THE 120th BLUE BOOK

In this, its 120th consecutive edition, RAND McNALLY BANKERS DIRECTORY indicates for the first time in any publication, all members of the Federal Deposit Insurance Corporation.

This is the second major improvement made by the Rand McNally Bankers Directory in recent issues—

The first being the inclusion in the Directory of a complete list of government agencies which deal with banks and emphasizes four major advances in the presentation of bank data.

For increased speed and facility of reading, the latest statements of all American banks are given in thousands of dollars only. Thus, a bank with \$200,000.00 capital is shown in the Capital column as \$200. An institution having \$1,421,642 in deposits is shown in the Deposit column as \$1,422.

Each statement is broken down into eleven items, and this columnar tabulation makes it possible to obtain detailed information about any bank at a glance, and to compare relative condition on each item of all banks in a city—again at a glance.

Surplus and undivided profits are shown in two separate columns,—one for surplus and the other for undivided profits and/or reserves.

Bonds and investments are broken down into two columns—one showing U. S. Government securities and the other, all other securities.

A Totals column gives the combined resources or liabilities of each bank.

The Blue Book's approval by American bankers, and its confidence in the future of American banking, have justified the heavy additional cost necessary to include the symbol indicating membership in the Federal Deposit Insurance Corporation.

Numerical System of the A. B. A.

IN 1911 the American Bankers Association adopted what is known as the "Numerical Transit System," which has proved of great benefit to the banking world.

The Clearing House Section of the Association, realizing the necessity for a uniform system of bank numbers, called a meeting in Chicago, December 12 and 13, 1910, to evolve a plan and work out the details of numbering all the banks in the country. The Executive Council of the American Bankers Association at its meeting in Nashville, May 2, 1911, unanimously adopted the System devised by the committee and authorized the publication of the A. B. A. KEY BOOK containing the names of the banks and the numbers assigned.

EXPLANATION OF SYSTEM

The reserve cities were each designated by a prefix number, with the exception of Brooklyn, which was included with New York City, Kansas City, Kan., which was included with Kansas City, Mo., and South Omaha, which was included with Omaha. Buffalo, N. Y., and Memphis, Tenn., on account of their size and importance as banking centers were included with the reserve cities. The cities were numbered from 1 to 49, inclusive, in the order of their population according to the Government Census of 1910. The lower numbers were thus assigned to the larger cities.

The Treasurer and Assistant Treasurers of the United States and the Post Offices were also numbered in these cities.

The state prefix numbers, together with clearing house numbers, were used in numbering the banks in the largest city in each state other than the reserve cities, all other cities being designated by the use of the state prefix and the numbers given to the banks, which are continued in the relative order of the population of the cities in each state. Each bank is numbered in consecutive order according to seniority in each city or town, excepting in towns having only one bank, in which case the banks are numbered in alphabetical order according to towns.

Rand McNally & Co. of Chicago, publishers of the Key to Numerical System of The American Bankers Association, assign numbers to new banks as they are organized and supply, upon request, the number of any bank which does not appear in the Key.

The Seventeenth Edition was published in May, 1935, and is supplemented to September 15, 1935.
