LETTER OF SUBMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF FOREIGN AND DOMESTIC COMMERCE,
Washington, November 13, 1937.

SIR: I have the honor to submit herewith for publication the fifty-ninth issue of the Statistical Abstract of the United States. This annual volume is a summary of authoritative statistics showing the trends in trade and industry as well as social progress and is a convenient reference work for business men, economists, statisticians, and students.

The present volume has been prepared in the Division of Economic Research under the editorship of Martha Hunter and the administrative direction of Roy G. Blakey, former chief of the division, and M. Joseph Meehan, assistant chief of the division. The volume represents a digest of data collected by all statistical agencies of the National Government, as well as those of a considerable number of private agencies and several States. Many of these offices and agencies have been of great assistance in furnishing advance data and also in the actual preparation of the tables used in the Abstract. Special mention in this connection is due the following offices of the Federal Government: The Bureau of the Census and the Bureau of Fisheries of the Department of Commerce; the Bureau of Agricultural Economics and the Weather Bureau of the Department of Agriculture; the Immigration and Naturalization Service and the Bureau of Labor Statistics of the Department of Labor; the Office of Education, the General Land Office, and the Bureau of Mines of the Department of the Interior; the Statistical Section of the Income Tax Unit of the Treasury Department; the Veterans' Administration; the Interstate Commerce Commission; the Board of Governors of the Federal Reserve System; the Farm Credit Administration; and the Social Security Board.

Current data for many of the statistical series carried in the Statistical Abstract are published monthly in the Survey of Current Business, another publication of this Bureau.

Respectfully,

ALEXANDER V. DYE,
Director.

TO HON. DANIEL C. ROPER,
Secretary of Commerce.

[1] Based on land area.

[2] In comparing this percentage of increase with that shown for the decade 1910–1920, allowance should be made for the fact that the period between the censuses of 1910 and 1920 was less than a full decade, and that between the 1920 and 1930 censuses was more than a full decade. An increase of 16.1 per cent for 123 months (the time between Jan. 1, 1920, and Apr. 1, 1930) is equivalent to 15.7 per cent for exactly 10 years; and the 1920 increase for 116½ months (the time between Apr. 15, 1910, and Jan. 1, 1920) is equivalent to 15.4 per cent for 120 months. Making this adjustment, the rate of increase for the decade ending in 1930 is only slightly higher than that for the preceding decade.

No. 5.—DENSITY OF POPULATION PER SQUARE MILE, BY STATES

NOTE.—The population of continental United States has been divided by the total land area, although it included at each census some unorganized territory which was not canvassed by the enumerators. For each State or Territory the population as returned at a given census has been divided by the land area as constituted at the time that census was taken. The areas of Indian reservations, outside of Indian Territory, are included in the areas of the several States and Territories, although the population was not ascertained and can not be considered in figuring density of population prior to 1890. The census of 1870 in the Southern States is considered incomplete. Population density in 1930 of Alaska, Hawaii, and Puerto Rico, and of Philippine Islands, December 31, 1918, based on gross area, and not land area, was as follows: Alaska, 0.1; Hawaii, 57.5; Puerto Rico, 449.5; Philippine Islands, 90.0

No. 7.—DISTRIBUTION OF POPULATION IN GROUPS OF CITIES AND IN RURAL TERRITORY

NOTE.—Prior to 1930 all incorporated places and also towns (townships) in Massachusetts, Rhode Island, and New Hampshire having 2,500 or more inhabitants, are classed as urban areas. For 1930, urban areas also include unincorporated political subdivisions with a total population of 10,000 or more inhabitants and a population density of 1,000 per square mile and include for the three New England States named above only those towns which contain a village of more than 2,500 inhabitants comprising, either by itself or when combined with other villages within the same town, more than 50 per cent of the population of the town. The total urban and rural population for 1880 and 1890 is as follows: Urban—1880, 14,358,167; 1890, 22,298,359; rural—1880, 35,797,616; 1890, 40,649,355; per cent urban—1880, 28.6; 1890, 35.4.

No. 9.—URBAN AND RURAL POPULATION, BY STATES

NOTE.—See headnote, Table 7. The proportion of urban and rural population in 1930 as compared with data for earlier censuses was affected by changes in the classification. If the segregation of urban and rural had been made in 1930 on the same basis as in 1920, the per cent urban in 1930 for the areas affected would have been as follows: United States, 55.9; New Hampshire, 66.3; Massachusetts, 95.3; Rhode Island, 97.5; Connecticut, 65.0; New York, 83.4; New Jersey, 77.5; Pennsylvania, 65.7; California, 72.4

No. 11.—POPULATION: Annual Midyear Estimates by States

Note.—Estimates of population from 1927 to 1929 are based on the assumption that the increase (or decrease) each year between the censuses of 1920 and 1930 is equal to the annual average change between the two enumerations. For 1930 to 1936, the total population is estimated upon the basis of the available birth, death, immigration, and emigration figures, allowance being made for unregistered births and deaths. For State estimates for 1934 and 1935 a study of local conditions was made through State data, principally school statistics, State censuses, and a review of the farm population as indicated by the Agricultural Census of Jan. 1, 1935. The figures for 1930 to 1933 are obtained by interpolation between the 1930 census figures and the 1934 and 1935 estimates. For estimate for continental United States for 1937, see table 12, p. 10. For actual enumerations, 1790 to 1930, see table 6, p. 4.

No. 12.—POPULATION: Annual Midyear Estimates for Continental United States and Certain Outlying Territories and Possessions

Note.—Estimates, except for continental United States and Hawaii, 1930 to 1937, are based on the assumption that the increase each year between two successive censuses is equal to the annual average increase between the two enumerations. Revised estimates for continental United States and Hawaii, 1930 to 1937, are based on available data regarding births, deaths, immigration, and emigration, allowance being made each year for unregistered births and deaths. Estimates for Puerto Rico, 1930 to 1937, are based upon a census taken as of Dec. 1, 1935.

[1] Enumeration in Southern States incomplete; this affects especially figures for the negro population.
[2] White population includes Mexicans prior to 1930. The estimated number of Mexicans included in the white classification in 1920 was as follows: Total, 700,541; native white, 243,181 (172,704 of foreign parentage and 70,477 of mixed parentage); foreign-born white, 457,360. For close comparison with 1930, adjusted figures for 1920 may be obtained by deducting these from the white population as reported in 1920.
[3] Exclusive of Indians in Indian Territory and on Indian reservations, not enumerated prior to 1890.
[4] Comprises Filipinos, Hindus, Koreans, Hawaiians, Malays, Siamese, Samoans, and Maoris.
[5] Less than one-tenth of 1 per cent. [6] A minus sign (−) denotes decrease.
[7] Exclusive of 325,464 persons (117,368 whites, 18,636 Negroes, 189,447 Indians, and 13 Chinese), specially enumerated in 1890 in Indian Territory and on Indian reservations.
[8] Increase over figures adjusted for 1920 on account of Mexicans. See footnote 2.
[9] Increase over estimated number in 1920. [10] Per cent not shown where base is less than 100.

[1] A minus sign (−) denotes decrease.
[2] Boundaries changed between 1910 and 1920. Statistics for 1910 relate to pre-war boundaries.
[3] Persons reported in 1910 as of Polish mother tongue born in Germany (190,096), Austria (329,418), and Russia (418,370) have been deducted from the respective countries and combined as Poland for comparison with number reported in 1920 as born in Poland. Though Poland before 1919 was divided among Russia, Germany, and Austria, the censuses of 1880 to 1900 listed it as a country of birth.
[4] Created since 1910.
[5] Included as part of Yugoslavia in 1920 and 1930.
[6] Turkey in Asia included with Turkey in Europe prior to 1910.
[7] Albania included with Turkey in Europe in 1910 and earlier years.
[8] Newfoundland included with Canada prior to 1910.
[9] Except possessions of the United States.

[1] A part of the decreases from 1920 to 1930 in the percentage illiterate in some States is doubtless due to the separate classification in 1930 of Mexicans who were included in 1920 with the white population.

No. 40.—FAMILIES BY TENURE, AND AVERAGE POPULATION PER FAMILY

NOTE.—A family is defined as a group of persons related either by blood or by marriage or adoption who live together as one household usually sharing the same table. Single persons living alone are counted as families, however, as are a few small groups of unrelated persons sharing the same living accommodations as "partners." In the 1920 count, inmates of an institution were treated as a single family as were also other quasi-family groups. Families not reporting tenure are included in the totals for all families.

[1] Private families only, excluding 75,178 institutions, hotels, etc. These quasi-family groups were included in the count as made for 1920.

[2] The first of the two averages shown for 1930 is obtained by dividing the total population by the combined number of private families and quasi-family groups (institutions, hotels, etc.). This figure is strictly comparable with the 1920 average. The second average presented for 1930 is obtained by dividing the total population living in private families by the number of private families.

[1] Because of changes made in 1930 in the classification of agricultural pursuits, it is impossible to group the 1920 occupations exactly according to the 1930 classification. It is believed, however, that the effect of the difference in grouping on the comparability of figures here presented is negligible. Figures have been adjusted to exclude those employed on turpentine farms classified in "Agriculture" in 1920 (see Note 5).

[2] Since, in 1920, only farm laborers on general farms were distinguished as working on "home farm" or "working out," farm laborers on dairy farms, stock farms, truck farms, poultry farms, etc., who were, in fact, working on the "home farm" as "unpaid family workers" were not included in "Farm laborers (home farm)." Hence, as here compiled for 1920, the number of farm laborers classified as "Wage workers" probably is somewhat too large, and the number classified as "Unpaid family workers" somewhat too small.

[3] Many of the machinists' apprentices probably are machine tenders.

[4] Includes, for 1920, groups otherwise classified in 1930 as follows: Apprentices, steam railroad, telegraph and telephone, other transportation and communication; Apprentices, wholesale and retail trade; Apprentices to other professional persons. "Architects', designers', and draftsmen's apprentices," classified in "Manufacturing and mechanical industries" in 1920, was transferred to "Professional service" in 1930.

[5] Persons employed on turpentine farms classified in "Agriculture, forestry, etc.," in 1920, were transferred to "Manufacturing and Mechanical Industries" in 1930.

[6] Not otherwise specified.

[6a] Figures are not comparable with data for 1930.

[19] See note 15, p. 58. [20] Selected occupations. [21] Not classified separately in 1920.
[22] Neither in 1920 nor in 1930 was the attempt to distinguish chauffeurs and motor truck drivers from draymen, teamsters, and carriage drivers very successful.
[23] Teamsters in agriculture, forestry, and the extraction of minerals are classified with the other workers in those industries, respectively; drivers for bakeries and stores are classified as deliverymen in trade, and drivers for laundries are classified as deliverymen in domestic and personal service.
[24] Included with "Draymen, teamsters, and expressmen" in 1920.
[25] Because of indefinite returns by census enumerators, it is probable that some stationary engineers were included with locomotive engineers, and some firemen of stationary boilers with locomotive firemen.

No. 61.—STATE AND FEDERAL PRISONS AND REFORMATORIES: Prisoners Received From Courts, by Color, Nativity, and Age, 1935

Note.—Ratios for total and for color and nativity groups equal numbers per 100,000 population 15 years of age and over, in the respective sex and color and nativity groups, as estimated for 1935. Ratios for age groups equal numbers per 100,000 of estimated population in the respective groups. The distribution of prisoners received from courts by color, nativity, and age is shown for 1933 for both State and Federal prisons and county and city jails in the 1935 issue of the Statistical Abstract. The ratios shown for that year, for the total and for each color and nativity group, were based on the 1930 enumerated population for all ages.

No. 72.—BLIND AND DEAFMUTES: 1890 to 1930

Note.—Variations in the number of blind and deafmutes are due in large part to changes in methods of enumeration. For a discussion of methods used and other factors affecting the accuracy of the data, see report of the Bureau of the Census, "The Blind and Deafmutes in the United States, 1930"

3. VITAL STATISTICS

GENERAL NOTE.—Vital statistics are registered by the States in the first instance, but duplicates of the original certificates of individual births and deaths are received and tabulated by the Census Bureau. Owing to the gradual expansion of the "registration" areas up to 1933 (see tables 74, 81, and 91), the number of births and deaths for the areas as a whole are not strictly comparable but, in most cases, the rates are affected very slightly. Beginning with 1933, all States are included in both the birth and the death registration area.

General tables cover the registration area in continental United States. Hawaii, Puerto Rico, and the Virgin Islands are shown separately in table 89. Stillbirths, shown in table 85, are excluded from data for both births and deaths.

The term "urban" as used in the birth and mortality statistics in this section includes the population living in cities having 10,000 or more inhabitants while "rural" includes minor cities with population from 2,5000 to 10,000 in addition to strictly rural areas.

Rates for 1930 to 1935, except as noted, are based upon revised estimates of population as of July 1, shown in table 11, p. 9. Revised population estimates for July 1, 1930, to 1935, are not available by race or by age groups, or for cities and rural areas.

In all tables showing data by color, Mexicans have been included with the white. Where data for "white" and "other races" shown in this issue of the Statistical Abstract differ from similar data published in previous issues, it is so indicated by notes.

4. IMMIGRATION, EMIGRATION, AND NATURALIZATION

[In compiling immigration statistics, Alaska, Hawaii, and Puerto Rico, beginning 1904, 1901, and 1902, respectively, are treated as integral parts of the United States. In prior years the transfer of population between them and the United States was considered immigration. The movement of population between the United States and the Philippine Islands is not included in immigration statistics for 1899 to May 1, 1934, but is included subsequently and prior to 1899]

No. 94.—IMMIGRATION: 1821 TO 1936

NOTE.—For 1821 to 1867 the figures represent alien passengers arriving; for 1868 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; for 1907 to date, immigrant aliens admitted. Data are for fiscal years ended June 30 except as noted; for periods they are totals, not annual averages

No. 98.—IMMIGRATION, BY COUNTRIES AND BY DECADES, 1841 TO 1930

NOTE.—For 1841 to 1867 figures represent alien passengers arriving; for 1868 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; thereafter, immigrant aliens admitted. Data prior to 1906 cover countries whence aliens came; thereafter, countries of last permanent residence. Owing to changes in the lists of countries separately reported and to changes in boundaries, data for certain countries are not comparable throughout. Countries added to the list since the beginning of the World War were theretofore included with the countries to which they belonged. Data are *totals* (not annual averages) for periods ended June 30 since 1870, Dec. 31 theretofore, except as noted

No. 102.—IMMIGRATION QUOTAS ALLOTTED AND QUOTA ALIENS ADMITTED: BY COUNTRY OR REGION OF BIRTH, YEARS ENDED JUNE 30

NOTE.—The Immigration Act of 1921 limited the number of aliens admitted annually of any nationality subject to the quota law, to 3 per cent of the number of foreign-born persons of such nationality resident in continental United States as determined by the census of 1910; the population plan of the act of 1924, to 2 per cent according to the census of 1890. The national origins clause of the latter act, which became effective July 1, 1929, provided that the quota of any nationality should be computed by applying to 150,000 the ratio between the calculated number of inhabitants in continental United States in 1920 owing their origin to the nationality concerned and the total inhabitants in the United States of all nationalities subject to the quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see table 97, Statistical Abstract, 1932.) Under the act of 1924 the minimum quota is 100. Both immigrant and nonimmigrant aliens may appear in quota law statistics, or aliens of both classes may not be counted against quotas at all

[1] Quota for 1924; revisions from 1922 or 1923 allotments for certain countries were made due to changes in boundaries or other adjustments. Quota immigrants admitted, 1922 to 1924, are as follows: 1922, 243,953; 1923, 335,480; 1924, 357,648. For admissions by countries see the 1934 and previous issues of the Statistical Abstract.

[2] Quota for 1934 to 1936. The total quota for 1930 and 1931 was 153,714; for 1932 and 1933, 153,831; the Soviet Union's quota was 2,784 for 1930 and 1931, and 2,701 for 1932 and 1933; Rumania's, 295 prior to 1934. There were also changes in 1932 and 1933 for certain countries included in "Other Europe", Asia, and Pacific Islands.

[3] All Ireland included with United Kingdom prior to 1925; thereafter, Northern Ireland only.

[4] Annual quotas for colonies, dependencies, or protectorates in "Other Europe", Asia, Africa, Pacific islands, and America are included in the annual quotas of the European countries to which they belong.

[5] Includes quota immigrants born in colonies, dependencies, or protectorates of European countries.

[1] Census enumeration as of June 1, 1870 to 1900, Apr. 15, 1910, Jan. 1, 1920, and Apr. 1, 1930.

[2] Excluding the population of Indian Territory which is not included in public-school statistics, and also for 1890, population of Indian reservations. These were not enumerated at censuses prior to 1890.

[3] Figures include capital outlays as well as operation and equipment expenditures.

[4] Census estimates for July 1. Figures for 1932 and 1934 are revised estimates.

[5] Computed by Foreign and Domestic Commerce based on revised estimates of population. The figure for expenditure per capita of total population for 1932 in this table differs slightly from the figure shown in table 116, which is based on unrevised estimates.

[6] Computed from number of teaching positions plus supervisors and principals whose salaries are included.

[7] Not including night, summer, part-time, and continuation schools when separately reported.

[1] The entire force, excluding duplicates, reduced to full time basis was 89,184 for 1932 and 89,375 for 1934. This includes administrative officers, extension service, and organized research in addition to the regular force.

[2] Collegiate, professional, and graduate. [3] Not available. [4] Included in collegiate.

[5] Includes some special and unclassified students not shown separately.

[6] Not comparable with data for earlier years. Figures for 1932 and 1934 represent undergraduates in arts and sciences, whereas formerly "collegiate" included engineering, education, commerce, etc., limiting "professional" in former years to theology, law, medicine, dentistry, pharmacy, osteopathy, and veterinary medicine.

[7] Includes graduate students in all departments; figures for prior years include graduate school only.

[8] Figures for years prior to 1932 include undergraduate and graduate students in theology, law, medicine, dentistry, pharmacy, osteopathy, and veterinary medicine, while other professions are included in collegiate or other departments. For 1932 and 1934 figures represent undergraduate students in all professions.

[9] Including first professional. [10] All doctors' degrees. [11] Including endowment.

[12] Not including expenditures for auxiliary enterprises ($82,536,000 for 1932 and $72,482,000 for 1934) included in the figure for 1930.

[1] Not including night, summer, part-time, and continuation schools when separately reported.
[2] Computed by the Bureau of Foreign and Domestic Commerce based on revised estimates of population (see table 11, p. 9); the new method of estimating State population in 1934 may account in part for the marked changes in the ratios for some States.
[3] 1930 figure; includes $636,000 estimated interest on debt not included in figure in preceding column.
[4] White schools.

[1] Statistics for Puerto Rico are for 1898–99; for Philippine Islands, for 1903–4.
[2] Censuses of 1910, 1920, and 1930, respectively.
[3] Census estimates as of July 1. Estimates are based upon a Census taken as of Dec. 1, 1935.
[4] Attendance at end of the year.
[5] No school buildings on the island, the 525 schools in operation being conducted, as a rule, in teachers' residences.
[6] Not available.
[7] March. [8] Highest monthly enrollment. [9] September.
[10] Statistics for 1899–1900 are for all public schools.
[11] Including mixed schools outside of incorporated towns and districts.
[12] Native and mixed schools outside of incorporated towns only.
[13] Revised to include capital outlays; excludes interest. Figures beginning with 1929–30 furnished by the Office of Education, Department of the Interior, which collects data biennially only.

Sources: Hawaii, reports of the Governor of Hawaii. Puerto Rico, reports of the Governors of Puerto Rico and the Commissioner of Education. Philippine Islands, reports of the Director of Education. Alaska, native schools, Office of Indian Affairs, Department of the Interior; white schools, reports of the Governor of Alaska and Commissioner of Education, Alaska, except as noted.

No. 129.—VOCATIONAL EDUCATION: Pupils Enrolled in Vocational Courses and Teacher-Training Courses, Year Ended June 30, 1936

NOTE.—Institutions Federally aided are reimbursed out of Federal funds provided under the act known as the "Smith-Hughes Act", or the "National Vocational Education Act of 1917" and subsequent acts extending the benefits of vocational education to Alaska, Hawaii, and Puerto Rico and providing for the further development of vocational education. The various acts, administered by the Office of Education, provide appropriations by Congress for reimbursement in part out of Federal funds for expenditures by States and local communities for vocational education.

No. 131.—VOCATIONAL REHABILITATION OF PERSONS DISABLED IN INDUSTRY OR OTHERWISE: YEARS ENDED JUNE 30

NOTE.—By the civilian vocational rehabilitation act of June 2, 1920, Congress set up a program of cooperation with the States for the vocational rehabilitation of persons disabled in industry or otherwise. By the end of the fiscal year 1936 45, States, the District of Columbia, Hawaii, and Puerto Rico had accepted the provisions and begun cooperation with the Federal Government. The figures shown relate only to cases aided by Federal funds. The total expenditure in 1936 (fiscal year) comprised: Federal funds $1,244,576, State and private funds, $1,358,100

GENERAL NOTE.—An original entry is a first claim to receive a given tract of public land. Perfected entry of the claim is made after required lapse of time and compliance with other conditions. By Executive orders of Nov. 26, 1934, and Feb. 5, 1935, public lands were temporarily withdrawn from settlement, location, sale, or entry. Both orders, however, were made subject to valid existing rights

[2] Includes 35,685 acres of the Chicago, Rock Island & Pacific Ry.; 109,757 acres of the Cedar Rapids & Missouri River R. R.; and 77,535 acres of the Dubuque & Sioux City R. R., situated in the old Des Moines River grant of Aug. 8, 1846, which should be deducted.

[3] Declared to be one grant.

[4] See Minnesota for original grants.

[5] Leavenworth, Lawrence & Galveston includes 186,937 acres and Missouri, Kansas & Texas 270,971 acres in the Osage ceded reservation which are to be deducted under decision of the Supreme Court.

[1] An Indian, as defined by the Indian Service, represents a person of Indian blood who, through wardship treaty, or inheritance, has acquired certain rights. Indians are accredited to the State where enrolled though an Indian may be carried on the rolls because of tribal or inheritance rights and reside elsewhere. Reservation and nonreservation Indians are included. Beginning 1930, Indians no longer under the jurisdiction of the Indian Office are not included. Figures for 1930 are as of Apr. 1; for 1936, as of Jan. 1.
[2] For 1930 and prior years the entire population of the Southern Navajo Reservation and the Western Navajo Reservation was reported under Arizona; for 1936, the part of the former extending into New Mexico and the part of the latter extending into Utah is included in New Mexico and Utah, respectively.
[3] 1927. [4] Estimate. [5] Includes Indian Territory for 1900.
[6] Figures include data for the Five Civilized Tribes as follows: 1900, 84,570; 1910, 101,278; 1920 and 1930, 101,506 (final roll of Mar. 4, 1907), including 23,405 freedmen and 2,582 intermarried whites; 1936, 72,626 Indian members as reported by the Bureau of the Census, the freedmen and inter-married whites having been dropped from the rolls since they were not Indians though they had the legal rights of Indians.

7. CLIMATE

No. 144.—CLIMATIC CONDITIONS: SELECTED CITIES IN THE UNITED STATES

NOTE.—The table presented herewith shows the more important facts concerning the weather at a number of points in the United States selected with a view to covering all the important climatic sections and including at least one from each State. The temperature extremes include the entire period of observations to Dec. 31, 1936. Other data are long-time averages covering periods ranging from 20 to more than 50 years. All monthly mean temperature values except those at Hartford and Wilmington, are normals, based on long records. Similarly, all monthly averages of precipitation are normals except the amounts given at Wilmington. Average hourly wind velocity data are reduced to true velocities. Temperatures are Fahrenheit

8. ARMY, NAVY, VETERANS' ADMINISTRATION ACTIVITIES, SOCIAL SECURITY, CIVIL SERVICE, ELECTIONS, ETC.

No. 145.—ARMY OF THE UNITED STATES: STRENGTH OF COMPONENT PARTS

NOTE.—Prior to 1914, table covers quinquennial years and years in which considerable changes occurred in the number of Regular Army. Figures for Officers' Reserve Corps include Regular Army enlisted men and also, prior to 1924, National Guard officers holding commissions in the reserve. There is, therefore, some duplication in the grand totals, but the number of this personnel is not so great as to make a material difference in the figures.

[1] Includes Philippine Scouts beginning with 1902. Figures for 1919 to 1926, inclusive, include in most cases World War emergency personnel still in service. All emergency enlisted men still in service were discharged on July 2, 1921. On Nov. 11, 1926, the last emergency officer was discharged, thereby completing the demobilization of the World War Army. Retired personnel on active duty are not included.

[2] State militia prior to act of June 3, 1916.

[3] U. S. Volunteers.

[4] Figures on officers and enlisted men not available.

[5] Regular Army Reserve. The Regular Army Reserve was abolished by act of June 4, 1920.

[6] Includes National Guard personnel in Federal service.

[7] Estimate.

[8] Officers' Reserve Corps. Beginning with 1924, figures do not include individuals who hold commissions also in the National Guard.

[9] Includes Regular Army Reserve, 8,382; Enlisted Reserve Corps, 35,000 (estimate).

[10] Includes Officers' Reserve Corps, 86,262; National Army, 49,118 (estimate).

[11] Estimated enlisted strength of the National Army. Practically all members of the Regular Army Reserve and the Enlisted Reserve Corps had, by this date, been assigned to duty with Regular Army, National Guard, and National Army organizations.

[12] Estimates only. Under orders of the Secretary of War all components had been merged into one army known as "The United States Army."

[13] Beginning with 1919, figures for commissioned officers include warrant officers in the following numbers: 1919, 37; 1920, 68; 1921, 1,159; 1922, 1,151; 1923, 1,085; 1924, 1,063; 1925, 1,028; 1926, 1,325; 1927, 1,262; 1928, 1,208; 1929, 1,138; 1930, 1,089; 1931, 1,028; 1932, 973; 1933, 926; 1934, 869; 1935, 825; 1936, 784.

[14] Enlisted Reserve Corps.

[15] Beginning with 1924, figures for commissioned officers include warrant officers in the following numbers: 1924, 87; 1925, 160; 1926, 162; 1927, 182; 1928, 184; 1929, 188; 1930, 198; 1931, 198; 1932, 204; 1933, 205; 1934, 198; 1935, 201; 1936, 198.

[1] The reduction in this item from the prior fiscal year was due essentially to discontinuance of disability allowance (nonservice) except for veterans permanently and totally disabled.

[2] For disbursements by wars see table 151.

[3] Includes veterans of the War of 1812 whose dependents were receiving pensions (2 for 1936) not shown separately.

[4] The small number of cases receiving pensions is included with "Compensation" for 1934 and later years.

[1] In computing these averages, pensions paid to a small number of veterans (see table 152) were included.
[2] The decrease in the averages for 1931 and 1932 was due to the addition to the roll of a large number of veterans receiving disability allowance for nonservice-connected disabilities at a lower annual average value, and the increase in 1934 to the discontinuance of the disability allowance to approximately 400,000 veterans.

No. 165.—CIVIL SERVICE AND CANAL ZONE RETIREMENT

NOTE.—Retirement for civil service employees was established by act of May 22, 1920. Under this act as amended July 3, 1926, and May 29, 1930 (effective July 1, 1930), employees of the classified service and certain other groups, including unclassified laborers subject to labor regulations, are eligible for retirement on annuity at the ages of 62, 65, and 70, according to the class of service, if they have rendered at least 15 years of service. The last-named act permits the optional retirement of employees 2 years before reaching the retirement age where they have rendered at least 30 years of service and also permits retirement on account of permanent and total disability after 5 years of service. From the basic compensation of each employee within the scope of the acts there is deducted 3½ percent (2½ prior to July 1, 1926) thereof for deposit to the credit of the retirement fund. All amounts deducted prior to July 1, 1930, and thereafter amounts deducted less $1 per month are credited to the employee's individual account. Under the amendment of May 29, 1930, annuities are composed of (1) a sum equal to $30 for each year of service not exceeding 30 (provided it does not exceed three-fourths of average salary), and (2) the amount of annuity purchasable with the sum credited to the individual's account together with interest at 4 percent per annum, with certain provisions regarding the minimum total annuity.

By act of Mar. 2, 1931 (effective July 1, 1931), special provision was made for employees of the Panama Canal and Panama Canal Railroad, who theretofore had been eligible for retirement under the civil service retirement and disability act.

[1] During 1915 to 1922 only Alaska was paying old-age benefits; for 1929 no data are available.
[2] 42 State plans approved by the Social Security Board were in operation by the end of the year. Laws were also in effect in Alaska, Arizona, and Nevada; data for these 3 States are not available.
[3] Data cover the 42 States with plans approved by the Social Security Board. Total payments include $18,539,000 disbursed by some States under plans in operation prior to approval by the Board and obligations of $136,124,000 incurred for payments to recipients for the period of operation under approved plans. The monthly payment represents an average for all months for which payments were made by the 42 States. The average monthly payment during operation under the Social Security Act was $17.48.

[1] Includes preliminary figures for Montana for old-age assistance; for Massachusetts and New Jersey for aid to dependent children; and for New Mexico for all 3 types of public assistance for 1937.
[2] Figures represent direct payments from Federal, State, and local funds to recipients only and do not include administrative expenses or obligations incurred for payments for burial or payments to physicians, hospitals, clinics, or others rendering services to the client.
[3] Represents the number of individuals whose applications for the type of assistance stated have been approved formally; this number for some States may be less than the number eligible for and receiving such assistance since in certain States 1 grant may be made to cover the needs of 2 or more persons.
[4] Number of children reported is the number for whom applications for aid have been approved formally and for whom aid was given for this month; this number may be less than the total number of children in households receiving aid to dependent children since other children in the family may not be granted aid.

[1] Figures prior to 1928 do not include votes cast for names not appearing on the electoral tickets specified in the table. In 1928 to 1936, the totals include miscellaneous and scattering ballots, insofar as they were reported by the States.

[2] See headnote.

[3] Democrat-Populist.

[4] Socialist-Labor only. In 1924 practically all the Socialist vote is included in votes in next column for La Follette and Wheeler, official candidates of the Socialist Party as well as the Independent Progressive.

[5] Workers.

[6] Includes 3,222 Independent Republican votes.

[7] Third party (Lemke).

[8] Commonwealth votes for Colvin.

[9] Includes 961 Industrial votes.

[10] Includes 9,407 National Union for Social Justice votes.

[11] Includes 274,924 American Labor votes.

[12] Royal Oak (Lemke).

[13] Independent (Lemke).

9. NATIONAL GOVERNMENT FINANCES

General note as to bases used in compiling statistics of receipts and expenditures of the United States Government.—Four different bases are used in compiling both the receipts and expenditures of the Government. These bases, in the case of receipts, are the daily Treasury statements (unrevised and revised), warrants issued, and collections reported. The expenditures of the Government are published on the first three of these bases and also on the basis of checks issued. Figures in the daily Treasury statements (unrevised) which are on a current cash basis are compiled from the latest daily reports from the Treasury offices or public depositories. Owing to the distance of some of these offices and depositories from the Treasury, reports from them are somewhat delayed in reaching the Treasury, and consequently it is necessary to issue the unrevised Treasury statements before they are received. The figures for actual transactions during a month or year which are calculated to take into account these delayed reports are said to be on a basis of daily Treasury statements (revised). The unrevised figures are the basis of the Budget estimates submitted to Congress by the President.

It is provided by law that warrants shall be issued by the Secretary of the Treasury in acknowledgment of money received, and that warrants must be drawn by the Secretary of the Treasury for all disbursements of money. Some of these warrants for expenditures do not represent actual payments but are merely advances of credit to disbursing officers, who then issue checks in payment of Government obligations. Expenditures on the basis of warrants issued include unexpended balances to the credit of disbursing officers at the end of the year but do not include expenditures made during the year from unexpended balances of the preceding year.

Expenditures on the basis of checks issued (table 175) represent most accurately the actual expenditures during any given year. They differ from expenditures shown by daily Treasury statements (revised), because they include checks outstanding at the end of the year and exclude unpaid checks at the beginning of the year.

Government transactions are classified according to the accounts through which they are effected. The three classes of accounts are: General fund accounts, which include the general revenues and from which the operating expenses of the Government, including capital outlays and fixed charges, are paid under appropriations by Congress; special fund accounts, or funds received under special authorizations of law which are earmarked for some specific purpose; and trust fund accounts, representing money received and held in trust for the benefit of individuals or classes of individuals. The latter are not strictly Government moneys and are shown separately in all tables except No. 173. (See headnote of that table.)

All figures for receipts and expenditures include postal surpluses or deficiencies only; postal revenues other than surplus receipts and postal expenditures payable from postal revenues are shown in table 173.

[1] Receipts include increment resulting from the reduction in the weight of the gold dollar and seigniorage resulting from the issuance of silver certificates against silver acquired under the Silver Purchase Act of 1934; expenditures include items chargeable against increment on gold (see table 174, p. 167) and net transactions in checking accounts of certain special governmental agencies.

[2] Includes processing tax and, for 1937, unjust enrichment tax and taxes under Social Security Act.

[3] Counter entry; deduct.

[4] General expenditures include $500,158,000 on account of bonds issued to U. S. Government Life Insurance Fund pursuant to Adjusted Compensation Payment Act, 1936; interest on debt includes $22,507,000 interest on these bonds.

[1] Surplus or deficit takes into account public debt retirements chargeable against ordinary receipts beginning 1918. See p. 164 for expenditures chargeable against ordinary receipts.

[2] Based on reports of the Post Office Department. Expenditures include adjusted losses, etc., postal funds, and expenditures from postal balances; they exclude departmental expenditures in Washington, D. C., to the close of the fiscal year 1922, and amounts transferred to the civil-service retirement and disability fund, fiscal years 1921 to 1926; in 1927 to 1937 the 3½ percent salary deductions are included.

[3] Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in miscellaneous receipts.

[4] On the basis of warrants issued 1789 to 1930; thereafter, on basis of checks issued.

[5] Average for period Mar. 4, 1789, to Dec. 31, 1800.

[6] Averages are for entire period though there were no amounts under these items for certain years.

[7] Years ended Dec. 31, 1801 to 1842; average for 1841–1850 is for the period Jan. 1, 1841, to June 30, 1850.

[8] Less than $500. [9] Average for 1863 to 1865. [10] Average for 1881 and 1884. [11] One year only, 1895.

[12] See headnote.

[13] See footnote 2, table 172, which applies here.

[14] Sales of public lands included with miscellaneous receipts; postal revenues and expenditures not available.

[15] Civil expenditures under War and Navy Departments at Washington are included in "Civil and miscellaneous" prior to 1916, thereafter under the War and Navy Departments, respectively. War Department includes expenditures for rivers and harbors and Panama Canal.

[16] Figures for Indians and prior to 1922, for postal deficiencies, are on the basis of warrants issued.

[17] Beginning 1931, figures represent expenditures for the Veterans' Administration, which includes the former Bureau of Pensions, Bureau of National Homes, and Veterans' Bureau. Prior to 1871, figures include only Army and Navy pensions and fees of examining surgeons; thereafter, they include also salaries and expenses of Bureau of Pensions (except salaries and expenses, civil employees' retirement act) and pension agencies. Figures for 1917 to 1921 include expenditures by Bureau of War Risk Insurance and for vocational rehabilitation, and for 1922 to 1930, Veterans' Bureau. All figures prior to 1923 and figures for Bureau of Pensions for 1923 to 1930 are on the basis of warrants issued.

[18] Exclusive of amounts transferred to civil service retirement and disability fund.

[19] See notes on corresponding periods, p. 163.

[20] See note 6, p. 163. [21] See headnote p. 163. [22] Included in miscellaneous.

[23] Includes Adjusted Service Certificate Fund payments amounting to $556,665,000 of which $500,158,000 represents amount certified for payment to U. S. Government Life Insurance Fund in bonds on account of liens against certificates. For Adjusted Service Certificate Fund payments for earlier years, see table 174, p. 165.

[24] Includes $22,507,000 interest on bonds issued to U. S. Government Life Insurance Fund referred to in note 23.

[1] Recovery and relief expenditures (except R. F. C. and subscriptions to stock, Federal land banks) were not classified seperately prior to 1934 and are included in general expenditures.

[5] Excess of credits, deduct.

[11] Additional expenditures under this account are shown under general expenditures. General expenditures for Boulder Canyon project, included under Interior Department, are given separately in note 6, p. 165.

[12] Figures include expenditures from funds allocated by the Reconstruction Finance Corporation.

[13] Revised to adjust classification.

[14] Advances to States under 1932 Relief Act of $298,560,000 are included under Reconstruction Finance Corporation, direct loans and expenditures.

[15] See note 4, p. 165.

[16] Receipts and expenditures on account of contributed funds are included in "Other" trust funds beginning with 1934; prior to 1934, such receipts and expenditures were included under special accounts.

[17] Since July 1, 1932, deductions from salaries credited to the civil service, foreign service, and Canal Zone retirement funds and earnings from investments of such funds and of adjusted service certificate fund have been classified as receipts; prior thereto, such items were used to offset expenditures for these funds.

[18] Resulting from issuance of silver certificates against silver acquired under Silver Purchase Act of 1934.

No. 177.—INTERNAL REVENUE: AMOUNTS COLLECTED FROM PRINCIPAL SOURCES

NOTE.—**All figures in thousands of dollars.** The figures represent collections by internal revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal revenue stamps and deposits of internal revenue collected through customs offices, and, therefore, differ from those in tables 172 to 174 and 176 which represent the deposits of these collections in the Treasury or depositaries during the fiscal year concerned, there being thus an overlapping of time. Certain items, included in the totals in the last column, are shown in detail in the second part of the table

No. 180.—INDIVIDUAL INCOME TAX RETURNS: SUMMARY

NOTE.—**All money figures in thousands of dollars.** Statistics are based on the taxpayers' returns as filed, unaudited except to insure proper execution of the return. Under the various revenue laws the following individuals were required to file personal returns: For 1913 to 1916, those with net income of $3,000 and over; 1917 to 1924, and 1932 to 1935, $1,000 and over; 1925 to 1931, $1,500 and over; or if married and living with husband or wife filing a joint return, $2,000 for 1917 to 1923, $2,500 for 1924, and 1932 to 1935, and $3,500 for 1925 to 1931; also, beginning 1921, individuals with gross income of $5,000 or over regardless of net income. Data for returns showing no net income, filed in accordance with the latter provision, are not included in statistics shown. Partnership net income or net loss is reported on the individual returns of copartners according to their shares. All income tax data include Alaska and Hawaii

[1] Total income and net income for 1926 to 1933 include capital net gains from sale of assets held over 2 years whereas net income has not been reduced by nor have deductions been increased by the amount of capital net losses from such sales. For treatment of capital gains and losses for 1934, see note 5.

[2] Excludes such wages and salaries of the individual, his wife, or dependent minors derived from the business conducted by the individual.

[3] Dividends on stock of domestic corporations, taxable interest on obligations of the United States, and prior to 1934, capital net gain from sale of assets held more than 2 years, received through partnerships and fiduciaries are reported under their respective classifications. For 1934, income of partnerships and fiduciaries includes the proportion of net capital gains and losses resulting from sales of capital assets through these entities required to be reported under the Revenue Act of 1934.

[4] Exclusive of amount taxed as capital net gain from sales of assets held over 2 years.

[5] Under the Revenue Act of 1934, certain percentages (varying according to the period for which assets were held) of gains or losses from the sale of all capital assets are taken into account in computing net income, the deduction for capital losses being limited to $2,000 after subtracting capital gains. Amounts shown as "net capital gain" and "net capital loss" represent the proportion of gains and losses required to be included and are not comparable with "profits (or net loss) from sale of real estate, stocks, bonds, etc." and "capital net gain from sale of assets held over 2 years" reported for earlier years; they exclude gain or loss on sale of capital assets through partnerships or fiduciaries (see note 3).

[6] Amount reported for tax at 12½ percent in lieu of normal tax and surtax.

[7] On stocks of domestic corporations.

[8] Interest on Government obligations not wholly exempt from tax.

[9] Other than reported for tax credit on capital net loss from sale of assets held more than 2 years.

[10] Excludes amounts reported in business deductions.

[11] No deduction allowed for prior year loss.

[12] For 1934 the limited credit for earned income was allowed against net income in computing taxable income.

[13] Loss in ordinary net income for given year and net loss for prior year deductible from capital net gain.

[14] Computed by Bureau of Foreign and Domestic Commerce, based on revised estimates of population.

No. 188.—CORPORATION INCOME TAX RETURNS: SUMMARY

NOTE.—**All money figures in thousands of dollars.** Statistics are based on taxpayers' returns as filed, unaudited except to insure proper execution of the returns. They include data for Alaska and Hawaii. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, charitable, etc., not operating for profit. Under the Revenue Act of 1934, the privilege of filing consolidated returns, which had formerly been permitted for groups of affiliated corporations, was limited to steam and electric railroads. This change in the law results in marked differences in the industrial and net income or deficit classifications of returns for 1934 and those for prior years, and also in the distribution of returns by size of assets classes. Under the consolidated provisions the predominant industrial activity and the composite income and deductions of the consolidated group determined the industrial, net income or deficit, and total assets classification of the consolidated return. For 1934, each of the separate returns of affiliated corporations is classified on the basis of its predominant business, which frequently differs from that of the consolidated return in which it was formerly included, and the net income or deficit and assets reported in the separate return. Certain items of assets and liabilities, receipts, and deductions, as well as dividend payments and tax, are also materially affected by the absence of "intercompany eliminations" which occurred in consolidated returns but not in the separate returns filed for 1934 by each concern. In Statistics of Income for 1934, part 2, tables are presented to show the effect of the discontinuance of the consolidated return on the tabulated data

[1] Excludes gross receipts from sale of capital assets. Excludes nontaxable income, other than interest on tax-exempt obligations and dividends on stock of domestic corporations.

[2] Where inventories are an income-determining factor. For "Cost of goods sold", see "Compiled deductions."

[3] Where inventories are not an income-determining factor. Figures represent gross profits other than from sales prior to 1932. For 1925, gross profits from operations other than from sales for all corporations were tabulated in "Other receipts." For the years 1926, 1927, and 1928 such profits for corporations classified under "Transportation and other public utilities", "Service", "Finance", and "Nature of business not given" only were included in "Other receipts."

[4] 1921 includes dividends from foreign corporations.

[5] Includes obligations of States and Territories or minor political subdivisions, securities issued under the Federal Farm Loan Act, and obligations of the United States or its possessions.

[6] Included in "Other deductions" for 1932. For prior years, only "Gross profits from other operations" included under "Receipts" were reported on the return.

[7] Excludes taxes reported under "Cost of goods sold."

[8] Compiled receipts less compiled deductions.

[9] Deducted by concerns reporting net income.

[10] Includes war excess-profits tax for 1921 and 1922 and excess-profits tax for 1933 and 1934.

[11] Excludes dividends of life insurance companies prior to 1928. Data were not compiled for 1921.

[12] Included in "Other deductions."

[13] Deficit.

[1] Gross income corresponds to total income, as reported on face of return, plus "cost of goods sold" and "cost of other operations." Interest received on Liberty bonds, etc., has been deducted from gross income so that gross income includes the same items as in prior years.

[2] Includes excess-profits tax amounting to $7,673,000, of which $37,540 represents excess-profits tax on returns with no net income (see note 1, table 190, p. 186).

No. 201.—FEDERAL ESTATE TAX RETURNS: SUMMARY

NOTE.—**All money figures in thousands of dollars.** Under the various revenue acts estate tax returns are required: (1) In the case of every citizen or resident (only every resident for deaths prior to May 11, 1934) decedent if gross estate exceeds $50,000 for deaths prior to Feb. 26, 1926, and from June 6, 1932, to Aug. 30, 1935; $100,000 for deaths from Feb. 26, 1926, to June 5, 1932; and $40,000 for deaths on or after Aug. 31 1935; (2) in the case of every nonresident alien (every nonresident citizen and alien if decedent died prior to May 11, 1934) who owned property in the United States at date of death. Estates of decedents dying on or after June 6, 1932, are subject to 2 taxes, that levied under the Revenue Act of 1926 and an additional tax levied under the acts of 1932, 1934, or 1935

[1] Except where otherwise indicated.
[2] Callable 1 year from date of issue, payable 20 years from date of issue. Redeemable and payable dates for all issues of postal savings bonds outstanding fall within the periods indicated in the payable column.
[3] At cost or redemption value. Bonds are sold at a discount, payable at par on maturity; they are redeemable at option of holder at any time after 60 days from date of purchase, payable 10 years after date of purchase. Interest rate is approximate yield if held to maturity.
[4] At option of holder.
[5] Special issues for investment of funds administered by the Treasury.
[6] Maturities various and nominal; redeemable in 1 year and payable 4 to 5 years from date of issue.
[7] Treasury bills are noninterest-bearing short-term securities sold on a discount basis with competitive bids for each issue. The average sales price gives an approximate yield on a bank-discount basis. Yields on all issues outstanding Dec. 31, 1936, ranged between the percents given above.
[8] Assumed by the United States on deposit of lawful money for their retirement.

[1] Independent school districts, townships, bridge, dike, drainage, irrigation, road, etc., districts.

[2] Data for years ended June 30, 1913 and 1933. Postal revenues and postal expenditures chargeable against them are included in receipts and expenditures, respectively. Further differences between figures in this table and totals in tables 172 to 174 are as follows: Receipts here shown exclude trust funds and other nonrevenue receipts while expenditures exclude public debt retirements, trust funds, District of Columbia, refunds of customs and internal revenue and other non-governmental costs.

[3] Cities, towns, etc., with a population of 2,500 and over; comparable data for 1932 are: Revenue receipts, $3,221,900,000 (per capita, $45.99); governmental-cost payments, $3,449,600,000 (per capita, $49.24).

[4] Not available. [5] Gross debt less cash in Treasury as of June 30 following the year stated in stub.

No. 212.—REVENUES AND EXPENDITURES OF STATE GOVERNMENTS

NOTE.—Both receipts and expenditures are net figures, excluding temporary and special transactions which represent virtually duplication. Revenue receipts do not include any receipts from borrowing of money. Outlays, which enter into the total for governmental-cost payments, represent capital investments, including those made with the proceeds of borrowed money. The excess of governmental-cost payments over revenue receipts represents, approximately, increase of indebtedness

No. 215.—ASSESSED VALUATION OF PROPERTY SUBJECT TO GENERAL PROPERTY TAX

NOTE.—Property belonging to railroads, telegraph companies, and a number of similar corporations is in some States distinguished as real or personal, but in a number of States it is treated as a single total. In the latter case, figures for such corporations and also other property and franchise valuations of corporations for which data were insufficient for a complete distinction of real from personal are not shown separately but are included in the totals. Figures do not show the relative wealth of the different States owing to differences in the bases of assessments and practices thereunder

No. 217.—TAXES: TOTAL LEVIES OF AD VALOREM GENERAL PROPERTY TAXES OF STATES, COUNTIES, AND MINOR CIVIL DIVISIONS

NOTE.—The data represent the total levies of general property taxes of States, counties, cities, villages, towns, boroughs, townships, school districts, etc., and for all purposes. They do not cover "special assessments" on property benefited by specific improvements nor special property taxes applying only to limited classes, nor taxes based on other standards than property, such as income, volume of business, inheritance, etc., which have been steadily growing in relative importance. The change in buying power of money affects materially the comparability of the figures. For data for 1860, 1870, and 1890, by States, see table 437, Statistical Abstract of 1922

[1] Prior to 1925, contingent or special assessment debt was included with funded and fixed debt. In this table, it has been excluded from funded and fixed and included with current debt, except for 1880, 1890, 1905, and 1910, when no segregation could be made.
[2] Includes special assessment debt, revenue bonds and notes, and warrants.
[3] Not segregated prior to 1915; included with funded and fixed.
[4] Revised figures.
[5] There was an excess of sinking fund assets over debt in one State.
[6] Includes figures for the fiscal year 1931 for 18 States. See table 224.
[7] Funded or fixed includes floating.
[8] Not computed.

No. 228.—REVENUE RECEIPTS, GOVERNMENTAL-COST PAYMENTS, AND NET DEBT OF 94 CITIES OF 100,000 OR MORE INHABITANTS: SUMMARY 1930, 1934, AND 1935, AND BY SIZE GROUPS, 1935

NOTE.—Per capita figures for both 1934 and 1935 are based on population estimates for 1933 (the latest available) for all cities except Washington, D. C., for which 1934 and 1935 estimates, respectively, are used. For per capita figures for 146 cities for 1903 to 1931, see Statistical Abstract, 1935, table 224. Data were compiled for cities of 100,000 or more inhabitants only in 1934 and 1935.

[1] Under orders of the Secretary of the Treasury of Dec. 28, 1933, and Jan. 11 and 15, 1934, all gold coin domestically owned (with minor exceptions) was required to be delivered to the Treasurer of the United States, and under the Gold Reserve Act of 1934 (Jan. 30) withdrawn from circulation and formed into bars. Gold coin ($287,000,000) shown on Treasury records as then outstanding was dropped from statements.

No. 231.—STOCK OF MONEY IN THE UNITED STATES, BY KINDS

NOTE.—**Amounts in thousands of dollars.** Figures prior to 1890 were revised in 1925 from the best available data, but the older records, especially from 1860 through the early 70's, are not complete and figures for gold and silver those years are only estimates. In 1927, data were revised to include minor coins beginning 1900 (no satisfactory data available for earlier years) and gold coin and bullion held abroad for Federal Reserve banks and to exclude gold earmarked for foreign account

[1] The totals involve a duplication to the extent that United States notes, Federal Reserve notes, Federal Reserve bank notes, and national bank notes, all included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 have been excluded, however, since they are complete duplications of the equal amounts of gold or silver held as security therefor and included in the totals.

[2] By a proclamation of the President dated Jan. 31, 1934, the weight of the gold dollar was reduced from 25.8 to 15 5/21 grains of gold, 0.9 fine. The value of gold is therefore based on $35 per fine ounce beginning June 1934; theretofore, it is based on $20.67 per fine ounce.

[3] There has been no fractional currency in actual circulation to any extent since 1878.

[4] Silver bullion in Treasury.

[5] Includes silver bullion as follows: June 30, 1934, $1,560,000; June 30, 1935, $313,309,000; Dec. 31, 1935, $576,862,000; June 30, 1936, $708,211,000; Dec. 31, 1936, $775,896,000; June 30, 1937, $835,196,000.

[1] Gold and silver certificates and Treasury notes of 1890 are excluded before combining money outside the Treasury with money in the Treasury in order to avoid duplication, since the gold and silver held in Treasury as security against these currencies is included. See also notes 1 and 2, table 231.

[2] Both of these items include also reserve against Treasury notes of 1890.

[3] See note 1, table 230.

[4] Includes total stock of silver dollars and subsidiary silver.

[5] Gold certificates. This amount is not included in the total since the gold held as security against the gold certificates is included in the column, "In trust against gold and silver certificates."

[1] Prior to Dec. 31, 1935, excludes balances with private banks to the extent that such balances were reported in "Other assets." Prior to Dec. 31, 1933, excludes time balances with domestic banks which, on that date, amounted to $62,000,000 and which, prior to that time, were reported in "Other assets."

[2] Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec 31, 1935, less cash items reported on hand but not in process of collection.

[3] Aggregate book value of capital stock, capital notes and debentures, surplus, undivided profits, reserves for contingencies, etc.

[4] Postal savings included in time deposits. [5] Beginning 1933, figures relate to licensed banks only. [6] Revised.

No. 247.—REPORTING MEMBER BANKS IN 101 LEADING CITIES: PRINCIPAL ASSETS AND LIABILITIES

NOTE.—**In millions of dollars.** Data are monthly averages of weekly figures. Figures were considerably affected in March 1933 by the closing of a number of large banks in 11 of the cities included and from March 1933 until the middle of 1934 by the reopening of old banks or the beginning of reports by new successor banks. These changes, however, reflect the course of banking developments during this period.

[1] Figures through June 1934 are "net demand deposits" and are not comparable with "demand deposits—adjusted" shown for subsequent months, which represent demand deposits other than interbank and U. S. Government less cash items reported on hand or in process of collection. Net demand deposits for September 1934 were $13,729,000,000. For a detailed discussion of these two series, see Federal Reserve Bulletin for November 1935.

[2] Figures prior to September 1934, include a relatively small amount of time balances of banks.

[3] Loans secured by stocks and bonds.

[4] Exclusive of loans to banks beginning with September 1934.

[5] Average for May 5 and 12; loan classification revised beginning with May 19.

Source: Board of Governors of the Federal Reserve System. Data are published currently in the "Federal Reserve Bulletin." Beginning with May 19, 1937, however, the classification of loans was revised. Explanation of the revisions and comparison of the old series here published with the new classification used beginning with May 19 are given in the "Federal Reserve Bulletin" for June 1937.

[1] Comprises all national banks in continental United States and all State commercial banks, trust companies, savings banks, and such private and industrial banks as are included in abstracts by State banking departments. Also includes during the period June 1934 to June 1935, private banks which, under the provisions of sec. 21 (a) of the Banking Act of 1933, submitted reports to the Comptroller of the Currency.
[2] Date of reports of member banks; figures for nonmember banks are as of nearest available date.
[3] Exclusive of interbank deposits, except that prior to December 1933 member bank figures include interbank deposits not subject to immediate withdrawal, which aggregated $103,000,000 on that date, and nonmember bank figures on all call dates include interbank deposits to the extent (estimated at $150,000,000 on June 30, 1937) that they were not shown separately in a few State bank extracts.
[4] Beginning June 30, 1933, all figures (other than for mutual savings banks) relate to licensed banks only, with some exceptions as to nonmember banks.

No. 252.—ALL REPORTING BANKS: PRINCIPAL ASSETS AND LIABILITIES FOR ALL BANKS AND FOR EACH CLASS OF BANKS, 1840 TO 1936

NOTE.—Banks in Alaska, Hawaii, Puerto Rico, Philippine Islands, and beginning with 1935, Virgin Islands are included. Data are as of June 30 or about June 30 except data for the earlier years for banks other than national, for which reports were of various dates. Figures for banks other than national for the earlier years, especially through 1885, are incomplete. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years; since 1926 only one is included. Private banks are not included prior to 1890; statistics for private banks, except for 1934 and 1935, cover only banks under State supervision and those voluntarily reporting; for 1934 and 1935, they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933

[1] Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national banks beginning with 1921 and for other banks beginning with 1929.
[2] Securities borrowed excluded for national banks beginning with 1903 and for other banks beginning with 1929. Not reported separately for prior years.
[3] Includes lawful reserve, exchanges for clearing house, and all cash items except for 1936, for which year cash items not in process of collection are excluded.
[4] Includes reserve accounts, and for banks other than national for 1934 to 1936, capital notes and debentures. Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1925 and for other banks beginning with 1929.
[5] Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.
[6] Includes postal savings. [7] Capital only. [8] Includes capital only for banks other than national.
[9] Figures for State banks, except number of banks and capital, estimated. [10] Licensed banks only.
[11] U. S. Government securities only. [12] Includes State bank circulation outstanding.
[13] Includes loan and trust companies and, with some exceptions (see headnote), stock savings banks.
[14] Figures given under capital, surplus, etc., represent surplus and undivided profits, including reserves, except that they include capital for any stock savings banks included (see headnote).

[1] Comprises banks suspended before the banking holiday, licensed banks suspended or placed on restricted basis following the banking holiday, unlicensed banks placed in liquidation or receivership, and unlicensed banks granted licenses after June 30, 1933. At the close of the banking holiday (Mar. 15, 1933) 1,400 national banks with deposits (on Dec. 31, 1932) of $1,942,574,000, and 221 State bank members with deposits of $924,177,000 had not been licensed to reopen. On Apr. 12, 1933, the first date following the banking holiday for which corresponding data are available with respect to nonmember banks, there were 1,108 unlicensed national banks with deposits of $1,818,541,000, 148 unlicensed State member banks with deposits of $841,382,000, and 2,938 unlicensed nonmember banks with deposits of $1,317,607,000. By the end of June 1933 supervisory authorities had completed their examination of all or nearly all the banks not granted licenses immediately following the banking holiday and had authorized such of the banks to reopen as could then qualify for licenses. On June 30, 1933, there remained 985 unlicensed national banks with deposits of $1,028,347,000, 110 State member banks with deposits of $237,668,000, and 1,983 nonmember banks with deposits of $1,093,984,000 to be rehabilitated and reopened or to be placed in liquidation or receivership. All such banks (not licensed by June 30, 1933) are treated as suspensions.

[2] Includes 8 insured nonmember banks in 1934, 22 in 1935, and 40 in 1936 with deposits of $1,912,000, $3,763,000, and $10,207,000, respectively. Federal deposit insurance became operative Jan. 1, 1934.

[1] In obtaining totals in this column adjustments were made to avoid duplication arising from the fact that production credit associations and banks for cooperatives borrow from and rediscount loans with Federal intermediate credit banks. The following loans which cannot be allocated by States are excluded: Central bank for cooperatives, $13,470,000 (total loans, $27,778,000, less $14,308,000 under rediscount with Federal intermediate banks); Agricultural Marketing Act revolving fund loans, $53,755,000. Including these amounts, the grand total loans outstanding were $3,362,382,000.

[2] Includes $622,000 emergency crop loans which cannot be allocated by States.

[3] Less than $500.

[4] Includes $9,000 for Hawaii.

[1] Less payments on principal and principal of delinquent and extended installments.
[2] Less amounts sold under repurchase agreements.
[3] Unmatured. Figures for 1932 include $18,500,000 of bonds issued to the Reconstruction Finance Corporation and for 1933, $142,118,000.
[4] Owned by national farm loan associations and individual borrowers.
[5] Not including special reserves set up against particular assets.
[6] Less impairment or deficit. The decrease in reserves and undivided profits for 1934 resulted largely from a change in accounting procedures.
[7] Includes surplus accrued, not yet paid, $3,054,000 for 1934, $2,719,000 for 1935, and $6,094,000 for 1936.

No. 293.—CLEARING-HOUSE EXCHANGES: SUMMARY FOR UNITED STATES

NOTE.—Prior to 1920 data are for all cities reporting to the New York Clearing House Association and cover years ended Sept. 30; commencing 1920 they are for 146 identical cities and relate to calendar years. The comparability of these figures is affected (1) by changes in the number of cities reporting, and (2) by the tendency toward consolidation of banks, eliminating former clearings between two or more banks. Debits to individual account (tables 294 and 295) are a more significant measure of volume of payment. The divisions shown in this table, with the exception of the New England, differ from the geographical divisions shown in most tables in the Abstract. The Eastern division includes the States comprising the Middle Atlantic division in other tables (see for example table 257) and Delaware, Maryland, and District of Columbia of the South Atlantic division; the Southern includes the other six South Atlantic States, the East South Central and the West South Central States with the exception of Oklahoma; the Middle Western includes the East North Central States, Minnesota, Iowa, and Missouri; the Western includes North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Montana, Wyoming, and Colorado; the Pacific includes Washington, Oregon, California, Idaho, Utah, Nevada, and Arizona

[1] Between Mar. 10, 1933, and Jan. 31, 1934, the foreign exchange value of the United States dollar was permitted to depreciate as a result of restrictions placed on gold shipments to foreign countries. By Executive Order of Jan. 31, 1934, the weight of the gold dollar was reduced to 15 5/21 grains of gold nine tenths fine, 59.06 percent of the former weight of 25.8 grains.

[2] Silver peso quoted in place of gold peso beginning July 30, 1931. Average for 1931 is for silver peso for July 30 to Dec. 31. Average for gold peso for Jan. 2 to July 29 was $0.4765.

[3] Paper peso, equivalent to 44 percent of gold peso, quoted in place of latter beginning Dec. 13, 1933. Average for 1933 is for gold peso for Jan. 1 to Dec. 10. Average for paper peso Dec. 13 to 31 was $0.3333.

[4] Average free market rate, quoted in addition to official rate beginning Aug. 3, 1936, was $0.0588 for Aug. 3 to Dec. 31, 1936.

[5] Data for Peru and Venezuela for 1932 to 1936 are selling rates in Lima and Caracas for sight drafts, compiled by Bureau of Foreign and Domestic Commerce.

[6] Quotations for 1928 and 1929 are for the libra of 10 soles, thereafter for the sol which replaced the libra as Peru's official unit of currency Mar. 21, 1930. The par value of the sol was established at $0.40 Mar. 1930 and restablized at $0.28 May 1931. Quotation for 1930 is for Mar. 27 to Dec. 31.

[7] Reported on new basis beginning Aug. 3, 1936. Average for 1936 is for rates reported on old basis for Jan. 1 to Aug. 2. Average rate reported on new basis for Aug. 3 to Dec. 31 was $0.1978.

[8] Quotations prior to 1933 are for the old yuan containing 23.9025 grams of pure silver; quotations beginning 1933 are for the new yuan containing 23.4934 grams of pure silver.

[9] Average quotation for the new yuan, Apr. 10 to Dec. 31 (see note 8). The average for the old yuan from Jan. 1 to Apr. 9 was $0.2021.

No. 301.—FIRE LOSSES: Total and Per Capita, Continental United States

Note.—**Amounts, except per capita, in thousands of dollars.** Prior to 1916, figures are as compiled by the New York Journal of Commerce and include losses of $10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being $214,531,000 as against $258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses

No. 306.—LIFE INSURANCE: INSURANCE WRITTEN AND IN FORCE, BY STATES

NOTE.—Figures cover business transacted in Continental United States, including United States business of Canadian companies. They include data for some small companies which confine their business to the State in which they domicile, and usually to several small cities, which are not included in tables 302 to 305. Further differences between totals in this table and in the preceding tables are due to duplications from reinsurance.

[1] Includes small amounts not distributed by States.

[2] After deducting a negative item of $33,835,000 for the Equitable, N. Y., which resulted from the fact that insurance written off in group business and withdrawals exceeded new business written. Insurance in force also reflects this negative item.

No. 307.—LIFE INSURANCE OF FRATERNAL ORDERS IN THE UNITED STATES

NOTE.—Although the number of orders reporting varies considerably, most of the larger orders report regularly, so that the figures are fairly comparable from year to year. Prior to 1920 the figures for the number of orders as given below include all known to be in existence whether reporting or not

[All money figures in millions and tenths of millions of dollars]

[1] Total premium receipts prior to 1910.
[2] Figures for 1895 to 1931 (also 1932 figures in italics) include adjustment expenses excluded thereafter.
[3] Including taxes.
[4] Figures through 1931, and 1932 figures in italics, include data for companies which transact life insurance in addition to accident and health insurance. Income and disbursement items include business of accident and health branches only of these life insurance companies, where companies were able to segregate data, while capital, assets, and net surplus include total amounts of these items for such companies, excluding, however, data for a few very large companies for which accident and health business is only a small proportion of the total business. Capital, assets, and net surplus are therefore overstated and in part duplicated in figures for life insurance companies in other tables. Figures for 1932 to 1934, except 1932 italics figures, relate to casualty, surety, and miscellaneous insurance companies only.
[5] Number of companies which show figures for the year.
[6] See note 4.
[7] Revised to exclude data for life departments of three companies (two for 1932) for which total assets and net surplus were included in figures previously published.
[8] Includes stock casualty, surety, and miscellaneous insurance companies, shown separately above, mutual companies, reciprocals, and Lloyds; number of companies and income and disbursement items also include accident and health departments of life insurance companies.

No. 312.—INSURANCE CARRIERS AND INSURANCE AGENCIES AND BROKERAGE OFFICES: NUMBER OF OFFICES, EMPLOYMENT, AND PAY ROLL FOR THE UNITED STATES, 1935

NOTE.—Carriers include all types of insurance coverage except title insurance and the guarantee of mortgages. Each carrier is considered as having only one home office. Insurance agencies and brokerage offices include insurance agencies, sub-agencies, and brokerage offices identifiable as business establishments; managing agencies for one or more carriers; attorneys-in-fact for Lloyds Associations and for reciprocal exchanges; and underwriter agencies. Classifications by kind of insurance in the case of multiple line companies submitting a consolidated report are based on the kind of insurance from which the major portion of the business is derived. For employment by occupational groups see table 369.

No. 314.—COMMODITY EXCHANGE TRANSACTIONS: VOLUME OF TRADING IN PRINCIPAL GRAIN FUTURES AND AMOUNT OF FEDERAL TAXES COLLECTED ON SALES OF ALL COMMODITIES FOR FUTURE DELIVERY

NOTE.—Trading in wheat and corn futures usually accounts for around 90 percent of the total volume of trading in grain futures. Statistics of the volume of future trading are not collected for commodities other than grains. The value of all futures sales is roughly indicated, however, by the amount of taxes collected on such sales. Since Oct. 3, 1917, stamp taxes upon sales of products or merchandise on exchanges, boards of trade, or similar places, for future delivery, have been in effect as follows: On each $100 of such sales or a fractional part thereof in excess of $100, 2 cents prior to July 2, 1924; 1 cent July 2, 1924, to June 21, 1932; 5 cents June 21, 1932, to May 11, 1934; 3 cents thereafter

No. 325.—CAPITAL ISSUES: SUMMARY, BY CLASSES, 1919 TO 1936

NOTE.—**In millions and tenths of millions of dollars.** Data cover domestic and foreign issues in the United States. Preferred stocks of no par value and all common stocks are taken at their offering price, other issues at par, except that in the figures for corporate issues for 1912 to 1918 all stocks are included at their market value. Corporate issues for 1912 to 1918 exclude real estate offerings and privileged stock subscriptions included in figures beginning 1919, and issues of less than $100,000. State and municipal issues include bonds issued by States, Territories, and possessions, counties and municipalities, and by school and road districts and other independent governmental bodies

No. 328.—COMMERCIAL FAILURES: NUMBER AND ASSETS AND LIABILITIES

NOTE.—In January 1936, statistics were revised to exclude failures of insurance and real estate agents and brokers, holding and finance companies, shipping agents, tourist companies, transportation terminals, and such, all of which were formerly included in the old group "Agents, brokers, and commercial service", and limited more strictly to commercial failures. These revisions make the failure record accord more nearly to the type of concerns included in the count of "Number of concerns in business", in which no changes were made. The following table and table 329 present revised statistics beginning with January 1933.

Year or yearly average	Number of failures	Liabilities (1,000 dollars)	Average liability	Year	Total number of concerns in business	Number of failures	Assets (1,000 dollars)	Liabilities (1,000 dollars)	Average liability

No. 331.—APPLICATIONS FOR REORGANIZATION UNDER SEC. 77-B, AMENDMENT TO THE BANKRUPTCY ACT: By Industrial Groups

Note.—Sec. 77-B, amendment to the Bankruptcy Act, effective June 1934, provided for the reorganization of companies in financial difficulties with sufficient assets in excess of liabilities to warrant reorganization. These 77-B cases should be considered in connection with commercial failures to obtain a complete picture of companies whose financial condition has brought them to the courts. There is some duplication when a company already in receivership files for reorganization, when a petition is an answer to involuntary bankruptcy, or when a 77-B company becomes bankrupt after reorganization. In general the 77-B provisions attract companies with extensive assets

12. NATIONAL WEALTH, INCOME, AND DEBT

(Data in this section relate to continental United States)

No. 334.—ESTIMATED NATIONAL WEALTH OF THE UNITED STATES: TOTAL, 1850 TO 1922, AND BY CLASSES OF PROPERTY, 1900 TO 1922

NOTE.—Estimates of national wealth for the earlier censuses were not made by precisely the same methods used more recently and are not closely comparable. Changes in buying power of money, as indicated by levels of prices and wages, materially affect the comparisons (see price tables in Sec. 13). For distribution of principal classes of property by States for 1912 and 1922, see Statistical Abstract, 1932, table 275. There have been no official estimates of wealth since 1922

No. 335.—WEALTH: ESTIMATED VALUE OF ALL TANGIBLE PROPERTY SITUATED IN EACH GEOGRAPHIC DIVISION AND STATE

NOTE.—See headnote to table 334. This table shows, not the value of property owned by the citizens of each State, but that of the physical property lying in each State wherever the securities or other evidences of title representing it may be found or owned. The per capita figures thus do not represent the average wealth of the citizens of each State

[1] Total differs from estimate as published in 1912 because of revision of estimate for taxed real property in Oklahoma. Includes $402,000,000 value of ships belonging to the United States Navy and $290,000,000 value of privately owned water-supply systems not distributed by States. Items for geographic divisions and States differ from estimate as published in 1912 because of redistribution of railroad values in accordance with the method employed in 1922.

[2] Total includes $1,446,000,000 value of ships belonging to the United States Navy, $361,000,000 privately owned water-supply systems, and $4,278,000,000 gold and silver coin and bullion not distributed by States.

[3] Includes Indian Territory.

No. 336.—NATIONAL INCOME PRODUCED AND PAID OUT

NOTE.—Under the concept of national income employed in this study, the following items have not been included: Imputed income from ownership of durable goods (including owned homes), the imputed value of services of housewives and other members of the family, earnings from odd jobs, direct relief and charity, earnings from illegal pursuits, and changes in value of assets not derived by groups professionally occupied in the handling of assets. Business savings represent the difference between the income produced in a given year and the amount actually distributed to individuals. Negative savings are incurred when the business system pays to individuals more than was produced in a given year.

No. 340.—LONG-TERM DEBT, PUBLIC AND PRIVATE: ESTIMATED AMOUNTS OUTSTANDING AT THE END OF THE YEAR, BY CLASSES

NOTE.—These figures represent gross debt. Insofar as possible, obligations held by the issuing corporation or individual are excluded, but no eliminations are made for intragroup and intergroup holdings of evidences of debt. Under the concept of long-term debt employed in this study, figures include, in general, debt issued with maturities of more than 1 year. Estimates for some items of private debt, partucularly for the earlier years, are subject to wide margins of error. Percentages indicating the estimator's opinion as to the probable margin of error for 1912 to 1934 are shown in the previous issue of this publication. The probable margin of error in the totals for the later years is around 3 percent. As the element of bias is believed to be in the same direction for all years, the figures are more reliable for the measurement of the flow of debt than to measure the absolute volume as of a particular date.

[1] This summary excludes the debt of financial corporations which is largely duplicated in other basic debt. Private financial corporative debt has been estimated at about $2,600,000,000 for recent years. Bonds, notes, and debentures of governmental corporations and credit agencies, excluding interagency liabilities and Federal land-bank bonds held by the Federal Farm Mortgage Corporation, amounted to $5,100,000,000 on Dec. 31, 1934, and $5,900,000,000 on Dec. 31, 1935; these figures include $3,300,000,000 and $4,500,000,000, respectively, of bonds guaranteed by the U. S. Government, representing contingent Federal debt.

[2] Funded debt actually outstanding for railways and switching and terminal companies. The 1930, 1934, and 1935 figures are raised to take account of receivers' certificates and funded debt matured unpaid. The margin of error is very small for these figures.

[3] Preliminary estimates from sample data.

[4] Figures are for corporations operating for profit and do not include debts of unincorporated business firms. Debts of the latter in the form of mortgage loans are included in urban realty debt figures.

[5] Figures for 1912, 1922, and 1930 are interpolated between estimates of the Bureau of Agricultural Economics on the basis of annual statistics of interest payable on farm mortgages published by that Bureau. The figure shown for both 1934 and 1935 is an estimate as of Jan. 1, 1935, by the Bureau of the Census, Department of Commerce, and the Bureau of Agricultural Economics, Department of Agriculture.

[6] Estimates are very rough. They include debts of unincorporated business enterprises and nonprofit corporations as well as real estate debts proper. Estimates for 1935 are tentative.

[7] For additional statistics relating to public debt, consult index for references to data in other sections.

[8] Includes bonds and Treasury notes and also, for 1922, Treasury war savings securities; these items constitute a debt figure which is roughly comparable with private long-term debt figures.

[9] Estimates as of June 30, 1913, 1923, 1931, and 1935. Data are not available for 1936.

13. PRICES

GENERAL NOTE.—The wholesale price index of the Department of Labor is based on primary market quotations of 784 commodities beginning 1926; a smaller number of commodities was covered in earlier years. The price of each article is weighted by the approximate quantities marketed during intervals fairly close to the period covered by the indexes. Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one of the classifications adopted were included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, were included among both farm products and foods. However, in computing the index for all commodities such articles were counted only once.

The retail food index presented in this section, with the exception of certain data shown in table 349, is a revised series. The revised indexes are computed from aggregate costs of 42 foods in 51 large cities prior to January 1, 1935, and of 84 foods since that date. To obtain the aggregate cost in each city, the average prices of individual foods were combined by means of weights based on total purchases of wage earners and lower salaried workers in 1918. City costs were combined with the use of population weights to determine the cost for the United States as a whole. Prior to August 1933, prices were collected on the 15th of the month; thereafter they were collected every 2 weeks.

The farm price index is based on prices paid to producers for 34 major crops and beginning 1924, also 13 commercial truck crops. Average quotations for the period, August 1909–July 1914, are used as a base, and each price series is weighted by the average annual marketings of farmers in the years 1924 to 1929.

No. 346.—WHOLESALE PRICES: INDEX NUMBERS, ALL COMMODITIES AND BY ECONOMIC CLASSES

NOTE.—Figures in boxes indicate number of quotations. As originally published, Bradstreet's "Index" is the sum of the prices per pound of 96 commodities; Dun's represents the aggregate cost per capita of a year's supply of the approximately 300 commodities included. In the following table, both series have been expressed as a percentage of 1926 by the Bureau of Foreign and Domestic Commerce. Indexes of the National Bureau of Economic Research for 1916 to 1928 are unweighted geometric means for approximately 490 commodities (converted from a 1913 base to a 1929 base by the Bureau of Foreign and Domestic Commerce); for subsequent years they are weighted arithmetic means for 680 price series, the weights being based upon the average value of production in 1927 and 1931. For method of computing the Department of Labor index see general note, p. 299

[1] Beginning 1926. In earlier years a smaller number of commodities was included.

[2] Number of quotations used beginning 1929; see headnote regarding earlier years. The sum of the number of quotations for producers' goods and consumers' goods and for durable and non-durable goods is greater than the number of all commodities owing to duplication of certain price series in the classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

[3] Perishable and semi-durable.

No. 347.—COST OF GOODS PURCHASED BY WAGE EARNERS AND LOWER-SALARIED WORKERS IN THE UNITED STATES: INDEX NUMBERS

NOTE.—**1923–1925 average=100.** Figures for food represent 51 cities since 1920 and a smaller number in earlier years; other figures, 19 cities from 1913 to 1917, and 32 cities thereafter. Totals weighted by relative importance of items as ascertained by country-wide study of cost of living made in 1918–19. Except for 1913, the annual average indexes for items other than foods, are estimates based on indexes compiled as of particular dates at irregular intervals, shown in previous issues of this publication. They represent weighted averages of indexes for each pricing period affecting the year. For example, where goods were priced in June and December, the indexes for December of the previous year were considered in arriving at the average for the year. The annual average food index is based on monthly indexes

No. 349.—RETAIL COSTS OF ALL FOODS: INDEX NUMBERS, 1890 TO 1936

NOTE.—The "old series" represents the series carried in the 1935 and previous issues of the Statistical Abstract converted from a 1913 base by the Bureau of Foreign and Domestic Commerce. The simple average of indexes for 1923, 1924, and 1925 on the 1913 base was used for converting. The "revised series" published for 1923 to 1936 incorporates certain changes in methods of weighting and computation (see last paragraph of general note, p. 299, for a brief description of this index)

No. 353.—ANNUAL AVERAGE UNIT VALUES OF IMPORTANT ARTICLES IMPORTED INTO THE UNITED STATES

NOTE.—The values are required by law to represent the values of the goods *in the foreign markets* whence exported to the United States. "Ton" signifies long ton of 2,240 pounds. The averages are obtained by dividing the total value of imports of the specified article by the total quantity, and as in some commodities there may be considerable variations in price between different grades, methods of packing, etc., and as the proportions of the grades, etc., may vary from year to year, the averages in such cases may show the actual price movements only roughly

14.—WAGES, HOURS OF LABOR, AND EMPLOYMENT

[Data in this section relate to Continental United States, except as noted. For data relating to hours of labor, wages, and employment shown in other sections, consult the index]

No. 355.—AVERAGE HOURS AND EARNINGS IN SELECTED MANUFACTURING INDUSTRIES

NOTE.—The number of establishments supplying monthly data on which averages in this table are based varies and, therefore, the averages shown are not strictly comparable. The reporting samples, however, are in practically all instances large enough to be representative of the industry generally. The average weekly earnings do not represent full-time earnings inasmuch as the data from which they are computed include both full-time and part-time workers. The average weekly hours and average hourly earnings are derived from somewhat smaller "samples" than the average weekly earnings. The latter figures, therefore, differ from the product of average weekly hours and average hourly earnings.

No. 356.—INDEX NUMBERS OF AVERAGE WEEKLY EARNINGS IN MANUFACTURING INDUSTRIES, OF COST OF LIVING, AND OF WEEKL YEARNINGS ADJUSTED TO THE COST OF LIVING INDEX

NOTE.—1923-25 average=100. The indexes of average weekly earnings in this table are derived from the employment and pay-roll indexes shown in table 360. For information regarding the indexes of cost of living, see headnote, table 347, p. 305. The significance of changes in average earnings is affected by such considerations as labor productivity, labor cost per unit of output, labor turnover, and wholesale prices. Such qualifying data are embodied in detailed reports of the Bureau of Labor Statistics

[1] Changes in United States wage rates are affected by the relative number of men employed in areas with higher or lower wage rates.
[2] Beginning with March 1932 through December 1935, data from State projects also are included.
[3] Average for 10 months. [4] Average for 9 months. [5] Average for 11 months.
[6] Federal-aid projects were at a low level for 1933 to 1935 and wage rates are not representative, see data for emergency, etc., projects.
[7] Data are based upon the type of project that employed the greatest number of men for the given year.

No. 360.—INDEXES OF EMPLOYMENT AND PAY ROLLS IN MANUFACTURING INDUSTRIES: REVISED SERIES

NOTE.—**Monthly average, 1923–25=100.** Indexes are currently based on monthly reports from establishments representing 89 industries beginning 1931 (52 to 61 industries in earlier years) and employing approximately 55 percent of all factory employees in the United States. The indexes in the following table and in tables 361 to 364 have been adjusted to conform with the Federal Biennial Census data on employment and pay rolls through the year 1933. Indexes are weighted according to the average number of employees and the average weekly pay rolls in the base period 1923–25 in each of the component industries and are without seasonal adjustment. A detailed description of the construction of these indexes is given in Bulletin No. 610, published by the Bureau of Labor Statistics, and in a supplement to Bulletin 610, which is now being prepared. See table 361 for seasonally adjusted indexes of employment.

[1] Compiled by Massachusetts Department of Labor and Industries, based upon monthly returns from approximately 1,700 manufacturing establishments employing about 55 percent of the factory wage earners in the State. Office workers assigned to productive departments are included, but not executives, salaried officers, etc. The employment indexes are adjusted to the annual State census of manufactures through 1934. Pay-roll indexes are based upon a computation of employment times average weekly earnings.

[2] Compiled by the New York State Department of Labor, based upon monthly reports from approximately 2,117 manufacturing firms who employ about 38 percent of all the factory workers in the State. Reports cover employees in both office and shop, including foremen. Executives and salesmen are omitted, and administrative and sales offices located away from the plants are not covered.

[3] Compiled by the Federal Reserve Bank of Philadelphia. For New Jersey, indexes are based upon monthly reports to the bank from 1923 to 1926 and since then, to the New Jersey Bureau of Statistics and Records of the Department of Labor. Current reports are from about 750 manufacturing plants which account for approximately 59 percent of all wage earners engaged in manufacturing industries of the State and 64 percent of the total wage payments. For Pennsylvania, indexes are based upon reports collected by the bank in cooperation with the U. S. Bureau of Labor Statistics and the Pennsylvania Department of Labor and Industry. Current reports are from over 2,300 manufacturing plants and represent about 55 percent of all workers and their earnings in the manufacturing industries of the State. Indexes are weighted according to the relative importance of each industry in the State totals. For Delaware, indexes are based upon reports collected by the bank in cooperation with the U. S. Bureau of Labor Statistics. Current reports are from about 80 manufacturing plants and represent approximately 57 percent of all workers engaged in manufacturing industries of the State and 64 percent of the total wage payments. The indexes for the three States have been adjusted to conform with the Federal Census of Manufactures data through 1931 and will be similarly adjusted to subsequent censuses.

[4] Compiled by the Illinois Department of Labor, based upon monthly reports from about 2,042 manufacturing plants covering wage earners (production employees) only. Reports represent approximately 47 percent of all wage earners engaged in manufacturing industries of the State and 45 percent of the total wage payments.

[5] Compiled by the Industrial Commission of Wisconsin, based upon monthly reports from a representative list of manufacturers who employ about two-thirds of the total factory wage earners (manual employees only) in the State. Current data are based on reports from about 730 manufacturing establishments, which employ approximately 165,000 shop workers. The indexes are weighted averages of relatives.

No. 367.—AVERAGE WEEKLY AND HOURLY EARNINGS: ALL WAGE EARNERS AND CLASSIFIED GROUPS OF LABOR, 25 MANUFACTURING INDUSTRIES

NOTE.—Index numbers based on 1923 as 100. Data cover a representative number of plants which employed 1,560,000 workers during 1936. The earnings are computed by weighting the average earnings in each industry according to the relative importance of the industry as revealed by the Federal Biennial Census of Manufactures for 1923. In addition, each labor group is weighted according to the relative proportion of the group in each industry as revealed in the Conference Board's studies during the 3-year period 1927–29. The pay-roll data are based upon the first full week in each month, or, if a generally recognized holiday falls in that week, upon the succeeding week

[2] Adjusted to conform with the Federal Census data through 1933 for trade and hotels, and 1931 for laundries, and dyeing and cleaning. Indexes for hotels relate to year-round hotels having 25 or more guest rooms; pay-roll indexes represent cash payments only; the additional value of board, room, and tips cannot be computed.

No. 369.—EMPLOYMENT, PAY ROLLS, AND AVERAGE WEEKLY WAGES FOR FULL-TIME EMPLOYEES, BY OCCUPATIONAL GROUPS, FOR SPECIFIED INDUSTRIES OR BUSINESSES

NOTE.—**Pay-roll figures are in thousands of dollars.** Data are for 1 week in 1935—in general, the week ended October 26, but where this period was not representative figures are for 1 week of normal employment. The figures are summarized from reports secured in connection with the 1935 Census of Business, and cover only those establishments or concerns which gave detailed information by occupational groups. For the average number of employees (full-time and part-time) and total pay rolls for 1935, consult index for references to data for the individual industries and businesses shown elsewhere in this publication.

No. 370.—INDEXES OF UNION SCALES OF HOURLY WAGE RATES AND WEEKLY HOURS IN BUILDING AND PRINTING TRADES: BY OCCUPATIONS

NOTE.—Data for the earlier years cover 39 cities. The coverage was gradually extended until, beginning with 1934, 70 cities were included. The figures are based upon the scale prevailing May 15 each year. The relative wages are percentages which indicate the change in wages per hour. The relative hours are percentages showing the change in the regular full-time hours per week, account not being taken of loss of time from slack work or other causes, nor of overtime work. See also headnote, table 371.

No. 371.—UNION WAGE RATES PER HOUR AND HOURS PER WEEK IN SELECTED TRADES, AS OF MAY 15

NOTE.—Data are compiled from a survey made of 70 cities for 1934 through 1936, and of 67 cities for prior years, which were selected on the basis of size, geographical distribution, and presence of trade-union organization. Rates were obtained for each of the principal time-work trades in all cities covered in which there were local unions and represent rates provided for in union agreements. The union membership covered by these agreements in 1935 was approximately 539,000 and in 1936, 600,000. The averages for each trade are weighted according to the number of members in the various local unions

No. 372.—STRIKES: Number of Strikes, Number of Workers Involved, and Man-Days Idle

Note.—The term "strike" is here used in the generic sense to include all stoppages of work due to labor disputes, whether initiated by the employers (lock-outs) or by the workers. Strikes involving fewer than 6 workers or lasting less than 1 day are not included. Notices or leads regarding strikes are obtained from 670 daily papers, labor papers, and trade journals, as well as from all Government labor boards.

No. 374.—EMPLOYMENT AND PAY ROLLS ON PROJECTS FINANCED FROM PUBLIC WORKS ADMINISTRATION FUNDS

NOTE.—**Pay-roll disbursements in thousands of dollars.** The construction program financed by the Public Works Administration was inaugurated under authority of the National Industrial Recovery Act of June 16, 1933, and extended to June 30, 1937, by the Emergency Relief Appropriation Act of 1935 and the First Deficiency Appropriation Act of 1936, cited as the Emergency Relief Appropriation Act of 1936. Data relate to workers at the site of Federal and non-Federal construction projects and jobs in railway car and locomotive shops financed in whole or in part from Public Works funds. Employees engaged on force-account projects (projects for which contracts are not let) conducted by Federal agencies and railway car and locomotive shops are duplicated in employment data shown elsewhere for Federal executive service and railroads. Monthly figures are for months ended on the 15th. Data beginning with July 1935 include employees working on Public Works Administration projects financed from E. R. A. A. 1935 and 1936 funds. These data are also included in table 375

No. 376.—UNEMPLOYMENT RELIEF: NUMBER RECEIVING EMERGENCY RELIEF AND OBLIGATIONS INCURRED FOR EMERGENCY RELIEF FROM PUBLIC FUNDS

NOTE.—Figures for the latter part of 1935 reflect the transfer of relief cases to the new Works Program which began operation in July under authority of the Emergency Relief Appropriation Act of 1935, and the gradual withdrawal of the Federal Emergency Relief Administration from the financing of relief operations. In a majority of States, general relief operations were continued by State and local agencies, using the balances of Federal funds and other public funds. Reports through December 1935 cover the general relief program (direct and work relief) and special programs (rural rehabilitation, emergency education, and college student aid); subsequent data are intended to include all general relief from public funds other than institutional care, hospitalization and burial, and special types of public assistance such as aid to the blind, aid to dependent children, and old age assistance. The figures do not include activities conducted under the Civil Works Program nor, after June 1935, the rural rehabilitation program (transferred to Resettlement Administration) and the college student-aid program (not in operation in July and August 1935 and conducted by the National Youth Administration thereafter). Data are from reports by the States through December 1935; subsequently they are partially estimated. For data for 1933, see table 373 of the 1936 issue of the Statistical Abstract

No. 379.—ACTIVITIES OF OFFICES OF THE STATE EMPLOYMENT SERVICES AND THE NATIONAL REEMPLOYMENT SERVICE

NOTE.—Data represent United States Employment Service which operated about 600 urban and district offices, and about 850 additional branches and temporary offices during June 1937. Operations are conducted through a Nation-wide system of State employment services affiliated with the United States Employment Service under the terms of the Wagner-Peyser Act, whereby State appropriations are matched within limits, after the State service has conformed to the Federal operating standards. By agreement with the Works Progress Administration, beginning with May 1935 certified relief recipients are registered and are included in the active file. Field visits represent the number of employer contacts. Data by States, industries, etc., are published by the United States Department of Labor.

[1] Excluding rural free delivery routes, ocean mail routes, and air mail routes to foreign countries.
[2] Audited postal surplus or deficit which is greater or less than excess of receipts or expenditures by the amount of adjusted losses and contingencies.
[3] International includes foreign countries on domestic basis. For explanation see headnote table 382.
[4] Data are for continental United States and are estimates except in 1923 and beginning with 1926, when figures are accurate calculations. No estimates made from 1914 to 1922, inclusive.
[5] Postage stamps first issued under act of Mar. 3, 1847, and placed on sale at New York July 1, 1847.
[6] From Nov. 1, 1864, when money-order system first went into operation, to June 30, 1865.
[7] From Sept. 1, 1869, to June 30, 1870. International money orders first issued under convention of Oct. 12, 1867.
[8] Gross revenues of department for 1918 and 1919 include $44,500,000 and $71,292,000, respectively, war-tax revenue accruing from increased postage.

No. 382.—POSTAL MONEY-ORDER BUSINESS: YEARS ENDED JUNE 30

NOTE.—For revenues from money orders, see table 381. For value of orders issued for other years, see table 380. Money orders are exchanged on a domestic basis not only within this country, but with its outlying possessions, Canada, Cuba, and numerous islands and minor countries neighboring the United States. International-basis orders are exchanged between the United States and its outlying possessions, on the one hand, and other than "domestic basis" foreign countries, on the other. In this table, however, "International" includes money orders exchanged between the United States and "domestic basis" foreign countries, and these are not included in "Domestic"

No. 384.—TRANSPORTATION OF DOMESTIC MAILS

NOTE.—**Amounts, except as indicated, in thousands of dollars.** Since Nov. 1, 1916, all service on steam railroads is authorized and paid for under the space basis system; formerly, payments were based on a system of quadrennial weighings. Railway mail space units of service vary in size and character and may consist of a car, a section of a car, or a closed pouch carried on a car. Some cars are railway post offices, others are for storage only, about 20 classes of units being distinguished. The "equated unit" represents a calculation of the equivalent of all the different units in terms of a 60-foot car. Annual rate of expenditure (regular authorizations) represents estimated cost for transporting normal mail traffic over regular routes only, based on contracts outstanding at the end of each fiscal year. "Annual cost" includes emergency and side and transfer service. Average rates are based on "regular authorizations"

No. 392.—TELEPHONE SYSTEMS: REPORTS TO THE INTERSTATE COMMERCE COMMISSION AND TO THE FEDERAL COMMUNICATIONS COMMISSION

NOTE.—Companies engaged in interstate business are required to report both as regards interstate and intrastate business. Prior to 1923 the classification of companies based on the amount of annual operating revenues was as follows: Class A, over $250,000; class B, $50,000 to $250,000; class C, $10,000 to $50,000. Effective Jan. 1, 1923, the classification was amended as follows: Class A, over $250,000; class B, $100,000 to $250,000; class C, $50,000 to $100,000; class D, $50,000 or less. A further change was made effective Jan. 1, 1933, as follows: Class A, over $100,000; class B, $50,000 to $100,000; class C, $50,000 or less. The companies below $50,000 are not covered in the table

[1] Not including bootleg or stolen coal; if this were included the energy from anthracite and the total energy in 1935 and 1936 would be increased by approximately 109 trillion British thermal units.
[2] The fuel equivalent for water power is calculated from the reported horsepower of installed water wheels. Prior to 1890 data were unsatisfactory, but estimates are included in the total.
[3] Calculated at 26,200,000 British thermal units per ton.
[4] Based on the amount of coal displaced by gas, as estimated by the gas companies.

No. 399.—ELECTRICITY PRODUCED, CONSUMPTION OF FUEL, AND CAPACITY OF GENERATORS IN PUBLIC-UTILITY POWER PLANTS

NOTE.—Data are estimated totals for all plants, based on returns from about 3,500 plants in 1919 to about 3,745 in 1936, each producing 10,000 kilowatt-hours or more per month, engaged in public service, including central stations, electric railways, steam railroads generating electricity for traction, and certain other plants. The capacity of plants reporting is about 95 percent of that of all plants. For Bureau of the Census data for 1902 and 1912, see the 1936 Statistical Abstract, table 396.

No. 402.—CENTRAL ELECTRIC STATIONS: EQUIPMENT, EMPLOYEES, OUTPUT, AND SALES

NOTE.—A central electric station, commercial or municipal, is one either generating and selling electrical energy, or selling only, to public or private consumers. Figures do not include establishments which consume all current generated, such as mines, factories, hotels, and other enterprises not in the nature of public utilities, nor plants operated by the Federal Government or by States unless energy is sold commercially. No data are included for electric-railway power plants unless part of the current generated is sold. There is considerable duplication in total sales, since they include energy sold for resale. Amount sold is considerably less than current generated due to line losses, etc.

No. 409.—DEVELOPED AND POTENTIAL WATER POWER

NOTE.—**In thousands of horsepower.** Data for developed water power cover capacity of actual installation of water wheels and turbines in plants of 100 horsepower or more. Potential power figures are 1936 revised estimates showing the 24-hour horsepower available 90 percent of the time and 50 percent of the time at an over-all efficiency of 70 percent at all developed and undeveloped sites. Data for potential power are not directly comparable with those for developed power, because developed power is usually given in terms of the capacity of installed water wheels or turbines, which may be several times the potential power available 90 percent of the time. Probably with complete development of the water-power resources of the whole country the installed capacity would amount to 80,000,000 horsepower or more

18.—PUBLIC ROADS AND MOTOR VEHICLES

No. 410.—RURAL ROADS IN THE UNITED STATES

NOTE.—Mileage data included for county and township roads in 1921 and 1926 were secured from county records; data for other years shown in this and subsequent tables contain some estimates and are not as accurate as to detail. Figures for county and township roads not available subsequent to 1930. Data in most cases refer to calendar years; there are, however, exceptions in some States. Data relate to continental United States only, except as noted

[1] Low type includes top-soil, sand-clay, gravel, chert, shale, etc., waterbound macadam, and low-cost bituminous mix; high type includes bituminous macadam, bituminous concrete, sheet asphalt, portland cement concrete, block pavements, and timber flooring on bridges.

[2] Includes 11,303 miles of unclassified roads. [3] Includes mileage partially graded and drained.

[4] Includes original and reconstructed surfacing. [5] Includes 368 miles of unclassified roads.

[6] Excludes funds transferred. [7] Excludes balance on hand at beginning of year; not reported in 1921.

[8] For road and bridge purposes under supervision of State highway department only.

[9] Includes an undetermined amount of municipal street mileage on State highway systems or connecting these systems. Beginning with 1933 such mileage is included, however, for only a few States. Figures prior to 1934 also include mileage of secondary road systems under State control for a number of States.

[10] Primary systems only. See also note 9. [11] Includes funds transferred to or from local units.

[12] Includes data for Hawaii except 1926 figures for projects approved for construction. For 1936 data regarding emergency road construction and grade crossing projects, see table 415.

No. 411.—RURAL ROAD MILEAGE AS OF DECEMBER 31

NOTE.—Data include all rural roads. In some cases variations in mileage from that of the previous year shown are partly because of more accurate survey of road mileage. Data in most cases relate to Dec. 31; there are, however, some exceptions. Data for local roads subsequent to 1930 are not available. For mileage of State highway systems as of Dec. 31, 1936, see table 412

No. 413.—DISBURSEMENTS FOR HIGHWAYS UNDER SUPERVISION OF STATE HIGHWAY DEPARTMENTS, INCLUDING FEDERAL AID

NOTE.—Figures include disbursements, whether from current revenues or the proceeds of loans, for construction, maintenance, interest and principal payments on highway bonds, transfers to local units, and miscellaneous disbursements. Data beginning 1934 cover calendar years, while figures for earlier years for many States represent fiscal years. For the States reporting on a fiscal year basis in 1933, the net total disbursements for interim and overlapping periods between 1933 and 1934 amounted to $124,428,000

No. 423.—AUTOMOBILE FATALITIES IN STATES AND LARGE CITIES HAVING DEATH REGISTRATION

NOTE.—Figures include all deaths from accidents caused by motor vehicles except motorcycles, but exclude deaths from collisions of automobiles with railroad trains and street cars. See table 74 for percent of total population included in the registration area for each year prior to 1933; since 1933 the entire population is included. Rates for 1930 to 1935 for registration States and for Washington, D. C., are based on revised estimates of population. Population estimates for cities other than Washington are not available for 1934 and 1935 and estimates for earlier years have not been revised

19.—TRANSPORTATION, AIR AND LAND—STEAM AND ELECTRIC RAILWAYS, EXPRESS COMPANIES, MOTOR BUSSES, AND CIVIL AERONAUTICS

[Data in this section relate to continental United States unless otherwise stated]

GENERAL NOTE.—The total steam railroad mileage of the United States includes: (a) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission, (b) switching and terminal railroads, also reporting to the commission; and (c) private railroads (defined by the commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of their annual operating revenues, class I, having more than $1,000,000 of such revenue; class II, from $100,000 to $1,000,000; and class III, less than $100,000. During recent years more detailed reports are required from class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of class II and class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district, the remainder of the country.

Class I companies make monthly reports from which data are compiled currently and published in a series of monthly statements. The yearly totals from these reports become available earlier than the sometimes slightly corrected totals from the final annual reports. The latest figures in these tables are in many cases from the monthly reports.

No. 424.—RAILWAY MILEAGE OWNED AND MILEAGE OPERATED CLASSIFIED BY TRACKAGE

NOTE.—Beginning with 1908 switching and terminal roads are omitted (they operate about 2,300 miles of main tracks). The first and second columns cover all railways, including "circular" and "unofficial" lines; the last five columns omit "circular" and "unofficial" lines. Mileage owned excludes all duplication and covers continental United States only. Mileage operated includes some duplication under trackage rights and some mileage in Canada operated by United States companies

[1] Data exclude switching and terminal companies beginning 1910. Class III roads are excluded in 1913. Exclusion of the latter has practically no effect on the comparability of the figures. Information for 1915 is incomplete, as 20 of the larger railways did not report, and is not shown.
[2] Calculated for all classes of employees, including those not paid on an hourly basis.
[3] Data cover Federal reports, reports of companies not under Federal control, and corporate reports.

NOTE.—All amounts except "per mile of road" in millions of dollars. Switching and terminal companies excluded beginning with 1910; their total capitalization in 1935 was $809,292,157. Figures include both operating and nonoperating railways. The gross figures include considerable amounts of securities held by the companies issuing them as well as larger amounts held by other railway companies

No. 436.—RAILWAY STOCK OUTSTANDING, DIVIDENDS, AND INTEREST

NOTE.—Data relate to years ending June 30 prior to 1916 and to calendar years thereafter. Nonoperating as well as operating roads are included. Switching and terminal roads are excluded beginning with 1908. Dividend figures throughout cover all classes of roads, but interest figure for 1913 excludes the unimportant class III roads. The amount of stock shown in the first column is exclusive of stock held by the issuing company, but includes that held by other railway companies

[1] Prior to 1925 figures include investment of leased lines and exclude investment of proprietary companies not rendering annual reports. Beginning with 1925, the investment in road and equipment of proprietary companies is included as follows: 1925, $480,216,000; 1926, $831,574,000; 1927, $919,095,000; 1928, $1,013,752,000; 1929, $1,051,469,000; 1930, $1,095,631,000; 1931, $1,114,637,000; 1932, $1,121,945,000; 1933, $1,096,264,000; 1934, $890,581,000; 1935, $861,716,000. No allowance is made for cash and material and supplies, and no deduction is made for depreciation.

[2] Investment originally published is increased by $170,000,000, estimated reserve for depreciation.

[3] Does not include returns for class II and class III companies.

No. 446.—REVENUE FREIGHT CARRIED, BY COMMODITY GROUPS

NOTE.—**All figures in thousands of tons of 2,000 pounds.** Data relate to years ended June 30 prior to 1916, to calendar years thereafter. Switching and terminal roads excluded beginning with 1908. Figures for 1911 to 1915, inclusive, exclude class III roads but this affects the comparability very slightly; those after 1916 exclude both class II and class III, thereby reducing the grand total about 6 percent. Non-revenue freight is excluded; this is a large item in the case of a few commodities, notably coal

Class of road and year or yearly average	Total	Products of agriculture	Animals and products	Products of mines		Products of forests	Manufactures and miscellaneous	
				Coal and coke	Other		Carload shipments	Less than carload

No. 450.—PERSONS KILLED AND INJURED IN RAILWAY ACCIDENTS

NOTE.—For various reasons, including the fact that returns were required under different acts, the statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of $150 or any damage and a resulting casualty. Thereafter they were considered as such when the damage exceeded $150 with or without a casualty. Where the damage is less than $150 and there is a reportable casualty it is classified as a train-service accident. Figures for years 1911–1915 include industrial and other nontrain accidents to employees only, and for years 1908–1910 do not cover switching and terminal roads. Otherwise the statement covers all reportable accidents

[1] The ratio of fuel oil to coal is based upon the experience of the various roads; 1 cord of hardwood equals two-thirds ton of coal; 1 cord of softwood equals one-half ton of coal.
[2] Totals include equivalent of a small amount of miscellaneous fuel.
[3] The total charges shown do not include the labor cost of applying the rails or ties.

No. 455.—ELECTRIC RAILWAYS: Summary of Operations

Note.—This table does not include the electric operations of steam railway companies nor motor-bus operations of electric railways; for motor-bus statistics see table 463. Many electric railway companies also engage in other operations, especially in the sale of current for light and power; wherever possible, such light and power business has been excluded, but for numerous companies this is impossible. No distribution can be made in the statistics between purely urban street railways and suburban and interurban lines. The insignificant amount of business still conducted by cable and animal traction is included, as well as some operations conducted by primarily electric railways by means of steam traction and gasoline engine cars. Mileage figures expressed in nearest mile

[1] Includes companies maintaining separate organizations, though leased to and controlled through stock ownership by other companies, largely in Pennsylvania. In 1912 these companies were treated as merged and not included in the number reported.

[2] Includes small mileage of track lying outside the United States.

[3] Compressed air.

[4] Includes 1.26 miles of nonelectric track in 1922, 1.20 miles in 1927.

[5] Complete data not available. In 1927 a number of composite companies included the value of electric railway road and equipment in the value of their entire plant and equipment reported on their combined balance sheet on the light and power schedule and advised that this could not be separated. Statistics for Central Light and Power Stations include their combined figures.

[6] Including revenues and expenses from auxiliary operations, except in 1932. Prior to 1927, auxiliary operations include data for electric light and power departments of electric railways; beginning with 1927, such data for most companies have been reported on separate schedules and are included in the statistics for "Central Electric Light and Power Stations."

[1] Mileage expressed in nearest mile. Figures include track lying outside the United States (1912, 32 miles; 1917, 1922, and 1927, 27 miles; 1932, 24 miles).

[2] In 1927 overhead trolley includes 25 miles of surface lines operated by both overhead trolley and gas-electric motor cars; in 1932, includes 2 miles operated by both overhead trolley and conduit and 2 miles operated by both overhead trolley and oil-electric motor cars.

[3] Figures for power-plant equipment, capacity of generators, and output of stations in 1927 and 1932 are not comparable with those in prior years, as companies that formerly reported these data as auxiliary operations on railway schedules furnished separate and complete reports for light and power operations in 1927 and 1932. These are included in the statistics for "Central Electric Light and Power Stations." The number of companies that reported power-plant equipment in 1912 was 494; in 1917, 355; in 1922, 232; in 1927, 70; in 1932, 39.

[4] Includes 33 units with 41,100 horsepower of idle equipment in 1927 and 18 units with 63,167 horsepower of idle equipment in 1932.

[5] Not shown separately.

[6] Not including passengers carried by motor busses operated by electric railway companies (16,120,000 in 1922; 214,694,000 in 1927; 880,543,000 in 1932).

[7] Exclusive of idle track and freight and switching roads for all years except 1932.

No. 457.—ELECTRIC RAILWAYS:

NOTE.—See headnote to table 455. The track mileage represents that actually lying in each State, but all ducted in other States. The differences among the States in the relation of passengers carried to of interurban as against purely urban traffic. Data for motor-bus lines represent those operated Revenue car mileage represents passenger, express, freight, and mail-car mileage

Operating Statistics, by States

other data relate to the total operations of companies domiciled in the State, part of which may be con-
passenger revenue and in other similar ratios are largely due to differences in the relative importance
directly by electric railways; lines operated by subsidiary and successor companies are *not* included.

No. 465.—COMMON CARRIER MOTORBUS TRANSPORTATION, MOTOR-TRUCKING FOR HIRE, AND PUBLIC WAREHOUSING: SUMMARY FOR THE UNITED STATES, 1935

NOTE.—**Revenue and pay roll in thousands of dollars.** The motorbus transportation census was limited to concerns that received 50 percent or more of their revenue from common carrier bus transportation operations, excluding bus lines operated by municipalities, electric railway companies and their subsidiaries, and directly by steam railroads. School bus operations are also not included. The survey of motor trucking for hire covered only those concerns that received 50 percent or more of their revenue from the transportation of other people's goods for a price and whose annual revenue was at least $200. Individuals and concerns engaged primarily in trucking for their own use are not included. While the coverage of trucking for hire is not complete, data must represent a large proportion of such business. The classification of motortrucking for hire and bus transportation concerns into local, intrastate, and interstate is based on the type of operation which accounted for the major portion of their business. The warehousing survey was limited to individuals and companies receiving 50 percent or more of their revenue from public warehousing and at least $500 revenue, excluding the following types of public warehousing: Field warehouses, apple sheds, potato pits, State and municipal warehouses, open yard and wharf storage, and automobile storage

20.—WATERWAYS, WATER TRAFFIC, AND SHIPPING

[Data in this section cover the following areas unless otherwise indicated: From Board of Engineers of the United States Army and Bureau of Foreign and Domestic Commerce, United States customs area which includes Alaska, Hawaii, and Puerto Rico, and, beginning Jan. 1, 1935, Virgin Islands; from United States Shipping Board, continental United States]

General note as to units of measurement.—"Cargo tonnage" represents weight of cargo in long tons (2,240 pounds) or short tons (2,000 pounds). All other tonnage figures refer to capacity of vessels. The terms gross and net tonnage refer to space measurement, 100 cubic feet being called 1 ton. Gross tonnage is the capacity of the entire space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers or crew, with certain minor exemptions. Net or registered tonnage is what remains after deducting from the gross tonnage the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead-weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety. Displacement tonnage (naval vessels) has reference to weight of the vessel itself with its normal equipment, fuel, etc.

[1] Includes the following, with figures for 1935: Harbor traffic of New York, Philadelphia, and San Francisco (36,272,000 tons); local traffic of other seaports (38,594,000); local traffic of lake ports (5,608,000).

[2] Excluding St. Marys Falls Canal traffic (48,293,000 tons in 1935) and additional Detroit River traffic (27,486,000 tons in 1935), both of which are already counted in Great Lakes traffic; also excluding duplications relating to rivers and canals themselves.

[3] Principally coastwise and lake traffic passing through canals and connecting channels, other than the St. Marys Falls Canal and the Detroit River.

[4] Estimated from data in this table on the assumption that all the duplications deducted from the grand total represent duplications in domestic traffic; there are, however, some minor cases of duplication connected with foreign traffic.

No. 468.—COMMERCE OF PRINCIPAL UNITED STATES OCEAN PORTS, 1935

NOTE.—**In thousands of short tons of 2,000 pounds.** *In addition to the commerce here shown, many of the ports have (1) commerce with ports on internal rivers and canals; (2) purely local port traffic, including in the case of New York, Philadelphia, and San Francisco, what is called intraport traffic between parts of a harbor for which separate statistics are maintained. These forms of traffic, although the aggregate tonnage is large, are of much less economic importance than foreign and coastwise traffic*

[1] Totals include data for rivers not shown separately.
[2] Includes cargoes in transit.
[3] Internal traffic only; figures do not include ocean-borne traffic at ports.
[4] Figures prior to 1935 represent traffic from Minneapolis, Minn., to New Orleans, La. They cover gross traffic, which represents the addition of the tons carried over each of the several stretches of the river, and therefore include some duplication owing to the overlapping of traffic. Data for 1935 represent net traffic which excludes duplication; net traffic for 1934 from Minneapolis to New Orleans is 16,038,000 tons.
[5] Data represent traffic on the Illinois River only.

[1] Sailing vessels, canal boats, and barges.
[2] Dec. 31.
[3] The decrease of tonnage arises principally from the registered tonnage having been corrected in 1818, 1829, and 1830 by striking off all vessels the registers of which were granted prior to 1815, which were supposed by the collectors to have been lost at sea, captured, etc.
[4] Sept. 30.
[5] Including Puerto Rico in all years shown and Virgin Islands beginning 1920.
[6] Including Hawaii and Alaska.

[1] After deduction of canal earnings repaid to appropriations.
[2] No interest charge against the Canal is actually made by the Treasury. In order to present the net results of the operation of the Canal, the interest on capital invested is computed at a rate considered reasonable for Government borrowings over an indefinite period. Computed interest to June 30, 1921, is included in capital investment account.
[3] Deficit.

No. 489.—NET TONNAGE OF VESSELS ENTERED AND CLEARED IN FOREIGN TRADE

Note.—Domestic trade is not included. For definition of net tonnage see general note, p. 404. Figures cover years ended June 30 to and including 1918, calendar years thereafter. Owing to the marked effect of the war on shipping a special average for the 6½ years July 1, 1914, to Dec. 31, 1920, is presented

21.—FOREIGN COMMERCE OF THE UNITED STATES

GENERAL NOTE.—All statistics of foreign commerce in this section are compiled in the Bureau of Foreign and Domestic Commerce, Department of Commerce. Except as noted (as, for example, in table 525) the values stated are in United States dollars without reference to changes in the gold content of the dollar. (The statutory price of gold—$20.67 per ounce—in effect prior to January 31, 1934, was changed on that date by Executive Order to $35.00 per ounce. Between March 10, 1933, and January 31, 1934, the foreign exchange value of the dollar was permitted to depreciate as a result of restriction placed on gold shipments to foreign countries.) The geographic area covered by these statistics, except as noted, is the United States customs area, which includes Alaska, Hawaii, and Puerto Rico, and, beginning January 1, 1935, the Virgin Islands (see headnote, table 499). Other explanations of the trade tables are given in the introduction to the Annual Foreign Commerce and Navigation of the United States. Monthly statistics of United States foreign trade are published currently in the "Monthly Summary of Foreign Commerce of the United States" and in mimeographed statements of the Bureau of Foreign and Domestic Commerce

No. 497.—PRODUCTION OF EXPORTABLE GOODS AND PROPORTION EXPORTED

NOTE.—Agricultural production prior to 1909 is the estimated value of farm products, excluding crops fed to livestock; beginning 1909 it is gross income, excluding feed, seed, and waste. Value added by manufacture represents manufactures. Value of mine products in 1909 and 1919 are census figures, in 1929 census data plus petroleum products, while estimates for other years are based on data of the Bureau of Mines As the figures are not adjusted for price changes, the increase or decrease in absolute values from period to period should be disregarded

No. 499.—MERCHANDISE TRADE OF CONTINENTAL UNITED STATES WITH FOREIGN COUNTRIES AND OUTLYING TERRITORIES AND POSSESSIONS

IMPORTANT NOTE.—This table differs as to its geographic basis from all other foreign trade tables in this section and in other publications: (1) In the case of other tables the data represent the trade of the "statistical customs area," which includes continental United States, Alaska, Hawaii, and Puerto Rico, and, beginning Jan. 1, 1935, Virgin Islands, with all foreign countries, including the Philippine and, prior to 1935, Virgin Islands. The data do not cover trade between continental United States and the territories included in the customs area as given above. (2) The present table takes continental United States as the basis. In the totals, trade between it and all United States territories and possessions is included, while the trade between that part of the customs area outside of continental United States and foreign countries is excluded. Practically all other nations calculate their foreign trade in the manner followed in the present table; that is, totaling the trade of the home country with foreign countries and with all outlying areas. Prior to 1901 Alaska was our only outlying area. Therefore, our foreign trade statistics for 1900 and earlier years very nearly represent the trade of continental United States with foreign countries. Data are for years ended June 30 through 1918; thereafter, for years ended Dec. 31

[1] Gold bullion (bars) and United States gold coin.

[2] Increase is the equivalent of net export and decrease the equivalent of net import. The reverse is true of changes in gold earmarked abroad for account of Federal Reserve banks, which were as follows: In 1932, an increase of $72,638,000, equivalent to a net import; and in 1933, a decrease of $72,638,000.

[3] Net release of gold from earmark during January at rate of $20.67 a fine ounce, $12,206,000; net release during remaining 11 months at rate of $35 a fine ounce, $70,347,000.

[1] This item consists roughly of three parts: (1) exports and imports of goods for which data are available but not recorded in the official trade figures (e. g., ships, bunker fuel purchases and sales, etc.); (2) goods whose export or import is wholly or partly omitted from official trade data (e. g., unrecorded parcel-post shipments, goods smuggled into the country, etc.); (3) corrections of certain recorded trade figures to allow for possible overvaluation (in case of goods sent on consignment) or undervaluation (in case of imports subject to ad-valorem duties), uncollectible accounts, etc.

[2] Less than $500,000.

[3] Negligible.

[4] Capital items are viewed as "exports" and "imports" of evidences of indebtedness.

[5] This item takes account of all reported security movements between the United States and foreign countries and includes international sales and purchases of long-term issues, new underwriting, sales and purchases of properties not represented by security issues, and security transfers resulting from redemption and sinking-fund operations.

No. 509.—PER CAPITA EXPORTS AND IMPORTS OF MERCHANDISE

NOTE.—Export figures for 1791 to 1820 are based on total exports including reexports (the latter were then relatively large) and for 1821 to date, on exports of United States merchandise only, shown in table 505. Import figures for 1791 to 1820 are based on general imports shown in table 505, for 1821 to 1870, total imports less reexports, and for 1871 to date, imports for consumption, shown in table 510

No. 510.—IMPORTS ENTERED FOR CONSUMPTION AND DUTIES THEREON

NOTE.—For basis of dollar values, see general note, p. 428. From 1821 to 1866, inclusive, the figures of import values represent total imports less reexports, and for 1867 and later years imports entered for consumption. The "ratio of duties to total" is based upon the values of imports shown in the table. Figures cover fiscal years ended Sept. 30, 1821 to 1842, and June 30, 1843 to 1915; calendar years thereafter

No. 513.—INDEXES OF QUANTITY, UNIT VALUE (PRICE), AND TOTAL VALUE OF EXPORTS OF UNITED STATES MERCHANDISE AND IMPORTS

NOTE.—The quantity and unit value indexes have been constructed by the so-called "ideal formula," the essential feature of which is the use of the quantities of the several articles as weighting factors of their unit values for each pair of years compared. About 265 commodities were included in the direct calculations for both exports and imports. It was then assumed that the prices of articles in each economic class not directly covered had moved in parallel with those of articles covered and their value, adjusted by the computed price index, was included in the aggregative totals from which the quantity index for each class was calculated. The index of quantity and unit value of total exports and imports was based on the aggregate of the adjusted totals of the classes. In constructing the indexes the data for 1919 were linked directly to 1913, and each subsequent year was compared with that preceding. The resulting year-to-year percentages were made into a series by the chain method

No. 516.—IMPORTS OF MERCHANDISE, FREE AND DUTIABLE,

NOTE.—**All figures in thousands of dollars.** For basis of dollar values, see general note, p. 428. Figures Data are "general imports" through 1933; "imports for consumption" beginning 1934. The percentage of the dutiable general imports are reported as reexported than of the free general imports. Moreover, 1933, carpet wool used for making carpets and, for 1922 to 1928, wheat imported for milling in bond for For adjusted figures see table 492 of the 1935 issue of the Statistical Abstract.

AND PER CENT FREE, BY ECONOMIC CLASSES

cover years ended Sept. 30, 1821 to 1840, and June 30, 1850 to 1915; calendar years thereafter, except as noted. free in general imports is normally slightly lower than in imports for consumption because relatively more in the period 1922–1933, there is an understatement of the free goods in general imports because, for 1922 to export were reported as dutiable when entered, although no duty was ultimately paid on these products.

No. 523.—EXPORTS (INCLUDING REEXPORTS) AND GENERAL IMPORTS OF

NOTE.—In the case of some countries, especially those having no seaports, there is considerable indirect imports from them; for such countries the apparent balance of trade may be far from the true bal to Europe and reported as exported to Canada. Such grain shipments were especially large in the America and included in exports to Europe are given in table 495 of the 1935 Statistical Abstract.

No. 525.—EXPORTS (INCLUDING REEXPORTS) AND IMPORTS OF MERCHANDISE, BY GROUPS OF CUSTOMS DISTRICTS

NOTE.—**All figures in thousands of dollars.** For basis of dollar values, except export figures for 1865 and 1870–78, see general note, p. 428. Export figures for those years represent mixed gold and currency values and hence do not agree with the specie values given for total exports in other tables. Figures cover fiscal years to and including 1915, calendar years beginning 1916. Import data are "general imports" through 1933; "imports for consumption" thereafter. Exports and imports of the interior districts, a small percentage of the total, are not included in this table

No. 526.—EXPORTS (INCLUDING REEXPORTS) AND IMPORTS OF MERCHANDISE, BY PRINCIPAL CUSTOMS DISTRICTS

NOTE.—**All figures in thousands of dollars.** For basis of dollar values, except export figures for 1865 and 1870–78, see general note, p. 428. Export figures for those years represent mixed gold and currency values. Figures cover fiscal years to and including 1915; thereafter, calendar years. Import data are "general imports" through 1933; "imports for consumption" thereafter. Areas of districts were rearranged July 1, 1913. Prior to that date some of the districts were more restricted. However, in most cases this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo include the (former) districts of Buffalo Creek and Niagara; those for Michigan include the (former) districts of Superior, Huron, and Detroit; and those for Massachusetts and Maryland were the former districts of Boston and Baltimore, respectively.

No. 529.—IMPORTS OF MERCHANDISE BY COMMODITY GROUPS AND ARTICLES

NOTE.—See general note, p. 428. Figures represent "general imports" for the period 1926 to 1932, inclusive, and "imports for consumption" beginning 1933. Figures for 1926–30 and 1931–35 are annual averages. For a number of items data are not shown separately for all years from 1926 to 1930 and 1931 to 1935, and for this reason many averages for 2, 3, and 4 years are shown in the table. However, averages shown for group totals always cover 5 years. In some cases the detail does not add to the total because of the different periods covered by the averages. Blanks indicate no data or data not shown separately. Relatively small items, "Articles, ordinarily dutiable, imported free for supplies of American vessels or for the United States Government, etc.", are included in the proper commodity classification for 1933 to 1936. For 1930 through 1932, those articles were included in the proper group totals but not shown separately except in group 9, while prior to 1930 the total of those articles was included in group 9

22.—COMMERCE OF NONCONTIGUOUS TERRITORIES

GENERAL NOTE.—In the general foreign trade statistics of the United States presented in the preceding section, the Philippines and prior to 1935, Virgin Islands, are treated as foreign countries and their trade with the United States is included while their trade with other countries is not included. On the other hand, Puerto Rico, Hawaii, and Alaska, and beginning Jan. 1, 1935, Virgin Islands, are treated as integral parts of the United States, so that trade between them and continental United States is not included, while trade between them and foreign countries is included; each of these territories appears as a separate customs district. Neither trade of American Samoa and Guam with foreign countries nor shipments between them and United States are included in the general tables on foreign trade. See also table 499, p. 430.

The tables in this section present the total foreign trade of each of the United States territories and possessions and show separately the trade with continental United States (unless otherwise indicated) and with foreign countries, including other United States territories and possessions. For basis of dollar values, see general note, p. 428.

No. 532.—IMPORTS AND EXPORTS OF ALASKA

NOTE.—In 1936 Alaska shipped domestic silver valued at $217,201 to the United States.

[1] The discrepancy between the United States figures of exports to the Philippines prior to 1911 and th Philippine figures of imports from the United States in corresponding periods is due chiefly to the fac that the Philippine import figures prior to that year omit merchandise imported free of duty for the use o the Government or for use in construction and equipment of railways in the islands, under the act of Feb 6, 1905, while the United States returns omit only Government supplies carried by Government vessels

No. 547.—IRRIGATION: SUMMARY FOR THE 19 IRRIGATION STATES

NOTE.—Tables 547 to 550 relate to irrigation enterprises of all types, including those operated by individual farmers. They are based on reports of the management of the enterprises. An enterprise is defined as "an independent irrigation establishment and includes the works for supplying water and the land for which water is supplied, except that the cost and value of the land is not included in the capital invested." Statistics cover the nineteen irrigation States shown in table 549.

No. 553.—DRAINAGE: SUMMARY FOR THE UNITED STATES

NOTE.—The statistics for drainage on farms in the first part of this table were collected from the individual farmers while those for drainage enterprises were obtained from a special canvass of organized drainage enterprises. A farm may have artificial drainage without being connected with any general enterprise; conversely, a general enterprise may facilitate the ultimate removal of water from a farm which has itself no artificial drainage. Drainage enterprises comprise public corporations and local improvement districts established under State laws relating to drainage, commercial enterprises draining land for sale, other organizations engaged in extensive land drainage work, and tracts of 500 acres or more drained by individual farm owners. The enterprises may include timbered and other unimproved land not yet in farms. The canvass of drainage enterprises did not include any of the northeastern States, and no enterprises were found in Alabama or West Virginia, and in 1919 none also in Virginia

[1] Estimates.

[2] For definition of urban and rural, see headnote, table 7, p. 6.

[3] The 1930 and 1935 farm population comprises all persons living on farms without regard to occupation; the 1920 figures include also those farm laborers (and their families) who, while not living on farms, lived outside the limits of any incorporated place. A further difference is due to the fact that the 1920 and 1935 censuses were taken in January, while the 1930 census was taken in April, when the number of persons on farms is appreciably larger. For farm population by States see table 10, p. 8, and table 574, p. 596.

[4] Data collected for 1925 are not strictly comparable with figures for other years.

[5] Includes crop land harvested, crop failure, crop land lying idle or fallow, and plowable pasture.

[6] "Improved land"; figures nominally include land available for crops and land occupied by buildings, yards, and barnyards.

[7] These figures include the value of fences, tile drains, and other incidental improvements on the land, excluding only the value of buildings.

[8] See note 1 on "livestock" table 560, p. 581.

No. 570.—NUMBER OF MORTGAGED FARMS AND MORTGAGE DEBT: BY STATES

NOTE.—Data in the following table are partly estimated. A part of the sectional differences in changes in the proportion of farms mortgaged and the trend of mortgage debt from 1930 to 1935 is accounted for by variations among the States in the change in the number, acreage, and value of farms. The number and acreage of farms and the value of land and buildings for 1930 and 1935 are shown for all farms in tables 558 and 560 and for owner farms in tables 564, 565, and 568, respectively.

No. 579.—FERTILIZER: Estimated Sales in the United States

Note.—Data are based on fertilizer tag sales for some States and are compiled by State authorities from sales records, etc., for others, as indicated by footnotes. For 1929, census data have been used in many cases. Other figures are estimates made by State authorities or the office of the National Fertilizer Association. Estimates for a few States for 1933 to 1935 have been revised and differ from those previously published

25.—FARM PRODUCTION AND RELATED STATISTICS

[Data in this section relate to continental United States except foreign trade statistics, which represent the trade of the "customs area" (see headnote, table 499)]

No. 582.—ESTIMATED GROSS AND CASH INCOME FROM FARM PRODUCTION

NOTE.—**In millions of dollars.** See headnote, table 584. Data for 1924 to 1935 are based on State totals (shown for 1934 and 1935 in table 585) adjusted to exclude interstate sales of crops, principally seeds for planting, and to include estimates of income from poultry other than chickens not estimated by States. See also footnote 2 below. "Livestock" includes livestock products

No. 584.—ESTIMATED FARM VALUE OF PRODUCTS, GROSS INCOME, AND CASH INCOME: By Commodities

NOTE.—Farm values of crops and animal products are obtained by multiplying State quantities by State average prices. Prices used in most cases are weighted averages—for animal products, calendar-year averages; for crops, averages for the period during which the crop is marketed. Gross income represents value of farm production sold plus value of production retained for use in the farm home, excluding, in the case of crops, amounts retained for feed and seed and amounts unfit for sale and consumption. Cash income relates to the value of quantities actually sold off the farms of States where produced. Farm values for 1935, and also values for 1934 for a few crops, differ from values shown elsewhere in tables relating to individual crops, as the latter are based on revised estimates of production. The farm values here shown are those used, however, in computing the gross income and cash income figures, which have not yet been revised

[1] Rental and benefit payments by Agricultural Adjustment Administration are not included.

[2] Includes Government purchases of cattle and calves and sheep and lambs in the Emergency Drought Purchase Program amounting to $112,827,000 for 1934 and $5,941,000 for 1935.

[3] Includes cotton price adjustment payments totaling $39,109,000 for the United States.

[4] United States totals include data for sugar beets for minor producing States for which separate estimates are not available as follows: Gross and cash income—1934, $3,541,000; 1935, $4,365,000; rental and benefit payments—1934, $1,996,000; 1935, $1,167,000. For totals for the United States adjusted for interstate duplications, see table 582.

1936 [6]	8,100					3,625	4,475

[1] Cash income relates to the value of quantities sold, excluding products used in the farm home. Estimate for 1933 to 1936 include Government payments by the Agricultural Adjustment Administration; for amounts of such payments, see table 583.

[2] Includes expenditures for feed, seed, fertilizer, containers, spray materials, twine, cost of operating tractors, trucks, etc., insurance, ginning, miscellaneous current expenditures, and capital expenditures for machinery, tractors and repairs, and automobiles and trucks. Allowance is made for use of automobiles for purposes other than production.

[3] Total cash wages paid.

[4] Interest on all bank loans other than real estate loans and on 90 percent of all mortgage indebtedness, 10 percent of the total mortgage indebtedness being assigned to farm dwellings.

[5] Only 90 percent of the estimated total taxes on farm property is included, 10 percent of the total being assigned to farm dwellings.

[6] Preliminary estimate.

No. 587.—ESTIMATED GROSS INCOME, DEDUCTIONS FROM GROSS INCOME, AND INCOME AVAILABLE FOR OPERATORS' CAPITAL, LABOR, AND MANAGEMENT, 1924 TO 1936

[In millions of dollars]

Year	Gross income from agricultural production [1]	Current expenditures of operators for production [2]	Depreciation of buildings and equipment [3]	Operators' expenditures for wages, interest, and taxes [4]	Rent to nonfarmer landlords [5]	Total deductions	Income available for operators' labor, capital, and management

1936 [6]	9,530					4,230	5,300

[1] Gross income includes the value of products consumed in the farm household on farm where produced

[2] Current operating costs less amounts estimated as paid by nonfarmer landlords.

[3] Relates to the depreciation of building, farm machinery, and other capital equipment, thus representing the cost of the use of these items rather than the amounts spent for them.

[4] Cash wages to hired labor plus an allowance for board and perquisites furnished hired labor and domestic hired labor contributing to production. Includes only that portion of interest payable by farm operators; figured at 75 percent of all interest payable on farm mortgage debt on real estate used in production and interest on all bank loans, other than real estate loans. It is assumed that 70 percent of all taxes on farm property used in production are paid by the farm operator.

[5] In estimating rent it is assumed that 72 percent of total rent goes to nonfarming landlords.

No. 588.—INDEXES OF THE VOLUME OF NET AGRICULTURAL PRODUCTION

NOTE.—1924–1929=100. Indexes are based on estimates of production for sale and for consumption in the farm home. Products fed to livestock or used for seed are not included. Calendar-year production of livestock and livestock products are here compared with crop production of the same year. Commodities included in the index contributed about 93 percent of the gross farm income during 1924–29

[1] The total for crops includes hay and tobacco and the total for livestock and products includes wool in addition to the products included in the groups shown separately.

[2] "Fruits and vegetables" includes grapes, apples, apricots, peaches, pears, cranberries, figs, grapefruit, oranges, lemons, olives, potatoes, sweetpotatoes, dry edible beans. "Truck crops" includes asparagus, snap beans, beets, cabbage, cantaloupes, carrots, cauliflower, celery, cucumbers, eggplant, lettuce, onions, peas, peppers, spinach, strawberries, tomatoes, watermelons.

[3] Figures for 1935 and 1936 and revised figures for 1934 are based upon estimates of production adjusted to returns from the 1935 Census of Agriculture. Other figures shown for 1934 and figures for prior years have not been adjusted to the revised estimates of production.

[1] Includes only value of animals specified in the preceding columns.

[2] Census returns prior to 1900 represented "milch" cows; in 1900, cows kept for milk 2 years old and over; in 1910, cows and heifers kept for milk born before Jan. 1, 1909 (estimated number 2 years old and over Jan. 1, 17,125,000); in 1920 and 1925, dairy cows and heifers 2 years old and over; in 1930, cows and heifers, born before 1928, kept mainly for milk production. Census data are not available for 1935. Estimates as of Jan. 1 represent cows and heifers 2 years old and over kept for milk.

[3] Estimates by Bureau of Agricultural Economics, Department of Agriculture; value, 1915 to 1919, computed by Bureau of Foreign and Domestic Commerce, based on United States average price for each class. Values for later years represent sum of values by age groups.

No. 598.—DOMESTIC ANIMALS AND CHICKENS ON FARMS: NUMBER AND VALUE, BY CLASSES, AND NUMBER OF FARMS REPORTING

NOTE.—Data for 1925 and 1935 are as of Jan. 1 and for 1930, as of Apr. 1. Owing to the difference in the date of enumeration, the figures for 1930 are not closely comparable with those for other years. The total value of all livestock for which data were collected at each census is shown in table 556, p. 574. Available data for number and value of certain classes not shown in the table below are as follows: Asses and burros, 1930, number, 48,000, value, $1,881,000; turkeys over 3 months old, 1935, number, 5,382,000, value, $11,668,000; hives of bees (on farms and elsewhere), 1930, number, 3,108,000, value, $13,632,000

No. 610.—MEATS AND LARD: PRODUCTION, FOREIGN TRADE, AND CONSUMPTION

NOTE.—**All figures, except per capita, in millions of pounds.** Pork production represents total hog carcass weight, less raw fat from carcass which was rendered into lard. Other meat production represents dressed carcass weight only, with edible byproducts excluded. Lard production represents rendered weight of lard. Uninspected production includes farm, retail, and non-Federally inspected wholesale slaughter. Meat obtained from cattle, calves, and sheep purchased for slaughter by Federal Government in 1934 and 1935 in connection with drought relief activities and pork and lard from sows and pigs slaughtered for Federal Government in August and September 1933 are not included. Exports and imports of meats comprise the different kinds of meat converted to a dressed carcass weight basis. Lard exports represent rendered lard including neutral lard. Exports include shipments to noncontiguous Territories of Alaska, Hawaii, Puerto Rico, and Virgin Islands. Imports for years prior to 1913 are 2-year moving averages of fiscal year totals of imports for consumption; figures for 1913 to 1917 are adjusted calendar year totals compiled from fiscal year data of imports for consumption and calendar year data of general imports. Consumption represents production plus imports less exports with allowance from 1916 on for changes in storage stocks

No. 621.—WOOL: Production, Imports, and Exports of the United States

Note.—**All figures in thousands of pounds.** Production, except Census data, is estimated and is for calendar years. Pulled wool is included beginning 1900 and was probably included for 1870 to 1899, though the exact basis of the estimates for these years is not known. Figures for 1839, 1849, and 1859 include only fleece. Exports and imports for 1839 are for the fiscal year ended Sept. 30; for 1849 and 1859, fiscal years ended June 30; subsequently, calendar years. Imports and foreign exports prior to 1914 and domestic exports include hair of the Angora goat, alpaca, and other like animals

27.—FARM CROPS AND FOODSTUFFS

[In general, data in this section other than on foreign trade relate to continental United States, while foreign trade statistics represent the trade of the customs area (see note, table 499). Any exceptions are noted. For weights of the units of measurement for the principal products see Appendix, p. 839]

No. 626.—INDEX OF CROP PRODUCTION: 12 IMPORTANT CROPS, 1866 TO 1936

NOTE.—Average production of 1910-14 equals 100. Index is based on production of wheat, corn, oats, barley, rye, buckwheat, flaxseed, potatoes, sweetpotatoes, cotton, tame hay, and tobacco. Production of the different crops for each year is multiplied by a constant price, and the aggregate is divided by the average aggregate of base years

[1] Excluding 14,502,932 acres reported for corn cut for fodder, a large part of which is duplicated in the acreage shown for corn harvested as grain.

[2] Including land in fruit orchards, vineyards, and planted nut trees (6,086,176 acres in 1929 and 6,220,679 acres in 1934) which was not reported in 1919; excluding acreage of annual legumes saved for hay (3,067,710 acres in 1929 and 9,500,946 acres in 1934) which is practically all duplicated in the acreage shown for the various individual annual legumes grown alone.

[3] Published as "Kafir and milo" prior to 1929; figures include sorghum seed.

[4] Acreage grown alone. Not all harvested for grain or seed as acreage also includes that for hay and that which was grazed. Some grain or seed harvested from acreage grown with other crops. [5] Does not include sorghum for silage. [6] Silage and miscellaneous forage crops. [7] The acreage for 1909 and the values for 1919 and 1929 represent farm gardens and vegetables harvested for sale. The acreage for 1919, 1929, and 1934 represents vegetables harvested for sale only.

[8] Prior to 1929, nominally sugar cane either for sugar or sirup or both. Acreage includes sugar cane for seed and other purposes not specified where specific reports were available.

[9] The production for sugar or sale to mills was 2,992,000 tons and the production of sirup was 15,169,000 gallons.

[10] Running bales. [11] Not comparable with earlier years. [12] Including tangerines in 1919 and tangerines, mandarins, etc. in 1929. [13] Less than $500.

[1] Figures for 1800 to 1903 represent commercial movement, as given by Dan Talmage's Sons Co.
[2] Figures for the years 1810 to 1865 include linters; excluded in subsequent years.
[3] Beginning 1899, ginnings as reported by Bureau of the Census. Figures for some years include small amounts of Lower California, Mexico, cotton ginned in United States. Round bales counted as half bales.
[4] Gross weight. Figures prior to 1899 compiled by Bureau of the Census from data published by Department of Agriculture. See also note 9, table 630, p. 639.
[5] Exports.
[6] Census figures for the previous year.
[7] Figures shown for 1870, 1875, and 1880 represent the estimated average production for 1863-71, 1874-77, and 1880-82, respectively.
[8] Louisiana only for 1924 to 1928; Louisiana and Florida beginning 1929.
[9] All figures except cotton and sugar production are preliminary.

No. 630.—SUMMARY FOR PRINCIPAL CROPS: Estimated Acreage, Yield, Production, Value, and Average Price Received by Farmers

Note.—Tons are of 2,000 pounds. For weights of the units of measurement for principal products, see Appendix, p. 839. The approximate weights of units of measurement for other products are as follows: Number of pounds to a bushel—sweetpotatoes, 54; grain sorghums, 56; clover seed, 60. Number of pounds to a barrel of cranberries, 100. Prices and yields for the periods are weighted averages except for cotton and cottonseed, which are simple averages of prices and yields for the individual years. Acreage, production, and yield of all crops except cranberries have been revised to census data

[1] Values are based on prices for crop-marketing season, Dec. 1 or Nov. 15 prices. See notes on "Price."
[2] Received by farmers. Beginning 1908, prices are weighted average prices for the crop-marketing season; prior thereto, Dec. 1 prices.

[1] Values are based on prices for crop-marketing season, Dec. 1 or Nov. 15 prices. See notes on "Price."
[4] Received by farmers. Beginning with 1908 for potatoes and cotton, with 1910 for sweetpotatoes, and with 1911 for cottonseed, prices are weighted average prices for the crop-marketing season. Figures for prior years are Dec. 1 prices.
[5] Average for 8 years. [6] Average for 6 years. [7] Average for 7 years. [8] Average for 4 years.
[9] State production figures, which conform with census annual ginning enumerations, with allowance for cross State ginnings, rounded to thousands and added for United States totals. Cotton grown in Lower California, ginned in California from 1913 to 1924, has been excluded.
[10] Production is in running bales prior to 1899; 500-pound gross weight bales thereafter.
[11] Area in cultivation July 1 less removal of acreage reported by the Agricultural Adjustment Administration, less abandonment on area not under contract.

[1] Values are based on prices for crop-marketing season, Dec. 1 or Nov. 15, prices. See notes on "Price."
[12] Received by farmers. See also notes on prices for each crop.
[13] Nov. 15 prices, 1916 to 1924; Dec. 1 prices, 1925 and 1926; average prices for the crop-marketing season beginning 1927.
[14] Prices are weighted average prices for the crop-marketing season, prices of beans being for cleaned beans.
[15] Average for 1919 and 1920.
[16] Bags of 100 pounds.
[17] Farm value of dry edible beans equals the price of cleaned beans applied to the production of cleaned beans rather than to the total production.
[18] Average for 1924 and 1925.
[19] Includes sweet clover prior to 1924. Prices for 1916 to 1918 are as of Nov. 15; beginning 1919, weighted average prices for the crop-marketing season.
[20] Dec. 1 prices, 1916 to 1931; beginning 1932, weighted average prices for the crop-marketing season.
[21] Includes 802,000 pounds in 1934 and 5,436,000 pounds in 1935 not harvested on account of labor shortage and market conditions. Prices and values are computed on the harvested crop.

[1] Values are based on prices for crop-marketing season, Dec. 1 or Nov. 15 prices. See notes on "Price."

[22] Received by farmers. Prices are as of Dec. 1 except as noted.

[23] Prices are weighted average prices for the crop marketing season beginning 1919; Dec. 1 prices theretofore.

[24] Not included in tame hay.

[25] Subject to revision. Values and prices not available.

[26] Includes tangerines. Production figures include fruit consumed on farms, sold locally, and used for manufacturing, as well as that shipped; they exclude fruit which ripened on the trees but was destroyed prior to picking. Figures relate to the crop produced from the bloom of the year shown, fruiting through the winter and the following spring and summer. In California, where picking continues throughout the year, the estimates are for 12-month periods, beginning Nov. 1. In other States, the season begins about Sept. 1.

[27] Net content of boxes varies. In California and Arizona, the approximate average is 70 lbs.; in other States, 90 lbs.

[28] Data not yet available.

[29] Production in California includes the following quantities donated for charity which have no farm value; 1933, 977,000 boxes; 1934, 1,395,000 boxes; 1935, 754,000 boxes.

[30] As estimated from prospects on July 1, 1937.

No. 640.—COTTON AND COTTONSEED: ACREAGE, PRODUCTION, AND FARM VALUE, BY STATES

NOTE.—Cotton production excludes linters. Figures for production in some States differ slightly from Census figures on ginnings due to ginnings in one State of cotton grown in another. Where figures are not shown for the individual States, separate data are not available for the entire period but are included in the United States totals. Yields and prices for the periods are simple averages of figures for individual years. Tons are of 2,000 pounds

No. 643.—TRUCK CROPS: Commercial Acreage, Production, and Value, for Market and Manufacture

Note.—Only States with a crop of commercial importance are included. Approximate weights of the units of measurements are as follows: Number of pounds to the crate—cantaloups, 60; cauliflower, 39; celery, 90 (¾ size crates); strawberries, 36 (24-quart crates). Number of pounds to the bushel—carrots, 50; cucumbers, 48; eggplant, 33; kale, 18; peppers, 25; potatoes, 60; spinach, 18. Number of pounds to a box of artichokes, 40. Lettuce is in western crates (mostly 4 to 6 dozen heads); onions, 100-pound sacks. Tons are of 2,000 pounds. Values are based on average seasonal farm prices

[1] Includes Hawaii, Puerto Rico, and the Philippine Islands; Virgin Islands included beginning July 1, 1917.

[2] Imports from the Philippine Islands excluded beginning July 1, 1900, and from Virgin Islands beginning July 1, 1917; reexports deducted through 1932–33; imports for consumption beginning 1933–34.

[3] Includes shipments to Hawaii and Puerto Rico for all years, to Alaska beginning 1933–34, and the Virgin Islands beginning Jan. 1, 1935. Excludes direct exports from them to foreign countries and also reexports of imported raw sugar.

[4] Sugar used in the manufacture of other commodities for export on which drawback was paid.

[5] Stocks at the beginning or end of year ignored.

[6] Except beet sugar production and exports prior to 1909 which are chiefly refined.

[7] Not computed.

[8] Raw sugar converted to refined by multiplying by the following factors: for years prior to 1930–31, Cuba and Hawaii, 0.9358; Puerto Rico, 0.9393; Philippine Islands, 0.95; all others, 0.932; beginning 1931–32 Hawaii, 0.9617; Puerto Rico, Philippine Islands, and Virgin Islands, 0.946; Cuba and all others, 0.9418.

No. 659.—COTTON: Production, Consumption, Exports, Imports, and Prices

NOTE.—**Production, consumption, and exports beginning 1914 are in thousands of running bales (counting round as half bales); these items prior to 1914, and net imports, all years, are in thousands of 500-pound bales, gross weight.** Production statistics relate to the growth year indicated in the stub. Other statistics for the most part relate to the 12-month period roughly corresponding to the marketing of the crop; there have been minor variations from time to time in the periods covered, but consumption, exports, and imports, beginning 1914, and prices, beginning 1910, are for the 12 months ended July 31 following the year indicated in the stub. Prices for 1902 to 1909 represent the price of the average grade marketed in New Orleans up to April 1 of the following year; from 1910 to date, the average price on the farm of all lint cotton throughout the country

No. 669.—COMMERCIAL STOCKS OF DOMESTIC GRAIN IN THE UNITED STATES: AS REPORTED ON SATURDAY NEAREST THE FIRST OF EACH MONTH

NOTE.—**All figures in thousands of bushels.** Number of pounds to a bushel: Wheat, 60; corn, 56; oats, 32. Figures represent domestic grain in store in public and private elevators in 41 markets and afloat in vessels or barges in harbors of lake and seaboard ports; they do not include grain in transit, stocks in mills or elevators attached to mills, or private stocks intended for local use. Official statistics were not compiled prior to January 1927. Bradstreet's visible supply is given for earlier years in the 1935 and previous issues of the Statistical Abstract

28.—FORESTS AND FOREST PRODUCTS

[Data in this section relate to continental United States only except those for national forests which include Alaska, or Alaska and Puerto Rico, as indicated]

No. 677.—FORESTS: Estimated Original Area, Area in 1930, Stand of Saw Timber, and Annual Growth, 1930, by Regions

Note.—Data in the following table are necessarily approximate. The original area and area in 1930 refer only to land capable of producing commercial timber in commercial quantities, and do not include the low-grade woodland and scrub; the 11,000,000 acres in parks, monuments, etc., are excluded from the forest area in 1930. Annual growth relates to acreage specified as growing area, other areas having no growth in excess of decay

No. 682.—FOREST FIRES: Area, Number, and Damage

Note.—Data were compiled from reports by the National Forest Supervisors and from those of cooperating States. Figures for unprotected area are based upon partial information only from incomplete reports; reliable data are not available prior to organized protection. Figures for fires on national parks were excluded prior to 1931 and on Indian reservations prior to 1932

Year	Area needing protection (1,000 acres)	Area protected (1,000 acres)	Area unprotected (1,000 acres)	Number of fires		Area burned (1,000 acres)		Damage [1] (1,000 dollars)

[1] Figures do not take into account the vast amount of intangible and indirect damage resulting from forest fires, such as that through decay of damaged timbers, replacements of desirable species of trees by less desirable but more fire-resistant ones, soil deterioration and erosion, loss of wild life, uncertain stream flow, interrupted tourist traffic, and the like.

[1] The figures of turpentine and rosin from crude gum from 1927–28 to 1932–33 and 1933–34 to 1936–37, and from wood for 1933–34 to 1936–37, refer to the crop year ended Mar. 31. All other figures relate to calendar years.

[2] Compiled from data reported by establishments engaged in the turpentine and rosin industry.

[3] Compiled from data reported by establishments engaged in the wood-distillation industry.

[4] Not reported.

[5] Includes for 1909 and 1914, 18,310 gallons and 92,401 gallons, respectively, of turpentine and for 1914, 4,495 barrels of rosin reported by establishments engaged in the manufacture of lumber and timber products.

[6] Compiled by the Bureau of Chemistry and Soils, Department of Agriculture.

[7] Complete data are not available. Data are estimates by J. E. Lockwood. Figures include estimates of rosin produced from reclaimed gum as follows: 1932–33, 33,400 barrels; 1933–34, 35,060; 1934–35, 34,000.

[8] Includes estimates by J. E. Lockwood for production of turpentine from steam-distilled wood.

[9] Includes 3,989,000 gallons reported to the Control Committee of the Marketing Agreement for Gum Turpentine and Gum Rosin Processors, but not reported directly to the Census Bureau.

[10] Includes 269,000 gallons computed upon the basis of 3⅓ barrels of rosin to each barrel of turpentine.

[11] Includes 54,187 barrels of rosin produced from reclaimed gum for 1935–36, and 42,694 for 1936–37.

[12] Does not include rosin produced from reclaimed gum. See notes 7 and 11.

No. 709.—PRODUCING MINES AND QUARRIES: SUMMARY, BY STATES

NOTE.—Figures for 1919 and 1929 have been revised to make them comparable except for 1919 where data for revision were not available, and for certain States for 1929 where revision would result in disclosure of individual operations. Therefore, the totals for the United States are less than the sum of the figures for the States for both years and for geographic divisions for 1919; also the totals for most of the geographic divisions for 1929 are less than the sum of the figures for the States

No. 710.—PRODUCING MINES AND QUARRIES: SUMMARY BY INDUSTRIES, CONTINENTAL UNITED STATES

NOTE.—Figures for 1919 and 1929 for the limestone, sandstone, abrasive materials, and silica industries are not strictly comparable, owing to the inclusion or exclusion of data for 1929 not similarly treated for 1919. For the limestone industry, data for quarrying operations of lime and cement manufacturers are included in the figures for 1929 but not in those for 1919. For the sandstone industry, data for enterprises whose product was ground into glass or molding sand, or used as refractory materials (siliceous mica schist and ganister), etc., are included in the figures for 1919 but excluded from those for 1929 and included in the figures for the glass-sand, molding-sand, abrasive-materials, or silica industries, according to the nature and purpose of the final product. Data for diatomaceous earth are included in the figures for abrasive materials in 1919 and in those for silica in 1929

[1] The figures noted include the value of work or services.

[2] Includes salaried officers, technical and supervisory employees, and all others on salaries, except employees at central administrative offices not connected with mine or plant.

[3] Includes cost of lumber or timber, iron and steel materials, explosives and oil used directly or sold to employees, water for boilers, machinery supplies, and all other supplies and materials necessary to maintain and operate the mine or plant.

[4] Determined by averaging the total number reported on pay rolls the 15th of each month.

[5] For the industries noted, data are included for beneficiating plants, finishing plants, or mills operated in connection with the mine or plant; in such cases, the value of their product is included and not the value of the product of the mine or quarry.

[6] Not available.

[7] Average including shut-down periods.

[8] The value of most of the crude feldspar is duplicated in the value of the ground product.

[9] Number of grinding mills; some of these are operated in connection with the feldspar mines.

[10] In addition, fluorspar was produced at an undetermined number of prospects and reclaimed from mill ponds, waste dumps, and old workings of abandoned mines. Data for these operations are included in the other figures given.

[11] Data for natural gas and petroleum cover number of wells; for natural gasoline, number of plants.

[12] Value at points of consumption; the value at wells amounted to $110,402,000.

[13] Not including 625 salaried employees at central offices with salaries amounting to $1,752,000.

[14] Boron, bromine and iodine, diatomite, emery, garnet, greensand marl, magnesite, magnesium salts, manganese, molybdenum, natural sodium compounds, miscellaneous stone, and vermiculite.

No. 714.—MINERAL PRODUCTS OF THE UNITED STATES: QUANTITIES AND VALUES

NOTE.—Data cover continental United States and, for leading products, outlying areas. Certain of the figures represent shipments rather than quantity mined, and some of the figures for 1936 are estimates. Blank spaces indicate absence of data in most cases; method of computing total value is indicated by footnotes. Short tons are 2,000 pounds; long tons, 2,240 pounds

[1] From both domestic and foreign ores. Data for 1935 and 1936 represent antimonial lead produced at primary refineries from both primary and secondary sources, and are not comparable with data for prior years; estimate of value of primary antimony and lead contents of antimonial lead from domestic sources included in total value of metallic products.
[2] Content of antimonial lead. Value excluded from metallic total as the value of the antimony is included in the antimonial lead value.
[3] Largely from foreign ore in 1935 and in 1936. Value not included in total value. Bureau of Mines not at liberty to publish value figures.
[4] Value included in total value of metallic or nonmetallic products. Bureau of Mines not at liberty to publish figures or not available. [5] Product from domestic ores only.
[6] Valued at $20.67+ per ounce through 1920; at $35.00 per ounce in 1935 and 1936.
[7] Value not included in total value, since value of product derived therefrom, or of raw material used, is accounted for under other items.
[8] Figures not available. Value of products derived therefrom, or of raw materials used, is included elsewhere.
[9] Figures obtained through cooperation with Bureau of the Census. Data for 1936 not yet available; estimate included in total value of nonmetallic products.
[10] Includes brown coal and lignite and anthracite mined elsewhere than in Pennsylvania.
[11] Tripoli only. Value of diatomite is included in total value of nonmetallic products. Bureau of Mines not at liberty to publish figures.
[12] No canvass. Estimate of value included in total value of nonmetallic products. [13] Includes mica recovered by grinding mica schist; excluded in prior years.
[14] Canvass discontinued after 1915. Value of iron ore sold for paint included under "Unspecified." [15] Sublimed blue lead, sublimed white lead, leaded zinc oxide, and zinc oxide.
[16] Figures include pyrites concentrates from Tennessee and partly desulphurized tailings from zinc operations in Wisconsin; similar output in 1915 to 1925 was not included.
[17] Includes soapstone used as dimension stone. [18] In 1915 includes 59,189 tons and in 1920, 23,728 tons of stronger acid, not converted to 60° Baumé.
[19] Talc only. Value of soapstone in 1925 and 1930 is included in value of nonmetallic products. Bureau of Mines not at liberty to publish figures.
[20] Talc and ground soapstone.

No. 715.—MINERAL PRODUCTION, BY STATES

NOTE.—The sum of the State totals in the table below does not agree with the total for the United States given in tables 705 and 714 chiefly because of the following reasons: (1) Figures for certain of the products included in the United States total are not available by States of origin; (2) the use of iron ore values in State totals and pig iron values in United States total; (3) the use of mine figures for gold, silver, copper, lead, and zinc in the State totals and mint and smelter figures in the United States total; and (4) the inclusion of estimates in the United States total for a few products for which no canvass has been conducted for many years and for which no estimate by States is made

No. 718.—PRODUCTION, EXPORTS, AND IMPORTS OF PIG IRON (INCLUDING FERRO-ALLOYS) AND PRODUCTION OF STEEL INGOTS AND CASTINGS

NOTE.—**In long tons (2,240 pounds).** Prior to 1901 exports and imports are for years ended June 30 following year specified; calendar years thereafter. Imports are imports for consumption beginning with 1933. All production figures are for calendar years. For individual years 1871 to 1908 and data for earlier years, see Statistical Abstract 1931, tables 750 and 751

No. 721.—PRODUCTS OF STEEL WORKS AND ROLLING MILLS, AND OF THE WIRE, TIN-PLATE, AND CAST-IRON PIPE INDUSTRIES

NOTE.—The overlapping of the industries shown in this table results in considerable duplication in tonnages shown. The products chiefly used further in manufacture are wire rods, plates and sheets, black plates for tinning, and skelp. The figures under "Wire," "Tin and terneplate," and "Cast-iron pipe and fittings" include data for products of these departments of steel works and rolling mills and of all other industries producing these commodities. For more detailed statistics, see Census reports for these industries.

[1] Of 2,240 pounds.
[2] In addition steel castings were produced for sale by establishments classified in other industries as follows: For 1929, 33,550 tons valued at $6,635,760; 1933, 14,495 tons valued at $2,508,632; 1935, 58,289 tons valued at $8,254,925.
[3] Includes the production of piercing billets, rounds, and blanks which were not called for separately prior to 1935. The amounts reported for 1935 are as follows: Produced and consumed in same works, 888,594 tons; made for sale and interplant transfer, 73,639 tons, valued at $3,920,021. For years prior to 1935 data for the tonnage produced and consumed in plant and an indeterminable amount of that made for sale and interplant transfer were reported under "Blooms, billets, and slabs."
[4] Includes 13,615 tons, valued at $9,147,892, of stainless-steel plates and sheets not reported separately.
[5] All iron and steel wire, including that subsequently galvanized, otherwise coated, and cold rolled.
[6] Of 2,000 pounds.
[7] Includes $313,000 in 1933 and $673,000 in 1935 for which no quantity was reported.
[8] Not including value of nails and tacks made from nail and tack plate.
[9] Of 100 pounds.
[10] No comparable data; quantity not reported in all cases.

[4] Includes data for 5 establishments in 1933 and 3 in 1935 engaged in production of sintered ore and flue dust and operated independently of blast furnaces.

No. 724.—AGGREGATE DOMESTIC EXPORTS OF HEAVY IRON AND STEEL

NOTE.—Prior to 1922, the small items for which quantity is not available are excluded, while in later years all items are included. Ferromanganese is included for all years. The small item "steam and hot water heating boilers and radiators," formerly classified as heavy iron and steel, is excluded beginning 1922

No. 729.—COPPER: PRODUCTION, EXPORTS, IMPORTS, AND CONSUMPTION

NOTE.—**All quantities except ore produced in millions and tenths of millions of pounds.** Production figures include continental United States and Alaska. Owing to the varying stages of production, the stocks in different classes of hands, the redistribution of copper previously purchased, the recovery and use of old copper, etc., calculations of consumption are somewhat uncertain. The American Bureau of Metal Statistics presents consumption estimates rather widely different from those given below. Consumption as shown represents the quantity of copper withdrawn on domestic account, but not actual domestic consumption, as no account is taken of consumers' stocks

No. 732.—EXPORTS AND IMPORTS OF COPPER

NOTE.—Exports are those classed as "domestic" in the foreign trade statistics but include copper smelted or refined in the United States from imported ore or unrefined metal. Values include all forms of copper. Quantities represent all copper except the small item, "other manufactures." Copper content of exports of ore for years 1891–1915 and of imports for years 1894–1903 was estimated

No. 736.—MANUFACTURES OF NONFERROUS METALS AND ALLOYS

NOTE.—This table shows the production of the commodities specified, whether made as primary or as secondary products by the industries reporting them. The census designations of the industries in which these commodities are made as primary products are as follows: "Nonferrous-metal alloys; nonferrous-metal products, except aluminum, not elsewhere classified;" and "Smelting and refining, nonferrous metals other than gold, silver, and platinum, not from the ore." No data are included for establishments engaged in smelting and refining concentrates containing copper, lead, zinc, and other nonferrous metals

No. 739.—GOLD AND SILVER: PRODUCTION FROM MINES IN CONTINENTAL UNITED STATES, ALASKA, PUERTO RICO, AND PHILIPPINE ISLANDS

NOTE.—The value of gold, in terms of money, being at a fixed rate, is not shown in the table. Gold is valued at $20.67+ per fine troy ounce from 1837 through 1933. In 1933, however, varying higher prices prevailed subsequent to the Executive order of Aug. 29. The value of gold production for 1933, as computed by the Bureau of Mines, was $65,338,000, including $52,842,000 calculated at legal coinage value ($20.67+ per ounce) plus $12,485,000 premium calculated at average weighted price ($25.56 per ounce). On Jan. 31, 1934, the legal value of gold was fixed at $35 per fine ounce. The value of silver given is commercial value, except for 1921 to June 1923 and beginning 1934 (see footnotes 1 and 2), which has differed materially from coinage value

No. 741.—SILVER: PRICE AND VALUE OF SILVER IN THE DOLLAR

NOTE.—The London price is converted to the basis of the ounce 1.000 fine and converted to American money at par of exchange through 1933; thereafter, at the current rate of exchange. London quotations are in depreciated currency after Sept. 21, 1931, also in some prior year periods, including 1918 to 1924. New York quotations are in depreciated currency after early March 1933. The commercial ratio is computed on the basis of London quotations through 1914; thereafter, on the basis of the New York average price. Beginning with 1934 the monetary value of gold is $35.00 per fine ounce as compared with $20.67 in previous years. The value of fine silver (371¼ grains) in the dollar is computed on the basis of London quotations through 1917; thereafter, on the basis of the New York average price

No. 744.—COAL PRODUCTION: Quantity and Value

NOTE.—**Quantities in thousands of short tons (2,000 pounds); values in thousands of dollars.** Includes coal consumed at mines. Figures for anthracite relate to Pennsylvania output only; those for bituminous relate to continental United States and Alaska. Bituminous coal includes brown coal and small amounts of anthracite outside of Pennsylvania. Comparatively little coal is held in stock at the mines

[1] Data represent averages of city prices shown in table 749. Anthracite prices are weighted averages for 25 cities; they supersede the simple averages shown in former issues of the Abstract. Bituminous coal prices are computed by taking a simple average of 38 city quotations.

No. 751.—NATURAL GAS AND NATURAL GASOLINE

NOTE.—**Quantities of gas in millions of cubic feet, of gasoline in thousands of gallons; values in thousands of dollars.** Production figures for gas refer only to that marketed, in addition to which considerable quantities are used by producers, and large quantities are wasted or lost. Values given are at the point of consumption. Consumption figures by States differ greatly from production figures by reason of interstate transportation

No. 753.—MANUFACTURED-GAS AND NATURAL-GAS INDUSTRIES: SUMMARY OF STATISTICS

NOTE.—**Population severed and number of customers in thousands, gas produced, purchased, and sold in millions of cubic feet; revenue in thousands of dollars.** Companies formerly distributing manufactured gas but which were distributing natural gas at the beginning of 1937 have been excluded from the figures for manufactured gas and included with those for natural gas for all years shown in this table. Companies selling mixed manufactured and natural gas are included with data for manufactured gas. Figures for natural gas do not include natural gas used in field operations or in the manufacture of carbon black, or gas used by distributing companies in the conduct of their gas operations

No. 764.—PETROLEUM: Prices of Crude and Refined Products

NOTE.—**Prices of crude and fuel oil in dollars per barrel of 42 gallons, others in cents per gallon.** Compiled by Joseph E. Pogue. The weighted average prices cover five principal grades of crude oil at wells, five markets for kerosene, gasoline at service stations in 50 cities (exclusive of all taxes), five refining locations for fuel oil, and lubricating oil at refineries.

31.—MANUFACTURES

[Data in this section relate to continental United States except as noted. For additional statistics regarding food manufacturing industries and mineral manufacturing industries see sections on Farm Animals and Animal Products, Farm Crops and Foodstuffs, and Mining and Mineral Products]

GENERAL NOTE.—Prior to 1899 census statistics of manufactures were collected decennially and from then to 1919 every five years. Beginning with 1921 data are being collected every two years. For the census of 1899 and previous censuses data were collected for both factories and hand and neighborhood industries. For the census years 1904 to 1919, inclusive, factories having products valued at $500 or more were included, but the statistics beginning 1921 (except as to certain major items shown for that year in table 778 only), relate only to establishments having products valued at $5,000 or more. However, in 1921, establishments having products valued at $500 or more but less than $5,000, while constituting 21.6 per cent of the total number of establishments, employed only six-tenths of 1 per cent of the total number of wage earners, and had an output of only three-tenths of 1 per cent of the total value of products.

The value of products represents the selling value at the factory. Figures of total cost of materials, etc., and total value of products for many individual industries, for all groups of industries, and especially for all industries combined, involve much duplication. This is due to the use of products of a given establishment as material for another in the same or a different industry.

The statistics for automobile repairing, collected for 1914 and 1919, have been excluded from tables 776 and 778. Data for "Coffee and spices, roasting and grinding" are excluded in the third section of table 776 and in tables 777 and 780 for all years, and data for "Peanuts, walnuts, and other nuts, processed or shelled" are excluded in table 777 and from figures beginning with 1927 in tables 776 and 780, no data having been collected for these industries at the 1933 and 1935 censuses. Data for these industries, however, are included in tables 778 and 779. As there are no comparable figures for "Peanuts, walnuts, etc.," for years prior to 1927, no adjustment for this industry can be made for earlier years. Data for "Poultry killing, dressing, and packing, wholesale" are included for all years except 1927, for which year this industry was not canvassed. In table 776, data for central-administrative-office employees have been excluded beginning 1923. The figures for 1914, 1919, and 1921, however, include such data.

At the census for 1933 the smaller establishments in many industries were canvassed by means of an abridged schedule which did not call for detailed data on production, and therefore the production figures for certain industries are somewhat incomplete. In cases in which the degree of incompleteness was sufficient to affect the comparableness of the statistics for different census years, the 1933 figures have been omitted from tables presenting detailed statistics of production in this issue of the Statistical Abstract. Data for 1933 and also 1931 figures adjusted for comparison with those for 1933 were shown, however, in the 1936 issue.

[1] No comparable data. [2] Data not collected. [3] Includes purchased power other than electric.
[4] Data approximately the same as given for factories and hand and neighborhood industries.
[5] Includes data for all establishments reporting products valued at $500 or more. This item was not tabulated separately for establishments reporting products valued between $500 and $5,000.
[6] For 1933 figures revised for strict comparism with those for 1935, see table 780, p. 741.
[7] Excluding data for salaried officers of corporations. [8] Data collected but not tabulated.

[1] To make the percentages for the number of establishments comparable, those for all 6 years have been based on the number of establishments reporting products valued at $5,000 or more. The percentages for other items, however, have not been similarly adjusted, the comparability of these percentages having been affected very slightly by the omission of small establishments in 1923, 1925, and 1929.

[2] No data for establishments with products under $5,000 in value have been collected since 1921.

[3] Data for these 53,999 establishments are not included in other tables showing statistics for 1921.

[4] Includes data for the $500,000 to $1,000,000 class. [5] Data included with the $100,000 to $500,000 class.

[1] Calculated for all groups except 2 and 5 and for part of the industries in those groups, by subtracting cost of materials, containers, fuel, and purchased electric energy from value of products. Calculated for industries in groups 2 and 5 in which cost of contract work is important, and for industries that are closely related to others in which cost of contract work is important, by subtracting sum of cost of materials, containers, fuel, and purchased electric energy and cost of contract work from value of products. Not strictly comparable with earlier years.

[2] Calculated, for all industries, by first method described in note 1. Figures are strictly comparable with those for years prior to 1935.

[3] Not called for on schedules for 1931 and 1933 and not tabulated for 1935.

[4] Revised; data for "Wool pulling" transferred to group 16 from group 2 and data for "Hats, straw, men's" transferred from group 16 to group 2.

[5] Calculated for part of the industries in this group by the first method and for the remaining industries by the second method described in note 1. Figures for years prior to 1935 for the printing and publishing group were calculated for all industries by the first method described in note 1.

[6] Revised; calculated for part of the industries in this group, by first method, for the remaining industries by the second method described in note 1; revision not carried into total for all groups.

[7] Revised; data for "Engravers' materials" and "Printers' supplies" transferred from group 5 to group 13.

[8] Revised; data for "Stamped and pressed metal products; enameling, japanning, and lacquering" transferred from group 12 to group 11.

[9] The decrease in the 1927 figures was chiefly due to practical ceasing of operations of a large company for a few months of the year.

[10] Revised by deduction of data for shops doing light repair work only; comparable with 1935.

[11] Comparable with statistics for prior years.

[12] Includes internal revenue tax paid by tobacco manufacturers. This amounted to $422,027,000 in 1931, $400,843,000 in 1933, and $477,882,000 in 1935.

[13] The "Cost of materials, etc.," does not include internal revenue tax paid by tobacco manufacturers.

No. 781.—MANUFACTURES: SUMMARY FOR INDIVIDUAL INDUSTRIES

NOTE.—The figures given in this table do not represent exactly the numbers of wage earners, values of products, etc., assignable to the classes of commodities from which the industries derive their names, as it is necessary for census purposes to classify each establishment as a whole in some one industry, according to its product of chief value, although in many cases a single establishment manufactures two or more classes of commodities. The figures for cost of materials and value of products for each group and each subgroup include considerable duplication due to the use of the products of one industry as the materials for another, and in some cases similar duplication occurs within an industry. Value added by manufacture is calculated, for most industries, by subtracting cost of materials, containers, fuel, and purchased electric energy from value of products. Calculated for industries in which cost of contract work is important, and for industries that are closely related to others in which cost of contract work is important, by subtracting sum of cost of materials, containers, fuel, and purchased electric energy and cost of contract work from value of products. Industry figures calculated by the second method and totals including such figures are indicated by asterisks. No data for horsepower were collected for 1931 and 1933 and no data were compiled for 1935. For totals for all industries and for 16 industrial groups see table 780. Four census years have been shown for all industries that reported $200,000,000 or more in value of products or over 50,000 wage earners in 1929, and three census years for other industries, except as indicated by footnotes. See also general note, p. 738.

[1] Revised; revision not carried into total.

[3] Revised; represents individual plants, comparable with figures for other years.

[4] At the 1935 census ethyl alcohol was assigned to "Chemicals, n. e. c." and "Liquors, rectified, etc.," were separately classified. The 1933 figures in italics have been adjusted for comparison with 1935.

[5] New classification; no comparable data for earlier years.

[6] This classification was abandoned at the census for 1923 and no statistics collected until 1933.

[7] Includes data for six establishments in former "Flax and hemp" industry not canvassed since 1929.

[8] Not strictly comparable with earlier years because of changes in classification.

[9] Formerly "Mats and matting, grass and coir." [10] Formerly classified in "Woolen goods."

[11] No comparable data for earlier years. [12] Formerly, "Cotton small wares."

[19] Formerly "Pulp goods and molded composition products"; no comparable data for 1929.

[20] Because of the fact in many cases a paper mill and a pulp mill are supplied with power from the same power plant, it is impossible to give separate figures for each industry.

[17] Not strictly comparable with data for 1933 and 1935.

[23] "Drugs and medicines" and "Insecticides and fungicides," etc., cover establishments formerly classified as "Druggists' preparations" and "Patent or proprietary medicines and compounds." A reclassification according to commodities was made for the new designations. Figures for 1929, 1931, and 1933, except horsepower, were revised for comparison with 1935. Revised data are not available for horsepower.

[25] "Gypsum products" and "Wall board and plaster (except gypsum), etc." were formerly treated as a single industry, "Wall Board, insulating board, gypsum and other plasters, and floor composition." The 1929 and 1933 figures for the latter have been revised to include data for mineral wool formerly assigned to "Steam and other packing", etc., but this revision has not been carried into total for subgroup. Revised 1929 data are not available for horsepower.

[26] No comparable data for 1929.

[27] Included with "Steel works and rolling-mill products."
[28] Combined total for "Blast-furnace products" and "Steel works and rolling-mill products."
[29] Revised to include data for "Stamped and pressed metal products; enameling, japanning, and lacquering." Figures for 1929 include also "Iron and steel, processed", abandoned as a separate industry classification in 1931 and, beginning with that year, included in the machinery group.
[30] Not including similar products manufactured to a considerable extent by steel works and rolling-mills or by plants operated in connection with rolling-mills. The figures here given refer only to establishments engaged primarily in the manufacture of the specified classes of products. "Nail spikes," etc., also exclude products made in wire mills.

[35] Figures for 1931 (except those in italics) and 1933 revised to include data for manufacturers of tractors, formerly classified in "Engines, turbines, water wheels, and windmills" industry. The figures for 1931 in italics are comparable with figures for 1929 which have not been revised.

[36] Formerly "Cash registers and adding, calculating, and card-tabulating machines." Manufacturers of duplicating machines, check-writing machines, and manifolding machines, classified in this industry in 1935, were formerly assigned to "Foundry and machine-shop products." The figures for 1933 have been revised accordingly. Comparable figures are not available for 1929.

[37] Prior to 1931 this industry included radio apparatus and tubes included beginning with 1931 in a new classification, "Radio apparatus and phonographs." Figures for 1931 in italics were adjusted for comparison with those for 1929.

[38] Figures for 1931 (except those in italics) and 1933 revised to exclude data for manufacturers of tractors formerly classified in this industry. Figures for 1931 in italics and those for 1929 have not been revised.

[39] Formerly a single industry; now the six industries following. Figures for 1929, 1931, and 1933 revised to include data for "Elevators and elevator equipment," classified separately for 1931 and 1933, but now included in "Machinery, n. e. c.," and for "Engravers' materials" and "Printers' supplies" now included in "Printers' machinery and equipment"; and to exclude data for certain products formerly assigned to "Foundry and machine-shop products" but now included in "Cash registers," etc. (see note 36). Revised 1929 data for horsepower are not available.

[40] New classification; formerly part of "Foundry and machine-shop products." Figures for 1933 compiled for comparison with 1935.

[41] New classification; formerly part of "Foundry and machine-shop products." No comparable figures available for earlier years.

[1] Revised; revision not carried into total for group.
[17] Not strictly comparable with data for 1933 and 1935.
[26] No comparable data for 1929.
[42] This classification covers "Refrigerators and refrigerator cabinets, exclusive of mechanical refrigerating equipment" and "Refrigerators, mechanical", formerly separate classifications in groups 3 and 13, respectively, and also includes, beginning 1931, statistics for a small number of establishments producing industrial ice-making and refrigerating machinery, formerly included in "Foundry and machine-shop products." As figures for 1929 do not include the establishments producing industrial ice-making and refrigerating machinery, they are not comparable with those for later years.
[43] No comparable data for 1929. Radio apparatus was formerly included in "Electrical machinery, apparatus, and supplies" and "Phonographs", was a separate industry in the "Miscellaneous industries" group.

[44] Classification revised to exclude shops engaged in light repair work only. Figures for 1933 in italics revised for comparison with 1935. Other figures for 1933 are comparable with 1929 and 1931.

[45] Figures include internal-revenue tax; figures in italics for 1931 exclude internal-revenue tax and are comparable with those for 1929.

[46] No comparable figure because of the fact that the amount of internal-revenue tax is included in the "Cost of materials" for 1931, 1933, and 1935, but not for prior years, while this tax is included in the figures for "Value of products" for all years. ("Value added by manufacture" equals "Value of products" less "Cost of materials, etc.").

[47] Revised to exclude data for "Hats, straw, men's" and to include data for "Wool pulling."

[48] Figures for 1929 and 1933 revised to exclude manufactures of crayons formerly classified in "Artists' materials" but now in "Pencils (including mechanical) and crayons." Revised 1929 data not available for horsepower.

[49] Manufacturers of gas and water meters formerly assigned to abandoned classification "Meters (gas, water, etc.) and gas generators" are now classified in this industry. Figures for 1929 and 1933 have been revised accordingly but revision not carried into subgroup total. Revised 1929 data not available for horsepower.

[50] Not elsewhere classified. This industry was abandoned as a separate classification and establishments formerly included distributed according to value of chief product; no comparable data for 1929.

[51] Not elsewhere classified. Figures for 1929 and 1933 revised to exclude data for establishments manufacturing mineral wool as a primary product. Revision not carried into total for subgroup.

[52] Revised data are not available.

[53] Not including children's wheel goods or sleds.

No. 782.—SUMMARY FOR ALL MANUFACTURING INDUSTRIES COMBINED: BY GEOGRAPHIC DIVISIONS AND STATES

NOTE.—All figures beginning with 1929 and United States totals for 1927 in italics exclude statistics for "Coffee and spices, roasting and grinding" and "Peanuts, walnuts, and other nuts, processed or shelled," no data having been collected for these industries at the 1933 and 1935 censuses. The figures for 1927, except the United States totals in italics, include data for these industries. Data for "Poultry killing and dressing" are included for all years except 1927, for which year this industry was not canvassed. Statistics for horsepower were not collected for 1931 and 1933 and were not compiled for 1935. See also general note, p. 738.

[2] Includes internal-revenue tax paid by tobacco manufacturers amounting to $239,125,000 for 1931, and $205,689,000 for 1933, and $242,158,000 for 1935.

[3] The "Cost of materials" does not include internal-revenue tax paid by tobacco manufacturers and the "Value added by manufacture" for these years is, therefore, overstated by the amount of such tax.

[1] Figures beginning with 1927 are not strictly comparable with earlier years owing to the fact that large quantities of heavy footwear now included with men's shoes were included with "Athletic," prior to 1927.
[2] Figures exclude footwear with fabric uppers and rubber soles; data for this class, for certain census years, are shown in table 793, p. 780.
[3] Figures include satin, canvas, etc.
[4] Includes slippers and moccasins (all leather and part leather, felt, etc.) for house wear.
[5] Not reported separately; included with "all other."
[6] Not reported separately; included with the various classes of boots and shoes.

No. 790.—CHEMICALS: QUANTITY AND VALUE OF PRODUCTION

NOTE.—Data shown in this table represent products made for sale and for interplant transfer. In addition, large quantities of certain chemicals, especially acids, are made and consumed in further processes in the same establishments. There is considerable duplication in the total value of products due to the use of products sold by one establishment as material for other establishments manufacturing chemicals. Tons are of 2,000 pounds, except as noted

[1] Data incomplete, no comparable data, or data not available.
[2] Value includes data for items not shown separately.
[3] Production in 1935, basis 80 percent; for other years, as reported, regardless of strength.
[4] Synthetic, natural dilute, and glacial.
[5] Production in 1935, basis 100 percent; for earlier years, as reported, regardless of strength.
[6] Production in 1929 and 1933, basis 50 percent in part P_2O_5 and in part H_3PO_4; in 1935 basis 50 percent H_3PO_4.
[7] Data for production by establishments classified in lead smelting and refining and copper smelting industries included in figures for 1929 and 1935, but not in those for 1933.
[8] In addition, 3,648,000 gallons of refined natural methanol, valued at $1,149,000, was produced for sale in the "Wood distillation and charcoal manufacture" industry.
[9] The production of ethyl alcohol, as reported to the Bureau of Internal Revenue, Treasury Department, was 138,600,000 proof gallons in 1933 and 193,219,000 proof gallons in 1935.
[10] Includes production from ammonia liquor. Such production in 1935 amounted to 2,991,000 pounds, valued at $388,699. Not reported separately for earlier years.
[11] Figures for 1935, but not for earlier years, include data for ammonia produced in "Manufactured gas" industry. For production in coke industry, see Bureau of Mines report, "Minerals Yearbook."
[12] Production in 1933 and 1935, basis 35 to 37 percent; for 1929, as reported, regardless of strength.
[13] Calcium chloride made by establishments engaged primarily in production of salt included for 1929 and 1933, but not for 1935. Such production in 1935 amounted to 8,044 tons, valued at $50,442.
[14] Figures for 1935 do not include color lakes included with "Paints, pigments, and varnishes" (table 791), nor certain other coal-tar chemicals, shown elsewhere in this table. Data for these classes of products are included with the figures for 1929 and 1933.
[15] Not including by-product crudes made in coke plants and gas works.
[16] Data incomplete; value included in that of "Other chemicals."
[17] Tons are of 2,240 pounds.
[18] Data for sodium nitrate withheld to avoid disclosing an approximation of the output of an individual establishment. Value included in that of "Other chemicals."
[19] Made in producing establishments in "Chemicals, not elsewhere classified" industry. Nitrocellulose articles are also made from purchased nitrocellulose plastics by establishments in other industries.
[20] Includes an indeterminable amount of materials used as fillers, such as wood flour, etc.
[21] Production in 1935, basis 15 percent; for other years, as reported, regardless of strength.
[22] Liquid basis 40°.
[23] Includes data for Glauber's salt refined from natural product.
[24] Includes data for natural salt cake made from brines.
[25] Production in 1935, basis 60 to 62 percent; for other years, as reported, regardless of strength.

No. 796.—MACHINERY: VALUE OF THE PRINCIPAL CLASSES MANUFACTURED

NOTE.—**Values in thousands of dollars.** The various classes of machinery listed are products of a number of industries, such as "Foundry and machine-shop products," "Agricultural implements," "Aircraft," "Electrical machinery, apparatus, and supplies," etc. This table is not an industry presentation, but a special presentation giving value of products for groups designated. The values are in part duplicated in other tables in this abstract, such as tables 797 to 801.

Class	1927	1929	1931	1933	1935
Agricultural machinery	129,595	167,673	49,954	17,109	80,890
Aircraft	14,505	51,508	21,790	15,670	17,242
Bakers' machinery and equipment	20,015	21,730	10,876	7,332	11,869
Blowers and fans	20,433	25,243	15,323	6,955	15,830
Bottling machinery	11,584	11,082	5,653	9,157	8,264
Clay-working machinery (brick, pottery, etc.)	4,308	4,402	1,671	591	1,071
Canning machinery	7,339	8,535	4,065	3,139	8,271
Cars and trucks, motorized	(1)	(1)	2,817	2,120	2,545
Cash registers, adding, calculating, and card-tabulating machines, and typewriters	143,913	151,583	62,279	46,577	83,217
Cement and concrete machinery:					
Cement-making machinery	4,619	4,387	1,579	545	1,646
Concrete mixers	12,674	11,405	4,357	963	2,415

Cranes (including hoists and derricks)	44,454	57,840	18,448	5,607	13,227
Dairy, cheese-factory, and butter-factory machinery	16,536	16,593	11,388	8,327	14,864
Dredging and excavating machinery:					
Power shovels	32,106	43,348	18,609	4,519	12,560
Other	19,776	17,397	11,578	2,975	5,891
Electrical machinery	203,995	253,594	[2] 138,425	[2] 74,933	[2] 151,501
Elevators and elevator machinery	43,152	44,044	20,035	8,322	9,110
Engines (steam or internal-combustion), and water wheels [3]	169,589	204,796	90,062	38,740	80,748
Flour-mill and grain-mill machinery	7,967	8,286	4,342	2,354	5,167
Gas machines and apparatus	5,082	5,408	1,794	(1)	(1)
Glass-making machinery	3,085	3,688	2,545	1,895	3,543
Hydraulic machinery (other than for dredging)	2,906	10,082	4,540	1,549	5,593
Laundry machinery	27,204	28,893	14,637	5,980	11,050
Lawn mowers	9,269	10,953	6,141	3,467	4,987
Leather-working machinery, other than shoe	2,000	1,249	816	747	1,005
Locomotives (steam and internal-combustion)	60,650	65,203	13,073	787	[4] 21,735
Machine tools	105,555	186,374	58,712	23,936	87,412
Metal-working machinery, other than machine tools	39,201	50,336	36,294	13,530	53,888
Mining machinery (other than oil-well), including ore crushers	38,152	40,325	12,570	8,776	22,770
Motorcycles, bicycles, and parts [5]	19,402	21,198	13,285	(1)	22,807

No. 804.—COTTON SPINDLES, COTTON CONSUMPTION, AND STOCKS

NOTE.—The statistics for 1915 to 1937 relate to the 12 months ended July 31 and those for prior years to the 12 months ended Aug. 31. Consumption and stocks are expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton for all years are in equivalent 500-pound bales. The number of active cotton spindles represents spindles operated at some time during the year, and is not as satisfactory a measure of activity of the industry as active spindle hours.

No. 809.—LEAF TOBACCO: AMOUNTS CONSUMED IN THE MANUFACTURE OF CIGARS, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF

NOTE.—**All figures in thousands of pounds.** Figures represent the equivalent in unstemmed leaf tobacco of stemmed leaf or scraps, cuttings, and clippings. In the following table the tobacco used in the manufacture of cigars and cigarettes was converted on the basis of 3 pounds of stemmed leaf or scraps, etc., to 4 pounds of unstemmed beginning 1915 (conversion prior to 1915 was at the ratio of 3 to 5) and of tobacco and snuff beginning 1903. For 1896 to 1902, tobacco used in manufactured tobacco and snuff was shown only under two heads, namely "leaf" and "scraps." It is probable that stemmed leaf was included with unstemmed tobacco under the head of "leaf" without the one kind being converted to the equivalent in the other. The conversion ratio of 3 to 4 was applied only to "scraps" for these years. Data exclude tobacco used in bonded manufacturing warehouses (see table 808).

[1] In computing taxable gallons all fractional parts of a proof gallon less than one-tenth are excluded.
[2] Production represents the amount removed from fermenters including wine that is removed for use as distilling material in the production of brandy.
[3] Includes artificially carbonated wine. Tax is payable "on each one-half pint (for artificially carbonated wine, 'on each pint' beginning June 26, 1936) or fraction thereof" of "each bottle or other container."
[4] Barrels of not more than 31 gallons. [5] Containing less than one-half of 1 percent alcohol by volume.
[6] Includes data for Hawaii; industrial alcohol figures also include Puerto Rico beginning Aug. 1, 1928.
[7] No data compiled by Bureau of Internal Revenue. [8] No legal production.
[9] Includes 1,588,788 barrels produced prior to Apr. 7 (effective date of the Act of Mar. 22, 1933).
[10] Alcoholic content limited to 3.2 percent by weight prior to Dec. 5, 1933.
[11] Does not include brandy withdrawn for the fortification of wine.
[12] Total withdrawals: tax law repealed, effective May 10, 1934. [13] In thousands of proof gallons.
[14] Does not include 40,206 gallons (regulation) of ethyl alcohol (pure grain) for 1935, 44,289 gallons for 1936, and 212 gallons for 1937, not convertible into proof gallons. [15] In thousands of wine gallons.

No. 812.—MOTION-PICTURE PRODUCTION: SUMMARY OF CENSUS STATISTICS

NOTE.—**All money figures are in thousands of dollars.** Data represent the activities of the motion-picture studios and laboratories. They do not include the distribution of films and their projection in theaters. No data are included for establishments which reported less than $5,000 as the cost of work done. The motion-picture industry has been canvassed, since 1921, in connection with the biennial census of manufactures. It is not, however, a manufacturing industry, but was treated as such prior to 1931.

32. DISTRIBUTION AND SERVICE AND AMUSEMENT INDUSTRIES

No. 814.—DISTRIBUTION OF MANUFACTURERS' SALES: COMPARISON BETWEEN PRIMARY CHANNELS OF DISTRIBUTION USED IN 1929 AND 1935

NOTE.—Figures do not cover sales or distribution expenses of manufacturers' own wholesale branches or retail stores, which are covered in data for wholesale trade and retail trade, respectively. Figures were not compiled for industries: (1) Where no outside sales were made, the plants being maintained for the purpose of making repairs, such as railroad repair shops; (2) where sales were made direct to users, the value of products in most instances comprising the sale of services, such as engraving and lithographing industries; (3) in which the plants were engaged, for the most part, in performing labor on materials owned by others so that their sales represented the sales of services rather than commodities, such as electroplating and galvanizing industries; and (4) where the plants of one organization so dominated that to show distribution of sales figures would disclose individual operations. The following table is limited to industries which are directly comparable in 1929 and 1935, while table 815 covers all industries for which 1935 data were compiled

[1] Figures for 1930 to 1932, 1934, and 1936 are estimates of the Bureau of Foreign and Domestic Commerce. Figures for total wholesale trade shown in the first column include data for chain-store warehouses which were not included in the 1935 wholesale trade census and which are excluded from figures by type of establishments in this table and from figures in other tables relating to wholesale trade.

[2] Figures adjusted to scope of the 1935 Census of Wholesale Trade; they exclude chain-store warehouses.

[1] Estimated by Bureau of Foreign and Domestic Commerce, based on trends of currently published data.
[2] The 1935 census figures for the food group include some stores classified as country general stores in prior censuses, as commodity data on the 1935 schedules indicated that many stores operating under the name of "General stores," and so classified in previous censuses, were essentially food stores. Estimates by the Bureau of Foreign and Domestic Commerce for the "Food group" and "Farmers' supply and country general stores group," for 1929 to 1934, adjusting for these shifts in classifications in the 1935 census, follow (figures in millions of dollars): "Food group"—1929, 11,377; 1930, 10,809; 1931, 9,443; 1932, 7,623; 1933, 7,168; 1934, 7,737; "Farmers' supply and country general stores"—1929, 2,994; 1930, 2,305; 1931, 1,647; 1932, 988; 1933, 1,266; 1934, 1,512.

[1] See note 2, table 820, regarding shifts in classifications between the food group and "General stores."
[2] Revised.
[3] Includes general merchandise mail-order houses.
[4] This classification includes in 1929, 3,379 body, fender, and paint shops with receipts of $46,106,000 and 2,059 parking stations, parking garages, and lots with receipts of $39,262,000, which are included under "Service establishments" in 1933 and 1935.
[5] Bicycle shops, included in this classification in 1929 and 1933, are included with "Other retail stores" in 1935.
[6] Fuel-oil retailers, included in "Filling stations" in 1933 are included in "Fuel and ice dealers" under "Other retail stores" in 1935.
[7] Figures for 1935 are not comparable with data for earlier years. Some heating, plumbing, and air-conditioning contractors, included in 1933, were transferred to the Construction Census in 1935.
[8] The 1935 figures are not comparable with those for earlier years. A number of electrical contractors, included in this classification in 1933, were transferred to the Construction Census in 1935 and those electrical shops whose income from repairs was greater than the sale of merchandise were included under Service Establishments in 1935.

[2] No comparable data available.
[3] Reported by 228 chains.
[4] Including merchandise sold at wholesale through the central offices. Figures do not represent the cost of goods sold. They relate only to merchandise billed through warehouses, which is but a small part of the total quantity of goods sold by chain stores. This figure is sometimes regarded as part of the total of wholesale distribution, performed by the chains instead of by merchant wholesalers.

No. 829.—INDEXES OF THE VALUE OF SALES OF CHAIN STORES

NOTE.—The combined index for all groups includes the apparel chains shown separately in the table, 5 grocery chains, 6 variety chains, 2 drug chains, and 3 (prior to January 1936, 2) shoe chains. Indexes are based on daily average sales. Each monthly index is expressed as a percentage of the average for the same month of the base period. Allowance for the fluctuating date of Easter is made in the case of apparel, variety, and shoe chains. No allowance has been made for changes in the number of stores operated

No. 830.—INDEXES OF DOLLAR VALUES OF AUTOMOBILE RETAIL SALES, VARIETY STORE SALES, GROCERY CHAIN STORE SALES, AND RETAIL SALES OF GENERAL MERCHANDISE IN SMALL TOWNS AND RURAL AREAS

NOTE.—Indexes of automobile sales are based on unit sales figures reported monthly to the Automobile Manufacturers' Association, which represent over 95 percent of all dealer's sales. The unit sales figures are converted to dollar volume by the use of a computed "average realized price." Indexes of sales in small towns and rural areas are based on figures furnished by three mail-order companies for sales by mail only and by a large group of chain units operating in small towns and cities which serve the rural population. Sales of reporting concerns represent about one-fifth of all general merchandise sales in places of less than 30,000 inhabitants. Indexes of both variety store sales and grocery chain store sales are based on figures furnished by chain organizations doing more than 75 percent of the business in the respective fields. For the variety store index adjustment has been made for changes in the number of stores operated by the companies so that the index reflects sales changes for a constant number of stores. All indexes are computed from dollar sales reduced to a daily average basis. In computing the index of automobile sales, equal weight is given to all days of the month, while in computing the other three indexes, allowance is made for the varying number of business days in the months and the varying sales importance of the different days of the week. The monthly indexes of all four series are adjusted for seasonal changes and, in addition, the variety-store index is adjusted for the changing date of Easter.

No. 833.—SERVICE ESTABLISHMENTS: SUMMARY BY STATES, 1935

NOTE.—The census of service establishments covers a heterogeneous group of kinds of business (see table 832) primarily engaged in the sale of service, as distinguished from establishments dealing in merchandise. The professional field, the financial, education, transportation, construction, and diverse other fields of business activity, many of which are covered elsewhere, are not included. Owing to differences in the scope of the 1933 and 1935 censuses of service establishments, the aggregates for 1935 are not comparable with the aggregates for 1933 published in the 1936 issue of this report.

No. 834.—POWER LAUNDRIES, CLEANING AND DYEING ESTABLISHMENTS, AND RUG-CLEANING ESTABLISHMENTS: SUMMARY OF CENSUS STATISTICS

NOTE.—**All money figures in thousands of dollars.** Statistics cover establishments reporting receipts of $5,000 or more. Data for power laundries relate to commercial laundries. Data for cleaning and dyeing establishments are restricted to establishments using mechanical power; they include cleaning and dyeing departments of laundries where separate data could be obtained. Rug-cleaning, which was given a separate classification beginning with 1933, was treated in general as an activity of the power laundry industry at prior censuses; statistics include rug-cleaning departments of laundries and of cleaning and dyeing plants so far as they were reported separately. Data for 1933 are incomplete, as about 15 percent of the laundries and 24 percent of the cleaning and dyeing establishments that had reported for 1931 failed to supply any information as to their status or activities in 1933. The laundries that failed to report accounted for around 8 percent of the 1931 totals for number of wage earners and receipts for work done for all laundries, while the cleaning and dyeing establishments that did not report accounted for about 15 percent of the 1931 totals for these two items for cleaning and dyeing establishments.

	Number of laundries	Proprietors and firm members	Salaried employees [1]	Wage earners (average for the year)	Salaries [1]	Wages	Cost of supplies, fuel, and purchased electric energy	Cost of contract work	Receipts for work done

No. 838.—PLACES OF AMUSEMENT: SUMMARY FOR THE UNITED STATES BY KINDS OF BUSINESS, 1935

NOTE.—The Census includes places of amusement (except those operated by educational institutions, municipalities, or other governmental agencies, or fraternal or religious organizations) charging admission, or receiving fees for use of recreational facilities. It is definitely known that the coverage is seriously incomplete, due primarily to the absence of legislation which during regular census years makes reporting mandatory. Incompleteness arises also from the difficulty of securing reports from many seasonal and transient amusement enterprises, which were not in operation at the time of the canvass. Furthermore, the nature of some amusement enterprises and of the business which they conduct is such that it was difficult to make the contacts necessary to secure reports.

No. 841.—REAL ESTATE AGENCIES AND BROKERAGE OFFICES: SUMMARY FOR THE UNITED STATES, 1935

NOTE.—**Commissions and fees and pay roll in thousands of dollars.** The census covers only offices whose income from real-estate sources consists principally of commissions and fees derived from such activities as real-estate sales, real-estate rentals, real-estate management, appraisals, etc. Offices reporting both a real estate and an insurance activity are included under the designation "Insurance and real-estate offices." Due to the fact that reporting to the 1935 census was not mandatory and to the difficulties experienced by enumerators in identifying as real-estate offices those establishments conducting a real-estate business in connection with other businesses, the coverage is incomplete

	Real-estate offices	Insurance and real-estate offices [1]		Real-estate offices	Insurance and real-estate offices [1]

Part-time	826	1,510			

[1] Offices doing insurance business only are not included. For insurance offices, see table 312, p. 284.
[2] Not including insurance commissions received by insurance and real-estate offices.
[3] Covers total employment of insurance and real-estate offices as well as total employment of real-estate offices reporting no insurance activity. The pay-roll figures also represent the total pay roll of all offices reporting; they do not include compensation of proprietors and firm members of unincorporated businesses.

33.—CONSTRUCTION AND HOUSING

No. 842.—CONSTRUCTION CONTRACTS AWARDED IN 37 STATES: BY CLASSES

NOTE.—Data compiled from reports covering contracts awarded in small towns and rural districts as well as large cities. Public works and public utilities cover some projects not susceptible to measurement in terms of floor space, such as highways, pipe lines, subways, etc. Statistics for the 37 States were not compiled for years prior to 1925, but available figures covering a varied number of States for earlier years have been published in the 1932 and previous issues of this publication. Figures for the individual States and districts in table 843 represent the value of construction contracts awarded in the State or district where the work is actually performed.

[Values in millions and tenths of millions of dollars; floor space in thousands of square feet]

[1] Owing to a change in the classification, data for airports have been excluded from the "Commercial" class and included with "Public utilities" beginning 1930. Separate figures for airports are not available prior to 1930.

[2] Owing to a change in the classification figures for the "Factories" class exclude data for power plants for all years and for pipe lines beginning 1929 (separate figures not available for years prior to 1929), which data are included with "Public utilities."

[3] Excludes 23 projects valued at $29,551,900, for which data are not available by classes of construction These projects were under the Civil Works Program which was not in existence after March 1934.

No. 845.—INDEXES OF THE VALUE OF CONSTRUCTION CONTRACTS AWARDED

NOTE.—**1923-25 average = 100.** Indexes are derived from monthly figures of construction contracts awarded reported by the F. W. Dodge Corporation. Reports included 37 States beginning with May 1924 and a varied number for earlier years. In order to obtain comparable figures from 1919 to date, the total value of construction contracts awarded in 37 States was estimated for January 1919 through April 1924. Seasonal adjustments were computed separately for "residential" and "all other" types of construction and the two series combined. The indexes are based on a 3-months moving average, centered at the middle month. For a more detailed description of the indexes, see the Federal Reserve Bulletin for July 1931.

No. 846.—BUILDING PERMITS ISSUED IN PRINCIPAL CITIES

NOTE.—Figures cover new buildings and repairs to old buildings, but exclude data for installation permits (those for installing boilers, signs, etc.) which are not strictly building operations. These permits are rather numerous, but in value they are of small amount. The number figures represent the number of buildings covered by permits issued (new construction and repairs, etc.), rather than the number of permits. Buildings authorized by permit are not always actually constructed, and the actual cost of those constructed may differ considerably from that originally estimated. The cities shown had a population of 50,000 or over in 1930.

No. 848.—ESTIMATED COST OF BUILDING CONSTRUCTION, FAMILIES PROVIDED FOR, AND POPULATION FOR 257 IDENTICAL CITIES

NOTE.—The estimated cost of buildings is based upon building permits issued for new buildings and repairs to old buildings, but does not include data for installation permits (those for installing boilers, signs, etc.) which are not strictly building operations. These permits are rather numerous, but in value they are of small amount. Buildings authorized by permit are not always actually constructed, and the actual cost of those constructed may differ considerably from that originally estimated

No. 849.—CONSTRUCTION, AND PROFESSIONAL, TECHNICAL, AND CLERICAL PROJECTS FINANCED FROM FEDERAL FUNDS: VALUE OF CONTRACTS AWARDED AND FORCE-ACCOUNT PROJECTS STARTED

NOTE.—**In thousands of dollars.** In the case of Federal projects financed from Public Works Administration funds the entire amount is allotted to Federal departments or agencies. The work is performed by commercial firms under contracts or, if a force-account project (no contract let), by day labor hired directly by the Federal agencies. In the case of allotments to States and local governments for non-Federal projects the Public Works Administration makes a direct grant of not more than 30 percent of the total labor and material cost on projects financed from funds appropriated under the National Industrial Recovery Act and not more than 45 percent of the total labor and material cost on projects financed by funds provided under the Emergency Relief Appropriation Acts of 1935 and 1936. The public agency finances the other 70 or 55 percent, in some cases through loans at interest from the Public Works Administration. Commercial allotments are in the form of loans and for the most part have been made to railroads.

No. 850.—CONSTRUCTION INDUSTRY: UNITED STATES SUMMARY FOR ALL REPORTING ESTABLISHMENTS, BY KINDS OF BUSINESS, 1935

NOTE.—The 1935 Census covers all reporting contracting establishments which handled work amounting to $500 or more. Data do not represent all construction work done in the United States as reports were not received from all contractors. Data for force account construction are not included. In reporting work performed, each contractor reported only the work performed by his own organization, excluding the value of work sublet to other contractors. Where State data are shown, figures for value of work performed are in accordance with the location of the contracting establishment and do not represent the amount performed in a given State. The percentage distribution of work performed by the location of the work is shown in table 852. For further information on the scope and limitations of these data, see report issued by the Bureau of the Census, entitled "Construction Industry, 1935," Volume I.

No. 856.—RESIDENTIAL STRUCTURES IN 64 CITIES: SELECTED STATISTICS FROM THE REAL PROPERTY INVENTORY, 1934

NOTE.—The cities included in the real-property inventory were selected from every State in the Union as a representative sample of urban housing in the United States. The cities chosen vary in size from a population of 11,000 to more than 1,000,000. The total population of the areas canvassed constituted about one-seventh of the total urban population of the United States. The survey covered all buildings with residential units except hotels, clubs, rooming houses, and summer cottages. Data for the individual cities included in this summary are shown in table 815 of the 1935 issue of the Statistical Abstract

APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:

	Weight of United States gallon		Weight of barrel of 42 gallons	
	Pounds	Kilograms	Pounds	Kilograms
Crude petroleum	7.3	3.311	306.6	139.07
Lubricating oils	7.0	3.175	294.0	133.36
Illuminating oils (kerosene)	6.6	2.994	277.2	125.74
Gasoline and related products (motor spirit, benzine, etc.)	6.1	2.767	256.2	116.21
Fuel and gas oils	7.7	3.493	323.4	146.69
