An Asset to any Bank

[See inside
back cover]

ONE of the greatest assets of a bank is the good-will of its depositors. Anything that contributes to this good-will—this asset—is worth while.

The visible protection which checks on National Safety Paper afford and their obvious high quality, do much to build good-will.

Specify National Safety Paper to your printer, stationer, or lithographer.

Your Business— And Ours

BANKERS and investment bond dealers have much in common—not alone in their community of interests but in a similarity of experiences as well.

As a lender of money, as a maker of credits, you serve as a builder of your community and of others. We, too, build. Only in the matter of methods and of forms do our activities in this line differ from yours.

Success for you, as for us, depends on the exercise of caution, quite beyond the needs of many lines of business. The same ideals animate us both; we are restrained by the same inhibitions. And the measure of our progress, as of yours, is the degree of service we extend to those with whom we deal.

Your business and ours are much alike. You are more than money lenders. We are more than bond sellers. There is justification for banker and investment dealer alike, we believe, in holding to a certain pride in what they accomplish beyond the narrow confines of mere accumulation of gain.

It may be because we recognize this conception of their business, and ours, that so many bankers have found the facilities of our organization especially well suited to their needs. Not alone when in the market for securities do they call on us but, as well, for appraisals, statistical information and general market information.

Perhaps we could serve you, too, as well.

Do you have an Investment Policy in relation to bank reserves?

A PORTION of every bank's funds must be readily obtainable whenever needed. What suits one bank in this respect will not suit another. Much depends upon the character and source of deposits, the maturity of loans, the nature of other assets, and the diversity of local business.

Cash and quick reserves are maintained, with a low earning power; loans and discounts compensate with a relatively high return. But both of these should be supported by a sound secondary reserve of marketable bonds earning a substantial rate of interest.

It is possible to build a secondary reserve of a size and content which will yield a liberal income and still safeguard the bank in event of both probable and unforeseen demand.

This is a problem in which we have had wide experience. We deal with thousands of banks, hundreds of whom depend upon us entirely for making and maintaining a sound investment structure for their secondary reserve.

Security, maturity, and marketability are carefully worked out to fit the needs of each institution—in the light of its own local conditions.

*May we have the opportunity to explain
the advantages of this service to you?*

To Our Subscribers

This, the 103rd Edition of the BANKERS BLUE BOOK, marks more than a half century of service to the bankers of the world, and the fact that nearly all of the banks of the United States use our book is proof that the service has met the hearty approval of the subscribers.

We assure our patrons that, as in the past, nothing will be left undone by us in our effort to give them a Directory as nearly perfect as experience, continued vigilance, time, and money can make it.

We wish to impress our constantly increasing number of friends and patrons that the claims of this publication for patronage are:

1. It is *honestly* revised twice a year.
2. It is *complete, up-to-date*, and is published nearer to the date of the information it contains than is any other similar publication.
3. It is printed in *tabulated form*, all *similar items* being placed in the *same column*, for the purpose of comparison—more expensive, but more satisfactory to the user.
4. It is *beautifully printed* in clear readable type.
5. It gives to advertisers a *country-wide circulation*, covering a majority of the best banks in America and thousands of the large corporations and lawyers' offices, a *circulation three times that of any other similar publication* and larger than that of any other financial publication in America.

HOW BIG IS ANY BANK?

THIS Directory shows the money size of every bank in the United States.

Certain banks are big in service and readiness to serve, in addition to their size in money. One good test of this kind of bigness is "Do they advertise in the Bankers Directory?"

Numerical System of the A. B. A.

In 1911 the American Bankers Association adopted what is known as the "Numerical Transit System," which has proved of great benefit to the banking world.

The Clearing House Section of the Association, realizing the necessity for a uniform system of bank numbers, called a meeting in Chicago, December 12 and 13, 1910, to evolve a plan and work out the details of numbering all the banks in the country. The Executive Council of the American Bankers Association at its meeting in Nashville, May 2, 1911, unanimously adopted the system devised by the committee and authorized the publication of the A. B. A. KEY BOOK containing the names of the banks and the numbers assigned.

EXPLANATION OF SYSTEM

The reserve cities were each designated by a prefix number, with the exception of Brooklyn, which was included with New York City, Kansas City, Kan., which was included with Kansas City, Mo., and South Omaha, which was included with Omaha. Buffalo, N. Y., and Memphis, Tenn., on account of their size and importance as banking centers were included with the reserve cities. The cities were numbered from 1 to 49, inclusive, in the order of their population according to the Government Census of 1910. The lower numbers were thus assigned to the larger cities.

The Treasurer and Assistant Treasurers of the United States and the Post Offices were also numbered in these cities.

The state prefix numbers, together with clearing house numbers, were used in numbering the banks in the largest city in each state other than the reserve cities, all other cities being designated by the use of the state prefix and the numbers given to the banks, which are continued in the relative order of the population of the cities in each state. Each bank is numbered in consecutive order according to seniority in each city or town, excepting in towns having only one bank, in which case the banks are numbered in alphabetical order according to towns.

Rand McNally & Co. of Chicago, publishers of the Key to Numerical System of The American Bankers Association, assign numbers to new banks as they are organized and supply, upon request, the number of any bank which does not appear in the Key, and in March and September each year publish and supply upon request, free of charge, supplements containing all changes which have taken place since any previous issue of the Key or of any supplement.

The Ninth Edition was published in May, 1926.

VALUES OF FOREIGN COINS

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY.
Washington, D. C., July 1, 1927

In pursuance of the provisions of section 25 of the act of August 27, 1894, as amended by Section 403, Title IV, of the Act of May 27, 1921, and reenacted by section 522, Title IV, Act of September 21, 1922, I hereby proclaim the following estimate by the Director of the Mint of the values of pure metal contents of foreign coins to be the values of such coins in terms of the money of account of the United States, to be followed in estimating the value of all foreign merchandise exported to the United States during the quarter beginning July 1, 1927, expressed in any such metallic currencies: *Provided, however*, that if no such value has been proclaimed, or if the value so proclaimed varies by five per centum or more from a value measured by the buying rate in the New York market at noon on the day of exportation, conversion shall be made at a value measured by such buying rate, as determined by the Federal Reserve Bank of New York and published by me as certified by said bank pursuant to the provisions of said Section 25 as amended.

Ogden L. Mills, Acting Secretary of the Treasury.

BANK SUPPLIES

KEEPING up customer service and keeping down unnecessary operating costs—this is, perhaps, the most acute problem of today in bank operation. It demands of the purchasing executive a wide acquaintance with sources of dependable and economical bank supplies. The best is generally the cheapest in the long run. You can broaden your market for quality products by studying the supply announcements in this Directory.

CLEARING HOUSES IN THE UNITED STATES

Babson's Statistical Organization of Wellesley Hills, Mass. says: "One of the best measurements of a locality's purchasing power is in the amount of the deposits in its banks. Moreover, one of the best measurements of a locality's prosperity is the relative rate at which the amount on deposit in its banks is increasing."

This compilation of deposits in the cities having Clearing Houses gives total deposits of *all* banks and will be a valuable reference for comparisons.

CONSOLIDATED CAPITALIZATION FOR JULY 1927 STATEMENTS

IMPORTANT: This tabulation covers only institutions performing the functions of a bank. Some publishers for reasons of their own, include in their tabulation all those concerns whose names they publish but whose business is confined to the selling of investments. Such information is naturally misleading. We carry the names of thousands of such institutions but they are not included in this tabulation.
