPTION	RELATIVE IMPORTANCE (1972 WEIGHT) REVISED DECEMBER 1980
35414	Grinding and polishing machines	0.223
35418	Other machine tools, incl. those designed for home workshops	0.695
35595	Other special industry machinery and equipment	1.440
35992	Pneumatic and hydraulic cylinders	0.170
3576	Scales and balances, except laboratory	100.000
	PRIMARY PRODUCTS	
35760	Scales and balances, except laboratory	96.351
	SECONDARY PRODUCTS	
34446	Other sheet metalwork	0.767
34699	Other stamped and pressed metal end products	0.677
35514	Packing, packaging & bottling machinery for indust. prods.	2.205
3592	Carburetors, pistons, piston rings and valves.	100.000
	PRIMARY PRODUCTS	
35921	Carburetors, new and rebuilt	43.953
35922	Pistons and piston rings	23.232
35923	Valves (intake and exhaust)	15.616
	SECONDARY PRODUCTS	
33216	Molds for heavy steel ingots	0.139
33219	Other gray iron castings (except ductile)	0.256
33611	Aluminum and aluminum-base alloy die castings	0.272
33612	Other aluminum and aluminum-base alloy castings	0.874
34292	Furniture hardware	0.062
34294	Builders' hardware	0.203
34296	Motor vehicle hardware	0.306
34297	Other transportation equipment hardware, ...	0.196
34621	Drop, upset and press steel forgings (closed die)	0.142
35992	Pneumatic and hydraulic cylinders	0.011
35994	Miscellaneous machinery products incl. flexible metal hose	1.715
36941	Ignition harness and cable sets	0.324
36943	Cranking motors	0.292
36944	Spark plugs	0.186
37141	Parts & accessories for motor vehicles, excl. rebuilt parts	12.219
3612	Power, distribution, and specialty transformers	100.000
	PRIMARY PRODUCTS	
36122	Power and distribution transformers, except parts	65.769
36124	Fluorescent lamp ballasts	11.948
36125	Specialty transformers (except fluorescent lamp ballasts)	10.965
36127	Power regulators, boosters, reactors, other transformers	7.990
	SECONDARY PRODUCTS	
34692	Job stampings, except automotive	0.077
36131	Switchgear, except ducts and relays	0.746
36133	Low voltage panelboards and distribution boards	0.078
36220	General industry power circuit devices and controls	0.054
36430	Current-carrying wiring devices including lighting rods	0.072
36441	Pole line and transmission hardware	0.079
36790	Electronic components, n.e.c.	2.179
38252	Test equip. for testing electrical, radio, & comm. circuits	0.041
3623	Welding apparatus, electric	100.000
	PRIMARY PRODUCTS	
36231	Arc welding machines, components, except electrodes	28.930
36232	Arc welding electrodes, metal	36.855
36233	Resistance welders, accessories, and electrodes	16.268
	SECONDARY PRODUCTS	
28995	Essential oils, fireworks and pyrotechnics	3.616
33155	Steel wire, not produced in steel mills	0.984
33691	Zinc and zinc-base alloy castings	0.879
33991	Metal powders and paste	0.344
34969	Other fabricated wire products, not prod. by wire drawers	0.666
34969	Other fabricated wire products, not prod. by wire drawers	0.697
35421	Punching, shearing, bending, and forming machines	0.236
35422	Presses, including forging presses	0.406
35423	Other metal-forming machine tools, incl. forging machines	0.220
35424	Parts for metal-forming machine tools	0.272

See footnotes at end of table.

Table 13. Continued—Relative importance of product classes in the industry-sector price index, December 1980

CODE	DESCRIPTION	RELATIVE IMPORTANCE (1972 WEIGHT) REVISED DECEMBER 1980
35493	Welding and cutting apparatus, except electric	0.798
35595	Other special industry machinery and equipment	0.432
35671	Electrical industrial furnaces and ovens, metal processing	0.537
35671	Electrical industrial furnaces and ovens, metal processing	0.573
36212	Integral h.p. motors/generators, exc. land trans. equip.	5.901
36241	Electrodes	0.270
36430	Current-carrying wiring devices including lighting rods	0.778
36945	Other complete elect. equip. for internal combust. engines	0.339
3631	Household cooking equipment	100.000
	PRIMARY PRODUCTS	
36311	Electric household ranges and ovens	42.807
36312	Household ovens and ranges, equipment, and parts	48.733
	SECONDARY PRODUCTS	
34337	Other heating equipment, except electric	1.139
34446	Other sheet metalwork	1.437
34692	Job stampings, except automotive	1.988
36321	Household refrigerators, including comb. refrig.-freezers	0.115
36331	Household mechanical washing machines, dryers	0.901
36341	Electric fans, except industrial type	0.226
36394	Dishwashing machines and food waste disposers	2.274
36399	Other household appliances and parts	0.381
3632	Household refrigerators and home and farm freezers.	100.000
	PRIMARY PRODUCTS	
36320	Household refrigerators and home and farm freezers, n.s.k.	0.744
36321	Household refrigerators, including comb. refrig.-freezers	76.411
36322	Home and farm freezers	12.077
	SECONDARY PRODUCTS	
35851	Heat transfer equipment, except room air-conditioners	2.065
35852	Unitary air-conditioners	0.334
35853	Commercial refrigeration equipment	0.310
35854	Compressors and compressor units, all refrigerants	1.326
35855	Condensing units, all refrigerants.	0.032
35856	Room air-conditioners and dehumidifiers	2.157
35858	Warm air furnaces (except floor & wall) & parts/attachments	0.371
36311	Electric household ranges and ovens	1.370
36343	Other small household electric appliances	0.059
36350	Household vacuum cleaners, including parts and attachments.	2.616
36394	Dishwashing machines and food waste disposers	0.126
3633	Household laundry equipment	100.000
	PRIMARY PRODUCTS	
36331	Household mechanical washing machines, dryers	87.385
	SECONDARY PRODUCTS	
36311	Electric household ranges and ovens	7.180
36394	Dishwashing machines and food waste disposers	5.435
3635	Household vacuum cleaners	100.000
	PRIMARY PRODUCTS	
36350	Household vacuum cleaners, including parts and attachments.	86.441
	SECONDARY PRODUCTS	
26432	Specialty bags and liners	3.838
36331	Household mechanical washing machines, dryers	1.589
36399	Other household appliances and parts	8.131
3636	Sewing machines	100.000
	PRIMARY PRODUCTS	
36360	Sewing machines & parts, excluding cases and cabinets	100.000
3641	Electric lamps	100.000
	PRIMARY PRODUCTS	
36410	Electric lamps (bulbs only), including sealed beam lamps	94.822
	SECONDARY PRODUCTS	
33572	Copper and copper-base alloy wire	0.223
33574	Communication wire and cable	0.119
33575	Nonferrous wire cloth made in nonferrous wiredrawing plants	0.243
33576	Appliance wire and cord and flexible cord sets	0.891

See footnotes at end of table.

Brief Explanation of Producer Price Indexes

Producer price indexes measure average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. These data were previously presented as the Wholesale Price Index. The name "Producer Price Indexes" is now being used to reflect more accurately the coverage of the data. The sample used for calculating these indexes continues to contain nearly 2,800 commodities and about 10,000 quotations selected to represent the movement of prices of all commodities produced in the manufacturing, agriculture, forestry, fishing, mining, gas and electricity, and public utilities sectors. The universe includes all commodities produced or imported for sale in commercial transactions in primary markets in the United States.

Producer price indexes can be organized by stage of processing or by commodity. The stage-of-processing structure organizes products by degree of fabrication (i.e., finished goods, intermediate or semifinished goods, and crude materials). The commodity structure organizes products by similarity of end-use or material composition.

Finished goods are commodities that will not undergo further processing and are ready for sale to the ultimate user, either an individual consumer or a business firm. Capital equipment (formerly called producer finished goods) includes commodities such as motor trucks, farm equipment, and machine tools. Finished consumer goods include foods and other types of goods eventually purchased by retailers and used by consumers. Consumer foods include unprocessed foods such as eggs and fresh vegetables, as well as processed foods such as bakery products and meats. Other finished consumer goods include durables such as automobiles, household furniture, and jewelry, and non-durables such as apparel and gasoline.

Intermediate materials, supplies, and components are commodities that have been processed but require further processing before they become finished goods. Examples of such semifinished goods include flour, cotton yarns, steel mill products, belts and belting, lumber, liquefied petroleum gas,

paper boxes, and motor vehicle parts.

Crude materials for further processing include products entering the market for the first time which have not been manufactured or fabricated but will be processed before becoming finished goods. Scrap materials are also included. Crude foodstuffs and feedstuffs include items such as grains and livestock. Examples of crude nonfood materials include raw cotton, crude petroleum, natural gas, hides and skins, and iron and steel scrap.

For analysis of general price trends, stage-of-processing indexes are more useful than commodity grouping indexes. This is because commodity grouping indexes sometimes produce exaggerated or misleading signals of price changes by reflecting the same price movement through various stages of processing. For example, suppose that a price rise for steel scrap results in an increase in the price of steel sheet and then an advance in prices of automobiles produced from that steel. The All Commodities Price Index and the Industrial Commodities Price Index would reflect the same price movement three times—once for the steel scrap, once for the steel sheet, and once for the automobiles. This multiple counting occurs because the weighting structure for the All Commodities Index uses the total shipment values of all commodities at all stages of processing. On the other hand, the Finished Goods Price Index would reflect the change in automobile prices, the Intermediate Materials Price Index would reflect the steel sheet price change, and the Crude Materials Price Index would reflect the rise in the price of steel scrap. (See illustration.)

To the extent possible, prices used in calculating producer price indexes apply to the first significant commercial transaction in the United States, from the production or central marketing point. Price data are generally collected monthly, primarily by mail questionnaire. Respondents are asked to provide net prices or to provide all applicable discounts. BLS attempts to base producer price indexes on actual transaction prices; however, list or book prices are used if transaction prices are not available. Most prices are obtained directly from producing companies on a voluntary and confidential basis, but some prices are taken from trade publications or from other Government agencies. Prices generally are reported for the Tuesday of the week containing the 13th day of the month.

In calculating producer price indexes, price changes for the various commodities are averaged together with weights representing their importance in the total net selling value of all commodities as of 1972. The detailed data are aggregated to obtain indexes for stage-of-processing groupings, commodity groupings, durability of product groupings, and a number of special composite groupings. Each index measures price changes from a reference period which

equals 100.0 (usually 1967, as designated by the Office of Management and Budget). An increase of 125 percent from the reference period in the Finished Goods Price Index, for example, is shown as 225.0. This change can also be expressed in dollars, as follows: "The price of a representative sample of finished goods sold in primary markets in the United States has risen from \$100 in 1967 to \$225."

Calculating Index Changes

Movements of price indexes from one month to another are usually expressed as percent changes rather than changes in index points because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The box shows the computation of index point and percent changes.

Index Point Change	
Finished Goods Price Index	185.5
less previous index	184.5
equals index point change	1.0
Index Percent Change	
Index point change	1.0
divided by the previous index	184.5
equals	0.005
result multiplied by 100	0.005×100
equals index percent change	0.5

Percent changes for 3-month and 6-month periods are expressed as annual rates that are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics published seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted data usually are preferred because they eliminate the effect of changes that normally occur at about the same time and in about the same magnitude every year—such as price movements resulting from normal weather patterns, regular production and marketing cycles, model changeovers, seasonal discounts, and holidays. For this reason, seasonally adjusted data more clearly reveal the underlying cyclical trends. Seasonally adjusted data are subject to revision when seasonal factors are revised each year.

The unadjusted data are of primary interest to users who need information which can be related to the actual dollar values of transactions. Individuals requiring this information include marketing specialists, purchasing agents, budget and cost analysts, contract specialists, and commodity traders. Unadjusted data generally are used in escalating contracts such as purchase agreements or real estate leases.

Data from the Producer Price Index Revision

Data from the 1980 Producer Price Index (PPI) revision are not included in this supplement because of limited resources. They will be found in the monthly issues of this report in table 4, "Producer price indexes for the net output of selected industries and their products." Table 4 of the monthly issues of this report includes data for additional Standard Industrial Classification (SIC) industries (4-digit level) and Census products (7 digit level); indexes for Census product classes (5- and 6-digit levels) and more detailed subproducts (9-digit level); and, for some industries, indexes for other sources of revenue. Thus, table 4 shows all official indexes arising from the ongoing PPI revision. By 1985, table 4 will cover all 493 SIC mining and manufacturing industries.

Traditional commodity price indexes and Industry-Sector Price Indexes (ISPI's) will continue to be published. In 1983, however, an entirely new structure will replace the traditional commodity structure as the primary vehicle for releasing and analyzing price changes at the primary market level.

Kinds of product indexes

Industries listed monthly in table 4 may be represented by one to three kinds of product indexes. Every industry has *primary product indexes* to show changes in prices received by establishments classified in the industry for products made primarily, but not exclusively, within that industry. To be classified in an industry, an establishment must have a plurality of its total shipment value accounted for by primary products. In addition, some industries also may have *secondary product indexes* to show changes in prices received by establishments classified in the industry for products primary to some other industry. Finally, some industries have *miscellaneous receipts indexes* to show price changes in other sources of revenue received by establishments within the industry which are not derived from the sale of their products. Because of the distinction between primary and secondary products, an index for a product made in one industry may differ from the index for the same product made in another industry.

Corresponding indexes

Some 7-digit Census products published monthly in table 4 correspond to 8-digit commodities published monthly in table 6 (table 3 of this supplement). Similarly, some 4-digit SIC industries and 5-digit Census product classes in table 4 correspond to the ISPI's in tables 11, 12, and 13 (tables 7 and 8 of this supplement). In these cases, movements in the commodity or Industry-Sector Price Indexes are calculated on the basis of the movements of their counterparts in table 4. Although most such indexes continue to be published in tables 6, 11, or 13 on their original base period of 1967 = 100 or some later base, the corresponding indexes in table 4 are published on a base of the month of their introduction. Therefore, index levels for corresponding items may differ, but monthly percent changes will be identical.

A point code of “.99” immediately after an 8-digit commodity code in table 6 identifies a commodity index that is calculated from a product index in table 4. A footnote after the industry or product class title in tables 11, 12, or 13 indicates an ISPI based on an index from table 4. The aggregation of commodity price indexes into commodity grouping indexes in table 6 continues to follow the traditional methodology; similarly, stage-of-processing price indexes in table 1 also are calculated from the commodity grouping indexes as in the past.

How new indexes differ from traditional commodity indexes

New indexes differ from traditional commodity indexes in a number of respects:

(1) New indexes are *industry-based*. The entire output of each industry is sampled, including primary and secondary production and miscellaneous receipts. Traditional commodity indexes are based on a selection of the most important commodities, and most Industry-Sector Price Indexes continue to be calculated from these traditional commodity indexes. In addition, traditional ISPI's do not cover miscellaneous receipts, and prices of products are included without systematic regard for the industry classification of the producer. New indexes, on the other hand, are based on prices of primary and secondary products made by producers classified in the specified industry; as a result, new indexes apply to production within the specified industry. As data from more mining and manufacturing industries become available, additional indexes will be constructed to cover each product regardless of the industry of origin.

(2) New indexes are easier to use with other industry-oriented economic data because they are *classified according to the SIC* and incorporate most features of the Census of Manufactures product code extensions of the SIC.

(3) New indexes use *net output values of shipments as weights*. Net output values refer to the value of shipments leaving the industry and exclude intra-industry shipments. In contrast, weights in traditional commodity price indexes and ISPI's include shipments within an industry. The resulting multiple-counting of price changes at successive stages of processing is one major defect of the traditional commodity grouping indexes. Stage-of-processing indexes partially correct this defect, but new indexes consistently correct it at all levels of aggregation. (Net output weights are not used, however, for traditional commodity indexes whose movements are based on corresponding new indexes.)

In the revision program, the relative importance of items within a product is based upon shipment value data and sampling weights from the revision survey itself. When detailed products are aggregated to the 5-digit product class and 4-digit industry levels, however, weights are taken from Census of Manufactures data, along with estimates of intra-industry shipments from input-output tables produced by the Bureau of Economic Analysis of the U.S. Department of Commerce.

(4) New indexes emphasize *actual transaction prices at the time of shipment* to minimize the use of list prices and order prices, which occasionally have been used in traditional commodity price indexes and ISPI's. In addition, some traditional indexes have been calculated intentionally from order prices rather than from shipment prices.

(5) New indexes are based on prices reported by companies of all sizes and locations selected by *probability sampling*. In addition, individual items and transaction terms from these firms are chosen by probability techniques. (Estimates of sampling error will be published later.) In the traditional PPI program, major companies selected on a judgment basis have been asked to report prices for volume-selling items under “typical” transaction terms.

For further information on the underlying concepts and methodology of the PPI revision, see two *Monthly Labor Review* articles by John F. Early: “Improving the Measurement of Producer Price Change,” April 1978; and “The Producer Price Index Revision: Overview and Pilot Survey Results,” December 1979. Reprints are available from the Bureau of Labor Statistics on request.
