Beginning with the issues for the year 1913, the free distribution of the annual publications of the Bureau of Foreign and Domestic Commerce will be confined to libraries, educational institutions, the press, and commercial or other organizations. Others may procure them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at the following rates:

Commerce and Navigation of the United States, $1 per copy.

Statistical Abstract of the United States, 50 cents per copy.

Persons on a regular mailing list of the Department of Commerce should give prompt notice to the "Division of Publications, Department of Commerce, Washington, D. C.," of any change of address, stating specifically the form of address in which the publication has previously been received, as well as the new address. The Department should also be advised promptly when a publication is no longer desired.

Persons receiving publications which are not desired, or for which they have only a temporary use, are requested to notify the Division of Publications, and franked mailing slips will be forwarded for their return.

EXPLANATORY NOTES.

The condensed statistics contained in this volume, unless otherwise stated in connection with the individual tables, represent, or are based upon, official figures collated and published under the various laws of the United States or those of other countries to which they may relate. The sources to which the various tables are credited will indicate where application should be made for additional details, with exception that certain tables for which no credit appears are derived from regular reports of the Bureau of Foreign and Domestic Commerce, Department of Commerce, and that Table No. 347 is derived mainly from corresponding data presented in less extended form in the previous body of the book.

General imports.—Tables Nos. 234 and 235 embrace imported articles entered at the customhouses for immediate consumption and imported articles entered for warehouse. The statements of *imports entered for consumption*, Tables Nos. 241, 242, and 243, embrace imported articles entered for immediate consumption and imported articles withdrawn from warehouse for consumption. The statement of *general imports* and the statement of *imports entered for consumption* for any period will always differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "entry for consumption" is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

Import values.—All invoices of imported merchandise shall be made out in the currency of the place or country from whence the importations shall be made, or, if purchased, or agreed to be purchased, in the currency actually paid, agreed upon, or to be paid therefor, shall contain a correct, complete, and detailed description of such merchandise and of the packages, wrappings, or other coverings containing it, and shall be made in triplicate or in quadruplicate in case of merchandise intended for immediate transportation without appraisement, and signed by the person owning or shipping the same, if the merchandise has been actually purchased, or price agreed upon, fixed, or determined, or by the manufacturer or owner thereof, if the same has been procured otherwise than by purchase, or agreement of purchase, or by the duly authorized agent of such purchaser, seller, manufacturer, or owner.

All such invoices shall, at or before the shipment of the merchandise, be produced to the consular officer of the United States of the consular district in which the merchandise was manufactured, or purchased, or contracted to be delivered from, or when purchases or agreements for purchase are made in several places, in the consular district where the merchandise is assembled for shipment, as the case may be, for export to the United States, and shall have indorsed thereon, when so produced, a declaration signed by the purchaser, seller, manufacturer, owner, or agent, setting forth that the invoice is in all respects correct and true and was made at the place from which the merchandise is to be exported to the United States; that it contains, if the merchandise was obtained by purchase, or agreement for purchase, a true and full statement of the time when, the place where, the person from whom the same was purchased, or agreed to be purchased, and the actual cost thereof, or price agreed upon, fixed, or determined, and of all charges thereon, as provided by the act of October 3, 1913; and that no discounts, rebates, or commissions are contained in the invoice but such as have been actually allowed thereon, and that all drawbacks or bounties received or to be received are shown therein; and when obtained in any other manner than by purchase, or agreement of purchase, the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value is the price at which the merchandise described in the invoice is freely offered for sale to all purchasers in said markets, and that it is the price which the manufacturer or owner making the declaration would have received, and was willing to receive, for such merchandise sold in the ordinary course of trade in the usual wholesale quantities, and that it includes all charges thereon as provided by the act of October 3, 1913, and the actual quantity thereof; and that no different invoice of the merchandise mentioned in the invoice so produced has been or will be furnished to anyone. If the merchandise was actually purchased, or agreed to be purchased, the declaration shall also contain a statement that the currency in which such invoice is made out is that which was actually paid for the merchandise by the purchaser or agreed to be paid, fixed, or determined.

Whenever imported merchandise is subject to an ad valorem rate of duty, or to a duty based upon or regulated in any manner by the value thereof, the duty shall be assessed upon the actual market value

or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the seller, shipper, or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States, and if there be used for covering or holding imported merchandise, whether dutiable or free, any unusual article or form designed for use otherwise than in the bona fide transportation of such merchandise to the United States, additional duty shall be levied and collected upon such material or article at the rate to which the same would be subjected if separately imported. The words "value," or "actual market value," or "wholesale price," whenever used in the act of October 3, 1913, or in any law relating to the appraisement of imported merchandise, shall be construed to be the actual market value or wholesale price of such or similar merchandise comparable in value therewith, as defined in that act. [Rev. Stats., 336, secs. 18 and 11 of the act of June 10, 1890, or other laws or regulations, as amended or superseded by act of Oct. 3, 1913. For full details regarding methods provided for ascertaining the actual "import" or "market" values in question (requirements and duties of sellers, purchasers, manufacturers, owners, agents, importers, shippers, consignors, consignees, consuls, collectors, appraisers, other persons, and production and consumption, fines, penalties, exactions, forfeitures, modifications, effect of decisions of courts of competent jurisdiction, etc.) see the complete act of 1913.]

Domestic export values.—Tables Nos. 236 and 237 exhibit the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported, or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles and utensils made from imported metals, etc. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported. (Rev. Stat., 337, and act of Apr. 29, 1902.

Foreign export values.—Table No. 238 called "foreign exports," or "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported from "warehouse" is their import value. The value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Values of foreign merchandise in transit or transshipped.—Table No. 246 exhibits foreign merchandise brought to the United States for immediate transit across the territory of the United States to a foreign country, or for transshipment in the ports of the United States to a foreign country. The value of the commodities returned in this table is determined in a similar manner to that of imports.

Values of warehoused merchandise.—Table No. 245 exhibits imported merchandise in warehouse. This merchandise has already appeared in the statements of *general imports*, Tables Nos. 234 and 235 for the year in which it was imported. The official values of the articles therein represented are the same as the *import values*.

Ton.—The term "ton" used in this volume, as applied to weight, is specified "long" (2,240 pounds) or "short" (2,000 pounds). The term "ton," as applied to vessel measurement, is specified as "net," equal to 100 cubic feet of carrying capacity exclusive of deductions for space occupied by cabins, machinery, etc., or "gross," equal to 100 cubic feet of the entire carrying capacity inclusive of such space. The term "M feet" used in connection with the measure of lumber, etc., signifies 1,000 feet, board measure, a "foot" of such measure being 1 foot long, 1 foot wide, and 1 inch or less in thickness. "Cubic feet" or "cords," as applied to the measurement of lumber, pulp wood, etc., signifies cubic contents. According to section 3249, Revised Statutes, "Proof spirits shall be held to be that alcoholic liquor which contains one-half its volume of alcohol of a specific gravity of 0.7939 at 60° Fahrenheit." The official gallon prescribed is one containing 231 cubic inches, or 58,372.2 grains, equal to 8.3389 pounds of distilled water at its maximum density, weighed in air of a temperature of 62° Fahrenheit and barometric pressure of 30 inches. The taxable gallon differs from the proof gallon by reason of the fact that in computing taxable gallons under section 3251, Revised Statutes, all fractional parts of a gallon less than one-tenth are excluded.

[1] In the States not enumerated the land areas were all appropriated in the years mentioned.
[2] Lands in Alaska are mostly unsurveyed and unappropriated.
[3] In public land strip.
[4] Exclusive of Ohio, Indiana, and Illinois, in which, if any public land remains, it consists of a few small, isolated tracts; it is exclusive of the Cherokee Strip, containing 8,044,644 acres, and all other lands owned or claimed by the Indians in the Indian Territory west of the ninety-sixth degree of longitude.

No. 26.—DENSITY OF POPULATION PER SQUARE MILE AT EACH CENSUS, 1790 TO 1910: BY STATES.

[Source: Reports of the Bureau of the Census, Department of Commerce.]

[NOTE.—In computing density of population for the United States, the areas and population of Alaska and Hawaii in 1900, of Alaska in 1890, and of Indian Territory in 1860, 1870, and 1880 are not considered. The area of Indian reservations, outside of Indian Territory, is included in the area of the States and Territories in which they are severally situated, and in that of the United States prior to 1890, although the population of these Indian reservations was not ascertained, and for this reason can not be considered in figuring density of population at the censuses prior to 1890.]

[1] For the five-year period of which the year stated is the median year.
[2] Estimated for Indian Territory and Indian reservations.
[3] The act of May 2, 1890, creating the Territory of Oklahoma, gave the United States courts in Indian Territory jurisdiction over divorce; prior to that date there is no record of divorce.
[4] Includes population of Indian Territory and Indian reservations.
[5] These States were organized from part of Dakota Territory, Nov. 2, 1889. The divorces granted in the counties then comprising Dakota Territory are distributed between North Dakota and South Dakota in accordance with the present division of those counties between the two States.
[6] All laws permitting divorce were repealed in 1878.
[7] Less than 1 in 100,000.

[1] Includes schools of mines, engineering, chemistry, and related subjects.
[2] Included elsewhere.
[3] 1,220 students in attendance on summer courses.

NOTE.—The grand totals of the University of Minnesota prior to 1912 are inclusive of "extension and similar students," which were listed separately in 1912 and 1913; hence the apparent decrease.

[1] Accurate data for years subsequent to 1904–5; estimates for prior years.
[2] "Schools," as here used, synonymous with "classroom." Rooms with a double enrollment—one class in the morning, another in the afternoon—counted as two. Figures for years subsequent to 1905–6 give the average number of schools open; figures for prior years, the whole number of schools open at any time during the year.
[3] For years subsequent to 1904–5, number of teachers employed at the end of the school year.
[4] For years preceding 1905, number of Porto Rican teachers only.
[5] No data.
[6] The total enrollment is given as 70,216; for the common schools, 64,039. As these figures include an unknown number of reenrollments they would not be comparable with the data for other years.

[1] Population of incorporated places having 2,500 or more inhabitants in 1910. The figure for 1900 does not represent the urban population according to that census, but is the population in that year of the territory classified as urban in 1910.

[2] Total, exclusive of urban. (See note 1.)

[3] Decrease in area due to drainage of lakes and swamps in Illinois and Indiana, building of the Roosevelt and Laguna Reservoirs, and the formation of the Salton Sea in California.

[4] Decrease.

[1] A minus sign (−) denotes decrease.

[2] Acreage reports for miscellaneous seeds were consolidated with those for minor field crops in 1900.

[3] Several crops or farm products, for which the Census Bureau has no separate acreage reports, yielded considerable returns. The acreage of cotton seed, if separately reported, would be a duplication of the acreage of cotton; that of grass seed, of hay and forage crops; and that of vegetable and flower seeds, of vegetables, and of flowers and plants. Such products as flax fiber, flax straw, other straw, and cornstalks and leaves come from the acreage reported under cereals. No acreage could be given for the maple sugar and sirup or forest products. The number of trees of bearing age and the number not of bearing age were thought to be more satisfactory as a measure of the extent of the fruit and nut industry than acreage, and, therefore, acreage reports are not shown except for small fruits.

[1] Figures of production relate to calendar years preceding those in which the censuses were taken. Figures for 1850, 1860, and 1870 relate to farms and ranges; those of later censuses include factory product also.

[2] Can not be shown separately, as to do so would disclose individual operations.

[3] Acquired in 1898. [4] Included under Wyoming. [5] Dakota Territory prior to 1890.

[6] Included in Dakota Territory prior to 1890.

[7] All other States, including Wyoming. In 1890 includes some of the States for which no figures appear in the table.

[8] Data for Alaska and Hawaii included in total, but not under the geographic divisions.

[9] For States included in each division, see note 5, p. 25.

[1] Figures relate to calendar years preceding those in which the censuses were taken.
[2] Figures relate to 1909 as reported, without estimates; they do not include milk sold and paid for on the basis of cream or butter fat content; therefore they are not closely comparable with those of preceding years.
[3] Figures relate to 1909 and include only milk reported without estimates.
[4] Not reported prior to 1900.
[5] Acquired in 1898.
[6] Dakota Territory prior to 1890.
[7] Included in Dakota Territory prior to 1890.
[8] Data for Alaska and Hawaii included in total but not in geographic divisions.
[9] For States included in each division, see note 5, p. 25.

[1] Based upon weight of beets.
[2] Percentage of sucrose (pure sugar) in the total soluble solids of the beets.
[3] Based on reports from 27 factories and careful estimates for 14 others.
[4] These averages are not based on data for all the factories, as some of them failed to report results of tests, but it is believed that they fairly represent the character of the total beet crops.
[5] No data reported.
[6] Including estimates of one factory, based upon acreage of beets.

[1] See explanation of terms, p. 7.

[2] State of Mississippi detached from Louisiana and consolidated with Alabama June 1, 1908, to be known as the district of Alabama.

[3] Oklahoma was detached Feb. 6, 1911, from the district of Kansas and constituted a separate collection district.

[4] After 1910 the two counties in Virginia are nominally included with that State.

NOTE.—There was no production of distilled spirits during the fiscal year 1913 in the following States and Territories: Alaska, Arizona, Colorado, Delaware, Idaho, Iowa, Kansas, Maine, Minnesota, Mississippi, Montana, Nevada, North Dakota, Oklahoma, South Dakota, Utah, Vermont, and Wyoming.

No. 143.—SUMMARY OF MANUFACTURES: BY SPECIFIED INDUSTRIES, CALENDAR YEARS 1899, 1904, AND 1909.

[Source: Reports of the Bureau of the Census, Department of Commerce. The figures for some industries do not represent the total production, because important establishments that manufacture the same class of products may be included in other industries. Primary horsepower includes power generated in manufacturing establishments plus electric and other power rented from outside sources; it does not include electric power generated by primary units of the establishments reporting. In the statistics of power for 1899 there is a difference of 154,723 horsepower between the total and the sum of the figures for the various industries. This is due to the impossibility of making a correct revision of the figures for each industry for comparison with 1904 and 1909. A minus sign (—) denotes decrease.]

[1] By "spot" value is meant value at the point of production.

[2] "Long" tons, 2,240 avoirdupois pounds; "short" tons, 2,000 pounds.

[3] Iron ore—1908: 35,983,336 long tons; value at mines, $81,845,904. 1909: 51,294,271 long tons; value at mines, $110,290,596. 1910: 56,889,734 long tons; value at mines, $140,785,607. 1911: 41,092,447 long tons; value at mines, $86,716,575; 1912: 57,017,614 long tons; value at mines, $107,050,153.

[4] Ferro-alloys include ferromanganese and spiegeleisen, ferrosilicon and ferrophosphorus, ferromolybdenum, ferrotitanium, ferrotungsten, and ferrovanadium. The ferro-alloys are made chiefly of foreign ores. Pig iron in 1910 includes ferro-alloys valued at $7,423,502.

[5] Average price per troy ounce in 1908 was 53 cents; in 1909, 52 cents; in 1910, 54 cents; in 1911, 53 cents; in 1912, 61.5 cents.

[6] Coining value, $20.67183465823.

[7] The product from domestic ores only.

[8] Of 75 avoirdupois pounds net.

[9] Consumption.

[10] Included under "Unspecified."

[11] In 1908, no production. In 1909, about 17 short tons of stream tin from Alaska were shipped to England. In 1910, small production from Alaska, North Carolina, South Dakota, and Texas; in 1911, from Alaska and Texas, and in 1912, from Alaska.

[12] Including brown coal and lignite, and anthracite mined elsewhere than in Pennsylvania. Coke—1909: 39,315,065 short tons; value at ovens, $89,965,483. 1910: 41,708,810 tons; value, $99,742,701. 1911: 35,551,489 tons; value, $84,130,849. 1912: 43,983,599 tons; value, $111,736,696.

[13] Including limestone for iron flux, but not including grindstones.

[14] Of 42 gallons.

[15] Value of clay, mined and sold as unmanufactured clay: 1908, $2,599,986; 1909, $3,449,707; 1910, $3,625,485; 1911, $3,480,768; 1912, $3,946,020.

[16] Of 380 pounds net.

[17] Of 280 pounds net—values for net product exclusive of cost of packages.

[18] Included under "Mineral paints," after 1910.

[19] Including metallic paints, ocher, umber, mortar colors, sienna, ground slate, shales, cobalt oxide in 1907, 1908, and 1909, and since 1907 sublimed blue lead, sublimed white lead, zinc lead, and leaded zinc oxide; in 1910, also whiting; in 1911 and 1912, also zinc oxide.

[1] In tons of 2,240 pounds.
[2] Includes spiegeleisen, ferromanganese, ferrosilicon, ferrophosphorus, ferrotitanium, ferrovanadium, etc.
[3] Colorado includes Missouri; Washington is also included from 1900; California is included from 1907; and Oregon from 1911.
[4] Massachusetts and Connecticut combined after 1904.
[5] Georgia includes North Carolina and Texas to 1908 and Texas only from 1904 to 1911.
[6] Indiana and Michigan combined after 1906.
[7] Kentucky includes Mississippi and West Virginia in 1913.
[8] Wisconsin includes Minnesota.
[9] New Jersey includes New York in 1913.
[10] New England and Middle States: Connecticut, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, and West Virginia. Southern States: Alabama, Georgia, Kentucky, Mississippi, North Carolina, Tennessee, Texas, and Virginia. Western States: Colorado, Illinois, Indiana, Michigan, Minnesota, Missouri, Ohio, and Wisconsin. Pacific States: Oregon, Washington, and California. (The production of the Pacific States is included with that of Colorado.)

No. 162.—WAGES AND HOURS OF LABOR: RELATIVE HOURS OF LABOR PER WEEK AND RELATIVE RATES OF WAGES PER HOUR, COMPUTED FROM UNION SCALES, 1907 TO 1912.

[Source: Reports of the Bureau of Labor Statistics, Department of Labor. The figures are based on data obtained in 39 cities. The relative hours indicate the change in the regular full-time working hours per week, account not being taken of any temporary reduction because of slack work. The relative wages indicate the change in wages per hour.

In computing relative hours, comparison was made of the hours for each year, taking into consideration any change of hours provided for in the union scale if for more than three months during the year. In computing the relative rates of wages, comparison was made of the rate on May 15 of each year. The relative number for each city was given a weight equal to the approximate number of union employees in the trade in that city. Hours and rates for 1907=100.0.]

[1] The figures given for the years ended June 30, 1908 to 1912, are not fully comparable with those shown for previous years, chiefly for the reason that they do not include data for roads classed as switching and terminal.

[2] Figures include an apportionment of unclassified tonnage.

[3] Includes 25 per cent of the total mileage of revenue mixed trains.

[4] For the years 1890 and 1895, 25 per cent of the mixed-train mileage was apportioned to passenger-train mileage and 75 per cent to freight-train mileage; but in computations for subsequent years the total mixed-train mileage was used both with passenger-train mileage and with freight-train mileage.

[5] Includes 75 per cent of the total mileage of revenue mixed trains.

[6] Includes a small amount of unclassified train mileage.

[7] Includes a small amount of special-train mileage not separately reported prior to 1908.

[8] Includes a small amount of unclassified train mileage; also a small amount of special-train mileage not separately reported prior to 1908.

[1] Amounts are shown to the nearest dollar.

[2] On Aug. 1, 1911, Wells, Fargo & Co. extended its service to all lines over which operations were formerly conducted by the Pacific Express Co., the latter company discontinuing business at that time. Because of the want of a complete report covering the operations of the Pacific Express Co. for the month of July, the following figures are taken from the report of revenues and expenses for that month: Gross receipts from operation, $439,050—express privileges, $213,407; operating revenues, $225,643. Operating expenses, $201,279. Net operating revenues, $24,364. These figures are not included in the 1912 totals.

[3] Debit.

No. 201.—NAVIGABLE STREAMS: POINTS CONNECTED, NAVIGABLE LENGTH, DEPTH AT LOW WATER, IN 1905, AND TRAFFIC MOVEMENT IN THE CALENDAR YEARS 1905 AND 1910, BY NAME, LOCALITY, AND TRIBUTARY CONNECTION.

[The original of this table was published in the report of the Inland Waterways Commission and was prepared and revised by the Bureau of Corporations, Department of Commerce, the data relating to rivers which had been the objects of Government improvement exclusive of those tributary to the Great Lakes. The present form retains the specific streams, with navigable lengths, depths, and traffic as stated in the original, to which figures of traffic movement for 1910, so far as practicable, have been added from the report of the Chief of Engineers, War Department, for 1911. For the most part the depths given show the maximum drafts that could be carried on June 30, 1906.]

[1] Grain embraces wheat flour reduced to equivalent in wheat, corn, rye, oats, barley, malt, and peas.
[2] Receipts at New York, Portland, Boston, Philadelphia, and Baltimore include shipments from the West to foreign countries through these ports on through bills of lading. Receipts at Portland via Montreal are duplications of receipts reported at Montreal. Receipts at Baltimore include flour ground by city millers, and therefore duplicate an equivalent quantity of wheat received in grain.

No. 222.—VESSELS ENTERED AT AND CLEARED FROM SEAPORTS OF THE UNITED STATES FROM AND TO FOREIGN COUNTRIES: TONNAGE, 1889 TO 1913, BY COUNTRIES.

[The "net ton" equals 100 cubic feet of carrying capacity, exclusive of deductions for space occupied by cabins, machinery, etc. Lack of uniformity in rules for the measurement of tonnage probably affects the accuracy of the figures presented.]

No. 223.—VESSELS ENTERED AT AND CLEARED FROM SEAPORTS OF THE UNITED STATES FROM AND TO FOREIGN COUNTRIES: TONNAGE, 1888 TO 1913, BY PORTS.

[The "net ton" equals 100 cubic feet of carrying capacity, exclusive of deductions for space occupied by cabins, machinery, etc. Lack of uniformity in rules for the measurement of tonnage probably affects the accuracy of the figures presented.]

No. 224.—NATIONALITY OF THE FOREIGN TONNAGE AND TOTAL AMERICAN TONNAGE ENTERED AND CLEARED AT SEAPORTS OF THE UNITED STATES FROM AND TO FOREIGN COUNTRIES: 1887 TO 1913.

[The "net ton" equals 100 cubic feet of carrying capacity, exclusive of deductions for space occupied by cabins, machinery, etc. Lack of uniformity in rules for the measurement of tonnage probably affects the accuracy of the figures presented.]

[1] The figures relate to coin and bullion only prior to 1895; subsequently they include ore also.

[2] Gold and silver can not be separately stated in domestic exports prior to 1864, but it is probable that the greater portion of the exports was gold, under which head the silver in question is included.

[1] The figures of this table do not in most instances agree with those under corresponding heads in the table following, owing to the fact that the schedules of the tariff and the classifications of the Bureau of Foreign and Domestic Commerce do not fully coincide as to the articles included. [1] During the period from May 1, 1900, to July 25, 1901, merchandise brought from Porto Rico was dutiable at 15 per cent of regular rates. The duties collected thereon were as follows: May 1, 1900, to June 30, 1900, $134,593.88; July 1, 1900, to July 25, 1901, $448,193.91. See explanation of terms, p. 7.

[2] Export duty from the Philippine Islands not included after 1902. The figures of this column do not include additional and discriminating duties.

[3] The average ad valorem rates on dutiable merchandise are based on ordinary duties, and those on free and dutiable merchandise are based on total duties collected.

[1] See also prior table of "Merchandise imported into and exported from the United States, and excess of imports or exports, by countries" (p. 357).
[2] Figures of 1899 cover the period Aug. 20, 1898, to June 30, 1899; subsequent figures, fiscal years.
[3] The marked discrepancy between the United States figures of exports to the Philippine Islands prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1905, while the United States returns omit only Government supplies carried by Government vessels.

NOTE BY MESSRS. MAUGER & AVERY.—This table exhibits in a concise form the prices of the three grades of a standard domestic fleece wool in the seaboard markets at the beginning of each quarter. In its present shape it is deemed to be intelligible to all interested in wool. In the special features of character and condition, "washed Ohio fleece wool" is less subject to variation than any other description, and thus is more a basis of value than any other class. Wool, owing to its wide variety, difference in character and condition, and liability to shrink in cleaning, is precluded from speculative operations which apply to products which may be dealt in as "futures." For these reasons the prices of wool are not liable to the same changes as cotton, wheat, etc.

[1] The price on board fixed at Baltimore by the Seaboard Coal Association.
[2] Price of soft-coal pool.
[3] Owing to unusual conditions in the coal market the association price for 1902 is not a correct guide as to the actual selling price. Clearfield coal selling as high as $7 at the mines and as high as $9 in New York Harbor. Unsettled conditions lasted until Mar. 1, 1903, or nearly so; then, on Apr. 1, prices were made $3.30 at Baltimore; later on in the year this price was discounted from 10 to 15 per cent.
[4] Shipments nominal. No sales made after 1908.
[5] Cumberland coal now includes "thin seam" as well as "big vein" coal, the former selling about 25 cents per ton lower than the latter.
[6] Freight on "big vein" coal to Baltimore having been reduced 15 cents, $2.60 in 1909 and subsequent years is equivalent to $2.75 in 1908 and previous years.
[7] Nominal; includes State tax of 10 cents per ton in 1913.

No. 270.—RELATIVE WHOLESALE PRICES OF RAW AND OF MANUFACTURED COMMODITIES: CALENDAR YEARS 1890 TO 1912, AND PER CENT OF INCREASE IN PRICES FOR 1912 OVER PRICES FOR EACH PRECEDING YEAR.

[Source: Reports of the Bureau of Labor Statistics, Department of Labor. This table summarizes wholesale prices of 255 staple commodities for 1912. The number of commodities has varied slightly from year to year. The commodities designated as "Raw" are such as are marketed in their natural state, and also such as have been subjected to only a preliminary manufacturing process; this group includes 50 articles from 1890 to 1907 and 54 articles from 1908 to 1912. The commodities designated as "Manufactured" are such as have been subjected to more than a preliminary factory manipulation and in which the manufacturing labor cost constitutes an important element in the price; this group includes 208 articles from 1890 to 1907, 204 articles in 1908, 203 articles in 1909 to 1911, 201 articles in 1912. A relative price, or index number, as it is technically called, of any article is the percentage which the price of that article at any date is of the price of the same article at a date or period which has been selected as the base or standard. The base selected by the Bureau of Labor Statistics for this compilation is the average price for the 10-year period 1890 to 1899. The relative prices shown under each group are simple averages of the relatives of all articles included within the group. Average price for 1890–1899=100.]

No. 272.—RELATIVE RETAIL PRICES OF PRINCIPAL ARTICLES OF FOOD: CALENDAR YEARS 1890 TO 1913, AND PER CENT OF INCREASE IN PRICES FOR 1913 OVER PRICES FOR EACH PRECEDING YEAR, BY ARTICLES.

[Source: Reports of the Bureau of Labor Statistics, Department of Labor. The statements of prices collected by the bureau were from retail merchants selling largely to the families of American, English, Irish, German, and Scandinavian wage earners. Reports were secured from several merchants in each of 39 important industrial cities, representing 32 States. In a general way the city selected in each section of the country was the city having the largest population in that section. Within the 39 cities live one-fifth of the total number of people, two-fifths of the urban population, and approximately one-third of the total number engaged in gainful occupations (not including those in agricultural pursuits) in continental United States. As previously explained under the title of "Wholesale Prices" (p. 500), the relative price of any article is the per cent which the price of that article at any date is of the price of the same article at a date or period which has been selected as the base or standard. The base selected by the bureau for retail as well as for wholesale prices is the average price for the 10-year period, 1890 to 1899. Average price for 1890–1899=100.]

No. 273.—RELATIVE RETAIL PRICES OF FOOD, SIMPLE AND WEIGHTED AVERAGES: CALENDAR YEARS 1890 TO 1913, AND PER CENT OF INCREASE IN PRICES FOR 1913 OVER PRICES FOR EACH PRECEDING YEAR, BY GEOGRAPHIC DIVISIONS.

[Source: Reports of the Bureau of Labor Statistics, Department of Labor. This table summarizes for each of the 5 geographic divisions and for the United States the relative retail price of food for each year, 1890 to 1913. In the first section of the table is shown for each of the 5 geographic divisions and for the United States the simple average of the relative prices of 15 principal articles of food. In the second section of the table is shown for each of the 5 geographic divisions and for the United States the relative price computed by giving to the relative price of each of the 15 articles its proper weight as determined by the average consumption in 2,567 families of workingmen studied by the bureau in 1901. The 15 articles of food represent approximately two-thirds of the average total expenditure for food in the 2,567 workingmen's families. Average price for 1890-1889=100.]

No. 274.—APPROXIMATE COST OF A YEAR'S FOOD SUPPLY FOR AN AVERAGE WORKINGMAN'S FAMILY: AVERAGE PRICES, CALENDAR YEARS 1890 TO 1913, BY GEOGRAPHIC DIVISIONS.

[Source; Reports of the Bureau of Labor Statistics, Department of Labor. This table is based on the average food cost per family, as reported in 1901, by the workingmen's families studied by the bureau in each geographic division, and the course of retail prices of food as indicated by the relative prices weighted according to family consumption in that geographic division. In each of the geographic divisions it is assumed that the expenditure for each of the various articles bore the same relation to the total expenditure for food in each of the other years in the 22-year period covered by this investigation as in 1901. The average food cost in 1901 was $338.10 for 1,415 families in the North Atlantic division, $298.64 for 219 families in the South Atlantic division, $321.60 for 721 families in the North Central division, $292.68 for 122 families in the South Central division, and $308.53 for 90 families in the Western division. Cents are not shown in entering the approximate amounts in this table.]

No. 275.—RELATIVE RETAIL PRICES OF COAL IN TON LOTS, FOR HOUSEHOLD USE: CALENDAR YEARS 1908 TO 1913, BY KINDS OF COAL AND BY GEOGRAPHIC DIVISIONS.

[Source: Reports of the Bureau of Labor Statistics, Department of Labor. This table compares the average price of coal for each year, 1908 to 1913, with the average price for 1907. The average for each year was found by dividing the sum of the prices on Jan. 15, Apr. 15, July 15, and Oct. 15, by 4. Statements of prices were furnished by 168 coal dealers in 35 cities during the period from 1908 to 1911. Other dealers were added during 1912, bringing the number up to approximately 200. The cities included, with few exceptions, are the same as those from which statements of retail prices of food were secured. Average price for 1907=100.]

[1] The periods relate to years ended June 30.
[2] The production is of the calendar year preceding the fiscal year, the figures being those of the Department of Agriculture.
[3] Including wheat flour reduced to wheat prior to 1890 at the rate of 5, and subsequently at the rate of 4½ bushels to the barrel. [4] Includes wheat for seeding. [5] Average for the period.
[6] Data relate to U. S. as a whole. Production (if any) for noncontiguous territory is lacking.

[1] The production statistics relate, when possible, to the year of growth, but when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1860 to 1898. Census figures have, however, been used when available, including those for 1899 to date.

[2] The value of lint per pound shown since 1902 relates to the average grade of upland cotton marketed prior to Apr. 1 of the following year; from 1890 to 1901, the average price of middling cotton on the New Orleans Cotton Exchange; and from 1860 to 1889, as published in reports of the United States Department of Agriculture.

[3] Compiled from publications of the United States Department of Agriculture for 1860 to 1894; from the reports of Latham, Alexander & Co., for 1895 to 1903. Census figures have been taken when available. Discrepancies in the figures for census years as compared with those of the table entitled "Statistical Record of the Progress of the United States" are caused mainly by difference of method in the making up of the respective tables.

[4] Compiled from "Commerce and Navigation of the United States," 1860 to date. The export year begins July 1 of the year specified from 1860 to 1866, and Sept. 1 for 1867 to date. The period for consumption, exports, and imports is designated by the year in which the record begins rather than that in which it ends.

[5] Excess of foreign exports over total imports.

[6] Equivalent bales of 400 pounds.

[1] The periods relate to years ended June 30.
[2] After 1900 includes imports into continental United States and shipments thereto from noncontiguous customs districts.
[3] After 1900 includes exports, domestic and foreign, from continental United States and shipments therefrom to noncontiguous customs districts.
[4] Average for the period.
[5] Import prices for 1891 and 1892 were overvalued by reason of depreciation of Brazilian paper milreis.
[6] Information for 1901 and 1902 relative to noncontiguous customs districts is somewhat fragmentary.

No. 289.—DISTILLED SPIRITS, WINES, AND MALT LIQUORS: QUANTITIES CONSUMED AND AVERAGE ANNUAL CONSUMPTION PER CAPITA IN THE UNITED STATES, 1850 TO 1913.[1]

[Source: The production of domestic wines has been estimated by the Department of Agriculture, by Mr. Charles McK. Leoser, president of the Wine & Spirit Traders' Society of New York, and other well-informed persons. The production of domestic spirituous and malt liquors has been derived from reports of the Commissioner of Internal Revenue. The table does not include for any year withdrawals of distilled spirits for scientific purposes and for use of the United States, or since 1906 withdrawals for denaturation, free of tax. For 1913 these amounts were 2,341,607 and 16,963,563 tax gallons, respectively.]

[1] This table has been revised and shows slight changes from previous figures in some of the items.

[2] For redemption of outstanding certificates an exact equivalent in amount of the appropriate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government. Gold coin became available for circulation Jan. 1, 1879, as a result of the resumption act of Jan. 14, 1875. Silver certificates were authorized by acts of Feb. 28, 1878, and Aug. 4, 1886.

[3] Subsidiary silver, which disappeared from circulation in 1862, was reintroduced under operation of the act of Jan. 14, 1875.

[4] As the result of special investigation by the Director of the Mint, a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years.

[5] The Director of the Mint made a revised estimate of the stock of subsidiary silver coin Sept. 1, 1910; as a consequence of such revision there was a reduction of $9,700,000.

[1] The cost of collecting the internal revenue embraces the following items: Salaries and expenses of the Internal-Revenue Service, including collectors, deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gangers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps, expenses of detecting and punishing violations of internal-revenue laws, and expenses of collecting the corporation tax.

[2] The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include disbursements for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor disbursements for erecting new buildings, all of which are paid for from specific appropriations made for those purposes.

The expenses of collecting internal and customs revenue do not include the disbursements for salaries, etc., incident to auditing these accounts in the office of the Auditor for the Treasury Department.

[3] Includes corporation tax, as follows: 1910, $20,961,780.97; 1911, $33,516,976.59; 1912, $28,583,303.78; 1913, $35,006,299.84.

[1] The law provides for a tax on wine made in imitation of champagne, etc., but no internal revenue was derived from the same during the fiscal years 1884–1898. The amounts thus received in some of the subsequent years are so small as to be negligible in this or the table following, except in 1905, when they amounted to nearly $700, included under distilled spirits as $1,000.

[2] From 1884 to 1890, inclusive, year ended Apr. 30.

[3] Fourteen months ended June 30.

No. 337.—CIVIL SERVICE: NUMBER OF POSITIONS, BY STATUS, ON JULY 1, 1912,[1] ADDITIONS BY APPOINTMENTS, ETC., AND SUBTRACTIONS BY SEPARATIONS, ETC., DURING THE FISCAL YEAR, AND NUMBER OF POSITIONS ON JUNE 30, 1913.

[Source: The Civil Service Commission.]

[This table is based upon the number of positions shown in the Official Register of 1903, and changes in the service since reported by the departments and offices. Some of the reports were not made in such manner as to permit of a definite distinction as to employment in Washington and elsewhere. The figures are therefore to be regarded as approximate only. Omissions to report certain changes, as explained in the detailed tables, and neglect of details necessary only for statistical purposes also contribute to making the figures approximate only.]

[1] The figures for July 1, 1912, differ from those in the twenty-ninth report because of extensive revisions of the figures for the Postal Service.

[2] Figures in this column are principally from Senate Document No. 836, Sixty-first Congress, third session, furnished in response to Senate resolution of Dec. 21, 1910.

[3] Presidential appointments, under the heading "Miscellaneous, Interior," in Washington, consist of the recorder of deeds, register of wills, inspector of gas and meters, and Superintendent of Capitol Building and Grounds.

[4] Under "Presidential, Justice," in Washington, are 16 department officers, 30 commissioners of deeds, 800 notaries, and 16 trustees of Reform School.

[5] Most of the unclassified appointments and separations in the Department of Commerce and Labor were of persons appointed under the Thirteenth Census act, outside of the provisions of the Civil Service Act and Rules. Although Congress created the Department of Labor and renamed the Department of Commerce by act of Mar. 4, 1913, it has not been found practicable to separate the statistics for the year ended June 30, 1913.

[6] The presidential appointments under "Miscellaneous, Treasury," are revenue-cutter officers.

[7] By an Executive order of Dec. 7, 1912, all artisan and supervisory artisan positions under the jurisdiction of the Navy Department were included in the competitive classified service; but no occupant of such a position may be classified unless he has established his capacity for efficient service, or has been examined and found qualified by the Labor Board. The total number of these employees was estimated by the department at 25,000 on June 30, 1912, and at 20,000 on June 30, 1913, of whom about 4,000, or one-fifth, are mere unskilled laborers.

[8] These positions are in the Post-Office Inspection Service; the stamped-envelope agency at Dayton, Ohio; and the official-envelope agency at Cincinnati, Ohio.

[9] The 8,423 positions in the presidential column are those of postmasters, being the number on June 30, 1913, according to an informal statement of the department.

[10] By an Executive order of Oct. 15, 1912, all positions of fourth class postmasters not previously in the competitive class were included. An Executive order of May 7, 1913, provides that no person occupying a position of postmaster of the fourth class shall be given a competitive status unless he has been appointed as a result of open competitive examination or under the regulations of Nov. 25, 1912, or of Jan. 20, 1909. The number of positions transferred from the excepted to the competitive class by the order of Oct. 15, 1912, was 36,332.

[11] Presidential positions in the Land Service are as follows: Registers, 105; receivers, 105; surveyors general, 13.

[12] The number (4,612) under excepted positions, indicates pension examining surgeons and specialists for pensions. The Invalid Pension act of Aug. 17, 1912, abolished the pension agencies after Jan. 31, 1913.

[13] Presidential positions in the Indian Service: Allotting agents, 14; classification commissioners, 6; mine trustees, 2; principal chief, Choctaw Nation; member of Board of Indian Commissioners, 10.

[14] Miscellaneous, presidential, under Interior, are as follows: Territorial governors, 4; secretaries, 3; mine inspector for New Mexico.

[1] The civil-service rules prior to Apr., 1903, defined the Departmental Service as including all classified positions except those in the Post Office, Customhouse, Internal Revenue, and Government Printing Services. The majority of such positions is found in the field, not in the departments at Washington, but all former reports have shown them as "Departmental," following the civil-service rule referred to. In this report for the first time an effort has been made to limit "Departmental" to its original meaning, showing field-service examinations under a separate heading; hence the apparent great discrepancy in the "Departmental" figures as compared with those in previous reports.

[2] Subject to addition of assistant-examiner examinations.

[7] Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about $25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

[8] Total specie in circulation; gold and silver were not separately stated prior to 1876. [9] Estimated.

[10] As the result of special investigation by the Director of the Mint a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on Sept. 1, 1910, a reduction of $9,700,000 was made in the estimate of silver coin.

*Statistics of national banks are as of reports nearest to June 30 of each year. Those of other banks combine reports of various dates within the year.

[1] From 1896 to 1908, inclusive, includes Illinois State banks having savings departments.

[2] Includes all private banks from 1875 to 1882; from 1887 to date includes only those voluntarily reporting, estimated at one-fourth of total private banks.

[3] "Ordinary receipts" include receipts from customs, internal revenue, direct tax, public lands, and "Miscellaneous," but do not include receipts from loans, premiums, or Treasury notes, or revenues of Post Office Department. The figures cover actual receipts as of Treasury accounts.

* Fiscal years.

[1] "Ordinary expenses" include disbursements for War, Navy, Indians, pensions, payments for interest, and "Miscellaneous," but do not include payments for premiums, principal of public debt, or disbursements for postal service paid from revenues thereof.

[2] Figures cover the military and naval establishments only.

[3] Based on total imports prior to 1866, after that on imports for consumption.

[4] The figures cover duties reported at entry, not always liquidated receipts. (See note 4, p. 632.)

* Fiscal years. The figures of imports include gold and silver prior to 1830.

[5] Not stated.

[6] 1821; no complete data for 1820 or earlier years.

[7] The ordinary receipts and disbursements and per capita on receipts for 1891 were erroneously stated by the Register of the Treasury in his reports for 1891, 1892, and 1893. (See Finance Reports for those years, pp. 767, 845, and 906.)

[8] Export duty from the Philippine Islands not included.

† Gold and silver can not be separately stated in domestic exports prior to 1864, but it is probable that the greater portion of the exports was gold, under which head the exports in question are included. Gold and silver contained in ore are included under gold and silver since 1894.

*Calendar years.

† The production statistics relate, when possible, to the year of growth, but when figures for the growth year are wanting, a commercial crop which represents the trade movement is taken. The statistics of production have been compiled from publications of the United States Department of Agriculture for 1858 to 1898.

[1] Cleaned rice; 1800 to 1903, commercial movement, as given by Dan Talmage's Sons Co.; 1904 to date as reported by the Department of Agriculture.

[2] Commercial value. [3] Of 380 pounds net. [4] Gallons sold. [5] Exports.

[4] Excluding tonnage received from connecting roads and other carriers after 1898.
[5] Exclusive of fast freight line service.
[7] Overvalued by reason of depreciation of Brazilian paper milreis.
[8] Information for 1901 and 1902 relative to commerce between continental United States and noncontiguous customs districts in coffee and tea is somewhat fragmentary.
[9] Includes an estimate for certain roads, as their records for this item were destroyed in the San Francisco fire of April, 1906.
[10] Excludes mileage of switching and terminal companies not segregated prior to 1908.

[1] "Specie" includes subsidiary coin in banks.
[2] Estimates for the United Kingdom prior to 1910 were for coin only; these figures include $100,000,000 for bullion in banks.
[3] Based on estimate of active rupee circulation by Accountant General of India in 1908.
[4] Includes Straits Settlements, Malay States, and Johore.
[5] United States paper currency islegal tender and constitutes a considerable proportion of the circulation.
[6] Based upon a calculation by Messrs. P. Arminjon and B. Michel in 1908, who then estimated the stock of gold at 38,000,000 to 41,000,000 Egyptian pounds. The mean of these figures was adopted. Since then the net imports of Egypt, by customs records, have been $50,000,000, but the 1908 estimate has been changed only to the extent of the increase in bank holdings. It does not seem probable that Egypt can have absorbed the amount of gold indicated by the customs records.
[7] Estimate of A. De Foville, 1909.
[8] The figures for the stock of gold in Germany are based upon an estimate by Dr. Arnold, a director of the Reichsbank, of 3,000,000,000 marks in German coin in the country at the end of 1910. At the close of 1912 the Reichsbank held $80,284,892 in bullion and foreign coin.
[9] This paper currency has been reduced to a gold basis at 100 pesos to the United States dollar.
[10] Except Costa Rica and British Honduras (gold standard countries).

NOTE.—The blank spaces in this table signify that no satisfactory information is available. In some instances the amount of gold in banks and public treasuries is carried out as the total stock in the country, although an unknown amount is in circulation. The case of Italy is an example of this. The per capita circulation is based upon known amounts only. All estimates for stock of money in circulation must be accepted with reserve.

NOTES.

Australia.—The total revenue of the Commonwealth for the year was £21,899,413, of which £6,119,930 were paid over to the States. The combined State revenues are thus inclusive of the amount received from the Commonwealth treasury. On June 25, 1913, the amount of Commonwealth notes issued and unredeemed was £9,162,617, secured by a gold reserve of £3,695,657. The funded debt of the Commonwealth given as per date June 30, 1913, includes £2,000,000 of inscribed stock and South Australian debts transferred to the Commonwealth, viz.: £3,359,891 on account of the Northern Territory and £2,071,058 on account of the Port Augusta-Oodnadatta railway. The net debt of the States aggregated £271,422,328, there being various sinking funds on hand totaling £5,701,767.

New Zealand.—The revenues and expenditures stated were on account of the consolidated fund only. The expenditure from the public-works fund amounted to £2,548,918. The net amount of public debt on Mar. 31, 1913, was £87,457,121, there being various sinking funds on hand totaling £2,603,642.

Brazil.—The total debt of Brazil does not include 612,519,626 *milreis* of inconvertible paper money outstanding Dec. 31, 1911, nor 378,483,010 milreis of convertible notes outstanding on the same date. The paper *milreis* has been converted at the rate of 1 milreis paper equal to 16d.

Bulgaria.—Against the total debt outstanding the Government holds assets amounting to 77,689,218 francs. The net debt, therefore, amounts to 623,346,807 francs.

Canada.—The receipts and expenditures stated were on account of the consolidated fund only. The expenditures for railways, canals, and public works amounted to $27,206,046, railway subsidies to $4,935,507, and other charges to $255,787, making the total expenditures for the year equal to $144,456,878. The total gross debt of the

Dominion on Mar. 31, 1913, stood at $453,232,555, against which the Government held assets amounting to $168,930,930, including sinking funds to the amount of $13,737,567. The net debt, therefore, amounted to $314,301,626.

Honduras.—Of the total external debt stated by the Council of the Corporation of Foreign Bondholders, £24,323,969, arrears of interest since 1872, constitute £18,925,399.

Panama.—The figures of revenue and expenditure represent one-half of the biennial budget for 1913 and 1914.

China.—The tael debt includes 772,937,500 taels of indemnities for the Boxer uprising.

Denmark.—Against the total debt the assets of the State are given as 812,752,958 kroner, of which 288,579,844 kroner represent the value of the State railways.

Egypt.—Against the total debt the "Caisse de la dette publique" and the Government hold bonds amounting to £5,439,220, reducing thus the net debt outstanding to £88,910,460. The interest charges include £E665,041 paid as tribute to Turkey. The Egyptian pound is equivalent to $4.943.

France.—The public-debt charges are exclusive of pensions, annuities, etc., comprised under the general caption of "rente viagère," amounting to 330,927,719 francs in 1913, and likewise of annuities paid by the State to railway and tramway companies, and other "obligatory expenditures," amounting to 203,083,985 francs in 1913.

Tunis.—By the law of Mar. 28, 1912, the Government of Tunis was authorized to borrow 90,500,000 francs for railway construction. The Crédit Foncier de France has undertaken to furnish, at 4 per cent, the sum of 72,350,000 francs in two years.

French colonies, n. e. s.—Budget figures are exclusive of the net expenditures of the mother country on account of the colonies.

German Empire.—The unfunded debt is made up of 220,000,000 marks of interest-bearing and 10,000,000 marks of noninterest-bearing treasury bills, 14,893,700 marks of arrears of interest, and 120,000,000 marks of unsecured treasury notes.

German States.—The revenues appearing in the table are exclusive of transfers (Ueberweisungen) but inclusive of compensatory payments (Verguetungen) from the Imperial Treasury; expenditures are exclusive of matrikularbeiträge.

German colonies.—The revenues are exclusive of 31,961,034 marks subsidy from the Imperial Treasury.

Greece.—The revenues and expenditures are given as estimated by the Minister of Finance. The unfunded debt includes 10,000,000 drachmas of treasury bonds and 61,775,975 drachmas of paper money in circulation.

British India.—In addition to the budget estimates as given, the amount of capital expenditure on State railways and irrigation works in 1912–13 was estimated at 138,784,000 rupees. The figures of the funded debt represent the permanent interest-bearing debt in England and India. The unfunded debt includes permanent noninterest-bearing debt, temporary bills, savings banks and miscellaneous obligations, special loans, service funds, and departmental and judicial deposits.

Italy.—The funded debt, given as per date June 30, 1912, represents the consolidated and perpetual debt. The unfunded debt is made up of 3,971,567,511 lire of the redeemable debt, 479,054,355 lire of treasury bills in circulation, 207,268,000 lire of treasury bonds, and 72,947,341 lire of interest-bearing current accounts. On the above date the treasury was reported to hold 1,353,787,512 lire of the public-debt securities, thus reducing the net debt outstanding to 13,429,361,597 lire.

Peru.—The funded debt includes the foreign debt of £1,137,330 as per date May 31, 1913, and the sum of £550,390 for which it is proposed to convert the internal debt, viz.: £2,660,645 of consolidated bonds at 1½, £1,134,210 of amortizable bonds at 10, and £511,758 of various obligations at 10.

Russia.—The total debt is exclusive of 1,623,376,000 rubles of credit notes of the Imperial Bank in circulation on Mar. 8 (21), 1914, fully covered by the gold reserve of the bank. At the end of October, 1913, there were due to depositors of the Government savings banks 1,627.7 million rubles. The Government is also liable for the 815.1 million and 1,263.4 million rubles of mortgage bonds in circulation July 1, 1913, issued by the Governmental Noblemen's and Peasants' Land Banks, respectively.

Siam.—In addition to the total for the public debt above stated there were in circulation at the end of March, 1913, 26,051,070 ticals of paper money. Thirteen ticals are equivalent to £1 sterling.

Switzerland.—The Swiss public revenue and expenditure are exclusive of the budget of the federal railways.

Turkey.—Of the total funded debt, given as per date Sept. 14, 1913, loans amounting to £T18,130,310 are specially secured on the Egyptian tribute, and other loans totaling £T84,257,492 are secured on revenues administered by the Council of the Ottoman Public Debt. The unfunded debt includes £T14,723,198 of treasury bills outstanding and £T10,000,000 of short advances (estimated).

United Kingdom.—The British budget figures are made up of gross exchequer receipts and issues, the latter exclusive of £3,057,500 made to meet capital expenditure, and of exchequer bonds for £7,000,000 issued to the National Telephone Co. in part payment of the purchase money of their establishment. The assets of the British exchequer on Mar. 31, 1913, were composed of £39,015,000, the market value of Suez Canal shares; £3,707,733 other assets; and £6,329,160 bank balances.

United States.—The total receipts include the ordinary receipts, $724,111,230, public-debt receipts, $23,400,850, and the postal revenues, $266,619,525. The total disbursements include the ordinary disbursements, $682,770,705, Panama Canal disbursements, $41,741,258, public-debt disbursements, $24,191,610, and disbursements on account of the postal service, $262,108,875. The item in the column "funded debt" is the total interest-bearing debt of the United States under date of July 1, 1913. The remainder represents all other indebtedness of the United States less cash in the Treasury on that date.
