LETTER OF SUBMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF FOREIGN AND DOMESTIC COMMERCE,
Washington, October 7, 1929.

SIR: I have the honor to submit herewith for publication the fifty-first annual issue of the Statistical Abstract of the United States. As in previous years, this publication has been prepared in the Division of Statistical Research, of which E. Dana Durand is chief. It represents, however, a digest of data collected by all statistical agencies of the National Government, as well as those of a considerable number of private agencies and one or two States. Many of these offices and agencies have been of great assistance in furnishing advance data and also in the actual preparation of the tables used in the Abstract. Special mention in this connection is due the following offices of the Federal Government: The Bureau of the Census, the Bureau of Fisheries, and the Bureau of Mines of the Department of Commerce; the Bureau of Agricultural Economics and the Weather Bureau of the Department of Agriculture; the Bureau of Immigration and the Bureau of Labor Statistics of the Department of Labor; the Bureau of Education of the Department of the Interior; the Federal Board for Vocational Education; the Statistical Division of the Income Tax Unit and the Federal Farm Loan Bureau of the Treasury Department; the Veterans' Bureau; the Interstate Commerce Commission; the United States Shipping Board; and the Division of Analysis and Research of the Federal Reserve Board. Valuable aid has also been given by the Bureau of Railway Economics, Washington; the New York Produce Exchange; the Spectator Co., New York; Dun's Review, New York; and the Bureau of Canals, State of New York.

Comparative international tables showing statistics for the United States and foreign countries are published in Volume II of the Commerce Yearbook.

Respectfully,

O. P. HOPKINS,
Acting Director.

To Hon. R. P. LAMONT,
Secretary of Commerce.

716. Canned Salmon Output, United States and Alaska.....	737
717. Alaska Fisheries: Quantity and value of products.....	737
718. Canned Salmon: Output and prices of Alaska product, by species.....	738
719. Fish Propagation: Output of fish eggs, fry and fingerlings, by Bureau of Fisheries.....	738

31. MINING AND MINERAL PRODUCTS

720. Total Value of Mineral Products of the United States: 1881 to 1928.....	739
721. Average Prices of Principal Nonferrous Metals.....	739
722. Mines and Quarries, Producing and Nonproducing: Census Statistics.....	740
723. Producing Mines and Quarries: Census Statistics.....	740
724. Producing Mines and Quarries: Size of enterprises, all industries and principal industries.....	741
725. Mines and Quarries: Hours of Labor.....	741
726. Producing Mines and Quarries: Census statistics, by industries.....	742
727. Producing Mines and Quarries: Census statistics, by States.....	743
728. Principal Mineral Products: Quantities and values.....	744
729. Mineral Production by States.....	747
730. Principal Mineral Products of Each State in Order of Value in 1927.....	748
731. Iron Ore: Production, shipments, exports, and imports.....	748
732. Analysis of Pig Iron and Ferro-alloy Production: By States, disposition, kinds, etc.....	749
733. Pig Iron: Production, 1810 to 1901.....	749
734. Production, Exports and Imports of Pig Iron, and Production of Steel Ingots and Castings.....	750
735. Rolled and Miscellaneous Steel Products: Production.....	750
736. Iron and Steel: Production, exports and imports of finished rolled products.....	751
737. Steel Ingots and Castings: Production, by grades.....	752
738. Iron and Steel: Census statistics of products.....	752
739. Blast Furnaces, Steelworks, and Rolling Mills: Census statistics.....	754
740. Aggregate Exports of Heavy Iron and Steel.....	754
741. Iron and Steel: Exports, by specified classes.....	755
742. Iron and Steel: Exports, by destination.....	755
743. Iron and Steel: Average annual prices.....	756
744. Aluminum and Bauxite: Production, exports and imports.....	756
745. Copper: Production, exports, imports, and consumption.....	757
746. Copper: State of origin of ore smelted.....	757
747. Copper: Smelter output from domestic ores, 1850 to 1928.....	758
748. Copper: Exports and imports.....	758
749. Lead: Production and value.....	759
750. Sources of Primary Lead Smelted or Refined in the United States.....	759
751. Lead: Supply and distribution of refined primary lead.....	760
752. Manufactures of Nonferrous Metals and Alloys.....	760
753. Zinc: Production, exports, stocks, and consumption.....	761
754. Smelter Production of Primary Zinc from Domestic Ore.....	761
755. Gold and Silver: Production, totals, 1792 to 1928, and by States, 1910 to 1928.....	762
756. Gold and Silver for Use in Manufactures and the Arts.....	763
757. Silver: Price, ratio to gold, and value of silver in the dollar, 1835 to 1927.....	763
758. Coal: Anthracite and bituminous, total production, 1821 to 1928, and by States, 1880 to 1928.....	764
759. Coal: Exports and imports and bunker coal laden on vessels, 1891 to 1928.....	765
760. Coal: Shipments, coke made, value per ton, men employed, days worked, etc.....	765
761. Bituminous Coal: Consumption in the United States, by principal classes of consumers.....	766
762. Coal: Average and relative retail prices.....	766
763. Coal: Retail price for household use in selected cities.....	767
764. Labor Strikes in Coal Mines: By States.....	768
765. Coke: Production, exports, and imports.....	769
766. Coke: Production, by States.....	769
767. Manufactured Gas Industry: Materials used and products.....	770
768. Production, Purchase, and Sale of Gas.....	770
769. Average Net Price of Manufactured Gas.....	770
770. Retail Price of Gas in Principal Cities.....	771
771. Natural Gas and Natural Gas Gasoline: Production, totals and by States.....	772
772. Asphalt: Production, exports, and imports.....	772
773. Petroleum: Production of crude.....	773
774. Petroleum: Production, Exports, Imports, and Bunker Oil.....	773
775. Petroleum: United States production, by regions and States, and world production.....	774

No. 6.—POPULATION: ANNUAL MIDYEAR ESTIMATES FOR CONTINENTAL UNITED STATES, AND CERTAIN OUTLYING TERRITORIES AND POSSESSIONS

NOTE.—Estimates for continental United States, prior to 1920, and for Hawaii, Porto Rico, and Philippine Islands, all years, are based on the assumption that the increase each year between two successive censuses is equal to the annual average increase between the two enumerations. Beginning 1920, estimates for continental United States are based on available data regarding births, deaths, immigration, and emigration. Estimates for 1929 have not been made pending the 1930 census. For estimated population by States see Table 11

No. 11.—POPULATION: ANNUAL MIDYEAR ESTIMATES BY STATES

NOTE.—The total population of the United States is estimated upon the basis of the available birth, death, immigration, and emigration figures. The annual increase in the United States population is distributed to the various States according to the per cent which each State increase was of the United States increase between 1910 and 1920, except that in the case of those States which took a census in 1925 the State census figures are used. If a State showed a decrease in population between 1910 and 1920 or 1920 and 1925, the 1920 or 1925 census figure was used and no estimate made. Pending the 1930 census, estimates for 1929 have not been made

¹Population of area taken to form State of Missouri in 1821; part of Louisiana Territory in 1810.²Population shown for South Dakota in 1880 represents entire Dakota Territory; for 1870 and 1880, population parts as since existing have been segregated.³Area now constituting West Virginia formed part of Virginia prior to 1870.⁴Population of area taken to form Arkansas Territory in 1819; part of Louisiana Territory in 1810.⁵Includes population of Indian Territory, as follows: 1890, 180,182; 1900, 392,060.

No. 13.—DENSITY OF POPULATION PER SQUARE MILE, BY STATES

NOTE.—The population of continental United States has been divided by the total land area, although it included at each census some unorganized territory which was not canvassed by the enumerators. For each State or Territory the population as returned at a given census has been divided by the land area as constituted at the time that census was taken. The areas of Indian reservations, outside of Indian Territory, are included in the areas of the several States and Territories, although the population was not ascertained and can not be considered in figuring density of population prior to 1890. The census of 1870 in the Southern States is considered incomplete. Population density in 1920 of Alaska, Hawaii, and Porto Rico, and of December 31, 1918, Philippine Islands, based on gross area, and not land area, was as follows: Alaska, 0.1; Hawaii, 39.7; Porto Rico, 378.4; Philippine Islands, 90.0.

No. 28.—DWELLINGS, FAMILIES, AND TENURE OF HOMES: BY STATES, 1920

NOTE.—A dwelling is a place in which one or more persons regularly sleep. A hotel, a boarding house, an institution, or an apartment house, though containing many families, constitutes but one dwelling, while a boat, tent, room in a factory, store, etc., although occupied by only one person, is also counted as a dwelling. A family signifies a group of persons, whether related by blood or not, who live in one household, usually sharing the same table. One person alone is a family, while occupants and employees of a hotel, if that is the usual place of abode, and all the inmates of an institution are treated as a single family

¹ A minus sign (—) denotes decrease.² Boundaries changed since 1910. Statistics for 1920 relate to postwar boundaries; for 1910, to prewar boundaries.³ Persons reported in 1910 as of Polish mother tongue born in Germany (190,096), Austria (329,418), and Russia (418,370) have been deducted from the respective countries and combined as Poland for comparison with number reported in 1920 as born in Poland. Though Poland before 1919 was divided among Russia, Germany, and Austria, the censuses of 1870 to 1900 listed it as a country of birth.⁴ Created since 1910.⁵ Included as part of Yugoslavia in 1920.⁶ Turkey in Asia included with Turkey in Europe prior to 1910.⁷ Albania included with Turkey in Europe in 1910 and earlier years.⁸ Includes "Europe, not specified" at each census, and Danzig, Fiume, and Saar Basin in 1920.⁹ Newfoundland included with Canada prior to 1910.¹⁰ Except possessions of the United States.

¹ At the 1890 census incorporated places were not distinguished from unincorporated ones. The figures for that year for incorporated places of less than 2,500 inhabitants have been estimated, assuming that those places were incorporated in 1890 which were returned separately in that year and were returned in 1900 as incorporated, and may include the population of some unincorporated places and exclude that of some incorporated.

No. 40.—URBAN AND RURAL POPULATION: MARITAL CONDITION OF PERSONS 15 YEARS OF AGE AND OVER, BY MAJOR CLASSES, 1920, WITH COMPARATIVE TOTALS FOR 1910, CONTINENTAL UNITED STATES

NOTE.—The number divorced is considered to be understated. The small number unknown is omitted. The method of segregating the urban and rural population in certain New England States has been changed since 1910 (see headnote, Table 37), so that the absolute numbers for marital condition in 1910 are not strictly comparable; the percentages, however, would not be affected by the small change.

No. 42.—POPULATION: MIDYEAR ESTIMATES FOR CITIES HAVING IN 1920 OVER 50,000 INHABITANTS

NOTE.—Estimates are based, in most cases, on the assumption that the annual increase of population since 1920 has been the same as the annual average increase between 1910 and 1920, except that in States which took a census in 1925 the estimates are based on the average annual increase between 1920 and 1925. Allowance is made for any annexations or detachments of territory that may have taken place and of which the bureau has been advised. Where the last census showed a decrease or where there were exceptional conditions of growth, no estimates were made. For actual enumerations see Table 43. Pending the 1930 census, estimates for 1929 have not been made

No. 44.—PERSONS ENGAGED IN GAINFUL OCCUPATIONS: By Sex and Age, CONTINENTAL UNITED STATES

NOTE.—Owing to change in the date of enumeration from April to January and to changes in the wording of the instructions, the number of persons, especially women and children, reported as farm laborers was much less in 1920 than would have been the case if the 1910 method had been followed. The incomparability in this occupation affects materially the figures for the agricultural group as a whole and even for all occupations combined. For discussion see Census of 1920, Vol. IV, pp. 12 to 14

¹ Owing to changes in the grouping of occupations according to great classes, in the definition of certain individual occupations, and in instructions to enumerators (especially as to reporting women and children), the census statistics as originally published require regrouping and also certain adjustments which must be made by estimate. The margin of possible error involved in these estimates is not sufficient to obscure the general nature of the shift which has taken place.

Source of Tables 51 and 52: Bureau of the Census; adjustments in Table 48 by Division of Statistical Research, Bureau of Foreign and Domestic Commerce.

GENERAL NOTE.—The figures contained in this section can not be taken as an absolute index of conditions. The provisions for the care of these classes are so divergent in different States, and in the same State at different times, that the enumeration of persons in certain institutions may be far from reflecting the true differences or changes in the relative number of such persons in the population at large. Moreover, the methods of enumeration have been changed from time to time. The difficulty of formulating an adequate definition, the large element of personal judgment of the enumerator, and reluctance on the part of individuals to admit defects, all affect the accuracy of the data.

3. VITAL STATISTICS

GENERAL NOTE.—Vital statistics are registered by the States in the first instance, but duplicates of the original certificates of individual births and deaths are received and tabulated by the Census Bureau. Some States have as yet no system of registration. Owing to the gradual expansion of the "registration" areas (shown in Tables 81, 88 and 97), figures for the areas as a whole are not strictly comparable but, in most cases, the rates are affected very slightly.

Rates of births and deaths are affected by the sex and age distribution of the population. Certain tables show "adjusted" death rates in 1920, taking these factors into consideration, but most of the tables show crude rates which are obtained simply by dividing the number of deaths by the total population. The difference for the registration area as a whole is small, but for some States it is considerable. Adjusted rates subsequent to 1920 may be computed by applying to the crude rates, based on estimated population, the ratio of the adjusted rate to the crude rate in 1920, based on enumerated population. This method, as we get farther and farther away from the census of 1920, may become less and less reliable owing to changes in the age and sex distribution of the population. Stillbirths, shown in Table 92, are excluded from data for both births and deaths.

General tables cover the registration area in continental United States. Hawaii and the Virgin Islands are the only territories or possessions having adequate registration of births and deaths. Data for the former are shown separately in certain tables.

No. 82.—DEATHS: RATE PER 1,000 POPULATION, BY SEX AND BY AGE GROUPS

NOTE.—It is necessary for accurate comparison of different years to consider only States having registration throughout the period compared. The rates for the registration States of 1900 are based on the population as enumerated January 1, 1920, and the estimated midyear population of 1903, 1913, 1926, and 1927; the rates for the registration States of 1920 are based on the midyear estimates. See also general note p. 77

4. IMMIGRATION AND EMIGRATION

In compiling immigration statistics for the United States, Alaska, Hawaii, and Porto Rico, beginning 1904, 1901, and 1902, respectively, were included. In prior years the transfer of population between them and the United States was considered immigration

No. 100.—IMMIGRATION: 1821 TO 1928

NOTE.—For 1821 to 1855 the figures represent alien passengers arriving; for 1856 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; for 1907 to date, immigrant aliens admitted. Data are for fiscal years ended June 30 except as noted; for periods they are totals, not annual averages

No. 105.—IMMIGRATION, BY COUNTRY OF LAST PERMANENT RESIDENCE, 1831 TO 1920

NOTE.—For 1831 to 1867 figures represent alien passengers arriving; for 1868 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; thereafter, immigrant aliens admitted. Owing to changes in the lists of countries separately reported and to changes in boundaries, data for certain countries are not comparable throughout. For immigration since 1920, rendered incomparable in many cases by changes in boundaries, see Table 106. Data are totals (not annual averages) for periods ended June 30 since 1870, Dec. 31 theretofore, except as noted

No. 111.—IMMIGRATION QUOTAS AND ALIENS ADMITTED AND CHARGED TO QUOTAS: BY NATIONALITY, YEARS ENDED JUNE 30

NOTE.—Both immigrant and nonimmigrant aliens may appear in quota law statistics, or aliens of both classes may not be counted against quotas at all, as shown by Table 110. Changes in quotas between 1923 and 1924 were necessitated by changes in boundaries and other adjustments. For national origin of the white population of United States and immigration quotas based thereon as provided in the immigration act of 1924, effective July 1, 1929, see Tables 116 and 117

No. 116.—NATIONAL ORIGIN OF THE WHITE POPULATION OF THE UNITED STATES: 1920

NOTE.—The table gives the national origin of the white population of the United States as determined as a basis for immigration quotas under the provisions of the Immigration Act of 1924. The percentage of the total white population derived from each country of origin is expressed in terms of the equivalent number of inhabitants. "Colonial Stock" is used to designate that portion of the white population which is descended from the population enumerated in the first census, taken in 1790; "post colonial stock," that which is descended from or consists of immigrants coming to the United States after 1790. Non-quota countries include Canada, Newfoundland, Mexico, Cuba, Haiti, the Dominican Republic, and the 16 independent Republics of Central and South America.

No. 123.—PUBLIC ELEMENTARY AND SECONDARY SCHOOLS: NUMBER AND SALARY OF TEACHERS

NOTE.—Number of teachers includes some superintendents, principals, and supervisors, as some States do not report them separately. A average salary refers in 1900 to annual salary of teachers and supervising officers in cities of 3,000 or over; in 1910, to monthly salary of teachers. Both total salaries and annual average salary in 1926 refer to salaries of teachers, supervisors, and principals, the latter being based on number of teaching positions plus number of supervisors and principals

No. 137.—VOCATIONAL EDUCATION: PUPILS ENROLLED IN VOCATIONAL COURSES

NOTE.—Institutions federally aided are established under the act known as the Smith-Hughes Act, or the national vocational education act. It provides for a continuing appropriation from Federal funds for the purpose of cooperating with the States in the establishment and maintenance of programs for vocational education of lower than college grades, for the preparation of teachers to instruct under these plans, and for the administration of these Federal funds by the Federal Board for Vocational Education

¹ In the adjustment of this grant the road was treated as an entirety and without reference to the State line. Hence Alabama has had approved to her more and Mississippi less than they would appear to be entitled to in proportion to the length of road in the respective States.

² Includes 35,685 acres of the Chicago, Rock Island & Pacific Ry.; 109,757 acres of the Cedar Rapids & Missouri River R. R.; and 77,535 acres of the Dubuque & Sioux City R. R., situated in the old Des Moines River grant of Aug. 8, 1846, which should be deducted.

³ Declared to be one grant.

⁴ See Minnesota for original grants.

⁵ Leavenworth, Lawrence & Galveston includes 186,937 acres and Missouri, Kansas & Texas 270,971 acres in the Osage ceded reservation which are to be deducted under decision of the Supreme Court.

No. 156.—ARMY OF THE UNITED STATES: STRENGTH OF COMPONENT PARTS

NOTE.—Prior to 1914, table covers quinquennial years and years in which considerable changes occurred in the number of Regular Army. Figures for Officers' Reserve Corps include Regular Army enlisted men and also, prior to 1924, National Guard officers, holding commissions in the reserve. There is, therefore, some duplication in the grand totals, but the number of this personnel is not so great as to make a material difference in the figures

¹ Includes Philippine Scouts beginning with 1902. Figures for 1919 to 1926, inclusive, include in most cases World War emergency personnel still in service. All emergency enlisted men still in service were discharged on July 2, 1921. On Nov. 11, 1926, the last emergency (World War nonregular) officer who for several years had been undergoing treatment for physical reconstruction, was discharged, thereby completing the demobilization of the World War Army. Retired personnel on active duty are not included.

² State militia prior to act of June 3, 1916.

³ Figures for 1900 and 1901 are "U. S. Volunteers of the Philippine Insurrection period; for other years Regular Army Reserve, Officers' Reserve Corps, Enlisted Reserve Corps, and the "National Army" of the World War period, as noted.

⁴ U. S. Volunteers.

⁵ Figures on officers and enlisted men not available.

⁶ Regular Army Reserve. The Regular Army Reserve was abolished by act of June 4, 1920.

⁷ Includes National Guard personnel in Federal service.

⁸ Estimate.

⁹ Officers' Reserve Corps. Beginning with 1924, figures do not include individuals who hold commissions also in the National Guard.

¹⁰ Includes Regular Army Reserve, 8,382; Enlisted Reserve Corps, 35,000 (estimate).

¹¹ Subject to revision.

¹² Includes Officers' Reserve Corps, 86,262; National Army, 49,118 (estimate).

¹³ Estimated enlisted strength of the National Army. Practically all members of the Regular Army Reserve and the Enlisted Reserve Corps had, by this date, been assigned to duty with Regular Army, National Guard, and National Army organizations.

¹⁴ Estimates only. Under orders of the Secretary of War all components had been merged into one army known as "The United States Army."

¹⁵ Beginning with 1919, figures for commissioned officers include warrant officers in the following numbers: 1919, 37; 1920, 68; 1921, 1,159; 1922, 1,151; 1923, 1,085; 1924, 1,063; 1925, 1,028; 1926, 1,325; 1927, 1,262; 1928, 1,208.

¹⁶ Enlisted Reserve Corps.

¹⁷ Beginning with 1924, figures for commissioned officers include warrant officers in the following numbers: 1924, 87; 1925, 160; 1926, 162; 1927, 182; 1928, 184.

GENERAL NOTE.—The following is a summary of the various forms of veterans' relief under the administration of the United States Veterans' Bureau.

Compensation is awarded for death or disability resulting from personal injuries received or diseases contracted in the military or naval service on or after April 6, 1917, and before July 2, 1921, or for an aggravation or recurrence of a preexisting disability resulting from such service. The rates of compensation range from \$8 per month for a temporary disability to \$200 per month for double permanent total disability. In some instances a \$50 allowance for an attendant is granted in addition to other compensation.

Yearly renewable term insurance.—During the period of the war and until July 2, 1927, yearly renewable term insurance ranging from \$500 to \$10,000 was issued. All term insurance not converted into permanent United States Government life insurance before July 2, 1927, lapsed. Claims upon such policies are paid in 240 monthly installments except where there is no beneficiary named or where the beneficiary named dies before receiving all of the payments, the remainder is paid in one sum.

Medical and hospital care.—In addition to compensation payments, the disabled person is furnished reasonable Government medical, surgical, and hospital service and supplies, and appliances considered reasonably necessary. Hospital facilities of this bureau are also available for veterans of the Spanish American War, the Philippine Insurrection, the Boxer Rebellion, or the World War, suffering from neuropsychiatric or tubercular ailments and diseases, paralysis agitans, encephalitis lethargica or amoebic dysentery, or the loss of sight of both eyes, whether such ailments or diseases are due to military service or otherwise. The bureau is also authorized to furnish hospitalization and necessary traveling expenses to veterans of any war since 1897, without regard to the nature or origin of their disabilities.

Vocational rehabilitation.—Under the act of July 27, 1918, honorably discharged members of the Army, Navy, or Marine Corps who were unable to carry on in a gainful occupation successfully were provided with vocational training at Government expense, including allowances for maintenance of them and their dependents. The act also provided for the placement of rehabilitated persons in suitable occupations. Veterans who suffered a compensable disability but were not vocationally handicapped were provided with instruction, including tuition and supplies, but were not given maintenance allowance. Rehabilitation activities of the bureau ceased with the close of the fiscal year 1928.

United States Government life insurance.—United States Government life insurance is issued in any multiple of \$500, not less than \$1,000 or more than \$10,000, upon the payment of premiums at a net peace-time rate, with no extra charge for administration or excess mortality due to the hazards of war. (For rates and forms of insurance see Tables 168 and 170.) The policies carry the usual provisions common to policies issued by commercial companies, such as extended insurance, paid-up insurance, cash surrenders, and loans. Dividends are also paid from excess of interest earnings and savings in mortality.

Adjusted compensation.—The act of May 19, 1924, authorized the payment of adjusted compensation to all veterans of the World War, excluding officers above the grade of captain in the Army or Marine Corps or similar rank in the Navy and Coast Guard. The rate of adjusted compensation for service in excess of 60 days is \$1.25 and \$1 per day and the amount of credit is limited to \$625 and \$500 for overseas and home service, respectively. Veterans entitled to not more than \$50 are paid in cash and others are given a 20-year endowment insurance policy for an amount that the adjusted service credit increased by 25 per cent would purchase at the age of the veteran on the birthday nearest the date of the certificate, with interest at 4 per cent compounded annually. An amendment authorized the bureau to make loans direct to the veteran; prior to its passage loans secured by adjusted service certificates could be made only by the banks.

¹ Payments to dependents of more than \$50 are made in 10 equal quarterly installments**No. 175.—CIVIL SERVICE RETIREMENT: SUMMARY, YEARS ENDED JUNE 30**

NOTE.—Retirement for civil-service employees was established by act of May 22, 1920, and amended by act of July 1, 1926. Under these acts employees of the classified service with competitive status, most of the principal groups of unclassified laborers, postmasters appointed from the classified service, and certain other groups are eligible for retirement on annuity at the age of 70 (65 for letter carriers, post office and seaport clerks, laborers, and mechanics generally and 62 for railway postal clerks and persons engaged in tropical and hazardous occupations) if they have rendered 15 years of service. Provision is also made for retirement of employees in the service 15 years who, before reaching retirement age, become disabled. Annuities are computed by multiplying the average annual basic compensation, not to exceed \$1,500, received during the last 10 years of service by the number of years of service, not to exceed 30, and dividing the product by 45. Employees within the scope of the act are required to contribute 3½ per cent (2½ prior to July 1, 1926) of their basic compensation to the retirement fund

¹Includes clerks, city carriers, village carriers, and employees in motor-vehicle service at classified post offices, rural carriers, fourth-class postmasters, and seaport clerks.

²Railway mail clerks, classified May 1, 1889.

³At close of year or period; approximated.

⁴Jan. 16, 1884, to Jan. 15, 1885.

⁵The large increase in field service figures for 1913 is due to the inclusion of navy-yard artisans' positions to the number of about 16,000 in the competitive classified service.

⁶11,635 fourth-class postmasters, appointed in 1914 and 13,238 in 1915, under the Executive order of May 7, 1913, requiring examinations at offices whose incumbents have not been appointed under the regulations, are not included in this table.

² Figures prior to 1928 do not include votes cast for names not appearing on the electoral tickets specified in the table. In 1928 they represent the entire vote cast, including 48,770 votes (35 States) cast for the Workers electors and 67,951 scattering, defective, blank, and void ballots.

³ Democrat-Populist.

⁴ Socialist-Labor only. In 1924 practically all the Socialist vote is included in votes in next column for La Follette and Wheeler, official candidates of the Socialist Party as well as the Independent Progressive.

⁵ Total for Georgia includes 35,871 anti-Smith votes; for South Carolina, 2,670.

⁶ Maryland includes 906 Labor votes; Minnesota and Pennsylvania, 1,921 and 380 Industrial votes, respectively.

9. NATIONAL GOVERNMENT FINANCES

General note as to bases used in compiling statistics of receipts and expenditures of the United States Government.—Four different bases are used in compiling both the receipts and expenditures of the Government. These bases, in the case of receipts, are the daily Treasury statements (unrevised and revised), warrants issued, and collections reported. The expenditures of the Government are published on the first three of these bases and also on the basis of checks issued. Figures in the daily Treasury statements (unrevised) which are on a current cash basis are compiled from the latest daily reports from the Treasury offices or public depositories. Owing to the distance of some of these offices and depositories from the Treasury, reports from them are somewhat delayed in reaching the Treasury, and consequently it is necessary to issue the unrevised Treasury statements before they are received. In order to show the actual receipts and expenditures for any month or year, it is necessary to take into account these delayed reports. The figures for actual transactions during a month or year which are calculated by the use of these reports are said to be on a basis of daily Treasury statements (revised). The unrevised figures are the basis of the Budget estimates submitted to Congress by the President.

It is provided by law that warrants shall be issued by the Secretary of the Treasury in acknowledgment of money received, and that warrants must be drawn by the Secretary of the Treasury for all disbursements of money. These warrants for expenditures do not represent actual payments but are merely advances of credit to disbursing officers, who then issue checks in payment of Government obligations. Expenditures on the basis of warrants issued include unexpended balances to the credit of disbursing officers at the end of the year but do not include expenditures made during the year from unexpended balances of the preceding year. Both receipts and expenditures on a warrant basis omit transactions in certain accounts which credit receipts directly against expenditures shown on a warrant basis. Under normal conditions the unexpended balances of disbursing offices vary comparatively little from year to year, and other adjustments are small, but during a war period or a period of post-war adjustments differences in these items may be large and may cause marked discrepancies between figures shown on a cash as compared with a warrant basis. For example, the liquidation of the War Finance Corporation has caused some very large differences between figures of Government expenditures on these bases during the past decade.

Expenditures on the basis of checks issued (Table 187) represent most accurately the actual expenditures during any given year. They differ from expenditures shown by daily Treasury statements (revised), because they include checks outstanding at the end of the year and exclude unpaid checks at the beginning of the year.

All figures for receipts and expenditures include the figures of postal surpluses or deficiencies and consequently leave out the gross figures of postal revenues and expenditures.

¹ Exclusive of the deposits made by banks to retire national bank and Federal reserve notes and of payments made from this fund to retire such notes; these are in the nature of fiduciary transactions. Both columns include redemption-exchange transactions.² Based on reports of the Post Office Department. Expenditures include adjusted losses, etc., postal funds, and expenditures from postal balances; they exclude departmental expenditures in Washington, D. C., to the close of the fiscal year 1922, and amounts transferred to the civil-service retirement and disability fund, fiscal years, 1921 to 1926. In 1927 and 1928 the 3½ per cent salary deductions are included.³ Averages are for entire 10-year period though there were no receipts or retirements certain years.⁴ After taking account of public-debt retirement expenditures chargeable against ordinary receipts.

¹ Up to 1920, inclusive, civil expenditures under War and Navy Departments at Washington are included under the column Civil and Miscellaneous; thereafter under War and Navy Departments, respectively. Civil and miscellaneous expenditures, beginning 1917, have been revised to exclude expenditures by Bureau of War Risk Insurance and for vocational rehabilitation. War Department expenditures include those for rivers and harbors and the Panama Canal.

² Includes only Army and Navy pensions for service prior to World War and fees of examining surgeons. Does not include salaries under Bureau of Pensions or payments to veterans of the World War, which are made by Veterans' Bureau (see next column).

³ Prior to 1922 data represent expenditures by Bureau of War Risk Insurance and for vocational rehabilitation. They are exclusive of operations in Government life insurance trust funds and special funds.

⁴ Exclusive of amounts transferred to the civil service retirement and disability fund in 1921 to 1926.

⁵ Averages are for entire 10-year period, though there were no expenditures in certain years.

⁶ Additional compensation, Postal Service (resolution of Nov. 8, 1919), included in "Postal deficiencies."

⁷ The liquidation of the War Finance Corporation and the repayment of loans by the railroads very much affected the total civil and miscellaneous expenditures in 1925.

¹ Additional collections under national prohibition act included under miscellaneous receipts.

² Exclusive of \$14, 268, 000 transferred from the checking account of the U. S. Shipping Board to the warrant account on the books of the Secretary of the Treasury and covered into the Treasury by miscellaneous receipt covering warrant. As this was merely an adjustment between accounts of cash transactions occurring in prior years, this item has not been included in either receipts or expenditures.

³ For additional collections from this source see under "Internal Revenue."

⁴ Includes \$3, 272, 000 head tax in 1927 and \$3, 263, 000 in 1928.

⁶ Less than \$500.

⁷ Apparent decrease is due to the fact that in 1928 adjustments were made between general account of advances and these accounts by transfer and counter warrants, whereas in prior years adjustments were effected by pay warrants, the proceeds of which were redeposited as miscellaneous receipts. In 1928 this adjustment is excluded from both receipts and expenditures, as it does not affect the cash in the Treasury.

¹ Totals prior to 1922 are not comparable with later years because of changes in classification of general and special expenditures.² In the fiscal years 1921, 1922, and 1923, material changes were made in classification of expenditures between legislative establishment, executive proper, and other independent offices and commissions.³ Alien property funds included under executive proper prior to fiscal year 1922.⁴ Payments for veterans' relief made prior to Aug. 11, 1921, by the War Risk Insurance Bureau are included under Treasury Department, while similar payments made prior to that date by the Federal Board for Vocational Education are under other independent offices and commissions.⁵ Refunds of customs and internal revenue receipts and investments of Government life insurance fund included under Treasury Department prior to 1922.⁶ Postal deficiency included under Post Office Department prior to 1922.⁷ Post Office Department expenditures for 1921 include \$65,576,000 paid to the Railroad Administration. This resulted in a corresponding decrease in expenditures for Federal control of transportation.⁸ Deduct, excess of credits.⁹ Civil service retirement fund, established May, 1920, included under Interior Department prior to 1922.

¹⁰ In 1922 to 1925 additional allotments for veterans' relief are included under the Treasury, War, and Navy Departments, and in 1924 and 1925 also under the Interior Department. In 1922 these allotments amounted to \$31,746,000; in 1923, to \$40,706,000; in 1924, to \$6,411,000; and in 1925, to \$6,058,000.

¹¹ Teachers' retirement fund included under District of Columbia prior to 1922.

¹² Figures are net and allow for receipts and deposits credited to the account concerned.

¹³ Includes \$288,399,000 payments on certificates of indebtedness of Director General of Railroads.

¹⁴ Deduct, excess of credits resulting from receipts of \$266,637,000 from sale of equipment trust notes and \$123,783,000 from sale or collection of other securities acquired under the transportation act, 1920. In 1923 and 1924 receipts on these accounts were included under miscellaneous receipts.

¹⁵ Deduct, excess of credits from deposits by War Finance Corporation of proceeds of United States securities redeemed.

¹⁶ Includes \$350,000,000 in 1920, \$100,000,000 in 1921, and \$25,000,000 in 1922 applied by U. S. Grain Corporation to reduction of capital stock and reflected in miscellaneous receipts for those years; the 1921 figure represents net expenditures after taking into account credits.

¹ Figures cover only appropriations which have been specifically designated by Congress as payable from the Treasury and are exclusive of amounts which may be required under indefinite appropriations (payable from the Treasury) provided by law to supply deficiencies in the postal revenues. (See note 5.)

² Includes \$35,698,000 additional compensation, Postal Service.

³ Includes \$14,000,000 for deficit under Federal control of telegraph and telephone systems.

⁴ Includes \$11,053,000 certified claims.

⁵ These figures include amounts which may be required under indefinite appropriations (payable from the Treasury) to supply deficiencies, if any, in the postal revenues.

⁶ Includes \$125,000,000 of accumulated interest on war-savings certificates, series of 1918, to be paid during the fiscal year 1923 though properly allocable to the full five years of their life.

⁷ The sinking fund created by the act of Feb. 25, 1862, was repealed by the act of Mar. 3, 1919. The act of Mar. 3, 1919, created a cumulative sinking fund beginning with the fiscal year 1921.

⁸ In 1918 to 1922, indefinite appropriations, estimated. In 1923 and 1924, definite amounts were appropriated which are included under the several departments and establishments. In 1925 to 1928 this item was absorbed by rates of pay included under the classification act, approved Mar. 4, 1923.

No. 191.—INTERNAL REVENUE: AMOUNTS COLLECTED FROM PRINCIPAL SOURCES

NOTE.—All figures in thousands of dollars. The figures represent collections by internal revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal revenue stamps and deposits of internal revenue collected through customs offices, and, therefore, differ from those in Tables 182, 184, and 186 which represent the deposits of these collections in the Treasury or depositories during the fiscal year concerned, there being thus an overlapping of time. Certain items, included in the totals in the last column, are shown in detail in the second part of the table

¹ Determined on the basis of the number of returns filed and the average net income in each class.

² Includes excise tax, \$10,071,000, under act of Aug. 5, 1909.

³ Figures for 1915 contain approximately 30,000 returns which properly belong in 1914.

⁴ In addition to the personal and corporation taxes shown for 1917 there was a war and excess-profits tax on partnerships amounting to \$103,888,000.

⁵ Includes war and excess-profits tax, \$101,250,000.

⁶ Includes tax on capital net gain from sale of assets held for more than 2 years. In 1924 to 1926 figures represent net tax after deducting tax credits of 12½ per cent on capital net loss from sale of assets held over 2 years and 25 per cent on earned net income.

¹ Accrued and unpaid interest on funded debt due to exercise of options to pay specified amounts over first five years in lieu of total amounts due for which bonds similar to those originally issued under funding agreement will be given upon expiration of the option for the full amount then due.

² Time of payment of principal and interest extended to June 1, 1943.

³ Indebtedness includes deferred payments provided for in the funding agreements, for which gold bonds of the respective debtor governments have been or will be delivered to the Treasury.

⁴ Funding agreement not yet ratified. Upon ratification, \$92,565,000 of payments shown will be applied toward payment of the first annuities due thereunder.

⁵ Increase in indebtedness over amount funded due to exercise of options to pay one-half of interest due on original issue of bonds in bonds of debtor governments.

⁶ Payments of governments which have funded were made prior to the dates of the funding agreements.

⁷ The Governments of Cuba and Liberia have paid in full principal and interest due on their obligations.

⁸ Represents proceeds of liquidation of financial affairs of Russia in this country.

No. 223.—TAXES: TOTAL LEVIES OF AD VALOREM GENERAL PROPERTY TAXES OF STATES, COUNTIES, AND MINOR CIVIL DIVISIONS

NOTE.—The data represent the total levies of general property taxes of States, counties, cities, villages, towns, townships, school districts, etc., and for all purposes. They do not cover "special assessments" on property benefited by specific improvements nor special property taxes applying only to limited classes, nor taxes based on other standards than property, such as income, volume of business, inheritance, etc., which have been steadily growing in relative importance. The change in buying power of money affects materially the comparability of the figures. For data for 1870 and 1890, by States, see Table 437, Statistical Abstract of 1922

No. 224.—ASSESSED VALUATION OF PROPERTY SUBJECT TO GENERAL PROPERTY TAX, 1927

NOTE.—Data shown are taxable values of property subject to the general property tax for the use of State governments. Property belonging to railroads, telegraph companies, and a number of similar corporations is in some States distinguished as real or personal, but in a number of States it is treated as a single total. In the latter case, figures for such corporations and also other property and franchise valuations of corporations for which data were insufficient for a complete distinction of real from personal are not shown separately but are included in the totals

No. 226.—REVENUES AND EXPENDITURES OF STATE GOVERNMENTS

NOTE.—Both receipts and expenditures are net figures, excluding temporary and special transactions which represent virtually duplication. Revenue receipts do not include any receipts from borrowing of money. Outlays, which enter into the total for governmental cost payments, represent capital investments, including those made with the proceeds of borrowed money. The excess of governmental cost payments over revenue receipts represents, approximately, increase of indebtedness

No. 232.—BONDED INDEBTEDNESS OF STATES, BY PURPOSE OF ISSUE

NOTE.—All figures in thousands of dollars. Data for the various States are not of identical date but with few exceptions are as of Jan. 1, 1923, or of more recent date. Four States (Florida, Nebraska, Kentucky, and Wisconsin) have no bonded indebtedness. Kentucky owes \$10,887,000 on outstanding warrants, and Wisconsin is indebted to its trust fund to the amount of \$1,664,000. "Total debt" includes indebtedness under issues for refunding and for miscellaneous purposes not shown separately. "Education" includes universities and public-school systems (cost of buildings and maintenance). "Welfare institutions" includes special and general hospitals, insane asylums, penal institutions, and reformatory schools. "Agricultural aid" includes rural credits, State Bank of North Dakota, agricultural experiment stations, forestry, etc. "Highways" includes bridges and grade-crossing elimination. "Other improvements" includes physical improvements other than highways, waterways, or buildings. "Other military purposes" includes armories, insurrection costs, and old war debts.

¹ Prior to 1925, contingent or special assessment debt was included with funded and fixed debt. In this table, it has been excluded from funded and fixed and included with current debt, except for 1880 to 1900, 1905, and 1910, when no segregation could be made.

² Not segregated prior to 1915; included with funded and fixed.

³ Includes special assessment debt, revenue bonds and notes, and warrants.

⁴ There was an excess of sinking fund assets over gross debt in one State.

⁵ Revised figures. ⁶ Debt to public trust funds included with "Other floating."

No. 247.—STOCK OF MONEY IN THE UNITED STATES, BY KINDS, JUNE 30

NOTE.—Amounts in thousands of dollars. Figures prior to 1890 have been revised from the best available data, but the older records, especially from 1860 through the early 70's, are not complete and figures for gold and silver those years are only estimates. Figures beginning 1890 have been compiled on the basis of revised figures for June 30 of each year and therefore differ slightly from the monthly circulation statements. In 1927, data were revised to include minor coins beginning 1900 (no satisfactory data available for earlier years) and gold coin and bullion held abroad for Federal reserve banks and to exclude earmarked gold. Gold and silver certificates and Treasury notes of 1890 are not shown, since equivalent amounts held in trust against them are included in gold coin and bullion and silver dollars

No. 248.—MONEY IN CIRCULATION, HELD IN TREASURY AND IN FEDERAL RESERVE SYSTEM, AND TOTAL STOCK, JUNE 30

NOTE.—All figures except per capita in thousands of dollars. In conformity with revisions in the form of circulation statement in 1922 and 1927, figures for 1915 on have been compiled to include in the holdings of Federal reserve banks and agents, and, hence, in stock of money, gold bullion and foreign coin held by them and gold coin and bullion held abroad for the account of Federal reserve banks, and also to include in the holdings of Federal reserve banks and agents, and, hence, exclude from circulation, all forms of money held by them whether as reserve against Federal reserve notes or otherwise. As to other revisions, see headnote, Table 247. Per capita figures are on basis of population estimates of the Treasury Department

¹ Includes bills discounted for Federal intermediate credit banks, 1923 to 1928, and also bills secured by adjusted service certificates discounted for nonmember banks, 1927 and 1928. For amounts see headline, table 252.

² Includes bills payable in foreign currencies in addition to amounts shown in following columns.

³ "Bought outright" includes "bills bought with resale agreement" where separate figures are not shown. The latter represent bills bought with the agreement that other banks will repurchase them in 15 days.

⁴ Includes special temporary certificates issued to Federal reserve banks by the Secretary of the Treasury; also prior to 1922 securities, if any, purchased from other Federal reserve banks.

⁵ Figures for 1923 and prior years represent municipal warrants; thereafter, they include also foreign loans on gold, Federal intermediate credit bank debentures, and Federal land bank bonds.

¹ In March, 1917, the Federal Reserve Board ruled that when the 60-day trade acceptance rate was higher than the 15-day commercial paper rate, trade acceptances maturing within 15 days were to be taken at the lower rate.

² Commodity rates were established during September and October, 1915, and merged with those for commercial paper of corresponding maturities in November and December, 1917.

³ Rates for bills maturing within 30 days, 3½ per cent; 31 to 60 days, 4 per cent; 61 to 90 days, 4½ per cent.

⁴ Oct. 20, 1917, rate of 3½ per cent for commodity paper maturing within 60 days and 4 per cent for paper maturing after 60 days but within 90 days.

⁵ Five per cent on 6 to 9 month agricultural and livestock paper from Apr. 7, 1923, to June 11, 1924.

⁶ Five per cent on 6 to 9 month agricultural and livestock paper from Apr. 19, 1923, to June 25, 1924. 4½ per cent on 91 days to 6 months agricultural and livestock paper from June 19 to June 25, 1924.

No. 266.—PRINCIPAL ASSETS AND LIABILITIES OF SELECTED REPORTING MEMBER BANKS OF THE FEDERAL RESERVE SYSTEM IN LEADING CITIES

NOTE.—All money figures in millions of dollars. Owing to the addition of new members to the list of reporting banks during 1919 and 1920, the comparability of the figures is somewhat affected, but since Jan. 1, 1921, the changes have been almost entirely through consolidation of reporting banks

**No. 272.—BANKS: NUMBER, RESOURCES, CAPITAL AND SURPLUS, AND DEPOSITS
FOR EACH CLASS OF BANKS**

NOTE.—Banks in Alaska, Hawaii, Porto Rico, and Philippine Islands are included. Data for national banks and in recent years for other classes are as of June 30 or about June 30. In earlier years reports for banks other than national were of various dates. Figures for private banks, which include only those under State supervision and others voluntarily reporting, except for 1880, and for other banks except national for earlier years, especially 1875, 1880, and 1885, are incomplete. For 1910 and 1915, when statistics were compiled from reports from individual banks, and in recent years, the segregation of the classes of banks is fairly accurate. In other years figures for State banks include stock savings banks and loan and trust companies in a number of States, and in some instances private banks. Individual deposits exclude dividends unpaid and, beginning 1910, certified and cashiers' checks; they include postal savings

¹ Capital only.

² Individual and other.

³ In 1921 returns from California, which in 1920 had shown 106 stock savings banks, included all banks except 1 mutual savings bank with State banks, which accounts for part of the increase in State banks and the greater part of the decrease in stock savings banks. In subsequent years returns showed separate statistics for each class of banks.

⁴ Average for all private banks for the six months ended May 31, 1880.

NO. 284.—SAVINGS BANKS: NUMBER OF DEPOSITORS AND AMOUNT OF SAVINGS DEPOSITS, CONTINENTAL UNITED STATES, 1820 TO 1910

NOTE.—Data for later years are as of June 30 or about June 30. In earlier years reports were of various dates. Prior to 1900 data include both mutual and stock savings banks; beginning 1900 they are for mutual savings banks only, which in that year had about 90 per cent of the savings deposits in all savings banks. For figures for later years and also savings deposits in all classes of banks, see Table 282

No. 289.—CERTAIN MAJOR ITEMS OF SAVINGS OF THE UNITED STATES

NOTE.—In millions of dollars. Increase in savings deposits is for fiscal years ended June 30; increase in assets of building and loan associations includes figures for calendar years for some States and fiscal years for others; other data are for calendar years. The last column should not be added to other items, as there is much duplication between it and them. For example, savings banks and life-insurance companies both invest their assets in the securities of corporations. On the other hand, many forms of savings, some of large amount, are not listed

No. 298.—WAR FINANCE CORPORATION: STATUS OF ADVANCES MADE UNDER ALL SECTIONS OF THE ACT, APRIL 5, 1918, TO NOVEMBER 30, 1928

NOTE.—When the corporation resumed operations January, 1921, there was outstanding \$111,117,610. The making of new loans was discontinued on Dec. 31, 1924, and all loans since that date are "expense advances" only. Figures for agricultural and livestock loans have been revised and adjusted so as to exclude all amounts representing renewals of loans and to include only net additional amounts advanced. For details of advances to Nov. 30, 1924, see Statistical Abstract 1924, Tables 245 and 246

No. 299.—CLEARING HOUSE EXCHANGES: SUMMARY FOR UNITED STATES

NOTE.—Prior to 1920 data are for all cities reporting to the New York Clearing House Association; commencing 1920 they are for 179 identical cities. The comparability of these figures is affected (1) by changes in the number of cities reporting, and (2) by the tendency toward consolidation of banks, eliminating former clearings between two or more banks. Debits to individual account (Tables 301 and 302) are a more significant measure of volume of payment. For States included in each division see Table 300

12. WEALTH

(Data in this section relate to continental United States)

No. 303.—ESTIMATED NATIONAL WEALTH OF THE UNITED STATES: TOTAL, 1850 TO 1922, AND BY CLASSES OF PROPERTY, 1900 TO 1922

NOTE.—Estimates of national wealth for the earlier censuses were not made by precisely the same methods used more recently and are not closely comparable. Changes in buying power of money, as indicated by levels of prices and wages, materially affect the comparisons (see price tables in sec. 14)

No. 305.—WEALTH: ESTIMATED VALUE OF ALL TANGIBLE PROPERTY SITUATED IN EACH GEOGRAPHIC DIVISION AND STATE

NOTE.—See headnote to Table 303. This table shows, not the value of property owned by the citizens of each State, but that of the physical property lying in each State wherever the securities or other evidences of title representing it may be found or owned. The per capita figures thus do not represent the average wealth of the citizens of each State

¹ Total differs from estimate as published in 1912 because of revision of estimate for taxed real property in Oklahoma. Includes \$402,000,000 value of ships belonging to the United States Navy and \$290,000,000 value of privately owned water-supply systems not distributed by States. Items for geographic divisions and States differ from estimate as published in 1912 because of redistribution of railroad values in accordance with the method employed in 1922.

² Total includes \$1,446,000,000 value of ships belonging to the United States Navy, \$361,000,000 privately owned water-supply systems, and \$4,278,000,000 gold and silver coin and bullion not distributed by States.

³ Includes Indian Territory.

⁴ Differs from estimate as published in 1912 because of revision of estimate for taxed real property.

¹ Data for 1921 and also for 1922 to 1925 for Colombia, Peru, and Venezuela compiled by the Bureau of Foreign and Domestic Commerce from publications of the individual countries.

² Parity of the milreis was established at 11.96 cents by laws of Dec. 18, 1926, and Jan. 5, 1927.

³ Quotations prior to 1926 are for the paper peso (1913 average, 19.53 cents). Beginning 1926, the currency was reestablished on a gold basis, the peso being devaluated to 12.17 cents.

⁴ Quotations for 1921 to 1924 are for the krone, par 20.26 cents.

⁵ Quotations prior to 1927 are for the franc (par 19.3 cents). The belga, which is equal to 5 francs, superseded the Belgian franc Oct. 26, 1926, and was quoted at par during November and December, 1926.

⁶ The lev was stabilized at 0.72 cents, Nov. 22, 1928, former par value, 19.3 cents.

⁷ Nominal par value, 20.26 cents. Stabilized in March, 1925, at 2.96 cents.

⁸ The pre-war par of the markka was 19.3 cents. In 1926 it was devaluated to a new gold parity of 2.52 cents.

⁹ In June, 1928, the currency was reestablished on a gold basis and the new parity of the franc fixed at 3.9179 cents. The former parity was 19.3 cents.

¹⁰ Prior to 1924 quotations are for paper marks (see monthly rates in Table 307). The new paper reichsmark currency issued the latter part of 1924 was thereafter quoted substantially at par (23.82 cents).

¹¹ In May, 1928, the drachma was reestablished on a gold basis and stabilized at a new parity of 1.30 cents, former parity, 19.3 cents.

¹² Prior to 1926 quotations are for the paper krone (par 20.26 cents). On Jan. 1, 1926, this was superseded by the pengo valued at 17.49 cents and exchangeable for 12,500 paper kronen.

¹³ In December, 1927, the lira was stabilized at 5.26 cents. The former par value was 19.3 cents.

¹⁴ Prior to 1924 quotations are for Polish marks, par 23.82 cents; thereafter for the zloty. The average rate for January to April, 1924, was 11.3 cents per million marks; for June to December, 1923 cents for 1 zloty. The par value of the zloty when adopted as the currency unit in 1924 was fixed at 19.3 cents, but in October, 1927, it was stabilized at 11.22.

¹⁵ Par of exchange varies with the price of silver, the standard of value; figures shown are calculated on the basis of the average price in 1928.

No. 314.—FIRE LOSSES: TOTAL AND PER CAPITA, CONTINENTAL UNITED STATES

NOTE.—Amounts, except per capita, in thousands of dollars. Prior to 1916, figures are as compiled by the New York Journal of Commerce and include losses of \$10,000 or over in the principal cities of the United States, adding 15 per cent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being \$214,531,000 as against \$253,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 per cent for unreported and uninsured losses

NOTE.—Totals in this table and No. 322 do not agree with totals in Tables 315 to 317 because of differences in the reports from which they are compiled as furnished by the companies to the various insurance departments, and because of duplications from reinsurance. The former also cover continental United States only

No. 333.—INDEXES OF VALUE OF SALES OF MAIL-ORDER HOUSES AND CHAIN STORES

NOTE.—1923-1925 average=100. Indexes for mail-order houses cover four companies throughout. The number of chain-store companies reporting varied from year to year, but in computing the indexes adjustment has been made for these variations. No adjustment has been made, however, to eliminate the influence of increase in the number of stores operated by the individual companies which accounts for a considerable part of the increase in the indexes. Sales are much affected by changes in price levels. For price index see Table 334

14. PRICES

GENERAL NOTE.—The wholesale price index of the Department of Labor is based on primary market quotations of 550 commodities. In weighting the prices included in the index, the biennial census reports of 1923 and 1925 have been used for most manufactured products and for other products the average for the years 1923 to 1925 where trustworthy information was available as in the case of agricultural products.

The retail food index is based on the weighted average quotations (weighted by average family consumption in 1918) as of the 15th of the month, secured from retail stores in 51 cities since 1920 and from a smaller number in earlier years, for 22 commodities to 1920 and for 43 commodities in 1921 and subsequent years.

The farm price index is constructed by weighting prices paid to producers for 30 products. Average quotations for the period, August, 1909–July, 1914, are used as a base, and each price series is weighted by the average annual marketings of farmers in the years 1918 to 1923.

No. 352.—ANNUAL AVERAGE UNIT VALUES OF IMPORTANT ARTICLES IMPORTED INTO THE UNITED STATES

NOTE.—The values are required by law to represent the values of the goods in the foreign markets whence exported to the United States. "Ton" signifies long ton of 2,240 pounds. The averages are obtained by dividing the total value of imports of the specified article by the total quantity, and as in some commodities there may be considerable variations in price between different grades, methods of packing, etc., and as the proportions of the grades, etc., may vary from year to year, the averages in such cases may show the actual price movements only roughly

No. 354.—WAGES PER HOUR IN THE COAL-MINING INDUSTRY

NOTE.—Practically all mines operate on a 48-hour week, but contract miners and their laborers in anthracite mines, and loaders, hand or pick miners, and machine miners in bituminous mines, generally work less hours. General averages are weighted according to relative importance of the different occupations. Data are not collected annually, but at intervals, and are available only for the years specified.

¹ The normal or customary hours of operation of the great majority of the potteries included in the study are 9 hours per day and 54 hours per week. Working hours in a pottery, however, are more nominal than normal, as so many employees are pieceworkers and to quite an extent determine their own time.

² All female workers were "Colored."

³ No females employed in the plants covered.

No. 358.—INDEX NUMBERS OF UNION HOURS OF LABOR PER WEEK AND RATES OF WAGES PER HOUR, BY OCCUPATIONS

NOTE.—The figures cover the principal cities of the United States. The relative hours are percentages showing the change in the regular full-time working hours per week, account not being taken of loss of time from slack work or other causes nor of overtime work. The relative wages are percentages which indicate the change in wages per hour. The figures are based on the scale prevailing May 15 each year. For absolute hourly wage rates for the same and other occupations, see Table 359. Data for the metal and millwork trades for 1924 and earlier years may be found in previous issues of this publication

No. 360.—EMPLOYMENT AND PAY-ROLL INDEXES IN MANUFACTURING INDUSTRIES

NOTE.—Indexes based on monthly average 1926=100. Statistics cover 54 industries comprising the 12 groups shown in Table 363 and are based on reports from nearly 12,000 establishments employing approximately 3,250,000 persons. Indexes are weighted according to relative importance of industries included. The returns cover one week in each month

¹ Compiled by the Massachusetts Department of Labor and Industries, Division of Statistics, from about 1,000 firms each month. Data are connected by the chain relative method.

² Compiled by the New York State Department of Labor from reports of 1,648 firms employing more than one-third of the factory workers of the State.

³ Compiled by the Federal Reserve Bank of Philadelphia from reports of about 1,000 plants each month in the States of New Jersey, Pennsylvania, and Delaware. Since August, 1926, figures for New Jersey are from the New Jersey Department of Labor.

⁴ Compiled from data furnished by the Illinois Department of Labor from reports by about 1,400 manufacturing establishments, employing about 400,000 people, based on the pay roll nearest the 15th of the month.

⁵ Compiled by the Industrial Commission of Wisconsin, based on link relatives from reports of about 850 manufacturing firms.

⁶ Index number represents 5 months' average, August to December, inclusive.

¹ Not counting rural free delivery routes.

² Audited postal surplus or deficit which is greater or less than excess of receipts or expenditures by the amount of adjusted losses and contingencies.

³ International includes foreign countries on domestic basis. For explanation see note on Table 370.

⁴ Data are for continental United States and are estimates except in 1923 and beginning with 1926, when figures are accurate calculations. No estimates made from 1914 to 1922, inclusive.

⁵ Postage stamps first issued under act of Mar. 3, 1847, and placed on sale at New York July 1, 1847.

⁶ From Nov. 1, 1864, when money-order system first went into operation, to June 30, 1865.

⁷ From Sept. 1, 1860, to June 30, 1870. International money orders first issued under convention of Oct. 12, 1867.

⁸ Gross revenues of department for 1918 and 1919 include \$44,500,000 and \$71,292,000, respectively, war-tax revenue accruing from increased postage.

No. 370.—POSTAL MONEY-ORDER BUSINESS

NOTE.—For revenues from money orders, see Table 369. For value of orders issued for other years, see Table 368. Money orders are exchanged on a domestic basis not only within this country, but with its outlying possessions, Canada, Cuba, and numerous islands and minor countries neighboring the United States. International-basis orders are exchanged between the United States and its outlying possessions, on the one hand, and other than "domestic basis" foreign countries, on the other. In this table, however, "International" includes money orders exchanged between the United States and "domestic basis" foreign countries, and these are not included in "Domestic"

No. 372.—TRANSPORTATION OF DOMESTIC MAILS

NOTE.—Amounts, except as indicated, in thousands of dollars. Since Nov. 1, 1916, all service on steam railroads is authorized and paid for under the space basis system; formerly, payments were based on a system of quadrennial weighings. Railway mail space units of service vary in size and character and may consist of a car, a section of a car, or a closed pouch carried on a car. Some cars are railway post offices, others are for storage only, over 20 classes of units being distinguished. The "equated unit" represents a calculation of the equivalent of all the different units in terms of a 60-foot car. Annual rate of expenditure (regular authorizations) represents estimated cost for transporting normal mail traffic over regular routes only, based on contracts outstanding at the end of each fiscal year. "Annual cost" includes emergency and side and transfer service. Average rates are based on "regular authorizations"

No. 382.—TELEPHONE SYSTEMS: REPORTS TO INTERSTATE COMMERCE COMMISSION

NOTE.—Companies engaged in interstate business are required to report both as regards interstate and intrastate business. Prior to 1923 the classification of companies based on the amount of annual operating revenues was as follows: Class A, over \$250,000; Class B, \$50,000 to \$250,000; Class C, \$10,000 to \$50,000. Class B now includes companies with revenues from \$100,000 to \$250,000 and Class C those with revenues from \$50,000 to \$100,000. The smaller companies, Class D, are not covered in the table

¹ Total income less all expenses, including depreciation; for 1917, 1922, and 1927 does not include charges for sinking and other reserve funds.

² Not including land-line-system plant and equipment to the value of \$20,000,000 reported as cable-system plant and equipment for 1912 and 1917. (In statistics for preceding censuses an item of \$20,000,000 funded debt, offset by the same amount for plant and equipment, was carried against ocean-cable telegraphs. This debt being really a land-line-system debt and being so reported for 1922, is eliminated from the figures for ocean-cable system.)

³ Includes land-line-system plant and equipment to the value of \$20,000,000 (see note ²).

⁴ Includes sinking funds and stock and bond discount.

⁵ Includes sinking and other special funds.

⁶ Not including land-line-system funded debt to the amount of \$20,000,000 reported as cable-system indebtedness in 1912 and 1917 (see note ²).

⁷ Includes land-line-system indebtedness to the amount of \$20,000,000 (see note ²).

¹ The fuel equivalent for water power is calculated from the reported horsepower of installed water wheels. Prior to 1890 data were unsatisfactory, but estimates are included in the total.

² Calculated at 26,200,000 British thermal units per ton.

³ Based on the amount of coal displaced by gas, as estimated by the gas companies at the time.

No. 391.—ELECTRICITY PRODUCED, CONSUMPTION OF FUEL, AND CAPACITY OF GENERATORS IN PUBLIC-UTILITY POWER PLANTS

NOTE.—Data prior to 1919 are totals for central stations and electric railways as reported by Bureau of the Census; thereafter they are estimated totals for all plants, based on returns from about 3,500 plants in 1919 to about 3,800 in 1928, each producing 10,000 kilowatt-hours or more per month, engaged in public service, including central stations, electric railways, steam railroads generating electricity for traction, and certain other plants. The capacity of plants reporting is about 95 per cent of that of all plants

No. 393.—CENTRAL ELECTRIC STATIONS: EQUIPMENT, EMPLOYEES, OUTPUT, AND SALES

NOTE.—A central electric station is one selling current to public or private consumers, or a municipal plant supplying current for streets, public buildings, etc. Isolated or private plants operated solely for the benefit of the owner in connection with factories, mines, stores, hotels, institutions, etc., which in the aggregate produce great quantities of current, are not included. The business of electric street railways is shown only so far as that portion of their business relating to the sale of current can be segregated. Electric plants operated by the Federal or State Governments are excluded even when they sell current to private consumers. One central electric station often sells current to another, so that there is considerable duplication in total sales. Net sales are considerably less than current generated because of wire losses, self consumption, etc.

¹ The term "station" as here used may represent a single electric station or a number of stations operated under the same ownership.

² Figures not available.

³ Salaries and wages were not reported for 1927 by municipal plants. Commercial plants reported 95,917 salaried employees, with salaries amounting to \$166,340,946, and 138,796 wage earners, with wages amounting to \$201,290,810. The percentages which the salaried employees and wage earners reported by the commercial plants formed of the corresponding totals for both commercial and municipal plants were 94.6 and 92.8, respectively.

No. 398.—RETAIL PRICES OF ELECTRICITY IN PRINCIPAL CITIES

NOTE.—Net price in cents per kilowatt hour, electricity for household use. For cities having more than one tariff for domestic consumers rates are shown for the schedule or schedules under which most residences are served. "Demand" is a term applied to an amount of current consumption bearing a given ratio to the capacity of consumers' installation as a basis for graduating rates. The method of determination varies from city to city. For example, in Buffalo the lighting demand is 25 per cent of the total installation, but not less than 250 watts. If the capacity of the total installation is 2,000 watts, the "demand" is 25 per cent of this, or 500 watts, and the first 60 hours' use amounts to 30 kilowatt hours and is subject to the first price schedule (5 cents, 1923); the next 120 hours' use (60 kilowatt hours) to the next rate (4 cents), and above 90 kilowatt hours to the excess rate (1½ cents). Measure of consumption as stated in second column refers to tariffs of 1923. For some cities primary and secondary rates applied to somewhat different amounts of current consumption in previous years. For full details see Monthly Labor Review, February, 1929.

No. 399.—DEVELOPED AND POTENTIAL WATER POWER

NOTE.—In thousands of horsepower. Data for developed water power cover capacity of actual installation of water wheels and turbines in plants of 100 horsepower or more. The figures for potential power are estimates showing the 24-hour horsepower available 90 per cent of the time and 50 per cent of the time at an over-all efficiency of 70 per cent at all developed and undeveloped sites. These figures for potential power are not directly comparable with those for developed power, because developed power is usually given in terms of the capacity of installed water wheels or turbines, which may be several times the potential power available 90 per cent of the time. Probably with complete development of the water-power resources of the whole country the installed capacity would amount to 80,000,000 horsepower or more.

No. 400.—RURAL ROADS IN THE UNITED STATES

NOTE.—Mileage data included for county and township roads in 1921, 1926, and 1927 were secured from county records; data for other years shown in this and subsequent tables contain some estimates and are not as accurate as to detail. Mileage data in most cases refer to calendar years; there are, however, exceptions in several States. Data relate to continental United States only except as noted

No. 401.—RURAL ROAD MILEAGE AS OF DECEMBER 31

NOTE.—Lack of definite information in the earlier years accounts for the fact that in some of the States the total road mileage reported is considerably greater than in the preceding year shown, while mileage of surfaced roads is less. Figures include county and township roads and also State highway systems. (See also headnote, Table 400)

¹ Prior to 1922 figures are based only on price of five-passenger open cars of a given chassis. Thus, if this model sold for less than \$1,000, the total production of cars with the same chassis is included in the "under \$1,000" class, even though closed models sold for over \$1,000. In 1922 and later years actual f. o. b. prices of open and closed models are considered separately and the cars included under proper classification.

20.—STEAM AND ELECTRIC RAILWAYS AND EXPRESS COMPANIES

[Data in this section relate to continental United States unless otherwise stated]

GENERAL NOTE.—The total steam railroad mileage of the United States includes: (a) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission, (b) switching and terminal railroads, also reporting to the commission; and (c) private railroads (defined by the commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of gross operating revenue in 1919: Class I, having more than \$1,000,000 of such revenue; Class II, from \$100,000 to \$1,000,000; and Class III, less than \$100,000. During recent years more detailed reports are required from Class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of Class II and Class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by Class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district the remainder of the country. The principal railroads of the eight regions are listed in Table 444.

Class I companies make monthly reports and the yearly totals from these become available earlier than the sometimes slightly corrected totals from the final annual reports. The latest figures in these tables are in many cases from the monthly reports.

No. 418.—RAILWAY MILEAGE OWNED AND MILEAGE OPERATED CLASSIFIED BY TRackage

NOTE.—Beginning with 1908 switching and terminal roads are omitted (they operate about 2,000 miles of first main track). The first and second columns cover all railways including "circular" and "unofficial" lines; the last five columns omit "circular" and "unofficial" lines. Mileage owned excludes all duplication and covers continental United States only. Mileage operated includes some duplication under trackage rights and some mileage in Canada operated by United States companies

No. 430.—CAPITALIZATION OF RAILROADS: ALL REPORTING COMPANIES

NOTE.—All amounts except "per mile of road" in millions of dollars. Switching and terminal companies excluded beginning with 1908; their total capitalization in 1927 was \$692,283,196. Figures include both operating and nonoperating railways. The gross figures include considerable amounts of securities held by the companies issuing them as well as larger amounts held by other railway companies

No. 431.—RAILWAY STOCK OUTSTANDING, DIVIDENDS, AND INTEREST

NOTE.—Data relate to years ending June 30 prior to 1916 and to calendar years thereafter. Nonoperating as well as operating roads are included. Switching and terminal roads are excluded since 1908. Dividend figures throughout cover all classes of roads but interest figure for 1913 excludes the unimportant Class III roads. The amount of stock shown in the first column is exclusive of stock held by the issuing company but includes that held by other railway companies

No. 433.—PROPERTY INVESTMENT, INCOME, INTEREST, AND DIVIDENDS:
REPORTED BY OPERATING ROADS

NOTE.—All figures except as indicated in thousands of dollars. Investment is as reported by the carrier and should not be confused with the tentative valuation fixed by the Interstate Commerce Commission. It relates only to railway property, but includes leased lines, which are not included, however, under the other columns. All data exclude switching and terminal companies.

¹ Prior to 1925 figures include investment of leased lines and exclude investment of proprietary companies which do not render annual reports. Beginning with 1925, the investment in road and equipment of proprietary companies is included. In this column no allowance is made for cash and material and supplies, and no deduction is made for depreciation.

² Investment originally published is increased by \$170,000,000, estimated reserve for depreciation.

³ Does not include returns for Class II and Class III companies.

⁴ Figures not comparable on account of Federal control accounting requirements.

⁵ Includes investment of proprietary companies: 1925, \$493,923,000; 1926, \$831,574,000; 1927, \$919,095,000.

No. 434.—FREIGHT TRAFFIC: TRAIN AND CAR MOVEMENT

NOTE.—Figures prior to 1916 relate to years ended June 30, thereafter to calendar years. Switching and terminal roads excluded beginning with 1908. The tonnage "per loaded car" for "All roads" is based on revenue tonnage only; and for "Class I roads" on revenue and nonrevenue tonnage, with exception of the "District" figures for 1916-1920. Tons are of 2,000 pounds

No. 446.—REVENUE FREIGHT CARRIED, BY COMMODITY GROUPS

NOTE.—All figures in thousands of tons of 2,000 pounds. Data relate to years ended June 30 prior to 1916, to calendar years thereafter. Switching and terminal roads excluded since 1908. Figures for 1911 to 1916, inclusive, exclude Class III roads but this affects the comparability very slightly; those after 1916 exclude both Class II and Class III, thereby reducing the grand total about 6 per cent. Nonrevenue freight is excluded; this is a large item in the case of a few commodities, notably coal

Class of road and year or yearly average	Total	Prod-ucts of agri-culture	Anim-als and prod-ucts	Products of mines		Prod-ucts of forests	Manufactures and miscella-neous

No. 449.—PERSONS KILLED AND INJURED IN RAILWAY ACCIDENTS

NOTE.—For various reasons, including the fact that returns were required under different acts, the statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of \$150 or any damage and a resulting casualty. Thereafter they were considered as such when the damage exceeded \$150 with or without a casualty. Where the damage is less than \$150 and there is a reportable casualty it is classified as a train-service accident. Figures for years 1911–1915 include industrial and other nontrain accidents to employees only, and for years 1908–1910 do not cover switching and terminal roads. Otherwise the statement covers all reportable accidents

¹ The ratio of fuel oil to coal is based upon the experience of the various roads; 1 cord of hardwood equals two-thirds ton of coal; 1 cord of softwood equals one-half ton of coal.

² Totals include equivalent of a small amount of miscellaneous fuel.

³ The total charges shown do not include the labor cost of applying the rails or ties.

⁴ Figures do not include data for 1,435 linear feet of steel ties in 1925, and 450 in 1926.

No. 454.—ELECTRIC RAILWAYS: SUMMARY OF OPERATIONS

NOTE.—This table does not include the electric operations of steam railway companies. Many electric railway companies also engage in other operations, especially in the sale of current for light and power; wherever possible, such light and power business has been excluded, but for numerous companies this is impossible. No distinction can be made in the statistics between purely urban street railways and suburban and interurban lines. The insignificant amount of business still conducted by cable and animal traction is included, as well as some operations conducted by primarily electric railways by means of steam traction and gasoline engine cars. In the trackage statistics of this table, each track of a double or multiple line is counted separately.

No. 457.—ELECTRIC RAILWAYS:

NOTE.—See headnote to Table 454. The track mileage represents that actually lying in each State, but conducted in other States. The differences among the States in the relation of passengers carried to interurban as against purely urban traffic. The information obtained in regard to motor-bus operations age represents passenger, express, freight, and mail-car mileage

OPERATING STATISTICS, BY STATES

all other data relate to the total operations of companies domiciled in the State, part of which may be passenger revenue and in other similar ratios are largely due to differences in the relative importance of related only to those lines which formed integral parts of electric-railway companies. No. 458.—ELECTRIC RAILWAYS: MILEAGE AND CARS AND BUSES OPERATED

NOTE.—This table includes mileage and equipment of city interurban, and electrified steam railroads in continental United States. Steam locomotives and cars owned by electric railways and used primarily for steam service are omitted. All data beginning 1924 and data for buses in 1923 are about December; all other data are about July

21.—WATERWAYS, WATER TRAFFIC, AND SHIPPING

Data in this section cover the following areas unless otherwise indicated: From Board of Engineers of the United States Army, and Bureau of Foreign and Domestic Commerce, United States customs area which includes Alaska, Hawaii, and Porto Rico; from United States Shipping Board, continental United States

General note as to units of measurement.—"Cargo tonnage" represents weight of cargo in long tons (2,240 pounds) or short tons (2,000 pounds). All other tonnage figures refer to capacity of vessels. The terms gross and net tonnage refer to space measurement 100 cubic feet being called 1 ton. Gross tonnage is the capacity of the entire space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, storage, passengers or crew, with certain minor exemptions. Net or registered tonnage is what remains after deducting from the gross tonnage the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead-weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety. Displacement tonnage (naval vessels) has reference to weight of the vessel itself with its normal equipment, fuel, etc.

¹ Includes the following, with figures for 1927: Harbor traffic of New York, Philadelphia, and San Francisco (48,105,000 tons); local traffic of other seaports (24,198,000); local traffic of lake ports (5,859,000).

² Excluding Sault Ste. Marie Canal traffic (83,354,000 tons in 1927) and additional Detroit River traffic (13,534,000 tons), both of which are already counted in Great Lakes traffic; also excluding duplications relating to rivers and canals themselves.

³ Not comparable with later years; see note 5.

⁴ Principally coastwise and lake traffic passing through canals and connecting channels, other than the Sault Ste. Marie Canal and the Detroit River.

⁵ Not available; the figures were for the most part deducted from river and canal traffic.

⁶ Estimated from data in this table on the assumption that all the duplications deducted from the grand total represent duplications in domestic traffic; there are, however, some minor cases of duplication connected with foreign traffic.

No. 462.—COMMERCE OF PRINCIPAL UNITED STATES OCEAN PORTS, 1927

NOTE.—In thousands of short tons of 2,000 pounds. In addition to the commerce here shown, many of the ports have (1) commerce with ports on internal rivers and canals; (2) purely local port traffic, including in the case of New York, Philadelphia, and San Francisco, what is called intraport traffic between parts of a harbor for which separate statistics are maintained. These forms of traffic, although the aggregate tonnage is large, are of much less economic importance than foreign and coastwise traffic

¹ Including canal boats and barges. ² Dec. 31.³ The decrease of tonnage arises principally from the registered tonnage having been corrected in 1813, 1829, and 1830 by striking off all vessels the registers of which were granted prior to 1815, which were supposed by the collectors to have been lost at sea, captured, etc.⁴ Sept. 30.⁵ Including Porto Rico in 1910, 1920, 1925 and 1928, and also Virgin Islands in 1920, 1925 and 1928.⁶ Including Hawaii and Alaska. ⁷ Motor vessels included in steam in 1900 and 1910.

¹ Deficit.

² To and including 1921 "Net revenues from business operations" shown in last column are included in "Taxes, licenses, etc.," "Total transit revenues," and "Net revenues from transit operations"; therefore the \$480,725 shown under the latter is the net revenue to June 30, 1921, from all operations. In the adjusted total this item is transferred to "Surplus from business operations" by deducting from the amount shown in this column \$379,862, which is added to "Business expenses," to "Business revenues," and to "Surplus from business operations," to which is also added \$619,585 interest on public works in Panama and Colon received prior to June 30, 1921, but not taken up as a canal revenue.

No. 502.—MERCHANDISE TRADE OF CONTINENTAL UNITED STATES WITH FOREIGN COUNTRIES AND OUTLYING TERRITORIES AND POSSESSIONS

IMPORTANT NOTE.—This table differs as to its geographic basis from all other foreign trade tables in this section and in other publications: (1) In the case of other tables the data represent the trade of the "customs area," which includes continental United States, Alaska, Hawaii, and Porto Rico, but not other outlying possessions. Consequently trade between continental United States and Alaska, Hawaii, and Porto Rico is not covered by the figures, while trade between these three Territories and foreign countries is so included. On the other hand, trade between continental United States (also Alaska, Hawaii, and Porto Rico) and the Philippine and Virgin Islands is covered, being treated as if it were trade with foreign countries. However, neither the trade between continental United States and Guam and American Samoa nor their trade with other countries, is covered. (2) The present table takes continental United States as the basis. In the totals, trade between it and Alaska, Hawaii, and Porto Rico is included while their trade with foreign countries is excluded. Trade of continental United States with Guam and American Samoa is also included. Practically all other nations calculate their foreign trade in the manner followed in the present table; that is, totaling the trade of the home country with foreign countries and with all outlying areas. Prior to 1901 Alaska was our only outlying area. Therefore our foreign trade statistics for 1900 and earlier years very nearly represent the trade of continental United States with foreign countries. Data are for years ended June 30, through 1918; thereafter for years ended Dec. 31

No. 503.—PRODUCTION OF EXPORTABLE GOODS AND PROPORTION EXPORTED

NOTE.—Agricultural production excludes duplications and seeds. Value added to materials by manufacture is used to represent manufacturing. Value of mine products in 1909 and 1919 are census figures while estimates for other years are based on data of the Bureau of Mines. As the figures are not adjusted for price changes the increase or decrease in absolute values from period to period should be disregarded

No. 505.—INDEXES OF CHANGES IN QUANTITY, PRICE, AND VALUE OF IMPORTS AND EXPORTS OF UNITED STATES MERCHANDISE

NOTE.—The purpose of these indexes is to eliminate the effect of price changes upon the total value of trade. They have been constructed by the so-called ideal formula, the essential feature of which is the use as weighting factors of the mean of the values of the several articles during each pair of years compared. For many commodities no quantitative data are available and for others the quantities lack significance because of variation in grades, size, and styles. About 180 commodities were included in the direct calculations for exports and 160 in those for imports, representing somewhat over two-thirds of the total value. It was then assumed that the prices of articles not directly covered had moved in parallel with those of articles covered save only that in making the adjustment the effect of abnormal price movements of heavily weighted commodities was first eliminated. In constructing the indexes, data for 1919 were linked directly to 1913 and each subsequent year was compared with that preceding. The resulting percentages were made into a series by the chain method

No. 515.—IMPORTS ENTERED FOR CONSUMPTION AND DUTIES THEREON

NOTE.—From 1821 to 1865, inclusive, the figures of import values represent total imports less reexports, and for 1870 and later years imports entered for consumption. The ratio prior to 1860 is based upon the values of total imports, since the duties as calculated for those years include the duties afterwards refunded upon reexports. Figures cover fiscal years ended Sept. 30, 1821 to 1840, and June 30, 1850 to 1915; calendar years thereafter

No. 519.—SUPPLEMENT TO TABLES 518 AND 527: FREE AND DUTIABLE GENERAL IMPORTS OF MERCHANDISE ADJUSTED FOR VALUES OF WHEAT AND WOOL CLASSIFIED AS DUTIABLE BUT ENTERED FREE UNDER SPECIAL PROVISIONS, 1922 TO 1928

NOTE.—All figures in thousands of dollars. Since 1922 there is an understatement of the value of free goods in the figures for general imports resulting from the following facts: (1) Wheat imported (practically all coming from Canada) is generally all reported as dutiable when first entered, but most of it is subsequently used for milling-in-bond for export and in that case no duty is collected; (2) carpet wool is nearly all reported as dutiable when first entered but most of it is subsequently used for making carpets in which case no duty is collected. These shifts affect the general total and the totals for the economic classes of crude materials, and crude foodstuffs in Table 518. The following table shows for these classes approximately the proportions free and dutiable since 1922 after adjusting for these shifts. It also shows approximate adjusted figures of free and dutiable imports from Canada (Table 527). The shift of carpet wool from dutiable to free likewise affects somewhat the proportions free and dutiable in imports from countries supplying carpet wool (principally United Kingdom, China, Argentina, Chile, and India), but no adjustments have been made for such countries or for continent totals

No. 522.—SUPPLEMENT TO TABLES 520, 521, AND 523: ADJUSTED FIGURES OF EXPORTS TO CANADA, NORTH AMERICA, NORTHERN NORTH AMERICA, AND EUROPE

NOTE.—Especially since 1920 large quantities of United States grain have been shipped through Canada (mostly via Montreal) to other foreign countries. Since the final destination is customarily not known when shipped, this grain is reported as an export to Canada, but as a matter of fact practically all of it except from five to ten million dollars' worth of corn annually goes thence to Europe. In the following table the reported figures of total value of exports are adjusted on the assumption that all this grain was destined for Europe, an assumption adopted for convenience and involving only a small margin of error. Figures cover fiscal years for 1910-1914; calendar, for all other years

[Millions and tenths of millions of dollars]

No. 527.—FREE AND DUTIABLE GENERAL IMPORTS BY PRINCIPAL COUNTRIES

NOTE.—For the years 1927 and 1928 dutiable imports for consumption from Canada were less and the free imports correspondingly greater than the general imports because of wheat which was originally classified as dutiable but which was later entered free under special provision. For adjusted figures see Table 519. There was a similar difference between imports for consumption and general imports from China caused by a reclassification of carpet wool from dutiable to free and this affects to a smaller degree statistics for Argentina, British India, and other wool exporting countries. See headnote, Table 519

MERCHANDISE BY CONTINENTS, COMMERCIAL REGIONS, AND COUNTRIES

trade by way of other countries, this being usually larger in the case of our exports to them than of our
ance. A specially marked case of indirect trade is that of grain exported through Canada to Europe.

NOTE.—Fiscal years to and including 1915; thereafter, calendar years. All figures except export figures for 1865 and 1870-1878 represent specie values; exports for those years represent mixed gold and currency values and hence do not agree with the specie values given for total exports in other tables. Exports and imports of the interior districts, a small percentage of the total (see Table 531), are not included in this table

1 Period July 1, 1915, to Dec. 31, 1920.

No. 530.—EXPORTS (INCLUDING REEXPORTS) AND GENERAL IMPORTS OF MERCHANDISE, BY PRINCIPAL CUSTOMS DISTRICTS

NOTE.—All figures in thousands of dollars. Fiscal years to and including 1915; thereafter, calendar years. Figures represent specie values except for exports for years 1866 and 1870-1878. Areas of districts were rearranged July 1, 1913. Prior to that date some of the districts were more restricted. However in most cases, this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo include the (former) districts of Buffalo Creek and Niagara; those for Michigan include the (former) districts of Superior, Huron, and Detroit; and those for Massachusetts and Maryland were the former districts of Boston and Baltimore, respectively. No. 537.—EXPORTS OF UNITED STATES MERCHANDISE BY COMMODITY GROUPS AND ARTICLES

NOTE.—Data are for calendar years except for 1910-1914 which are for years ended June 30. Figures for 1910-1914 and 1921-1925 are annual averages. A greater number of items are shown separately beginning about 1912 and 1922 and for this reason many averages for two, three, and four years are shown in the table. However, averages shown for group totals always cover five years. In some cases the detail does not add to the total because of the different periods covered by the averages

No. 538.—GENERAL IMPORTS OF MERCHANDISE BY COMMODITY GROUPS AND ARTICLES

NOTE.—Data are for calendar years except for 1910-1914, which are for years ended June 30. Figures for 1910-1914 and 1921-1925 are annual averages. A greater number of items are shown separately beginning about 1912 and 1922, and for this reason many averages for two, three, and four years are shown in the table. However, averages shown for group totals always cover five years. In some cases the detail does not add to the total because of the different periods covered by the data.

23.—COMMERCE OF NONCONTIGUOUS TERRITORIES

GENERAL NOTE.—In the general foreign-trade statistics of the United States presented in the preceding section, the Philippines and Virgin Islands are treated as foreign countries and their trade with the United States is included while their trade with other countries is not included. On the other hand, Porto Rico, Hawaii, and Alaska are treated as integral parts of the United States, so that trade between them and continental United States is not included, while trade between them and foreign countries is included; each of these three possessions appears as a separate customs district (Table 531). Neither trade of American Samoa and Guam with foreign countries nor shipments between them and United States are included in the general tables on foreign trade. See also Table 502, p. 462.

In the present section the trade of each of these possessions with the United States (including other non-contiguous possessions except the Philippines and Virgin Islands) is shown, and separately its trade with foreign countries (including the Philippines and Virgin Islands).

¹ The discrepancy between the United States figures of exports to the Philippines prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1905, while the United States returns omit only Government supplies carried by Government vessels.

¹ Data are for calendar year (irrigation season), except on Salt River project, where data are for corresponding "agricultural year" October, 1926, to September, 1927.

² Area for which bureau was prepared to supply water.

³ Includes 20,536 acres reported as vacant, 2,414 acres of "home tracts," and 3,548 acres on which no crops were reported.

⁴ 680 acres in the Fort Shaw division, and 8,170 acres in the Greenfields and Big Coulee division cropped without irrigation.

⁵ 19,130 acres cropped without irrigation.

No. 559.—IRRIGATION: SUMMARY FOR THE UNITED STATES, 1910 AND 1920

NOTE.—See general note, p. 599. Tables 559 to 563 relate to systematic irrigation enterprises and do not cover small irrigation work by individual farmers. They are based on reports of the management of the enterprises. An enterprise is defined as "an independent irrigation establishment and includes the works for supplying water and the land for which water is supplied, except that the cost and value of the lands is not included in the capital invested." Statistics cover all States which have irrigation enterprises

No. 564.—IRRIGATION: ACREAGE AND VALUE OF CROPS GROWN ON IRRIGATED LAND, 1919

NOTE.—The data in this table are from schedules of individual farmers and not from the managements of irrigation enterprises, as in the case of Table 563. It is believed that the returns are incomplete, some crops actually grown on irrigated land not having been distinguished as such. In the tabulation for each State crops of which the aggregate area in the State was reported as less than 500 acres were omitted, but these form such a small part of the total as to be negligible

No. 565.—DRAINAGE OF FARM LANDS AND DRAINAGE OF OPERATING ENTERPRISES IN THE UNITED STATES, 1920

NOTE.—The statistics of drainage on farms in the first part of this table and the statistics of drainage enterprises in the second part are from wholly different sources and are not comparable. The former are from schedules of individual farmers and the latter from a special canvass of organized drainage enterprises. The farm may have artificial drainage without being connected with any general enterprise. Conversely, a general enterprise may facilitate the ultimate removal of water from a farm which has itself no artificial drainage. The statements of farmers as to additional land needing drainage are likely to be less precise than those as to area actually drained artificially. Drainage enterprises comprise public corporations and local improvement districts established under State laws relating to drainage, commercial enterprises draining land for sale, other organizations engaged in extensive land drainage work, and tracts of 500 acres or more drained by individual farm owners. The enterprises in some States include considerable areas of timber and other unimproved land not in farms. The canvass of drainage enterprises did not include any of the northeastern States, and no enterprises were found in Alabama, Virginia, or West Virginia

25.—FARMS—GENERAL STATISTICS

[Data in this section relate to continental United States]

No. 569.—POPULATION, FARMS, AND FARM PROPERTY

NOTE.—The schedule for 1925 did not call for "improved land." The combined total for "crop land," 391,459,902 acres, and "plowable pasture land," 113,567,498 acres, aggregating 505,027,400 acres, corresponds in a rough way to the definition of "improved land" at previous censuses. Figures for 1920 and 1925 relate to Jan. 1, for 1910 to Apr. 15, and for earlier years to June 1

¹ Estimated.

² Population residing outside of incorporated places having 2,500 inhabitants or more, or in Massachusetts, Rhode Island, and New Hampshire, outside of towns having 2,500 inhabitants or more.

³ The 1925 farm population includes only persons living on farms; the 1920 figures include also those farm laborers (and their families) who, while not living on farms, lived outside the limits of any incorporated place.

⁴ See headnote.

⁵ These figures include the value of fences, tile drains, and other incidental improvements on the land, excluding only the value of buildings.

26.—FARM PRODUCTS—VALUE, PRICES, AND FOREIGN TRADE

[Data in this section relate to continental United States except foreign trade statistics which represent the trade of the "customs area" (see general note, p. 462)]

No. 597.—ESTIMATED VALUE OF FARM PRODUCTS

NOTE.—Values 1897 to 1908 are based on farm prices Dec. 1 while those for 1909 to date are obtained by multiplying crop and animal production by weighted prices for the crop year. Beginning with 1919, a number of items which previously had not been included in making these estimates were added

No. 619.—FARM PRICES OF ANIMALS AND ANIMAL PRODUCTS

NOTE.—Prices represent weighted averages for the entire country. Annual averages are weighted according to volume marketed each month. Market year ends in July for cattle, October for hogs, May for lambs, June for chickens, and March for eggs. Quotations are as of the 15th of each month. All prices are in cents per pound except for eggs which are in cents per dozen

No. 620.—MEATS: PRODUCTION, EXPORTS, IMPORTS, AND ESTIMATED CONSUMPTION, AND NUMBER OF ANIMALS SLAUGHTERED UNDER FEDERAL INSPECTION

NOTE.—All figures except per capita in millions of pounds. Uninspected slaughter is a rough estimate, based on ratios established at the census of 1909 and revised after the publication of more accurate data from census and other sources. The edible offal (liver, pluck, etc.) is disregarded. Figures of consumption beginning with 1916 include differences between quantities in storage at beginning and end of year

Pulled wool ²	42,500	43,800	46,800	49,600	50,100	51,900	-----

¹ In States where sheep are shorn twice a year this figure covers wool per head of sheep shorn and not weight per fleece.

² Estimated from returns of plants pulling from 80 to 90 per cent of all wool.

No. 638.—ANIMAL FOOD MANUFACTURING INDUSTRIES: MATERIALS USED AND PRODUCTS

NOTE.—Only major materials and products are shown. The figures for products in some cases include and in other cases exclude data for the specified commodities made as secondary products by establishments classified in other industries; and in the cases of certain commodities the data for these secondary products are included beginning in 1925 but not for 1914. No data for establishments having products under \$5,000 in value are included beginning 1925; this change has little effect on comparability with 1914

28.—FARM CROPS AND FOODSTUFFS

[In general, data in this section other than on foreign trade relate to continental United States, while foreign trade statistics represent the trade of the customs area (see general note, p. 462). Any exceptions are noted. For weights of the units of measurement for the principal products see Appendix, p. 850]

No. 639.—INDEX NUMBERS OF THE MASS OF CROP PRODUCTION

NOTE.—Average production of 1910-1914 equals 100. Production of wheat, corn, oats, barley, rye, buckwheat, potatoes, hay, tobacco, and cotton for each crop each year is multiplied by a constant price, and the aggregate is divided by the average aggregate of base years

¹ Cleaned rice for 1800 to 1903 represents commercial movement, as given by Dan Talmage's Sons Co.

² Figures for the years 1810 to 1898 include linters excluded in subsequent years.

³ Counting round as half bales.

⁴ Equivalent 500-pound bales, gross weight.

⁵ Exports.

⁶ Census figures for the previous year.

⁷ Mean annual production not exceeding quantity stated.

⁸ Louisiana only.

¹ Value of crops with production reported in 1924, exclusive of sugar cane.

² A minus sign (-) denotes decrease and a plus sign (+) an increase.

³ Change in value as actually reported, due to change in production and to lower prices.

⁴ Increase or decrease in value on basis of 1919 prices for both 1919 and 1924 crops. The percentages in this section represent the net quantitative increase or decrease in production.

⁵ Decrease of actual 1924 values over values computed for 1924 on basis of 1919 prices.

¹ Value of crops with production reported in 1924.

² Excluding 14,502,932 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.

³ Includes 3,169,149 acres of oats unthreshed and 5,172,326 acres of corn hogged off, not reported separately prior to 1924; excludes a few crops for which acreage is not available.

⁴ Not available.

⁵ Excludes velvet beans, the acreage of which was largely duplicated in the acreage shown for "Hay and forage."

⁶ Includes "velvet beans" only.

⁷ Exclusive of root crops for forage.

⁸ Included in the hay production is an undetermined tonnage of sorghum cut for hay, the acreage being shown separately.

⁹ Includes the value of an undetermined tonnage of sorghum cut for hay, no corresponding value being shown in previous years.

¹⁰ See footnote 11.

¹¹ Including farm gardens in 1899 and 1909, in 1919 vegetables raised for sale only, and in 1924 only 7 vegetables, cabbages, cantaloupes, lettuce, onions, sweet corn, tomatoes, and watermelons, grown for sale. The value of the farm gardens in 1919 (included in the total for crops with no acreage reports) was \$344,666,000.

¹² Figures for Louisiana only.

No. 647.—ESTIMATED VALUE OF 22 CROPS AND OF ALL CROPS: BY STATES

NOTE.—The following tabulation gives the estimated total value of 22 crops—corn, wheat, oats, barley, rye, buckwheat, flaxseed, rice, potatoes, sweet potatoes, all hay, tobacco, lint cotton, beans, broomcorn, grain sorghums, hops, oranges, cloverseed, peanuts, cranberries, and apples, in 1924 to 1928, and the calculated value of all crops in 1924 to 1928, based upon ratio of the 22 crops to all crops in the census year 1919. The slight differences in the total value of crops in the United States between Table 597 and this table are due to different methods of estimating. In this table, where each State is shown separately, a more detailed method is used than is practicable in Table 597.

¹ Farm values as of Dec. 1.² Value 1922 to 1927 based on season's average price; for 1928, on season's average to Jan. 31, 1929.³ Price for season.⁴ Figures cover California (crop beginning Nov. 1 of year specified in stub) and Florida (crop year beginning Sept. 1), data including tangerines. Florida figures for 1919, 1920, and 1921 represent commercial shipments.⁵ Of approximately 100 pounds.

No. 668.—SUGAR BEETS AND BEET SUGAR: PRODUCTION

NOTE.—Prior to 1924 acreage and production of beets are accredited to State in which made into sugar and include a small quantity produced in Canada for United States factories. "Per cent of sucrose in beets" is based on analysis; "Per cent extracted" is per cent of total weight of beets actually recovered by factories. Tons are 2,000 pounds

¹ 1 gallon of sirup taken as equivalent to 8 pounds of sugar.² Totals cover the 9 States listed, except that for 1920 to 1923 Connecticut, which produced only a negligible quantity of sugar and sirup, and prior to 1927 Indiana, are included. The 11 States included for 1920 to 1923 produced 97.1 per cent of the maple sugar and 97.2 per cent of the maple sirup made in the United States in 1919, and had 98.1 per cent of the trees tapped as reported by the Bureau of the Census.³ Preliminary.

No. 674.—COTTON: PRODUCTION, CONSUMPTION, EXPORTS, IMPORTS, AND PRICES

NOTE.—All quantities in thousands of bales, reduced to equivalent of 500 pounds, gross weight. Production statistics relate to the growth year indicated in the stub. Other statistics for the most part relate to the 12-month period roughly corresponding to the marketing of the crop; there have been minor variations from time to time in the periods covered. An exception appears in the price statistics from 1902 to 1909 which represent marketings of the preceding crop up to Mar. 31. Prices for 1902 to 1909 represent the average grade at New Orleans. Prices from 1910 to date represent average price on the farm of all lint cotton throughout the country. Production, consumption, and exports include linters

No. 687.—GRAIN RECEIVED AT SIX ATLANTIC PORTS

NOTE.—Data are for calendar years. Total receipts by ports include flour, meal, and malt reduced to grain equivalent. Receipts at New York, Boston, Philadelphia, and Baltimore include shipments from the West to foreign countries through these ports on through bills of lading. Receipts at Baltimore include flour ground by city millers, and therefore duplicate an equivalent quantity of wheat received in grain

No. 702.—LUMBER: COMPOSITE PRICES

NOTE.—The prices represent a combined weighted average for the respective species of lumber, based on quotations on various grades for each species, and the species weighted according to annual production. The softwood index is based upon seven species: Yellow pine, Douglas fir, North Carolina pine, white pine, hemlock, spruce, and cypress. The hardwood index is based upon 13 species: Maple, birch, beech, basswood, elm, oak, gum, ash, cottonwood, chestnut, poplar, hickory, and walnut

¹ Operators, not enterprises, in 1909.² The totals for all industries include, besides those specified, statistics for the chromite industry in 1919 and for the borax, chromite, grindstone, marl, monazite and zircon, peat, and precious stones industries in 1909, for which comparable figures could not be given. The value of products of these industries did not exceed one-tenth of 1 per cent of the total for all industries in either year.³ Figures not available.

¹ Operators, not enterprises, in 1909.² The total for the United States includes, besides the States specified, statistics for the District of Columbia for which no statistics were reported for 1909.³ Exclusive of duplication, 307 operators having reported in two or more States.⁴ For 1909 statistics are for Louisiana only; nothing reported for Mississippi.

No. 728.—MINERAL PRODUCTS OF THE UNITED STATES: QUANTITIES AND VALUES

NOTE.—Data cover continental United States and, for leading products, outlying areas. Certain of the figures represent shipments rather than quantity mined, and some of the figures for 1928 are estimates. Blank spaces indicate absence of data in most cases; method of computing total value is indicated by footnotes. Short tons are 2,000 pounds; long tons, 2,240 pounds

¹ From both domestic and foreign ores.² Content of antimonial lead. Value excluded from metallic total as the value of the antimony is included in the antimonial lead value. Value for antimony other than that in antimonial lead is included in metallic total. Bureau of Mines not at liberty to publish figures.³ Product from domestic ores only.⁴ Included under "Pig iron."⁵ Value not included in total value, since value of product derived therefrom, or of raw material used, is accounted for under other items.⁶ Including ore used for fluxing.⁷ Figures not available. Value of products derived therefrom, or raw materials used, is included elsewhere.⁸ Value included in total value of metallic products. Bureau of Mines not at liberty to publish figures.⁹ Figures obtained through cooperation with Bureau of the Census.¹⁰ Figures not yet available. Estimate of value included in total value of nonmetallic products.¹¹ Includes brown coal and lignite and anthracite mined elsewhere than in Pennsylvania.¹² Tripoli only. Value of diatomite is included in total value of nonmetallic products. Bureau of Mines not at liberty to publish figures.¹³ No canvass. Estimate of value included in total value of nonmetallic products.¹⁴ Canvass discontinued after 1915. Value of iron ore sold for paint included under "Unspecified."¹⁵ Sublimed blue lead, sublimed white lead, leaded zinc oxide, and zinc oxide.¹⁶ In 1915 includes 69,189 tons and in 1920, 23,728 tons of stronger acid, not converted to 60° Baumé.¹⁷ Talc only. Value of soapstone is included in value of nonmetallic products. Bureau of Mines not at liberty to publish figures.

No. 729.—MINERAL PRODUCTION, BY STATES

NOTE.—Iron ore, not pig iron, is taken as the basis of valuation of iron and in the case of other metals, mine production (recoverable content of metals) is the basis. For principal mineral products of each State see Table 730

No. 730.—PRINCIPAL MINERAL PRODUCTS OF EACH STATE, IN ORDER OF VALUE IN 1927

New England:

Maine—Stone, lime, clay products, slate.
 New Hampshire—Stone, clay products, sand and gravel, feldspar.
 Vermont—Stone, slate, lime, talc.
 Massachusetts—Stone, clay products, sand and gravel, lime.
 Rhode Island—Stone, sand and gravel, clay products, lime.
 Connecticut—Stone, clay products, lime, sand and gravel.

Middle Atlantic:

New York—Clay products, stone, cement, gypsum.
 New Jersey—Clay products, zinc, cement, stone.
 Pennsylvania—Coal, cement, clay products, natural gas.

East North Central:

Ohio—Clay products, coal, natural gas, stone.
 Indiana—Coal, stone, cement, clay products.
 Illinois—Coal, clay products, petroleum, cement.
 Michigan—Iron ore, copper, cement, sand and gravel.
 Wisconsin—Stone, zinc, sand and gravel, iron ore.

West North Central:

Minnesota—Iron ore, stone, cement, clay products.
 Iowa—Coal, cement, gypsum, clay products.
 Missouri—Lead, clay products, cement, coal.
 North Dakota—Coal, sand and gravel, clay products.
 South Dakota—Gold, cement, stone, sand and gravel.
 Nebraska—Sand and gravel, cement, clay products, stone.
 Kansas—Petroleum, zinc, natural gas, cement.

South Atlantic:

Delaware—Clay products, stone, sand and gravel.
 Maryland—Coal, clay products, cement, sand and gravel.
 District of Columbia—Sand and gravel, clay products, sand-lime brick, stone.

South Atlantic—Continued.

Virginia—Coal, cement, clay products, stone.
 West Virginia—Coal, natural gas, petroleum, clay products.
 North Carolina—Stone, clay products, sand and gravel, copper.
 South Carolina—Stone, clay products, sand and gravel, barite.
 Georgia—Stone, clay products, cement, fuller's earth.
 Florida—Phosphate rock, stone, fuller's earth, sand and gravel.

East South Central:

Kentucky—Coal, petroleum, clay products, natural gas.
 Tennessee—Coal, cement, stone, clay products.
 Alabama—Coal, iron ore, cement, clay products.
 Mississippi—Sand and gravel, clay products, natural gas, stone.

West South Central:

Arkansas—Petroleum, coal, natural gas.
 Louisiana—Petroleum, natural gas, salt.
 Oklahoma—Petroleum, natural gas, zinc.
 Texas—Petroleum, natural gas, sulphur.

Mountain:

Montana—Copper, zinc, petroleum, coal.
 Idaho—Lead, silver, zinc, stone.
 Wyoming—Petroleum, coal, natural gas.
 Colorado—Coal, gold, zinc, lead.
 New Mexico—Copper, coal, zinc, petroleum.
 Arizona—Copper, gold, silver, lead.
 Utah—Copper, lead, coal, silver.
 Nevada—Copper, gold, silver, gypsum.

Pacific:

Washington—Coal, cement, clay products, sand and gravel.
 Oregon—Cement, stone, sand and gravel, clay products.
 California—Petroleum, natural gas, cement.
 Alaska—Copper, gold, coal, silver.

No. 738.—PRODUCTS OF STEEL WORKS AND ROLLING MILLS AND OF THE WIRE, TIN-PLATE, AND CAST-IRON PIPE INDUSTRIES

NOTE.—The overlapping of the industries shown in this table results in considerable duplication in tonnages shown. The products chiefly used further in manufacture are wire rods, plates and sheets, black plates for tinning, and skelp. The figures given under "Wire" and "Tin and terneplate" include data for products of these departments of steel works and rolling mills and of all other industries producing these commodities. The original census tables contain much fuller detail as to the disposition of semifinished products

No. 745.—COPPER: PRODUCTION, EXPORTS, IMPORTS, AND CONSUMPTION

NOTE.—All quantities except ore produced in millions and tenths of millions of pounds. Production figures include continental United States and Alaska. Owing to the varying stages of production, the stocks in different classes of hands, the redistribution of copper previously purchased, the recovery and use of old copper, etc., calculations of consumption are somewhat uncertain. The American Bureau of Metal Statistics presents consumption estimates rather widely different from those given below. Consumption as shown represents the quantity of copper withdrawn on domestic account, but not actual domestic consumption, as no account is taken of consumers' stocks

No. 747.—COPPER: SMELTER AND REFINERY OUTPUT

NOTE.—Smelter output as here given represents the production of unrefined copper from domestic (including Alaskan) ores. Some copper ore is imported and smelted in this country, but this appears only in the figures of refined copper from imported material in Table 745

No. 748.—EXPORTS AND IMPORTS OF COPPER

NOTE.—Exports are those classed as "domestic" in the foreign trade statistics but include copper smelted or refined in the United States from imported ore or unrefined metal. Values include all forms of copper. Quantities represent all copper except the small item, "other manufactures." Copper content of exports of ore for years 1891-1915 and of imports for years 1894-1903 was estimated.

No. 749.—REFINED PRIMARY LEAD AND SECONDARY LEAD

NOTE.—Production in short tons (2,000 pounds); values except price per pound in thousands of dollars. This table, except the column for secondary lead, relates to new (primary) lead only; the totals include lead derived from both domestic (including Alaska) and foreign ore. General production figures and production of desilverized lead do not include antimonial lead, shown in next to the last column. This table represents exclusively refined lead, while in Table 750 part of the lead from domestic ore is unrefined.

No. 757.—SILVER: PRICE, AND VALUE OF SILVER IN THE DOLLAR

NOTE.—The London price is converted to the basis of the ounce 1,000 fine and converted to American money throughout at par of exchange, notwithstanding the fact that from 1918 to 1924, inclusive, the pound sterling was depreciated as compared to the dollar. During this period of depreciation the commercial ratio and the value of the silver (371¼ grains) in the dollar are computed on the basis of the New York average price; for other years they are computed on the basis of the London quotations, which were at all times close to the New York quotations.

No. 758.—COAL PRODUCTION: QUANTITY AND VALUE

NOTE.—Quantities in thousands of short tons (2,000 pounds); values in thousands of dollars. Includes coal consumed at mines. Figures for anthracite relate to Pennsylvania output only; those for bituminous relate to continental United States and Alaska. Bituminous coal includes brown coal and small amounts of anthracite outside of Pennsylvania. Comparatively little coal is held in stock at the mines

¹ Of 2,000 pounds.

² Item (b) includes coal used by mine employees and sold for domestic purposes in the vicinity of the mine. It also includes an unknown amount taken by locomotive tenders at the tippie or sold to a near-by factory or power plant. It therefore involves an unknown amount of overlapping with items (c), (h), and (i). Double counting in the total is avoided by an adjustment in item (j), which is obtained by subtracting the sum of all other items from the known total.

³ Figures include all coal used except that charged in coke ovens.

⁴ Includes coal for gas making only. Excludes coal charged in by-product coke ovens operated by city gas companies, which is included under item (e).

⁵ Includes electric central stations and street railways. Data not available for 1889.

⁶ Excludes coal consumed in coke ovens, iron and steel works, and for gas making at coal and water-gas plants; includes consumption of railroad-car shops.

⁷ Includes heating of large buildings other than factories, and also some nondomestic uses not covered elsewhere. Obtained by subtraction; see item (b) and note 2. Because of this it is affected by any errors in the other items, and there is evidence that the figure for 1919 (84.5 million tons) is too high and the figure for 1923 (83.9 million tons) too low.

No. 770.—RETAIL PRICES OF GAS IN PRINCIPAL CITIES

NOTE.—Prices are net per 1,000 cubic feet of gas for household use. Prices for manufactured gas are based on a family consumption of 3,000 cubic feet per month. In cities where a service charge or a sliding scale is in operation families using less than 3,000 cubic feet per month pay a somewhat higher rate than shown, while those consuming more than this amount pay a lower rate. The figures represent quite closely the actual monthly cost of gas per 1,000 cubic feet to the average wage-earner's family. Prices for natural gas and for manufactured and natural mixed gas are based on a family consumption of 5,000 cubic feet per month

No. 771.—NATURAL GAS AND NATURAL GASOLINE

NOTE.—Quantities of gas in millions of cubic feet, of gasoline in thousands of gallons; values in thousands of dollars. Production figures for gas refer only to that marketed, in addition to which considerable quantities are used by producers, and large quantities are wasted or lost. Values given are at the point of consumption. Consumption figures by States differ greatly from production figures by reason of interstate transportation

No. 779.—PETROLEUM PRODUCTS: OILS RUN TO STILLs, OUTPUT OF REFINERIES, STOCKS, EXPORTS, AND APPARENT CONSUMPTION OF PRODUCTS

NOTE.—Stocks are those in the hands of refiners only. Hence "apparent consumption" represents deliveries by refiners to dealers and consumers. Exports include shipments to noncontiguous territories. Consumption figures for kerosene, gas oil and fuel oil, and lubricating oil for 1922 to 1928 take into account comparatively small imports not shown separately, and for which no data were available prior to October, 1922. In 1928 these imports were as follows: Kerosene, 204,000 barrels; gas and fuel oil, 7,268,000 barrels; lubricants, 13,000 barrels

[In thousands of barrels of 42 gallons, except wax (thousand pounds), and coke and asphalt (thousand short tons of 2,000 pounds)]

No. 782.—PETROLEUM: PRICES OF CRUDE AND REFINED PRODUCTS

NOTE.—Prices of crude and fuel oil in dollars per barrel of 42 gallons, others in cents per gallon. Compiled by Joseph C. Pogue. The weighted average prices are computed from five principal grades of crude oil at wells, from five markets each for kerosene and gasoline from tank wagon, from five refining locations for fuel oil, and for five grades of lubricating oil

32.—MANUFACTURES

[Data in this section relate to continental United States. For additional statistics regarding food manufacturing industries and mineral manufacturing industries see sections on Farm Animals and Animal Products, Farm Crops and Foodstuffs, and Mining and Mineral Products].

GENERAL NOTE.—Prior to 1899 census statistics of manufactures were collected decennially and from then to 1919 every five years. Beginning with 1921 data are being collected every two years. For the census of 1899 and previous censuses data were collected for both factories and hand and neighborhood industries. For the census years 1904 to 1919, inclusive, factories having products valued at \$500 or more were included, but the statistics beginning 1921 (except as to certain major items shown for that year in Table 794 only), relate only to establishments having products valued at \$5,000 or more. However, in 1921, establishments having products valued at \$500 or more but less than \$5,000, while constituting 21 per cent of the total number of establishments, employed only six-tenths of 1 per cent of the total number of wage earners, and had an output of only three-tenths of 1 per cent of the total value of the product.

The statistics for automobile repairing, collected for 1914 and 1919, have been excluded from Tables 793 and 795 to 797. Other adjustments in previously published figures in the third section of Table 793 and in Tables 795 to 797 have been made as follows: (1) Data for "Coffee and spice, roasting and grinding," have been added, except for 1925, for which year such data were not tabulated; (2) data for "Poultry killing and dressing" have been deducted, as no data were collected for this industry for 1927. Also in Table 793 the figures for salaried employees and salaries for 1923 and 1925 have been adjusted by deducting the number of salaried employees and salaries for central administrative office employees. Data in regard to salaried employees of central administrative offices were not collected for 1927. These data for 1914, 1919, and 1921 are not available, and therefore no change was made for these years.

Figures for wages, cost of materials, and value of products are greatly affected by changes in the buying power of money or, in other words, by the general levels of prices and wages. Figures of total cost of materials and total value of products for many individual industries, for all groups of industries, and especially for all industries combined, involve much duplication. This is due to the use of products of a given establishment as material for another in the same or a different industry.

¹ No comparable data.

² Not called for on schedule.

³ Data approximately the same as given for factories and hand and neighborhood industries, as the amount of horsepower used in the latter is small.

⁴ Includes data for "Poultry killing and dressing" industry.

⁵ Includes data for all establishments reporting products valued at \$500 or more. These items were not tabulated separately for establishments reporting products valued between \$500 and \$5,000.

¹ To make the percentages for the numbers of establishments comparable, those for all 5 years have been based on the numbers of establishments reporting products valued at \$5,000 or more. The percentages for wage earners and value of products, however, have not been similarly adjusted, the comparability of these percentages having been affected very slightly by the omission of small establishments in 1923 and 1925.

² No data for establishments with products under \$5,000 in value have been tabulated for 1923 and 1925.

³ The data for the 53,999 establishments in the "Less than \$5,000" class are not included in other tables.

⁴ Data for \$500,000 to \$1,000,000 class and \$100,000 to \$500,000 class combined.

No. 796.—SUMMARY BY 16 GENERAL GROUPS OF INDUSTRIES

NOTE.—See general note, p. 785. Due to a change in the classification of a number of the industries the figures for the majority of the groups differ from those previously published. The figures for 1899 are estimated in part, but are believed to be fairly comparable with those for later years

¹ Not called for on schedule.

² Data not compiled for 199 by groups.

³ Data for 1899 included with group 5.

⁴ Includes data for group 4.

⁵ The fact that the increase in the "Chemicals and allied products" group is less than in most others is due to the decline in the production of alcoholic liquors which are included. For figures excluding alcoholic liquors see p. 798.

⁶ Includes data for group 7.

⁷ Data for 1899 included with group 6.

No. 797.—MANUFACTURES: SUMMARY FOR INDIVIDUAL INDUSTRIES

NOTE.—The figures given in this table do not represent exactly the numbers of wage earners, values of products, etc., assignable to the classes of commodities from which the industries derive their names, as it is necessary for census purposes to classify each establishment as a whole in some one industry, according to the character of its principal product, although in many cases a single establishment manufactures two or more classes of commodities. The figures for cost of materials and value of products for each group and each subgroup include considerable duplication due to the use of the products of one industry as the materials for another, and in some cases similar duplication occurs within an industry. As to comparability of figures see general note, page 785. No data for horsepower were collected for 1921. Horsepower figures for 1919 and 1914 in certain industries differ from those in certain previous reports because of exclusion here and inclusion in the previous reports of data for purchased power other than electric. For totals for all industries and for 16 great groups see Table 796. Five census years have been shown for all industries that reported \$200,000,000 or more in value of products or over 50,000 wage earners in 1927. For other industries 1914, 1925, and 1927 have been shown except as indicated by footnotes

	1914	82	6,486	4,720	64,062	76,504	12,442	11,900

¹ Because of a change in classification of some industries in this group for 1927 the figures for previous years have been revised to preserve comparability.

² No data were compiled for 1925 except for San Francisco, Calif.

³ "Feeds, prepared, for animals and fowls," prior to 1927 was treated as a subclassification under "Food preparations, not elsewhere classified." Because of the transfer to this industry for 1927 of a certain class of establishments formerly classified under "Flour and other grain-mill products" the figures for earlier years are not comparable with those for 1927.

⁴ "Lard substitutes and cooking fats" was treated as a subclassification under "Food preparations, not elsewhere classified," prior to 1927. The figures for 1927 are not comparable with those for earlier years because of transfer for 1927 to this industry classification of data for those establishments manufacturing, primarily, vegetable cooking oils, which data were to a large extent formerly included in those for "Oils, not elsewhere classified."

⁵ For censuses prior to 1927 this industry was treated as a subclassification under "Food preparations, not elsewhere classified," but for 1927 it was treated as a separate industry.

⁶ For censuses prior to 1927 this industry covered the manufacture of cereal preparations; prepared feeds for animals and fowls; lard substitutes; macaroni, spaghetti, etc.; and the treating of nuts (except peanuts). For 1927 separate industry classifications designate establishments engaged primarily in these activities, and accordingly the figures for prior years for the "Food preparations, not elsewhere classified," industry have been revised.

⁷ For 1927 included in "Peanuts, walnuts, and other nuts, processed."

⁸ Prior to 1927 part of the establishments now in this industry were classified in the "Food preparations, not elsewhere classified," industry and part in the "Peanuts, grading, roasting, cleaning, and shelling" industry, which has been abandoned.

⁹ For 1914 reported as "Mineral and soda waters."

¹⁰ The manufacture of asbestos textiles prior to 1925 treated as an industry in this group is now classified as a branch of the "Asbestos products, other than steam packing or pipe and boiler covering" industry, p. 802, therefore data have been excluded from statistics for textile-mill products for 1923 and earlier years.

¹¹ Because of a change in classification no comparable statistics can be given for prior years.

¹² The industry classification "Clothing, men's, youths', and boys', not elsewhere classified," for 1923, 1921, and 1914 included men's work clothing, except shirts. For 1927 and 1925 statistics for this class of wearing apparel have been shown separately as "Clothing, work (except shirts), men's."

¹³ "Gloves and mittens, cloth" treated as a part of the "Furnishing goods, men's" industry for 1914; statistics for 1914 for the latter industry are therefore not strictly comparable with those for later years.

¹⁴ "Handkerchiefs" and "Trimmings" were first treated as separate industries at the census for 1927. For prior censuses data for "Handkerchiefs" were included in part in "Furnishing goods, men's," and in part in "Millinery and lace goods," and data for "Trimmings" were included in "Millinery and lace goods."

¹⁵ Included in the classification "Millinery and lace goods," which was abandoned at the census for 1927. No comparable figures can be given for earlier years.

¹⁶ "Asphalted felt-base-floor coverings" included in "Linoleum" for 1914. Figures for "Linoleum" for 1914 are therefore not comparable with those for later years.

¹⁷ Includes "Oakum" for 1914.

¹⁸ Includes data for "Hammocks," heretofore treated as a separate industry.

¹⁹ Classified in other industries for 1927 and 1925.

²⁰ No separate statistics prior to 1927.

²¹ Combined total for paper and pulp.

²² Not reported separately; included with paper.

²³ See footnote 24.

²⁴ "Rayon" included in "Chemicals, not elsewhere classified," for 1923 and prior years; compressed and liquefied gases included prior to 1927.

²⁵ The figures for 1925 differ from those previously published because of a change in the classification in 1927 of establishments manufacturing rubber cement as their principal product from this group to the "Rubber goods, other than tires, inner tubes, and boots and shoes" industry, in the "Rubber manufactures" group. The figures for 1914 have not been revised and therefore are not strictly comparable with later years.

²⁶ Includes distilled liquors in 1914.

²⁷ At the 1921 and 1919 censuses the malt-liquor industry was confined to cereal beverages (near beer and similar soft drinks) and in 1923 and later years these were included under "Beverages." (See p. 792.)

²⁸ Included in "Rubber goods, other than tires, inner tubes, and boots and shoes" prior to 1921.

²⁹ Includes for all years "Belting and hose, rubber" formerly treated as a separate industry. For 1914 also includes, "Rubber tires and inner tubes."

³⁰ The figures for 1925 have been revised due to a counterbalance change in "Leather: Tanned, curried, and finished" and "Boot and shoe cut stock."

³¹ The figures for 1925 and 1923 have been revised due to a change in the industries making up this subclass.

³² The figures for 1927 and 1925 are not comparable with those for 1914 because of the inclusion in the earlier year of statistics for certain establishments manufacturing gloves of cloth and leather combined; for later years this class of establishments was included in the cloth-glove industry.

³³ Includes asbestos textiles, prior to 1925 classified as a separate industry.

³⁴ For 1914 "Millstones" are included in "All other industries," p. 813.

³⁵ Former title "Brick and tile, terra cotta, and fire-clay products."

³⁶ Included with "Steelworks and rolling mills."

³⁷ Similar products are manufactured to a large extent by steelworks and rolling mills. The figures here given refer only to establishments engaged primarily in the manufacture of the specified classes of products.

³⁸ Included in "Foundry and machine-shop products" for 1914. (See p. 808.)

³⁹ Data for establishments engaged in job welding are included in the figures for 1923 but are not included for 1927 and 1925, as job-welding establishments were not canvassed for those years.

⁴⁰ "Tin plate and terneplate" are treated as products of the "Iron and steel, steel works and rolling mills" industry.

⁴¹ Classified in other industries subsequent to 1923.

⁴² Figures for 1927 and 1925 include data for bells, shown as a separate industry under "Manufactures of metals" in previous years.

⁴³ No establishments were classified in this industry at the censuses for 1927, 1925, or 1914.

⁴⁴ Abandoned as a separate industry classification; statistics for 1927 and 1925 included with those for "Brass, bronze, and other nonferrous alloys, and manufactures of these alloys and of copper, not elsewhere classified."

⁴⁵ Refrigerators, mechanical, for censuses prior to 1927 included in "Electrical machinery, apparatus, and supplies" and "Foundry and machine-shop products."

⁴⁶ "Foundry and machine-shop products, not elsewhere classified," include for 1914: "Iron and steel, processed," "Machine tools," "Steel barrels, kegs, and drums," and "Textile machinery and parts," data for which were not specifically called for at that census. (See also footnote 45.)

⁴⁷ Not classified separately prior to 1919. Included in "Foundry and machine-shop products."

⁴⁸ For censuses prior to 1925 not separately classified; included in "Foundry and machine-shop products."

⁴⁹ Data for establishments engaged solely in repair work are included for 1921 and 1914 but not for 1927, 1925, and 1923. The differences between the figures for 1923, 1921, and 1914 and those published in previous reports are due to the inclusion here and the exclusion from the previous reports of data for wheelbarrows.

⁵⁰ The figures for 1919 do not cover the entire industry and are not, therefore, comparable with those for later years.

⁵¹ At the censuses for 1927 and 1925 it was possible to present statistics for every industry covered by the census classifications; but for the preceding census years it was necessary to combine the figures for certain unimportant industries in order to avoid disclosing operations of individual establishments.

**No. 798.—SUMMARY FOR ALL MANUFACTURING INDUSTRIES COMBINED:
By GEOGRAPHIC DIVISIONS AND STATES**

NOTE.—Data for "Coffee and spice roasting and grinding" (not tabulated for 1925) are included in the figures for 1914, 1921, 1923, and 1927. Data for "automobile repairing" (not collected since 1919) and for "Poultry killing and dressing" (not collected for 1927) are included in the division and State figures for 1914, but are excluded from the totals for that year and from all figures for later years. No data for establishments with products valued at less than \$5,000 are included in the statistics for 1921 to 1927; for 1914, such data have been excluded from the United States totals except for wages and horsepower but are included in the United States totals for these items and in all division and State figures. Statistics for horsepower were not collected for 1921

No. 802.—TEXTILE MANUFACTURES: PRODUCTION

NOTE.—In general, most of the articles listed are finished products, but large quantities of partly finished products, especially yarn, made for sale to other establishments of the same or other branches of the textile industry are included. This involves considerable duplication in total value of products and in cost of material. The products listed under each branch of the textile industry represent only the output of concerns classified as engaged primarily in that branch. Certain quantities, usually small, of some of the products are also made in establishments classed under other branches. In 1927, these amounts were as follows: Cotton goods, \$10,262,230 (not including cordage and twine mills); cotton-lace goods, \$695,816; other knit goods, \$729,959; silk goods, \$7,131,055; woolen and worsted goods, \$14,145,016 felt goods, \$997,972; wool-felt hats, \$646,154; carpets and rugs, \$71,951; cordage and twine and jute and linen goods, \$12,572,428; fur-felt hats, \$862,462; oilcloth, \$1,261,824; artificial leather, \$621,924

No. 803.—CHEMICALS: PRODUCTS MADE FOR SALE

NOTE.—The table includes products made in all industries, sometimes as by-products. In addition to quantities shown in the table, made for sale, large quantities of certain chemicals, especially acids, are made and consumed in further processes in the same establishment. There is considerable duplication in the total value of products due to the use of products sold by one establishment as materials for other establishments manufacturing chemicals. Tons are of 2,000 pounds

No. 805.—MISCELLANEOUS INDUSTRIES INVOLVING CHEMICAL PROCESSES: CENSUS STATISTICS OF PRODUCTS

NOTE.—Only major products of a fairly sharply defined character, and in general only those for which quantitative data are available are shown. See also chemicals (Table 803), petroleum refining (Table 778), manufactured gas (Table 767), etc. Semifinished products made for consumption in the same establishment are not included, except where otherwise stated, but there is some duplication in total value of products in certain branches, due to the use of such products as materials by other establishments in the same industry. Data include, except where otherwise stated, not only products of the major industry specified but also similar products made in other industries. Tons are of 2,000 pounds

No. 811.—MACHINERY: VALUE OF THE PRINCIPAL CLASSES MANUFACTURED

NOTE.—Values in thousands of dollars. The various classes of machinery listed are products of a number of industries, such as "foundry and machine-shop products," "agricultural implements," "aircraft," "cash registers and calculating machines," "dairymen's, poultrymen's, and apiarists' supplies," "electrical machinery, apparatus, and supplies," etc. This table is not an industry presentation, but a special presentation giving value of products for groups designated. The values are in part duplicated in other tables in this abstract, such as Tables 810, 812, 813, and 814

No. 817.—COTTON SPINDLES, COTTON CONSUMPTION, AND STOCKS

NOTE.—The statistics for 1915 to 1928 relate to the 12 months ended July 31 and those for prior years to the 12 months ended Aug. 31. South refers to cotton growing States. Consumption is expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton in all years are in equivalent 500-pound bales. The number of active spindles represents spindles operated for any time, however short, during the year, and is therefore an unsatisfactory measure of activity of the industry

No. 818.—COTTON SPINDLE HOURS AND COTTON CONSUMPTION

NOTE.—Per cent of capacity represents ratio between (1) the actual number of spindle hours including overtime, double shifts, and part time, and (2) the total number of spindles in place multiplied by the number of hours per month in a single shift at normal full working time. Consumption includes both domestic and foreign cotton

No. 824.—LEAF TOBACCO: AMOUNTS CONSUMED IN THE MANUFACTURE OF CIGARS, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF

NOTE.—All figures in thousands of pounds. Figures are unstemmed equivalent of all tobacco, stemmed, unstemmed, and scrap. Beginning with 1922 the Commissioner of Internal Revenue converted stemmed tobacco used in the manufacture of cigars and cigarettes to unstemmed at the ratio of 3 pounds stemmed to 4 pounds unstemmed. In previous years conversion was at the ratio of 3 to 5. In the following table figures are given on the new basis beginning 1918. On the old basis the quantity used for cigars in 1918 was calculated at 162,277,000 pounds and that for cigarettes at 177,379,000 pounds

No. 827.—BUILDING PERMITS ISSUED IN PRINCIPAL CITIES

NOTE.—Figures cover new buildings and repairs to old buildings, but exclude data for installation permits (those for installing boilers, signs, etc.) which are not strictly building operations. These permits are rather numerous, but in value they are of small amount. The number figures represent the number of buildings covered by permits issued (new construction and repairs, etc.) rather than the number of permits. The cities shown include all cities having a population of 50,000 or over in 1920 and some cities having a population of 25,000 or over. The estimated cost of buildings authorized in 257 identical cities since 1921 is as follows: 1921, \$1,573,000,000; 1922, \$2,489,000,000; 1923, \$3,072,000,000; 1924, \$3,208,000,000; 1925, \$3,805,000,000; 1926, \$3,587,000,000; 1927, \$3,138,000,000; 1928, \$2,995,000,000. Buildings authorized by permit are not always actually constructed, and the actual cost of those constructed may differ considerably from that originally estimated.

No. 830.—CONSTRUCTION CONTRACTS AWARDED

NOTE.—Data compiled from reports covering contracts awarded in small towns and rural districts as well as large cities. Certain public works (roads, etc.) not in the nature of buildings have no floor space reported. The total value of contracts awarded for the 25 States for years prior to 1915 were as follows: 1910, \$805,700,000; 1911, \$777,456,000; 1912, \$868,103,000; 1913, \$857,700,000; 1914, \$720,240,000

¹ Prior to May, 1921, these figures covered the 25 States north and east of, and including, North Dakota, South Dakota, Iowa, Missouri, Tennessee, and Virginia, together with portions of eastern Kansas and Nebraska, and the District of Columbia. Beginning May, 1921, North Carolina and South Carolina were added to the list, but this addition is stated to have little effect upon the total.

² No data available prior to 1919.

³ Estimates made by the F. W. Dodge Corporation.

⁴ Data not reported separately prior to 1919, but included with "All other."

⁵ Figures for the 37 States include all except the 11 States in the Mountain and Pacific divisions.

APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:

	Weight of United States gallon		Weight of barrel of 42 gallons
