LETTER OF TRANSMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., March 11, 1940.

SIR: I have the honor to submit herewith for publication the sixty-first issue of the Statistical Abstract of the United States. This annual volume is a compilation of authoritative statistics relating to the social and economic condition of the population and to the industrial, commercial, and governmental activities of the Nation. It is designed to serve as a convenient reference work for businessmen, economists, statisticians, students, and others who may have need of a statistical compendium covering a wide range of subjects.

The present volume was prepared in the Division of Territorial, Insular, and Foreign Statistics, of this Bureau, under the supervision of Kathleen H. Dugan, editor, and under the administrative direction of LeVerne Beales, chief statistician for the division.

The first 34 issues of the Abstract were prepared and published by the Bureau of Statistics, originally a bureau of the Treasury Department and later of the Department of Commerce and Labor; the next 25 by the Bureau of Foreign and Domestic Commerce, now of the Department of Commerce; and the sixtieth issue (that for 1938) by the Bureau of the Census.

The statistical tables contained in the Abstract are compilations of data collected by the various statistical agencies of the Federal Government, by several State agencies, and by a considerable number of nongovernmental organizations. Many of these agencies have rendered valuable assistance not only in supplying advance data but also in the actual preparation of tables for inclusion in the Abstract. Special mention on this account is due the following-named agencies of the Federal Government: The Bureau of Foreign and Domestic Commerce and the Bureau of Marine Inspection and Navigation, of the Department of Commerce; the Bureau of Agricultural Economics, the Agricultural Marketing Service, the Office of Foreign Agricultural Relations, the Farm Credit Administration, the Forest Service, and the Weather Bureau, of the Department of Agriculture; the Office of Education and the Social Security Board, of the Federal Security Agency; the Bureau of Fisheries, the General Land Office, and the Bureau of Mines, of the Department of the Interior; the Immigration and Naturalization Service and the Bureau of Labor Statistics, of the Department of Labor; the Bureau of Internal Revenue, of the Treasury Department; the Federal Communications Commission; the Board of Governors of the Federal Reserve System; the Interstate Commerce Commission; the United States Maritime Commission; and the Veterans' Administration.

Respectfully,

WILLIAM LANE AUSTIN,
Director of the Census.

To HON. HARRY L. HOPKINS,
Secretary of Commerce.

31. MINING AND MINERAL PRODUCTS

Table	Page
735. Mineral products of the United States—Value, for metallic and nonmetallic: 1881 to 1938	728
736. Nonferrous metals—Yearly average prices, by kind: 1896 to 1938	728
737. Mines and quarries—Summary for producing and nonproducing enterprises: 1929	729
738. Mines and quarries, producing—Summary: 1909 to 1929	729
739. Mines and quarries, producing—Summary, by States: 1919 and 1929	730
740. Mines and quarries, producing—Summary, by industries: 1919 and 1929	731
741. Mineral industries—Summary for specified industries: 1935	732
742. Mines and quarries, producing—Establishments classified by number of wage earners, by principal industries: 1929	733
743. Mines and quarries, producing—Hours of labor, by industries: 1929	733
744. Mineral production, by States and for Alaska: 1931 to 1937	734
745. Mineral products of the United States—Quantities and values: 1920 to 1938	735
746. Iron ore—Production, shipments, exports, and imports, 1881 to 1938, and production, by region, State, and kind, 1935 to 1938	738
747. Pig iron and ferro-alloys—Production, by States, disposition, kind, and fuel and materials used: 1900 to 1938	738
748. Pig iron and ferro-alloys and steel ingots and castings—Production, exports, and imports: 1871 to 1938	739
749. Rolled and miscellaneous steel products—Production, by kind: 1910 to 1938	739
750. Iron and steel, finished rolled—Production, exports, and imports: 1876 to 1938	740
751. Steel, wire and wire products, tin plate and terneplate, and cast-iron pipe and fittings—Production: 1933, 1935, and 1937	741
752. Steel ingots and castings—Production, by grade: 1890 to 1938	743
753. Blast furnaces and steel mills—Summary: 1889 to 1937	743
754. Iron and steel—Aggregate exports: 1890 to 1938	743
755. Iron and steel—Exports, by kind: 1935 to 1938	744
756. Iron and steel—Exports, by destination: 1936, 1937, and 1938	744
757. Iron and steel—Average annual prices, by class or kind: 1891 to 1938	745
758. Aluminum and bauxite—Production, exports, and imports: 1913 to 1938	745
759. Copper—Production, exports, imports, and consumption: 1910 to 1938	746
760. Copper—Smelter production, by State of origin of ore: 1910 to 1938	746
761. Copper—Smelter and refinery output: 1850 to 1938	747
762. Copper—Exports and imports: 1891 to 1938	747
763. Lead, recoverable—Mine production, by States and for Alaska: 1920 to 1938	748
764. Lead—Production of refined primary and secondary lead, 1830 to 1938, and by class and source: 1880 to 1938	748
765. Lead—Supply and distribution of refined primary pig: 1910 to 1938	749
766. Nonferrous metals and alloys, and finished products thereof—Production, by kind: 1933, 1935, and 1937	749
767. Zinc—Production of ore, by States, smelter production, and primary slab zinc available for consumption: 1910 to 1938	750
768. Zinc, primary—Smelter production from domestic ore: 1875 to 1938	750
769. Gold and silver—Production in continental United States, Alaska, Puerto Rico, and Philippine Islands: 1792 to 1938	751
770. Gold and silver for use in manufactures and the arts: 1880 to 1938	752
771. Silver—Prices, London and New York, and value in the dollar: 1835 to 1938	752
772. Coke—Production, exports, and imports: 1896 to 1938	753
773. Coke—By-product and beehive production, by States: 1915 to 1938	753
774. Coal—Production, 1821 to 1938, and by States: 1911 to 1938	754
775. Coal—Exports, imports, and bunker coal laden on vessels in foreign trade: 1891 to 1938	755
776. Coal—Shipments, value, and employment in mines: 1890 to 1938	755
777. Bituminous coal—Consumption, by class of consumer: 1889 to 1938	756
778. Strikes in anthracite and bituminous coal mining industries, by major issues involved: 1927 to 1938	756
779. Coal for household use—Retail prices, by cities: 1929 to 1939	757
780. Coal—Average retail prices and indexes for large cities combined: 1930 to 1939	758
781. Natural gas and natural gasoline—Production, 1906 to 1938, and by States, 1925 to 1938	758
782. Manufactured-gas industry—Fuel consumed, by kind and by use: 1931 to 1938	759
783. Manufactured-gas and natural-gas industries—Summary: 1931 to 1938	759
784. Gas prices—Monthly prices of specified quantities, by cities	760
785. Petroleum, crude—Production: 1861 to 1938	761
786. Petroleum, crude and refined—Production, imports, exports, and bunker oil laden on vessels in foreign trade: 1871 to 1938	761

¹Based on land area.

²In comparing this percentage of increase with that shown for the decade 1910-1920, allowance should be made for the fact that the period between the censuses of 1910 and 1920 was less than a full decade, and that between the 1920 and 1930 censuses was more than a full decade. An increase of 16.1 per cent for 123 months (the time between Jan. 1, 1920, and Apr. 1, 1930) is equivalent to 15.7 per cent for exactly 10 years; and the 1920 increase for 11½ months (the time between Apr. 15, 1910, and Jan. 1, 1920) is equivalent to 15.4 per cent for 120 months. Making this adjustment, the rate of increase for the decade ending in 1930 is only slightly higher than that for the preceding decade.

POPULATION—DENSITY BY STATES

3

NO. 5.—POPULATION PER SQUARE MILE, BY STATES: 1800 TO 1930

NOTE.—The population of continental United States has been divided by the total land area, although it included at each census some unorganized territory which was not canvassed by the enumerators. For each State or Territory the population as returned at a given census has been divided by the land area as constituted at the time that census was taken. The areas of Indian reservations, outside of Indian Territory, are included in the areas of the several States and Territories, although the population was not ascertained and can not be considered in figuring density of population prior to 1890. The census of 1870 in the Southern States is considered incomplete. Population density in 1930 of Alaska, Hawaii, and Puerto Rico, and of Philippine Islands, December 31, 1918, based on gross area, and not land area, was as follows: Alaska, 0.1; Hawaii, 57.5; Puerto Rico, 449.5; Philippine Islands, 90.0

⁴ Population of area taken to form State of Missouri in 1821; part of Louisiana Territory in 1810.⁵ Population shown for South Dakota in 1860 represents entire Dakota Territory; for 1870 and 1880, population parts as since existing have been segregated.⁶ Area now constituting West Virginia formed part of Virginia prior to 1870.⁷ Population of area taken to form Arkansas Territory in 1819; part of Louisiana Territory in 1810.⁸ Includes population of Indian Territory, as follows: 1890, 180,182; 1900, 392,060.

AREA AND POPULATION

No. 7.—POPULATION, FOR URBAN SIZE GROUPS AND FOR RURAL TERRITORY:
1900 TO 1930

NOTE.—Prior to 1930 all incorporated places and also towns (townships) in Massachusetts, Rhode Island, and New Hampshire having 2,500 or more inhabitants, are classed as urban areas. For 1930, urban areas also include unincorporated political subdivisions with a total population of 10,000 or more inhabitants and a population density of 1,000 per square mile and include for the three New England States named above only those towns which contain a village of more than 2,500 inhabitants comprising, either by itself or when combined with other villages within the same town, more than 50 per cent of the population of the town. The total urban and rural population for 1880 and 1890 is as follows: Urban—1880, 14,358,167; 1890, 22,298,359; rural—1880, 35,797,616; 1890, 40,649,355; per cent urban—1880, 28.6; 1890, 35.4.

POPULATION—URBAN AND RURAL

7

No. 9.—POPULATION, URBAN AND RURAL, BY STATES: 1910 TO 1930

NOTE.—See headnote, Table 7. The proportion of urban and rural population in 1930 as compared with data for earlier censuses was affected by changes in the classification. If the segregation of urban and rural had been made in 1930 on the same basis as in 1920, the per cent urban in 1930 for the areas affected would have been as follows: United States, 55.9; New Hampshire, 66.3; Massachusetts, 95.3; Rhode Island, 97.5; Connecticut, 65.0; New York, 83.4; New Jersey, 77.5; Pennsylvania, 65.7; California, 72.4

POPULATION, BY STATES

9

No. 11.—POPULATION, ESTIMATED AS OF JULY 1, BY STATES: 1928 TO 1937

NOTE.—Estimates of population for 1928 and 1929 are based on the assumption that the increase (or decrease) each year between the censuses of 1920 and 1930 is equal to the annual average change between the two enumerations. For 1930 to 1937, the total population is estimated upon the basis of the available birth, death, immigration, and emigration figures, allowance being made for unregistered births and deaths. For State estimates for 1934 and 1935 a study of local conditions was made through State data, principally school statistics, State censuses, and a review of the farm population as indicated by the Agricultural Census of Jan. 1, 1935. The figures for 1930 to 1933 are obtained by interpolation between the 1930 census figures and the 1934 and 1935 estimates. For estimate for continental United States for 1938, see table 12, p. 10. Because of lack of adequate data on internal migration and because of the proximity of the Sixteenth Decennial Census, to be taken in 1940, no further estimates of the population of States will be made during this intercensal decade. For actual enumerations, 1790 to 1930, see table 6, p. 4.

No. 12.—POPULATION, ESTIMATED AS OF JULY 1, FOR CONTINENTAL UNITED STATES AND CERTAIN OUTLYING TERRITORIES AND POSSESSIONS

NOTE.—Estimates, except for continental United States and Hawaii, 1930 to 1938, are based on the assumption that the increase each year between two successive censuses is equal to the annual average increase between the two enumerations. Revised estimates for continental United States and Hawaii, 1930 to 1938, are based on available data regarding births, deaths, immigration, and emigration, allowance being made each year for unregistered births and deaths. Estimates for Puerto Rico, 1930 to 1938, are based upon a census taken as of Dec. 1, 1935. No further estimates during this intercensal decade.

¹ Enumeration in Southern States incomplete; this affects especially figures for the negro population.² White population includes Mexicans prior to 1930. The estimated number of Mexicans included in the white classification in 1920 was as follows: Total, 700,541; native white, 243,181 (172,704 of foreign parentage and 70,477 of mixed parentage); foreign-born white, 457,360. For close comparison with 1930, adjusted figures for 1920 may be obtained by deducting these from the white population as reported in 1920.³ Exclusive of Indians in Indian Territory and on Indian reservations, not enumerated prior to 1890.⁴ Comprises Filipinos, Hindus, Koreans, Hawaiians, Malays, Siamese, Samoans, and Maoris.⁵ Less than one-tenth of one per cent. ⁶ A minus sign (-) denotes decrease.⁷ Exclusive of 325,464 persons (117,368 whites, 18,636 Negroes, 189,447 Indians, and 13 Chinese), specially enumerated in 1890 in Indian Territory and on Indian reservations.⁸ Increase over figures adjusted for 1920 on account of Mexicans. See footnote 2.⁹ Increase over estimated number in 1920. ¹⁰ Per cent not shown where base is less than 100.

¹ A minus sign (-) denotes decrease.² Boundaries changed between 1910 and 1920. Statistics for 1910 relate to pre-war boundaries.³ Persons reported in 1910 as of Polish mother tongue born in Germany (190,096), Austria (328,418), and Russia (418,370) have been deducted from the respective countries and combined as Poland for comparison with number reported in 1920 as born in Poland. Though Poland before 1918 was divided among Russia, Germany, and Austria, the censuses of 1880 to 1900 listed it as a country of birth.⁴ Created since 1910.⁵ Included as part of Yugoslavia in 1920 and 1930.⁶ Turkey in Asia included with Turkey in Europe prior to 1910.⁷ Albania included with Turkey in Europe in 1910 and earlier years.⁸ Newfoundland included with Canada prior to 1910.⁹ Except possessions of the United States.

¹ DEFINITION OF MEDIAN.—The median is the numerical value of the half-way point in a series of units arranged according to size, age, value, weight, or some other measurable characteristic. Therefore there are as many units above the median size, weight, etc., as there are below it. One-half of the population is older than the median age and the other half is younger. One-half of the homes have a value above the median value, the other half a value below it.

¹ A part of the decreases from 1920 to 1930 in the percentage illiterate in some States is doubtless due to the separate classification in 1930 of Mexicans who were included in 1920 with the white population.

**NO. 37.—MARITAL STATUS, BY SEX, RACE, NATIVITY, AND PARENTAGE,
CONTINENTAL UNITED STATES: 1920 AND 1930**

NOTE.—Figures for "All other" in 1930 include Mexicans; prior to 1930 Mexicans were classified for the most part as white. See footnote 2, Table 14. The marital condition of males and females 15 years of age and over by race and nativity for each geographic division and of white and negro persons for each State having a negro population of over 5 per cent of the total is shown in Statistical Abstract, 1931, Tables 23 and 24.

AREA AND POPULATION

No. 40.—FAMILIES, BY HOME TENURE AND SIZE OF FAMILY, BY STATES

Note.—A family is defined as a group of persons related either by blood or by marriage or adoption who live together as one household usually sharing the same table. Single persons living alone are counted as families, however, as are a few small groups of unrelated persons sharing the same living accommodations as "partners." In the 1920 count, inmates of an institution were treated as a single family as were also other quasi-family groups. Families not reporting tenure are included in the totals for all families.

¹ Private families only, excluding 75,178 institutions, hotels, etc. These quasi-family groups were included in the count as made for 1920.

² The first of the two averages shown for 1930 is obtained by dividing the total population by the combined number of private families and quasi-family groups (institutions, hotels, etc.). This figure is strictly comparable with the 1920 average. The second average presented for 1930 is obtained by dividing the total population living in private families by the number of private families.

¹ Because of changes made in 1930 in the classification of agricultural pursuits, it is impossible to group the 1920 occupations exactly according to the 1930 classification. It is believed, however, that the effect of the difference in grouping on the comparability of figures here presented is negligible. Figures have been adjusted to exclude those employed on turpentine farms classified in "Agriculture" in 1920 (see Note 5).

² Since, in 1920, only farm laborers on general farms were distinguished as working on "home farm" or "working out," farm laborers on dairy farms, stock farms, truck farms, poultry farms, etc., who were, in fact, working on the "home farm" as "unpaid family workers" were not included in "Farm laborers (home farm)." Hence, as here compiled for 1920, the number of farm laborers classified as "Wage workers" probably is somewhat too large, and the number classified as "Unpaid family workers" somewhat too small.

3. VITAL STATISTICS

General Note.—Births and deaths are registered by the States, and transcripts of the original certificates are received and tabulated by the Bureau of the Census. Because of the gradual expansion of the "registration" areas up to 1933 (see tables 75, 82, and 93), the numbers of births and deaths recorded for earlier years for the areas as a whole are not strictly comparable, but, in most cases, the expansion of the areas had only a negligible effect on the comparability of the rates. Beginning with 1933, all States have been included in both the birth and death registration areas.

"Registration area" in tables 75, 78-80, 82, 84-86, 88-90 covers continental United States; table 91 gives figures for Hawaii, Puerto Rico, and the Virgin Islands. Data for stillbirths (see table 87) are excluded from the figures for both births and deaths.

Rates for 1930 to 1938, except as noted, are based on the latest revised estimates of population as of July 1, given in table 11, p. 9 and table 12, p. 10. Revised population estimates for July 1, 1930 to 1938, are not available by race or by age groups or for cities.

In all tables giving statistics by race, data for Mexicans have been included with those for the white population.

VITAL STATISTICS

No. 83.—BIRTHS AND DEATHS, BY PLACE OF OCCURRENCE AND BY PLACE OF RESIDENCE, FOR SELECTED CITIES: 1937

Note.—The first and the second columns compare the numbers of births occurring in the specified cities (regardless of the places of residence of the mothers) with the numbers of births to mothers whose permanent homes were in the specified cities (regardless of the places of occurrence of such births). Similarly, the third and fourth columns compare the numbers of deaths occurring in the specified cities (regardless of the places of residence of the decedents) with the numbers of deaths of residents of the specified cities (regardless of the places of occurrence of such deaths). For example: The total number of births occurring in Akron (including births to mothers having their permanent homes elsewhere) was 4,150; whereas the total number of births to mothers having their permanent homes in Akron (including births occurring elsewhere) was 3,698.

4. IMMIGRATION, EMIGRATION, AND NATURALIZATION

GENERAL NOTE.—In compiling immigration and emigration statistics, Alaska, Hawaii, and Puerto Rico, beginning with 1904, 1901, and 1902, respectively, have been treated as integral parts of the United States. In prior years the transfer of population between these areas and the United States was treated as immigration and emigration. The movement of population between the Philippine Islands and the United States was treated as immigration and emigration prior to July 1, 1898, and has been so treated since May 1, 1934, but was not accounted for in the statistics for the period between those dates.

No. 96.—IMMIGRATION: 1821 TO 1938

NOTE.—For 1821 to 1867 the figures represent alien passengers arriving; for 1868 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; for 1907 to date, immigrant aliens admitted. Data are for fiscal years ended June 30 except as noted; for periods they are totals, not annual averages.

100 IMMIGRATION, EMIGRATION, AND NATURALIZATION

No. 100.—IMMIGRATION, BY COUNTRY OF ORIGIN, BY DECADES: 1841 TO 1930

NOTE.—For 1841 to 1867 figures represent alien passengers arriving; for 1868 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; thereafter, immigrant aliens admitted. Data prior to 1906 cover countries whence aliens came; thereafter, countries of last permanent residence. Owing to changes in the lists of countries separately reported and to changes in boundaries, data for certain countries are not comparable throughout. Countries added to the list since the beginning of the World War were theretofore included with the countries to which they belonged. Data are totals (not annual averages) for periods ended June 30 since 1870, Dec. 31 theretofore, except as noted.

No. 104.—IMMIGRATION QUOTAS ALLOTTED AND QUOTA ALIENS ADMITTED, BY COUNTRY OF BIRTH: YEARS ENDED JUNE 30, 1925 TO 1938

NOTE.—The Immigration Act of 1921 limited the number of aliens admitted annually of any nationality subject to the quota law, to 3 per cent of the number of foreign-born persons of such nationality resident in continental United States as determined by the census of 1910; the population plan of the act of 1924, to 2 per cent according to the census of 1890. The national origins clause of the latter act, which became effective July 1, 1929, provided that the quota of any nationality should be computed by applying to 150,000 the ratio between the calculated number of inhabitants in continental United States in 1920 owing their origin to the nationality concerned and the total inhabitants in the United States of all nationalities subject to the quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see table 97, Statistical Abstract, 1932.) Under the act of 1924, the minimum quota is 100. Both immigrant and nonimmigrant aliens may appear in quota law statistics, or aliens of both classes may not be counted against quotas at all.

¹ Quota for 1924; revisions from 1922 or 1923 allotments for certain countries were made due to changes in boundaries or other adjustments. Quota immigrants admitted, 1922 to 1924, are as follows: 1922, 243,953; 1923, 335,480; 1924, 357,643. For admissions by countries see the 1934 and previous issues of the Statistical Abstract.

² Quota for 1934 to 1938. The total quota for 1930 and 1931 was 153,714; for 1932 and 1933, 153,831; the Soviet Union's quota was 2,784 for 1930 and 1931, and 2,701 for 1932 and 1933; Rumania's, 295 prior to 1934. There were also changes in 1932 and 1933 for certain countries included in "Other Europe," Asia, and Pacific Islands.

³ Austria included with Germany in 1938.

⁴ All Ireland included with United Kingdom prior to 1925; thereafter, Northern Ireland only.

⁵ Annual quotas for colonies, dependencies, or protectorates in "Other Europe," Asia, Africa, Pacific Islands, and America are included in the annual quotas of the European countries to which they belong.

⁶ Includes quota immigrants born in colonies, dependencies, or protectorates of European countries.

¹ Enrollment in night, summer, part-time, and continuation schools not included where separately reported.² Per capita figures for 1932 based on unrevised estimates of population. Figure for continental United States differs, therefore, from corresponding figure in table 111, p. 107, which is based on revised estimate. Figures for 1934 computed by Bureau of Foreign and Domestic Commerce based on revised estimates of population. See table 11, p. 9. New method of estimating State population for 1934 and 1936 accounts in part for marked changes in ratios for some States.³ White schools.

No. 133.—VOCATIONAL (INCLUDING TEACHER-TRAINING) COURSES—STUDENTS ENROLLED, BY CLASS, BY STATES AND TERRITORIES AND FOR PUERTO RICO: YEAR ENDED JUNE 30, 1938

NOTE.—Institutions Federally aided are reimbursed from Federal funds provided under the act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917" and subsequent acts extending the benefits of vocational education to Alaska, Hawaii, and Puerto Rico and providing for the further development of vocational education. These acts, administered by the Office of Education, provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education.

No. 134.—VOCATIONAL REHABILITATION OF DISABLED PERSONS, BY NUMBER AND BY CASES ON ROLL, BY STATES AND FOR HAWAII AND PUERTO RICO: 1930 TO 1938

NOTE.—In accordance with the Civilian Vocational Rehabilitation Act of June 2, 1930, Congress set up a program of cooperation with the States for the vocational rehabilitation of persons disabled in industry or otherwise. By the end of the fiscal year 1938, 46 States, the District of Columbia, Hawaii, and Puerto Rico had accepted the provisions and begun cooperation with the Federal Government. The figures given relate only to cases aided by Federal funds. The total expenditure in 1938 (fiscal year) comprised: Federal funds, \$1,789,989; State and private funds, \$2,050,402.

6. PUBLIC LANDS

GENERAL NOTE.—An original entry is a first claim to a given tract of public land. Perfected entry is made after required lapse of time and compliance with other conditions. A patent is a conveyance or grant of land to a claimant who has made his perfected entry. By Executive orders of Nov. 26, 1934, and Feb. 5, 1935, public lands were temporarily withdrawn from settlement, location, sale, or entry. Both orders, however, were made subject to valid existing rights.

¹ In the adjustment of this grant the road was treated as an entirety and without reference to the State line. Hence Alabama has had approved to her more and Mississippi less than they would appear to be entitled to in proportion to the length of road in the respective States.

² Includes 35,685 acres of the Chicago, Rock Island & Pacific Ry.; 109,757 acres of the Cedar Rapids & Missouri River R. R.; and 77,535 acres of the Dubuque & Sioux City R. R., situated in the old Des Moines River grant of Aug. 8, 1846, which should be deducted.

³ Declared to be one grant.

⁴ See Minnesota for original grants.

⁵ Leavenworth, Lawrence & Galveston includes 186,937 acres and Missouri, Kansas & Texas 270,971 acres in the Osage ceded reservation which are to be deducted under decision of the Supreme Court.

NO. 147.—CLIMATIC CONDITIONS OF SELECTED CITIES, BY MONTHS

NOTE.—The table presented herewith shows the more important facts concerning the weather at a number of points in the United States selected with a view to covering all the important climatic sections and including at least one from each State. The temperature extremes include the entire period of observations to Dec. 31, 1938. Other data are long-time averages covering periods ranging from 20 to more than 50 years. All monthly mean temperature values except those at Hartford and Wilmington, are normals, based on long records. Similarly, all monthly averages of precipitation are normals except the amounts given at Wilmington. Average hourly wind velocity data are reduced to true velocities. Temperatures are Fahrenheit.

8. MILITARY AND CIVIL SERVICES, ELECTIONS, AND CONGRESSIONAL REPRESENTATION

No. 148.—ARMY OF THE UNITED STATES—STRENGTH OF COMPONENT PARTS: 1890 TO 1938

Note.—Prior to 1914, table covers quinquennial years and years in which considerable changes occurred in the number of Regular Army. Figures for Officers' Reserve Corps include Regular Army enlisted men and also, prior to 1924, National Guard officers holding commissions in the reserve. There is, therefore, some duplication in the grand totals, but the number of this personnel is not so great as to make a material difference in the figures.

¹ Includes Philippine Scouts beginning with 1902. Figures for 1919 to 1926, inclusive, include in most cases World War emergency personnel still in service. All emergency enlisted men still in service were discharged on July 2, 1921. On Nov. 11, 1926, the last emergency officer was discharged, thereby completing the demobilization of the World War Army. Retired personnel on active duty are not included.

² State militia prior to act of June 3, 1916.

³ U. S. Volunteers.

⁴ Figures on officers and enlisted men not available.

⁵ Regular Army Reserve. The Regular Army Reserve was abolished by act of June 4, 1920.

⁶ Includes National Guard personnel in Federal service.

⁷ Estimate.

⁸ Officers' Reserve Corps. Beginning with 1924, figures do not include individuals who hold commissions also in the National Guard.

⁹ Includes Regular Army Reserve, 8,832; Enlisted Reserve Corps, 35,000 (estimate).

¹⁰ Includes Officers' Reserve Corps, 86,262; National Army, 49,118 (estimate).

¹¹ Estimated enlisted strength of the National Army. Practically all members of the Regular Army Reserve and the Enlisted Reserve Corps had, by this date, been assigned to duty with Regular Army, National Guard, and National Army organizations.

¹² Estimates only. Under orders of the Secretary of War all components had been merged into one army known as "The United States Army."

¹³ Beginning with 1919, figures for commissioned officers include warrant officers in the following numbers: 1919, 37; 1920, 68; 1921, 1,159; 1922, 1,151; 1923, 1,085; 1924, 1,063; 1925, 1,028; 1926, 1,325; 1927, 1,262; 1928, 1,208; 1929, 1,138; 1930, 1,089; 1931, 1,028; 1932, 973; 1933, 926; 1934, 869; 1935, 825; 1936, 784; 1937, 794; 1938, 782.

¹⁴ Enlisted Reserve Corps.

¹⁵ Beginning with 1924, figures for commissioned officers include warrant officers in the following numbers: 1924, 87; 1925, 160; 1926, 162; 1927, 182; 1928, 184; 1929, 188; 1930, 198; 1931, 198; 1932, 204; 1933, 205; 1934, 198; 1935, 201; 1936, 198; 1937, 204; 1938, 207.

* The reduction in this item from the prior fiscal year was due essentially to discontinuance of disability allowance (non-service) except for veterans permanently and totally disabled.

** For disbursements by wars, see table 154.

† Includes veterans of the War of 1812 whose dependents were receiving pensions (1 for 1938), not shown separately.

¹ In computing these averages, pensions paid to a small number of veterans (see table 155) were included.

² The decrease in the average for 1938 was due to the addition to the roll of a large number of veterans receiving disability allowances for nonservice-connected disabilities at a lower annual average value, and the increase in 1934 to the discontinuance of the disability allowance to approximately 400,000 veterans.

NO. 169.—CIVIL SERVICE AND CANAL ZONE RETIREMENT: 1921 TO 1938

NOTE.—Retirement for civil service employees was established by act of May 22, 1920. Under this act as amended July 3, 1926, and May 29, 1930 (effective July 1, 1930), employees of the classified service and certain other groups, including unclassified laborers subject to labor regulations, are eligible for retirement on annuity at the ages of 62, 65, and 70, according to the class of service, if they have rendered at least 15 years of service. The last-named act permits the optional retirement of employees 2 years before reaching the retirement age where they have rendered at least 30 years of service and also permits retirement on account of permanent and total disability after 5 years of service. From the basic compensation of each employee within the scope of the acts there is deducted 3½ percent (2½ prior to July 1, 1926) thereof for deposit to the credit of the retirement fund. All amounts deducted prior to July 1, 1930, and thereafter amounts deducted less \$1 per month are credited to the employee's individual account. Under the amendment of May 29, 1930, annuities are composed of (1) a sum equal to \$30 for each year of service not exceeding 30 (provided it does not exceed three-fourths of average salary for any five consecutive years), and (2) the amount of annuity purchasable with the sum credited to the individual's account, together with interest at 4 percent per annum, with the provision that the annuity shall in no case be less than an amount equal to the average salary, not to exceed \$1,600 per annum, received during any five consecutive years, multiplied by the number of years of service, not exceeding 30, and divided by 40. By act of Mar. 2, 1931 (effective July 1, 1931), special provision was made for employees of the Panama Canal and Panama Canal Railroad, who theretofore had been eligible for retirement under the civil service retirement and disability act.

NO. 174. - APPORTIONMENT OF CONGRESSIONAL REPRESENTATION, BY STATES, FROM ADOPTION OF CONSTITUTION TO 1930

NOTE.—The ratios for 1870 and subsequent years indicate the numbers of inhabitants per member of the House of Representatives, as provided for by the several apportionment acts. The ratio for each year prior to 1870 was based on a total made up of (a) the number of free persons, excluding Indians not taxed, and (b) three-fifths of the number of slaves.

9. NATIONAL GOVERNMENT FINANCES

General note as to bases used in compiling statistics of receipts and expenditures of the United States Government.—Four different bases are used in compiling both the receipts and expenditures of the Government. These bases, in the case of receipts, are the daily Treasury statements (unrevised and revised), warrants issued, and collections reported. The expenditures of the Government are published on the first three of these bases and also on the basis of checks issued. Figures in the daily Treasury statements (unrevised) which are on a current cash basis are compiled from the latest daily reports from the Treasury offices or public depositories. Owing to the distance of some of these offices and depositories from the Treasury, reports from them are somewhat delayed in reaching the Treasury, and consequently it is necessary to issue the unrevised Treasury statements before they are received. The figures for actual transactions during a month or year which are calculated to take into account these delayed reports are said to be on a basis of daily Treasury statements (revised). The unrevised figures are the basis of the Budget estimates submitted to Congress by the President.

It is provided by law that warrants shall be issued by the Secretary of the Treasury in acknowledgement of money received, and that warrants must be drawn by the Secretary of the Treasury for all disbursements of money. Some of these warrants for expenditures do not represent actual payments but are merely advances of credit to disbursing officers, who then issue checks in payment of Government obligations. Expenditures on the basis of warrants issued include unexpended balances to the credit of disbursing officers at the end of the year but do not include expenditures made during the year from unexpended balances of the preceding year.

Expenditures on the basis of checks issued (table 178) represent most accurately the actual expenditures during any given year. They differ from expenditures shown by daily Treasury statements (revised), because they include checks outstanding at the end of the year and exclude unpaid checks at the beginning of the year.

Government transactions are classified according to the accounts through which they are effected. The three classes of accounts are: General fund accounts, which include the general revenues and from which the operating expenses of the Government, including capital outlays and fixed charges, are paid under appropriations by Congress; special fund accounts, or funds received under special authorizations of law which are earmarked for some specific purpose; and trust fund accounts, representing money received and held in trust for the benefit of individuals or classes of individuals. The latter are not strictly Government moneys and are shown separately in all tables except No. 176. (See headnote of that table.)

All figures for receipts and expenditures include postal surpluses or deficiencies only; postal revenues other than surplus receipts and postal expenditures payable from postal revenues are shown in table 176.

1789 TO 1939

NOTE.—In thousands of dollars. Figures prior to 1916 are on the basis of warrants issued (net); thereafter on the basis of daily Treasury statements (unrevised) except as noted. General, special, and trust accounts are included for 1789 to 1930 and in the 1931 figures in italics; trust and related accounts (increment on gold, etc.) are excluded beginning with 1931, except for the 1931 figures in italics. For explanation of bases used and of accounts, see general note, p. 166. Expenditures from trust funds, etc., are shown for 1934 to 1938 in table 177.

¹ Surplus or deficit takes into account public debt retirements chargeable against ordinary receipts beginning 1918. See p. 168 for expenditures chargeable against ordinary receipts.

² Based on reports of the Post Office Department. Expenditures include adjusted losses, etc., postal funds, and expenditures from postal balances; they exclude departmental expenditures in Washington, D. C., to the close of the fiscal year 1922, and amounts transferred to the civil-service retirement and disability fund, fiscal years 1921 to 1926; in 1927 to 1938 the 3½ percent salary deductions are included.

³ Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in miscellaneous receipts.

⁴ On the basis of warrants issued 1789 to 1930; thereafter, on basis of checks issued.

⁵ Average for period Mar. 4, 1789, to Dec. 31, 1800.

⁶ Averages are for entire period though there were no amounts under these items for certain years.

⁷ Years ended Dec. 31, 1801 to 1842; average for 1841-1850 is for the period Jan. 1, 1841, to June 30, 1850.

⁸ Less than \$500. ⁹ Average for 1863 to 1885. ¹⁰ Average for 1881 and 1884. ¹¹ One year only, 1895.

¹² See headnote.

¹³ Includes processing tax and for 1927, 1938, and 1939, unjust enrichment tax, taxes under Social Security Act, and taxes upon carriers and their employees.

¹⁴ Sales of public lands included with miscellaneous receipts; postal revenues and expenditures not available.

¹⁴ Civil expenditures under War and Navy Departments at Washington are included in "Civil and Miscellaneous" prior to 1916, thereafter under the War and Navy Departments, respectively. War Department includes expenditures for rivers and harbors and Panama Canal.

¹⁵ Figures for Indians and prior to 1922, for postal deficiencies, are on the basis of warrants issued.

¹⁶ Beginning 1931, figures represent expenditures for the Veterans' Administration, which includes the former Bureau of Pensions, Bureau of National Homes, and Veterans' Bureau. Prior to 1931, figures include only Army and Navy pensions and fees of examining surgeons; thereafter, they include also salaries and expenses of Bureau of Pensions (except salaries and expenses, civil employees' retirement act) and pension agencies. Figures for 1917 to 1921 include expenditures by Bureau of War Risk Insurance and for vocational rehabilitation, and for 1922 to 1930, Veterans' Bureau. All figures prior to 1923 and figures for Bureau of Pensions for 1923 to 1930 are on the basis of warrants issued.

¹⁷ Exclusive of amounts transferred to civil service retirement and disability fund.

¹⁸ See notes on corresponding periods, p. 167. ¹⁹ See note 6, p. 167. ²⁰ See headnote, p. 167.

²¹ Includes Adjusted Service Certificate Fund payments amounting to \$556,665,000 of which \$500,158,000 represents amount certified for payment to U. S. Government Life Insurance Fund in bonds on account of losses against certificates. For Adjusted Service Certificate Fund payments for earlier years, see table 177, p. 170.

²² Includes \$22,507,000, representing 1 year's interest on bonds issued to U. S. Government Life Insurance Fund referred to in note 21. ²³ Included in miscellaneous.

No. 180.—INTERNAL REVENUE RECEIPTS, BY CHIEF TAX SOURCES: 1863 TO 1939

NOTE.—All figures in thousands of dollars. The figures represent collections by internal revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal revenue stamps and deposits of internal revenue collected through customs offices, and, therefore, differ from those in tables 175 to 177 and 179 which represent the deposits of these collections in the Treasury or depositaries during the fiscal year concerned, there being thus an overlapping of time. Certain items, included in the totals in the last column, are shown in detail in the second part of the table.

INCOME TAX RETURNS

181

No. 183.—INCOME TAX RETURNS, INDIVIDUAL—SUMMARY: 1913 TO 1937

NOTE.—All money figures in thousands of dollars. Statistics are based on the taxpayers' returns as filed unaudited except to insure proper execution of the return. Under the revenue laws these classes of individuals were required to file personal returns: For 1913 to 1916, those with net income of \$3,000 and over; 1917 to 1924, and 1932 to 1937, \$1,000 and over; 1925 to 1931, \$1,500 and over; or if married and living with husband or wife filing a joint return, \$2,000 for 1917 to 1923, \$2,500 for 1924, and 1932 to 1937, and \$3,500 for 1925 to 1931; also, beginning 1921, individuals with gross income of \$5,000 or over regardless of net income. Data for returns showing no net income, filed in accordance with the latter provision, are not included in statistics shown. Partnership net income or net loss is reported on the individual returns of copartners according to their shares. All income-tax data include Alaska and Hawaii.

¹ Total income and net income for 1928 to 1933 include capital net gains from sale of assets held over 2 years, whereas net income has not been reduced nor have deductions been increased by amount of capital net losses from such sales. For treatment of capital gains and losses for 1934 and later years, see note 5.

² Excludes salaries and wages of the individual, his wife, or dependent minors derived from business conducted by the individual.

³ Dividends on stock of domestic corporations prior to 1936, taxable interest on obligations of the United States for all years, and prior to 1934, capital net gain from sale of assets held more than 2 years, received through partnerships and fiduciaries were reported under their respective classifications. For 1934 and subsequent years, income of partnerships and fiduciaries includes proportion of net capital gains and losses resulting from sales of capital assets through these entities required to be reported under Revenue Acts of 1934 and 1936.

⁴ Exclusive of amount taxed as capital net gain from sales of assets held over 2 years.

⁵ Under the Revenue Acts of 1934 and 1936, certain percentages (varying according to the period for which assets were held) of gains or losses from the sale of all capital assets are taken into account in computing net income, the deduction for capital losses being limited to \$2,000 after subtracting capital gains. Amounts shown as "net capital gain" and "net capital loss" represent the proportion of gains and losses required to be included and are not comparable with "profits (or net loss) from sale of real estate, stocks, bonds, etc." and "capital net gain from sale of assets held over 2 years" reported for earlier years; they exclude gain or loss on sale of capital assets through partnerships or fiduciaries (see note 3).

⁶ Amount reported for tax at 12½ percent in lieu of normal tax and surtax.

⁷ On stocks of domestic corporations prior to 1936, includes dividends on stocks of both domestic and foreign for 1936, subject to normal tax and surtax. ⁸ Not wholly exempt from tax.

⁹ Other than reported for tax credit on capital net loss from sale of assets held more than 2 years.

¹⁰ Excludes amounts reported in business deductions. ¹¹ No deduction allowed for prior year loss.

¹² Beginning with 1934 limited credit for earned income was allowed against net income in computing taxable income.

¹³ Loss in ordinary net income for given year and net loss for prior year deductible from capital net gain.

¹ Prior to 1935 includes returns of husbands whose wives though living with them file separate returns.

² Included in "Joint returns of husbands and wives."

³ An unequal number of separate returns of husbands and wives results from the use of the sample method for returns with net income under \$5,000, as the net income of one spouse may be \$5,000 or over and that of the other spouse under \$5,000.

⁴ Prior to 1935 returns of estates were distributed according to sex and family relationship of testator or grantor, and returns of property held in trust, according to sex and family relationship of beneficiary or sex and family relationship of testator or grantor if status of beneficiary could not be determined.

No. 191.—INCOME TAX RETURNS, CORPORATION—SUMMARY: 1911 TO 1937

NOTE.—All money figures in thousands of dollars. Statistics are based on taxpayers' returns as filed, un-audited except to insure proper execution of the returns. They include data for Alaska and Hawaii. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, charitable, etc., not operating for profit. Under the Revenue Act of 1934, the privilege of filing consolidated returns, which had formerly been permitted for groups of affiliated corporations, was limited to steam and electric railroads. The Revenue Act of 1936 extended this privilege to street, suburban, and interurban electric railways. These changes resulted in marked differences between the industrial and the net-income or deficit classifications of returns for 1934 and subsequent years and those for 1933 and prior years and also in the distribution of returns by size-of-assets classes. Corporations are classified industrially according to their predominant business. Owing to the diversified activities of many corporations, the industrial groups include some corporations not engaged exclusively in the industries classified. Tables showing the effect of the discontinuance of the consolidated return on the tabulated data will be found in Statistics of Income for 1934, part 2.

¹ For 1935 and prior years, net income or deficit represents amount for income tax computation. For 1936, net income or deficit represents amount for excess-profits tax computation which includes dividends received on stock of domestic corporations subject to taxation under Title I of the effective revenue acts and interest received on certain Government obligations subject to excess-profits tax and excludes contributions or gifts (limited to 5 percent of net income before deduction of contributions or gifts).

² Includes inactive concerns prior to 1927. ³ Returns showing net income in excess of \$5,000 exemption.⁴ Returns showing net income not in excess of \$5,000 exemption, or deficit.⁵ Not available.

Receipts for year ended June 30 following year in stub as reported by Commissioner of Internal Revenue. Figures shown for 1911 and 1912 and \$10,671,000 of the amount shown for 1913 are excise tax receipts.

⁶ Figures for 1915 contain approximately 32,000 returns which properly belong in 1914.⁷ Excess-profits tax (effective June 30, 1933, under provisions of the National Industrial Recovery Act).⁸ Includes surtax on undistributed profits according to provisions of Revenue Act of 1936.

¹ No income data reported. Inactive corporations included with those reporting no net income for 1926.

² For 1926 to 1931 gross income corresponds to total income as reported on face of return, plus "cost of goods sold," and for 1932 to 1936 gross income corresponds to total income as reported on face of return, plus "cost of goods sold" and "cost of operations." For 1934 and 1935 interest on Liberty bonds, etc., has been deducted from gross income as this item was not included in gross income for prior years. For 1936 gross income includes interest received on certain Government obligations which is subject to the excess-profits tax.

¹ See note 1, table 191.² Includes excess-profits tax of \$27,540 for 1934 and \$19,584 for 1935 on returns with no net income, since credit for interest received on certain obligations of the United States and its instrumentalities is not allowed against net income in the computation of the excess-profits tax. For 1936, includes surtax on undistributed profits.³ Includes surtax on undistributed profits.

No. 195.—GROSS INCOME OF CORPORATIONS, BY INDUSTRIAL GROUPS

NOTE.—In millions of dollars. For 1929 to 1935 gross income excludes nontaxable income, except dividends on capital stock of domestic corporations, but includes receipts from all other sources. For 1936 gross income includes interest on certain Government obligations subject to excess-profits tax, and dividends, unlike former years, are taxable. Sales are included on gross basis, but only net profits from the sale of capital assets are included. See also headnote, table 191.

¹ Excludes nontaxable income, other than interest on tax-exempt obligations for all years and dividends on stock of domestic corporations except for 1936. For 1936, dividends are taxable income.

² Where inventories are an income-determining factor. For "Cost of goods sold," see "Compiled deductions."

³ Where inventories are not an income-determining factor. Figures represent gross profits other than from sales prior to 1932. For 1925, gross profits from operations other than from sales for all corporations were tabulated in "Other receipts." For 1926, 1927, and 1928 such profits for only those corporations classified under "Transportation and other public utilities," "Service," "Finance," and "Nature of business not given" were included in "Other receipts."

⁴ Includes obligations of States and Territories and minor political subdivisions, securities issued under the Federal Farm Loan Act, and obligations of the United States and its possessions and for 1936 certain obligations subject to excess-profits tax.

⁵ Included in "Other deductions" prior to 1933.

⁶ Included dividends of \$2,677,000,000 (taxable income for 1936).

⁷ Included in "Other receipts."

⁸ Includes \$280,000,000, subject to excess-profits tax only.

⁹ These figures are affected by the inclusion in deductions of contributions or gifts (limited to 5 percent of net income before deduction of contributions or gifts).

¹⁰ Compiled receipts less compiled deductions. ¹¹ See note 1, table 191.

¹² Deducted by concerns reporting net income.

¹³ Includes excess-profits tax for 1933 to 1936, and for 1936 surtax on undistributed profits.

¹⁴ Excludes dividends of life-insurance companies prior to 1928.

¹⁵ Excludes taxes reported under "Cost of goods sold" and for 1936 excludes also excess-profits tax.

¹⁶ Included in "Other deductions." ¹⁷ Deficit.

¹ Includes corporations not reporting nature of business, but excludes inactive corporations.² Includes "Other manufacturing" not shown separately.³ Excludes nontaxable income other than interest on tax-exempt obligations. Unlike former years, dividends received on stock of domestic corporations are included in taxable income instead of in tax-exempt income.⁴ Gross sales where inventories are an income-determining factor. For "Cost of goods sold" see "Depletions."⁵ Gross receipts from operations where inventories are not an income-determining factor. For "Cost of operations" see "Deductions."⁶ Includes United States Savings bonds and Treasury bonds owned in principal amount of over \$5,000 and obligations of instrumentalities of the United States (other than those issued under Federal Farm Loan Act or such act as amended).

No. 204.—ESTATE TAX RETURNS, FEDERAL—SUMMARY: 1916 TO 1937

NOTE.—All money figures in thousands of dollars. Under the various revenue acts estate tax returns are required: (1) In the case of every citizen or resident (only every resident for deaths prior to May 11, 1934) decedent if gross estate exceeds \$50,000 for deaths prior to Feb. 26, 1926, and from June 6, 1932, to Aug. 30, 1935; \$100,000 for deaths from Feb. 26, 1926, to June 5, 1932; and \$40,000 for deaths on or after Aug. 31, 1935; (2) in the case of every nonresident alien (every nonresident citizen and alien if decedent died prior to May 11, 1934) who owned property in the United States at date of death. Estates of decedents dying on or after June 6, 1932, are subject to two taxes, that levied under the Revenue Act of 1926 and an additional tax levied under the acts of 1932, 1934, or 1935.

¹ Except where otherwise indicated.

Treasury bills are non-interest-bearing short-term securities sold on a discount basis with competitive bids for each issue. The average sale price gives an approximate yield on a bank-discount basis. Yields on all issues outstanding Dec. 31, 1938, ranged between the percents given above except series maturing Mar. 29, 1939 on which rate of interest is negative.

² Assumed by the United States on deposit of lawful money for their retirement.

¹ Independent school districts, townships, bridge, dike, drainage, irrigation, road, etc., districts.

² Data for years ended June 30, 1913 and 1933. Postal revenues and postal expenditures chargeable against them are included in receipts and expenditures, respectively. Further differences between figures in this table and totals in tables 175 to 177 are as follows: Receipts here shown exclude trust funds and other nonrevenue receipts while expenditures exclude public debt retirements, trust funds, Federal contribution for District of Columbia government, refunds of customs and internal revenue and other nongovernmental costs.

³ Cities, towns, etc., with a population of 2,500 and over; comparable data for 1932 are: Revenue receipts, \$3,221,900,000 (per capita, \$45.99); governmental-cost payments, \$3,449,600,000 (per capita, \$49.24).

⁴ Not available.

⁵ The differences between the figures covered by this footnote and the corresponding ones appearing in subsequent tables are due (1) to the inclusion in this table and the exclusion in tables 216, 220, 221, and 223 of data for public-service enterprises and (2) to the fact that data for the fiscal year 1931 (instead of 1932) are included in this table for 18 States and in subsequent tables for only 7 States.

⁶ Gross debt less cash in Treasury as of June 30 following the year stated in stub.

No. 216.—REVENUES AND COST PAYMENTS OF GENERAL DEPARTMENTS OF STATE GOVERNMENTS, BY SOURCE AND FUNCTION: 1932 AND 1937

NOTE.—Statistics of public-service enterprises are presented separately for 1937. (See table 217.) This separation was not made in reports for 1932 and prior years. Revenues exclude borrowings and other nonrevenue receipts. Cost payments exclude outlays and interest, and debt retirements and other noncost payments. Because of a change in classification of accounts for 1937, it is impracticable to present comparable data for 1932 for some of the items. Data for 1937 are for fiscal years ended in 1937; those in the 1932 columns are for fiscal years ended in 1932, except for 7 States, for which 1931 fiscal-year data were included.

No. 219.—ASSESSED VALUATION OF PROPERTY SUBJECT TO GENERAL AND SELECTIVE PROPERTY TAXES, BY STATES: 1932 AND 1937

NOTE.—In millions of dollars. Valuation reported is the total that was subject to general and selective property taxes for the State and local units within the State. The proportion of the total valuation that was taxed by different governmental units, and the rates of taxation thereon, varied widely according to State and local legislation. Figures do not show the relative wealth of the several States owing to differences in the bases of assessment and practices thereunder.

No. 225.—TAX LEVIES—TOTAL LEVIES OF GENERAL PROPERTY TAXES OF STATE AND LOCAL GOVERNMENTS, BY STATES: 1880 TO 1932

NOTE.—The data represent the total levies of general property taxes of States, counties, cities, villages, towns, boroughs, townships, school districts, etc., and for all purposes. They do not cover "special assessments" on property benefited by specific improvements nor special property taxes applying only to limited classes, nor taxes based on other standards than property, such as income, volume of business, inheritance, etc., which have been steadily growing in relative importance. The change in buying power of money affects materially the comparability of the figures. For data for 1860, 1870, and 1890, by States, see table 437, Statistical Abstract of 1922.

¹ Farm-mortgage and other rural-credit assets amounting to \$121,300,000, resulting from rural-credit loans, held by the State sinking funds of Minnesota, North Dakota, and South Dakota, were not deducted from gross debt. The sinking funds for these States include farm mortgages and other rural-credit assets as follows: Minnesota, \$67,000,000; North Dakota, \$31,000,000; South Dakota, \$33,000,000.

² Farm-mortgage and other rural-credit assets were not deducted from gross debt for Minnesota, North Dakota, and South Dakota.

³ Indebtedness of local governments. Sinking-fund assets of State governments exceeded the gross debt.

⁴ No State indebtedness reported; the Virginia-West Virginia debt settlement was not made until 1919.

⁵ Includes \$853,000 indebtedness of local governments in Indian Territory reported separately in 1902.

¹ Prior to 1925, contingent or special assessment debt was included with funded and fixed debt. In this table, it has been excluded from funded and fixed and included with current debt, except for 1880, 1890, 1905, and 1910, when no segregation could be made.² Includes special assessment debt, revenue bonds and notes, and warrants.³ Not segregated prior to 1915; included with funded and fixed.⁴ There was an excess of sinking-fund assets over debt in one State.⁵ Includes figures for the fiscal year 1931 for 7 States. See table 232.⁶ Included in current.⁷ Funded or fixed debt less sinking-fund assets.⁸ Not computed.⁹ Excluding outstanding warrants.

No. 241.—MONEY—STOCK, BY KIND: 1860 TO 1939

NOTE.—Amounts in thousands of dollars. Figures prior to 1890 were revised in 1925 from the best available data, but the older records, especially from 1860 through the early 70's, are not complete and figures for gold and silver for those years are only estimates. In 1927, data were revised to include minor coins beginning 1900 (no satisfactory data available for earlier years) and gold coin and bullion held abroad for Federal Reserve banks and to exclude gold earmarked for foreign account.

¹ The totals involve a duplication to the extent that United States notes, Federal Reserve notes, Federal Reserve bank notes, and national bank notes, all included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 have been excluded, however, since they are complete duplications of the equal amounts of gold or silver held as security therefor and included in the totals.

² By a proclamation of the President dated Jan. 31, 1934, the weight of the gold dollar was reduced from 25.8 to 15½ grains of gold, 0.9 fine. The value of gold is therefore based on \$35 per fine ounce beginning June 1934; theretofore, it is based on \$20.67 per fine ounce.

³ There has been no fractional currency in actual circulation to any extent since 1878.

⁴ Silver bullion in Treasury.

⁵ Includes silver bullion as follows: June 30, 1934, \$1,560,000; June 30, 1935, \$313,309,000; June 30, 1936, \$708,211,000; June 30, 1937, \$835,196,000; Dec. 31, 1937, \$938,760,000; June 30, 1938, \$1,037,163,000; Dec. 31, 1938, \$1,137,624,000; June 30, 1939, \$1,230,566,000.

No. 242.—MONEY IN CIRCULATION, MONEY HELD IN TREASURY AND IN FEDERAL RESERVE SYSTEM, AND TOTAL STOCK: 1800 TO 1939

NOTE.—All figures except per capita in thousands of dollars. In conformity with revisions in the form of circulation statement in 1922 and 1927, figures for 1915 on have been compiled to include in the holdings of Federal Reserve banks and agents, and, hence, in stock of money, gold bullion and foreign coin held by them and gold coin and bullion held abroad for the account of Federal Reserve banks, and also to include in the holdings of Federal Reserve banks and agents, and, hence, exclude from circulation, all forms of money held by them whether as Reserve against Federal Reserve notes or otherwise. See also headnote, table 241. Per capita figures based on population estimates of the Treasury Department.

¹ Gold and silver certificates and Treasury notes of 1890 are excluded before combining money outside the Treasury with money in the Treasury in order to avoid duplication, since the gold and silver held in Treasury as security against these currencies is included. See also notes 1 and 2, table 241.

² Both of these items include also reserve against Treasury notes of 1890.

³ See note 1, table 240.

⁴ Includes total stock of silver dollars and subsidiary silver.
⁵ Gold certificates. This amount is not included in the total since the gold held as security against the gold certificates is included in the column, "In trust against gold and silver certificates."

¹ Prior to Dec. 31, 1935, excludes balances with private banks to the extent that such balances were reported in "Other assets." Prior to Dec. 31, 1933, excludes time balances with domestic banks which, on that date, amounted to \$62,000,000 and which, prior to that time, were reported in "Other assets."

2 Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and prior, to Dec. 31, 1935, less cash items reported on hand but not in process of collection.

3 Aggregate book value of capital stock, capital notes and debentures, surplus, undivided profits, reserves for contingencies, etc.

4 Postal savings included in time deposits.

5 Beginning 1933, figures relate to licensed banks only.

6 Includes United States Treasurer's time deposits, open account.

7 Central reserve city banks only.

¹ Figures for loans and investments beginning Dec. 31, 1938, are not entirely comparable with prior call dates because investments and other assets (principally loans) indirectly representing bank premises and other real estate are no longer included in loans and investments but are now reported separately. Such investments and other assets amounted to \$93,569,000 and \$49,939,000, respectively, on Dec. 31, 1938.

² Not reported separately where no figures are shown.

³ Figures prior to Dec. 31, 1938 represent all loans on securities, except loans to banks and to brokers and dealers.

⁴ This is a residual item and, because of revised loan classification beginning Dec. 31, 1938, the residual amounts are not comparable.

⁵ Federal Home Loan bank debentures are included in "Other bonds, notes, and debentures."

⁶ Corporate stocks of foreign corporations were reported in combination with bonds, notes, and debentures prior to Dec. 31, 1938.

No. 261.—ALL REPORTING BANKS IN THE UNITED STATES—NUMBER, LOANS, INVESTMENTS, AND DEPOSITS: 1926 TO 1938

NOTE.—Money figures in millions of dollars. This table covers all national banks in continental United States, all State commercial banks, trust companies, mutual and stock savings banks, and such private Morris Plan, and industrial banks as are included in abstracts issued by State banking departments. Also includes, during the period June 1934-June 1935, private banks which, under provisions of sec. 21 (a) of the Banking Act of 1933, submitted reports to the Comptroller of the Currency. Morris Plan and industrial banks in New York and North Carolina were not included until June 30, 1937; in Connecticut, not until Dec. 31, 1938.

¹ Date of reports of member banks; figures for nonmember banks as of nearest available date.

² Exclusive of interbank deposits, with following exceptions: For dates prior to Dec. 30, 1933, member-bank figures include interbank deposits not subject to immediate withdrawal, which aggregated \$103,000,000 on that date; nonmember-bank figures for all call dates include interbank deposits to the extent (estimated at \$150,000,000 for June 30, 1937, but since reduced to probably a small amount) that they were not reported separately in a few State bank abstracts.

³ Beginning June 30, 1933, all figures, except for mutual savings banks, relate to licensed banks only, with some exceptions as to nonmember banks.

No. 262.—ALL ACTIVE BANKS—PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANKS: 1840 TO 1938

NOTE.—Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands, and beginning with 1935, those in Virgin Islands and in 1938, those in Canal Zone, Guam, and American Samoa. Data are as of June 30 or about June 30 except data for the earlier years for banks other than national, for which reports were of various dates. Figures for banks other than national for the earlier years, especially through 1885, are incomplete. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years; since 1926 only one is included. Private banks are not included prior to 1890; statistics for private banks, except for 1934 and 1935, cover only banks under State supervision and those voluntarily reporting; for 1934 and 1935, they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933.

¹ Comprises banks suspended before banking holiday, licensed banks suspended or placed on restricted basis following banking holiday, unlicensed banks placed in liquidation or receivership, and unlicensed banks granted licenses after June 30, 1933. At close of banking holiday (Mar. 15, 1933) 1,400 national banks with deposits (on Dec. 31, 1932) of \$1,942,574,000, and 225 State bank members with deposits of \$925,777,000 had not been licensed to reopen. On Apr. 12, 1933, the earliest date following the banking holiday for which corresponding data are available regarding nonmember banks, there were in the United States 1,108 unlicensed national banks with deposits of \$1,818,541,000, 152 unlicensed State member banks with deposits of \$842,982,000, and 2,938 unlicensed nonmember banks with deposits of \$1,317,607,000. By the end of June 1933 supervisory authorities had completed their examination of all or nearly all the banks not granted licenses immediately following the banking holiday and had authorized such of the banks to reopen as could qualify for licenses. On June 30, 1933, there remained 985 unlicensed national banks with deposits of \$1,028,347,000, 114 State member banks with deposits of \$239,268,000, and 1,983 nonmember banks with deposits of \$1,063,984,000 to be rehabilitated and reopened or to be placed in liquidation or receivership. All such banks are treated as suspensions.

² Includes 8 insured nonmember banks in 1934, 22 in 1935, 40 in 1936, 47 in 1937, and 47 in 1938, with deposits of \$1,912,000, \$3,763,000, \$10,207,000, \$10,156,000, and \$11,721,000, respectively. Federal deposit insurance became operative Jan. 1, 1934.

No. 275.—SAVINGS BANKS—NUMBER OF DEPOSITORS AND AMOUNT OF SAVINGS DEPOSITS, CONTINENTAL UNITED STATES: 1820 TO 1910

NOTE.—Data for later years are as of June 30 or about June 30. In earlier years reports were of various dates. Prior to 1900 data include both mutual and stock savings banks; beginning 1900 they are for mutual savings banks only, which in that year had about 90 percent of the savings deposits in all savings banks. For figures for later years and also savings deposits in all classes of banks, see table 276.

¹ Includes deposits evidenced by savings passbooks, time certificates of deposit payable in 30 days or over, time deposits, open account, postal savings redeposited in banks, and, for some States, Christmas savings, and similar accounts.

² Includes State, stock savings, and private banks and trust companies.

³ Combined data for other than national banks included in total.

⁴ For data for 1910 and earlier years from reports of the Comptroller of Currency, see table 275.

⁵ Not available.

⁶ Figures include depositors for State-chartered banks in States which did not previously report depositors as follows (figures in parentheses are the number of depositors for the first year the given States reported): Beginning 1928, Ohio and Idaho (2,376,000 depositors); beginning 1931, Missouri (623,000 depositors); beginning 1932, Colorado (50,000 depositors); and beginning 1934, Indiana (286,000 depositors).

⁷ Represents the number of savings passbook accounts.

No. 287.—FEDERAL HOUSING ADMINISTRATION—VOLUME OF BUSINESS TRANSACTED—TREND AND STATUS OF HOME MORTGAGE, RENTAL HOUSING, AND PROPERTY IMPROVEMENT INSURING OPERATIONS: 1934 TO 1938

NOTE.—Amounts in thousands of dollars. The program of providing insurance for long-term mortgages on individual homes and on large-scale rental projects and for short-term character loans for property improvements is carried on by the Federal Housing Administration under the provisions of the National Housing Act and its amendments. The Federal Housing Administration lends no money but provides insurance for loans made by banks and other private lending institutions

¹ In obtaining totals in this column adjustments were made to avoid duplication arising from the fact that production credit associations and banks for cooperatives borrow from and rediscount loans with Federal intermediate credit banks. The following loans which cannot be allocated by States are excluded: Central bank for cooperatives, \$14,964,000 (total loans, \$32,838,000, less \$17,874,000 under rediscount with Federal intermediate banks); Agricultural Marketing Act revolving fund loans, \$23,723,000; emergency crop loans, \$473,000. Including these amounts, and excluding \$3,017,000 duplication arising from participation loans between the Central Bank for Cooperatives and the district banks for cooperatives, the grand total of loans outstanding was \$3,210,768,000.

² Excludes \$473,000 emergency crop loans which cannot be allocated by States.

³ Less than \$500.

⁴ Includes \$18,000 for Hawaii.

¹ Less payments on principal and principal of delinquent and extended installments.² Less amounts sold under repurchase agreements.³ Unmatured. Figures for 1932 include \$18,500,000 of bonds issued to the Reconstruction Finance Corporation and for 1933, \$142,118,000.⁴ Owned by national farm loan associations and individual borrowers.⁵ Not including special reserves set up against particular assets.⁶ Less impairment or deficit. The decrease in reserves and undivided profits for 1934 resulted largely from a change in accounting procedures. Includes earned surplus for 1937 and 1938.⁷ Includes claims not yet paid: \$3,054,000 for 1934, \$2,719,000 for 1935, \$6,094,000 for 1936, \$3,621,000 for 1937, and \$881,000 for 1938.

No. 308.—BANK CLEARINGS FOR LEADING CITIES: 1921 TO 1938

NOTE.—In millions of dollars. Cities are listed in order of importance according to clearings in 1938. No figures are given for Los Angeles, which ranked eighth in 1929 but has not reported clearings for any subsequent year. Comparability of figures for different years is affected by the tendency toward consolidation of banks, eliminating former clearings between two or more banks. Debits to individual account (tables 309 and 310) are a better measure of volume of payment. For figures for earlier years for all cities reporting to New York Clearing House Association, 1882 to 1920, and for figures for 146 identical cities, 1920 to 1936, see table 293, Statistical Abstract, 1937.

No. 316.—FIRE LOSSES, TOTAL AND PER CAPITA, CONTINENTAL UNITED STATES: 1876 TO 1938

NOTE.—Amounts, except per capita, in thousands of dollars. Prior to 1916, figures are as compiled by the New York Journal of Commerce and include losses of \$10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being \$214,531,000 as against \$258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter.

No. 321.—LIFE INSURANCE WRITTEN AND IN FORCE, BY STATES: 1936 AND 1937

NOTE.—Figures cover business transacted in Continental United States, including United States business of Canadian companies. They include data for some small companies which confine their business to the State in which they domicile, and usually to several small cities, which are not included in tables 317 to 320. Further differences between totals in this table and in the preceding tables are due to duplications from reinsurance.

¹ Total premium receipts prior to 1910.

² Figures for 1895 to 1931 (also 1932 figures in italics) include adjustment expenses excluded thereafter.

³ Including taxes.

⁴ Figures through 1931, and 1932 figures in italics, include data for companies which transact life insurance in addition to accident and health insurance. Income and disbursement items include business of accident and health branches only of these life insurance companies, where companies were able to segregate data, while capital, assets, and net surplus include total amounts of these items for such companies, excluding, however, data for a few very large companies for which accident and health business is only a small proportion of the total business. Capital, assets, and net surplus are therefore overstated and in part duplicated in figures for life insurance companies in other tables. Figures for 1932 to 1937, except 1932 italics figures, relate to casualty, surety, and miscellaneous insurance companies only.

⁵ Number of companies which show figures for the year.

⁶ See note 4.

⁷ Includes stock casualty, surety, and miscellaneous insurance companies, shown separately above, mutual companies, reciprocals, and Lloyds; number of companies and income and disbursement items also include accident and health departments of life insurance companies.

NO. 327.—INSURANCE CARRIERS AND INSURANCE AGENCIES AND BROKERAGE OFFICES—NUMBER OF OFFICES, PERSONNEL, AND PAY ROLL, BY TYPE OF INSURANCE, FOR THE UNITED STATES: 1935

NOTE.—Carriers include all types of insurance coverage except title insurance and the guarantee of mortgages. Each carrier is considered as having only one home office. Insurance agencies and brokerage offices include insurance agencies, sub-agencies, and brokerage offices identifiable as business establishments; managing agencies for one or more carriers; attorneys-in-fact for Lloyds Associations and for reciprocal exchanges; and underwriter agencies. Classifications by kind of insurance in the case of multiple line companies submitting a consolidated report are based on the kind of insurance from which the major portion of the business is derived. For employment by occupational groups see table 382.

No. 329.—COMMODITY EXCHANGE TRANSACTIONS—VOLUME OF TRADING IN PRINCIPAL GRAIN FUTURES AND AMOUNT OF FEDERAL TAXES COLLECTED ON SALES OF ALL COMMODITIES FOR FUTURE DELIVERY: 1921 TO 1939

NOTE.—Trading in wheat and corn futures usually accounts for around 90 percent of the total volume of trading in grain futures. Statistics of the volume of future trading are not collected for commodities other than grains. The value of all futures sales is roughly indicated, however, by the amount of taxes collected on such sales. Since Oct. 3, 1917, stamp taxes upon sales of products or merchandise on exchanges, boards of trade, or similar places, for future delivery, have been in effect as follows: On each \$100 of such sales or a fractional part thereof in excess of \$100, 2 cents prior to July 2, 1924; 1 cent July 2, 1924, to June 21, 1932; 5 cents June 21, 1932, to May 11, 1934; 3 cents May 12, 1934, to June 30, 1938; repealed effective July 1, 1938.

No. 340.—CAPITAL ISSUES—SUMMARY, BY CLASSES: 1921 TO 1938

NOTE.—In millions and tenths of millions of dollars. Data cover domestic and foreign issues in the United States. Preferred stocks of no par value and all common stocks are taken at their offering price, other issues at par, except that in the figures for corporate issues for 1915 to 1918 all stocks are included at their market value. Corporate issues for 1915 to 1918 exclude real estate offerings and privileged stock subscriptions included in figures beginning 1919, and issues of less than \$100,000. State and municipal issues include bonds issued by States, Territories, and possessions, counties and municipalities, and by school and road districts and other independent governmental bodies.

No. 344.—INDUSTRIAL AND COMMERCIAL FAILURES—NUMBER AND LIABILITIES,
BY MONTHS: 1934 TO 1939

NOTE.—Liabilities in thousands of dollars. Current liabilities include all accounts and notes payable and all obligations, whether in secured form or not, known to be held by banks, officers, affiliated companies, supplying companies, or the Government. Deferred liabilities (the difference between current, as defined above, and the total) are therefore long term obligations held by the public.

12. INCOME AND DEBT

[Data in this section relate to Continental United States]

No. 348.—NATIONAL INCOME PRODUCED AND PAID OUT: 1929 TO 1938

NOTE.—National income produced is net value of commodities produced and services rendered (gross value less expenditures for materials and interindustry services—such as transportation and communication—used in productive processes, for taxes, and for depreciation of capital equipment). Income paid out is amount actually distributed to individuals as salaries, wages, interest, dividends, entrepreneurial withdrawals, and net rents and royalties. Imputed income from ownership of durable goods (including owned homes), imputed value of services of members of family, earnings from odd jobs, direct relief and charity, earnings from illegal pursuits, and changes in value of assets not derived by groups professionally engaged in handling of assets are not included either in income produced or in income paid out. Business savings (positive or negative) represent difference between income produced and income paid out.

¹ Data on dividends, interest, and corporate savings by industrial divisions for 1934 and for subsequent years are based on a different industrial classification than are the estimates of these items for earlier years because of a change in the Revenue Act of 1934. Special tabulations of the Bureau of Internal Revenue permitted the making of estimates for 1934 on the earlier basis. For specific items in certain industries the variations are substantial, but for total income the changes were small. The two estimates were averaged in compiling this table.

No. 352.—CONSUMER INCOMES—DISTRIBUTION OF FAMILIES AND SINGLE INDIVIDUALS AND OF AGGREGATE INCOME RECEIVED, BY INCOME LEVEL:¹ 1935-36

NOTE.—These figures are estimates based primarily on sample data collected in the Study of Consumer Purchases, a Works Progress Administration project conducted by the Bureau of Home Economics and the Bureau of Labor Statistics in cooperation with the National Resources Committee and the Central Statistical Board. Findings of that study were supplemented by income tax statistics and by other sample data on family and individual incomes.

¹ The estimates cover all consumers with the exception of 2,000,000 persons living in institutions or quasi-institutional groups. A family is defined as 2 or more persons sharing a common income and living under a common roof. Single individuals include persons lodging in rooming houses and hotels, living as lodgers or servants in private homes, or maintaining independent living quarters as 1-person families. Income includes the total net money income received during the year by all members of the economic family plus the value of certain items of nonmoney income, such as the occupancy of an owned home and food produced by rural families for their own use. The estimates apply to the 12-month period from July 1935 through June 1936.

No. 353.—LONG-TERM DEBT, PUBLIC AND PRIVATE—ESTIMATED AMOUNTS OUTSTANDING AT THE END OF THE YEAR, BY CLASSES: 1912 TO 1937

NOTE.—These figures represent gross debt. Insofar as possible, obligations held by the issuing corporation or individual are excluded, but no eliminations are made for intragroup and intergroup holdings of evidences of debt. Under the concept of long-term debt employed in this study, figures include, in general, debt issued with maturities of more than 1 year. Estimates for some items of private debt, particularly for the earlier years, are subject to wide margins of error. The probable margin of error in the totals for the later years is around 3 percent. As the element of bias is believed to be in the same direction for all years, the figures are more reliable for the measurement of the flow of debt than as a measure of the absolute volume as of a particular date.

¹ This summary excludes the debt of financial corporations which is largely duplicated in other basic debt. Private financial corporate debt has been estimated at about \$7,400,000,000 for recent years.

² Funded debt actually outstanding for railways and switching and terminal companies. The 1934-37 figures are raised to take account of receivers' certificates and funded debt matured unpaid. The margin of error is very small for these figures.

³ Figures are for corporations and do not include debts of unincorporated business firms. Debts of the latter in the form of mortgage loans are included in urban realty debt figures.

⁴ Figures for 1912 and 1922 are interpolated between estimates of the Bureau of Agricultural Economics on the basis of annual statistics of interest payable on farm mortgages published by that Bureau.

⁵ Outstanding mortgage debt on 1- to 4-family nonfarm homes.

⁶ Outstanding mortgage debt on hotels, office and commercial buildings, apartment buildings, etc. Debts of real-estate mortgage corporations whose combined debt in 1935 totaled \$7,634,000,000 are included.

⁷ Interest-bearing obligations of the United States Government outstanding at the end of the calendar year. Figures include bills and certificates of indebtedness in the following amounts: 1922, \$1,092,000,000; 1934, \$1,954,000,000; 1935, \$2,404,000,000; 1936, \$2,203,000,000; 1937, \$2,602,000,000. Figures do not include debt of the Reconstruction Finance Corporation or members of the Federal Farm Loan System and Federal Home Loan System. The net debt of these Federal agencies held by non-Government owners amounted to \$3,027,000,000 on June 30, 1934, and \$5,712,000,000 on June 30, 1937. For additional statistics relating to public debt, consult index for references to data in other sections.

⁸ Figures as of June 30. For 1937 State and local debt was distributed as follows: State, \$3,241,600,000; county, \$2,323,300,000; municipal, \$9,969,000,000; school district, \$1,864,390,000; other divisions, \$1,754,700,000.

13. PRICES

GENERAL NOTE.—The wholesale-price index of the Department of Labor is based on primary market quotations of 784 commodities beginning 1926 and 813 beginning January 1938; a smaller number of commodities was covered in earlier years. The price of each article is weighted by the approximate quantity marketed during a period approximating that covered by the index. Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one of the classifications were included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, were included among both farm products and foods. However, in computing the index for all commodities such articles were counted only once.

The retail-food-price index presented in this section, with the exception of the "old series" shown in table 362, is a revised series. The revised indexes are computed from aggregate costs of 42 foods in 51 large cities prior to January 1, 1935, and of 84 foods since that date. To obtain the aggregate cost in each city, the average prices of individual foods were combined by means of weights based on total purchases of wage earners and lower salaried workers in 1918. City costs were combined with the use of population weights to determine the cost for the United States as a whole. Prices were collected monthly, except for the period September 1933 to June 1936, inclusive, when they were collected every 2 weeks.

The farm-price index is based on prices paid to producers for 34 major crops and, beginning 1924, also 13 commercial truck crops. Average quotations for the period August 1909-July 1914 are used as a base, and each price series is weighted by the average annual marketings of farmers in the years 1924 to 1929.

² Ton of 2,000 pounds.⁸ 11-month average.⁹ Weighted average price of Buick, Cadillac, Chevrolet, Dodge, Ford, and Packard cars. Data not available for 1938.¹⁰ Owing to frequent changes in patterns announced by manufacturers, prices of individual articles of furniture are only roughly comparable from year to year and are not shown. ¹¹Average for 1924 and 1925.

NO. 359.—PRICES, WHOLESALE—INDEX NUMBERS, ALL COMMODITIES AND BY ECONOMIC CLASSES: 1916 TO 1939

NOTE.—Figures in boxes indicate number of quotations. As originally published, Bradstreet's "Index" is the sum of the prices per pound of 96 commodities; Dun's represents the aggregate cost per capita of a year's supply of the approximately 300 commodities included. In the following table, both series have been expressed as a percentage of 1926 by the Bureau of Foreign and Domestic Commerce. Indexes of the National Bureau of Economic Research for 1916 to 1928 are unweighted geometric means for approximately 490 commodities (converted from a 1913 base to a 1929 base by the Bureau of Foreign and Domestic Commerce); for subsequent years they are weighted arithmetic means for 680 price series, the weights being based upon the average value of production in 1927 and 1931. For method of computing the Department of Labor index see general note, p. 315.

¹ Effective January 1938. In earlier years a smaller number of commodities was included.

² Number of quotations used beginning 1929; see headnote regarding earlier years. The sum of the number of quotations for producers' goods and consumers' goods and for durable and non-durable goods is greater than the number of all commodities owing to duplication of certain price series in the classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

³ Perishable and semi-durable. ⁴ Beginning December 1937, discontinued by reporting source.

NO. 360.—COST OF GOODS PURCHASED BY WAGE EARNERS AND LOWER-SALARIED WORKERS IN 32 LARGE CITIES COMBINED—INDEX NUMBERS: 1913 TO 1939

NOTE.—1923-1925 average=100. Figures for food represent 51 cities since 1920 and a smaller number in earlier years; other figures, 19 cities from 1913 to 1917, and 32 cities thereafter. Totals weighted by relative importance of items as ascertained by country-wide study of cost of living made in 1918-19. Except for 1913, the annual average indexes for items other than foods, are estimates based on indexes compiled as of particular dates at irregular intervals, shown in previous issues of this publication. They represent weighted averages of indexes for each pricing period affecting the year. For example, where goods were priced in June and December, the indexes for December of the previous year were considered in arriving at the average for the year. The annual average food index is based on monthly indexes

NOTE.—The "old series" represents the series carried in the 1935 and previous issues of the Statistical Abstract converted from a 1913 base by the Bureau of Foreign and Domestic Commerce. The simple average of indexes for 1923, 1924, and 1925 on the 1913 base was used for converting. The "revised series" published for 1923 to 1938 incorporates certain changes in methods of weighting and computation (see second paragraph of general note, p. 315, for a brief description of this index)

No. 366.—UNIT VALUES, ANNUAL AVERAGE, OF IMPORTANT ARTICLES IMPORTED: 1909 TO 1938

NOTE.—The values are required by law to represent the values of the goods in the *foreign markets* whence exported to the United States. "Ton" signifies long ton of 2,240 pounds. The averages are obtained by dividing the total value of imports of the specified article by the total quantity, and as in some commodities there may be considerable variations in price between different grades, methods of packing, etc., and as the proportions of the grades, etc., may vary from year to year, the averages in such cases may show the actual price movements only roughly.

14. WAGES, HOURS OF LABOR, AND EMPLOYMENT

[Data in this section relate to continental United States, except as noted. For data relating to hours of labor, wages, and employment shown in other sections, consult the index.]

No. 368.—HOURS AND EARNINGS, AVERAGE, IN SELECTED MANUFACTURING INDUSTRIES: 1934 TO 1938

NOTE.—The averages in this table are based on monthly data supplied by representative establishments in the respective industries. As the number of such establishments varies slightly from month to month, the averages for different years are not in all cases strictly comparable; but the reporting "samples" are, in general, large enough to be representative of the industries. The average weekly earnings do not represent full-time earnings, inasmuch as the data from which they are computed cover both full-time and part-time workers. The average weekly hours and average hourly earnings are derived from somewhat smaller samples than the average weekly earnings, and therefore the product obtained by multiplying the hours by the hourly earnings is not identical with the average weekly earnings.

No. 369.—EARNINGS, AVERAGE WEEKLY, IN MANUFACTURING INDUSTRIES; COST OF LIVING; WEEKLY EARNINGS ADJUSTED TO COST OF LIVING—INDEXES: 1921 TO 1938

NOTE.—1923-25 average=100. The indexes of average weekly earnings in this table are derived from the employment and pay-roll indexes shown in table 373. For description of method of computing indexes of cost of living, see headnote, table 360, p. 321. The significance of changes in average earnings is affected by such considerations as labor productivity, labor cost per unit of output, labor turnover, and wholesale prices. Such qualifying data are embodied in detailed reports of the Bureau of Labor Statistics.

¹ Changes in United States wage rates are affected by the relative number of men employed in areas with higher or lower wage rates.

² Beginning with March 1932 through December 1935, data from State projects also are included.

³ Average for 10 months.

⁴ Average for 11 months.

⁵ Federal-aid projects were at a low level for 1933 to 1935 and wage rates are not representative; see data for emergency, etc., projects.

⁶ Data are based upon the type of project that employed the greatest number of men for the given year.

NO. 373.—EMPLOYMENT AND PAY ROLLS IN MANUFACTURING INDUSTRIES—INDEXES, BY MONTHS: 1921 TO 1939

NOTE.—**Monthly average, 1923-25=100.** Indexes are based on monthly reports from representative establishments in 87 manufacturing industries. These industries and industry groups are shown in tables 375-377. The base used in computing these indexes is the 3-year average, 1923-25, taken as 100. Indexes are not adjusted for seasonal variation. Indexes in this table and tables 374-377 have been adjusted to conform with the Federal Biennial Census statistics on factory employment and pay rolls through the year 1935 and supersede the previously published series. The principal change in addition to the adjustment to the 1935 census is the elimination of the railroad repair-shop group from the revised series. For indexes of employment adjusted for seasonal variations, see table 374.

No. 378.—EMPLOYMENT AND PAY ROLLS IN MANUFACTURING INDUSTRIES—
INDEXES, FOR SPECIFIED STATES: 1924 TO 1939

NOTE.—Index numbers for New Jersey, Pennsylvania, and Delaware, relative to monthly average of the years 1923-25 as 100; for Massachusetts, New York, Illinois, and Wisconsin, monthly average of the years 1926-27. Reports cover the week ending nearest the 15th of the month, except for New York prior to 1935 which covered the week including the 15th of the month. The indexes are not adjusted for seasonal variation and are unweighted, except for Pennsylvania and Wisconsin as stated in footnotes.

¹ Compiled by Massachusetts Department of Labor and Industries, based upon monthly returns from approximately 1,800 manufacturing establishments employing about 55 percent of the factory wage earners in the State. Office workers assigned to productive departments are included, but not executives, salaried officers, etc. The employment indexes are adjusted to the annual State census of manufactures through 1936. Pay-roll indexes are based upon a computation of employment times average weekly earnings.

² Compiled by the New York State Department of Labor, based upon monthly reports from approximately 2,156 manufacturing firms who employ about 38 percent of all the factory workers in the State. Reports cover employees in both office and shop, including foremen. Executives and salesmen are omitted, and administrative and sales offices located away from the plants are not covered.

³ Compiled by the Federal Reserve Bank of Philadelphia. For New Jersey, indexes are based upon monthly reports to the bank from 1923 to 1926 and since then, to the New Jersey Bureau of Statistics and Records of the Department of Labor. Current reports are from about 830 manufacturing plants which account for approximately 62 percent of all wage earners engaged in manufacturing industries of the State and 66 percent of the total wage payments. For Pennsylvania, indexes are based upon reports collected by the bank in cooperation with the U. S. Bureau of Labor Statistics and the Pennsylvania Department of Labor and Industry. Current reports are from over 2,300 manufacturing plants and represent about 57 percent of all workers and 59 percent of the factory pay rolls in the manufacturing industries of the State. Indexes are weighted according to the relative importance of each industry in the State totals. For Delaware indexes are based upon reports collected by the bank in cooperation with the U. S. Bureau of Labor Statistics. Current reports are from about 82 manufacturing plants and represent approximately 56 percent of all workers engaged in manufacturing industries of the State and 63 percent of the total wage payments. The indexes for the three States have been adjusted to conform with the Federal Census of Manufactures data through 1931 and will be similarly adjusted to subsequent censuses.

⁴ Compiled by the Illinois Department of Labor, based upon monthly reports from about 2,500 manufacturing plants covering wage earners (production employees) only. Reports represent approximately 67 percent of all wage earners engaged in manufacturing industries of the State and 70 percent of the total wage payments.

⁵ Compiled by the Industrial Commission of Wisconsin, based upon monthly reports from a representative list of manufacturers who employ about two-thirds of the total factory wage earners (manual employees only) in the State. The indexes are weighted averages of relatives. Beginning 1929 indexes have been adjusted to trends indicated by Census data.

NO. 380.—EARNINGS, AVERAGE WEEKLY AND HOURLY, IN 25 MANUFACTURING INDUSTRIES, BY LABOR GROUPS: 1925 TO 1938

NOTE.—Index numbers based on 1923 as 100. Data cover a representative number of plants which employed 1,600,000 workers during 1938. The earnings are computed by weighting the average earnings in each industry according to the relative importance of the industry as revealed by the Federal Biennial Census of Manufactures for 1923. In addition, each labor group is weighted according to the relative proportion of the group in each industry as revealed in the Conference Board's studies during the 3-year period 1927-29. The pay-roll data are based upon the first full week in each month, or, if a generally recognized holiday falls in that week, upon the succeeding week

¹ Adjusted to conform with Federal Census figures through 1935 for coal mining, trade, hotels, laundries, and dyeing and cleaning. Indexes for hotels relate to year-round hotels having 25 or more guest rooms. Pay-roll indexes represent cash payments only; additional value of board, room, and tips cannot be computed.

² Not including electric-railroad-car building and repairing.

No. 382.—EMPLOYMENT, PAY ROLLS, AND AVERAGE WEEKLY WAGES FOR FULL-TIME EMPLOYEES, BY OCCUPATIONAL GROUPS, FOR SPECIFIED INDUSTRIES OR BUSINESSES: 1935

NOTE.—Pay-roll figures are in thousands of dollars. Data are for 1 week in 1935—in general, the week ended October 26, but where this period was not representative figures are for 1 week of normal employment. The figures are summarized from reports secured in connection with the 1935 Census of Business, and cover only those establishments or concerns which gave detailed information by occupational groups. For the average number of employees (full-time and part-time) and total pay rolls for 1935, consult index for references to data for the individual industries and businesses shown elsewhere in this publication.

No. 383.—WAGE RATES PER HOUR AND HOURS PER WEEK—INDEXES OF UNION SCALES IN BUILDING AND PRINTING TRADES, BY OCCUPATIONS: 1908 TO 1938

NOTE.—Data for the earlier years cover 39 cities. The coverage was gradually extended until, beginning with 1938, 72 cities were included. Prior to 1938 the figures were based upon the scale prevailing May 15 each year. For 1938 the study was made as of June 1. The relative wages are percentages which indicate the change in wages per hour. The relative hours are percentages showing the change in the regular full-time hours per week, account not being taken of loss of time from slack work or other causes, nor of overtime work

No. 385.—STRIKES—NUMBER, WORKERS INVOLVED, AND MAN-DAYS IDLE: 1928 TO 1939

NOTE.—The term "strike" is here used in the generic sense to include all stoppages of work due to labor disputes, whether initiated by the employers (lock-outs) or by the workers. Strikes involving fewer than 6 workers or lasting less than 1 day are not included. Information regarding strikes is obtained principally from the public press, union publications, and trade journals. Reports are also received from the various Government labor boards and conciliation services. For the first time information was also obtained from one of the clothing unions, which began in 1938 to keep a complete record of all strikes conducted by the union.

EMPLOYMENT AND PAY ROLLS

349

No. 388.—EMPLOYMENT AND PAY ROLLS ON PROJECTS FINANCED FROM PUBLIC WORKS ADMINISTRATION FUNDS: JULY 1933 TO JUNE 1939

NOTE.—*Pay-roll disbursements in thousands of dollars.* Construction projects financed by the Public Works Administration are those projects authorized by the National Industrial Recovery Act of June 1933. This program of public works was extended to June 30, 1937, by the Emergency Relief Appropriation Acts of 1935 and 1936. The Public Works Administration was continued until July 1, 1939, by the P. W. A. Extension Act of 1937, and to June 30, 1941, by the P. W. A. Appropriation Act of 1938. Data for employees engaged on force-account projects (projects for which contracts are not let) are duplicated in employment figures given elsewhere for Federal executive service and railroads. Monthly figures cover periods ended on the 15th. Figures for July 1935 and subsequent months include data for employees working on P. W. A. projects financed from funds provided by the Emergency Relief Appropriation Acts of 1935, 1936, and 1937, and P. W. A. Appropriation Act of 1938. See table 389.

NO. 389.—EMPLOYMENT AND PAY ROLLS ON PROJECTS FINANCED BY THE WORKS PROGRAM: JULY 1935 TO JUNE 1939

NOTE.—Pay-roll disbursements in thousands of dollars. The Works Program was inaugurated by the President by authority of the Emergency Relief Appropriation Act of 1935 and continued by Emergency Relief Appropriation Acts of 1936, 1937, and 1938. Employment created by this program covers projects conducted under supervision of Works Progress Administration, those conducted by Public Works Administration, and other Federal agency projects financed from the Emergency Relief Appropriation Acts of 1935, 1936, 1937, and 1938. These figures do not include activities of the Civilian Conservation Corps financed from the Emergency Relief Appropriation Act of 1935. Unless otherwise stated, figures refer to calendar months.

No. 390.—UNITED STATES EMPLOYMENT SERVICE—MAJOR ACTIVITIES: JULY 1933 TO JUNE 1939

NOTE.—The operations of the United States Employment Service are conducted through a Nation-wide system of State and Territorial employment services affiliated with the United States Employment Service, under the terms of the Wagner-Peyser Act, whereby State and Territorial appropriations are matched (within limits of each State apportionment from the Federal appropriation) upon agreement by the State or Territorial service to conform with the Federal operating standards. Field visits represent the number of employer contacts. Figures by States, industries, etc., are published in special releases of the United States Employment Service.

15. SOCIAL SECURITY

[Data in this section relate to Continental United States, Alaska, and Hawaii, except as noted]

GENERAL NOTE

Old-age and Survivors Insurance.—Federal old-age and survivors insurance, administered by the Social Security Board under the Social Security Act as amended in August 1939, covers employment in industry and commerce. Specified employments are excepted, notably agricultural labor, domestic service, services for government and for certain types of nonprofit organizations, and self-employment. Beginning January 1940, monthly benefits are payable to qualified workers at age 65 and also to certain dependents of beneficiaries and certain survivors of insured workers. Benefits are based on the legally defined average wage of the insured and are paid from the Federal Old-Age and Survivors Insurance Trust Fund, to which is appropriated annually an amount equal to the total taxes paid by employers and employees under the Federal Insurance Contributions Act. (A separate system, administered by the Railroad Retirement Board, covers employees of railroads and certain of their subsidiaries and affiliates.)

Unemployment Compensation.—The Federal-State unemployment compensation program provides for payments to persons who are able and willing to work but are unable to find jobs. The contributions collected under State laws are designed to provide a fund to be used solely for this purpose. Employers, and in some States employees also, contribute definite proportions of pay rolls and wages to a special fund, from which qualified unemployed workers may draw benefits, limited as a rule by the amount of their prior employment and the wage rate. Under the Social Security Act the Social Security Board has two statutory responsibilities in the administration of the unemployment-compensation program. It certifies each year to the Secretary of the Treasury, for normal and additional tax-credit purposes, the State laws which conform to the standards prescribed; it also certifies grants to defray necessary costs of administering the State program for those States which, in law and administration, conform to the standards prescribed in Title III of the act. Funds are certified in the amounts determined by the Board to be necessary for the proper administration of State laws.

Public Assistance.—Under the Social Security Act, the Federal Government shares with the States the costs of assistance given to needy persons and families. The assistance in which the Federal and State governments are thus collaborating is of three types: (1) Aid to needy persons aged 65 and over, (2) aid to the needy blind, and (3) aid to dependent children under the age of 16 who have been deprived of parental support. To receive a Federal grant under any one of these programs, a State must submit a plan which can be approved by the Social Security Board as meeting the basic requirements of the act, and, after approval of its plan, must supply with its requests for Federal funds the data required by the Board.

Public assistance under the Social Security Act obviously is related to other forms of public aid maintained by Federal, State, and local governments. The Social Security Board has therefore undertaken, at the request of other governmental agencies and with their cooperation, to report on all public aid to persons in need.

No. 391.—OLD-AGE INSURANCE—NUMBER OF EMPLOYEES AND AMOUNT OF TAXABLE WAGES, BY INTERVAL OF EARNINGS AND BY AGE, FOR THE UNITED STATES: 1937

NOTE.—Wages in thousands of dollars. Wage figures in this table and in tables 392 and 393 include 93 percent of the total volume of taxable wages reported as paid in 1937. The number of employees is estimated at 96 percent of the total who earned taxable wages in 1937. Taxable wages are defined as excluding wages of employees 65 years and over, wages earned in excess of \$3,000 in the service of any one employer within a year, and wages earned outside the industries covered by the Social Security Act. Figures revised as of April 10, 1939. See also general note above.

¹ Represents sum of balances at end of month in State clearing account, benefit payment account, and unemployment trust fund account maintained in the U. S. Treasury.

² Includes contributions plus penalties and interest collected from employers since contributions were first payable. Figures are adjusted for refunds of contributions and for dishonored contribution checks. Employer contributions of 2.7 percent are collected in all States except the District of Columbia, Michigan, and New York. In these States, the rate of employer contributions is 3 percent.

³ Interest earned on funds in State accounts in the unemployment trust fund is credited and reported by the U. S. Treasury in the last month of each quarter.

^t Adjusted for voided benefit checks.

^s Employee contributions of 1 percent are collected in Alabama and California; of 0.5 percent in Louisiana; and of 1.5 percent in Rhode Island. Massachusetts has suspended employee contributions on wages earned during the pay-roll months of July 1938 through June 1939.

^{1938 collections only. Excludes contributions from governmental units subject to the Act.}

⁷ Excludes approximately \$100,000 in "non-cash items," representing payments to covered workers employed by governmental units.

¹ Represents net amount of emergency grant vouchers certified to cases during month.

² Includes earnings of persons certified as in need of relief and earnings of all other persons employed on work and construction projects financed in whole or in part from Federal funds. Figures for the C. C. C. represent earnings of enrolled persons only.

³ Figures through January 1936 represent payments from State and local funds only. Thereafter, figures represent payments to recipients from Federal, State, and local funds in States administering the 3 special types of public assistance under the Social Security Act and from State and local funds only in States not participating under the Act.

⁴ Figures through March 1937 from the W. P. A., Division of Statistics. Figures for 1933-35 include obligations incurred for direct relief, and earnings of relief and nonrelief persons (other than of administrative employees) employed under the general relief program of the F. E. R. A.; they do not include all obligations incurred for relief extended to cases by local authorities from public funds under the poor laws.

⁵ Figures from the W. P. A., Division of Statistics; include obligations incurred for relief extended to cases under the emergency education, student aid, rural rehabilitation, and transient programs of the Emergency Relief Administrations largely financed from F. E. R. A. funds.

⁶ Figures estimated by the C. C. C. by multiplying average monthly number of persons enrolled by an average of \$70 per month. This average amount is based on amount of obligations incurred for cash allowances and for clothing, shelter, subsistence, and medical care of persons enrolled, and for certain other items.

⁷ Figures from the W. P. A., Division of Statistics; represent earnings of persons employed on projects financed from W. P. A. funds and cover all pay-roll periods ended during month.

⁸ Figures from the W. P. A., Division of Statistics; represent earnings during all pay-roll periods ended during month.

⁹ Figures from the Bureau of Labor Statistics, Division of Construction and Public Employment; represent earnings on other work and construction projects financed in whole or in part from Federal funds and cover all pay-roll periods ended during monthly period ended on 15th of specified month.

¹⁰ Includes \$214,956,000 for 1933 and \$603,059,000 for 1934, representing estimated total earnings of persons employed under the Civil Works Program during month, as reported by the Division of Statistics of the W. P. A.

¹ Includes both those in States administering these programs under the Social Security Act and those in States not participating under the Act.

² Figures for January 1933—March 1937 from the W. P. A., Division of Statistics. Figures represent the number aided during the month. Figures for 1933–35 include cases receiving direct relief, and relief and nonrelief persons (other than administrative employees) employed under the general relief program of the F. E. R. A.; they do not include all general relief cases aided by local authorities from public funds under the poor laws.

³ Figures from the W. P. A., Division of Statistics; include cases receiving relief during month under emergency education, student aid, rural rehabilitation, and transient programs of the Emergency Relief Administrations largely financed from F. E. R. A. funds.

⁴ Represents net number of emergency grant vouchers certified to cases during month. Ordinarily only 1 grant voucher per case is certified per month.

⁵ Includes persons certified as in need of relief and all other persons employed on work and construction projects financed in whole or in part from Federal funds. Figures for the C. C. C. represent enrolled persons only.

⁶ Figures from the C. C. C. are estimated for January 1933—April 1935; for subsequent months they are averages computed by the C. C. C. from reports on number of persons enrolled on 10th, 20th, and last day of each month except for the Indian Division, for which averages are computed from daily reports.

⁷ Figures from the W. P. A., Division of Statistics; represent average weekly number of persons employed during month on projects financed from W. P. A. funds.

⁸ Figures from W. P. A., Div. Stat., represent number of different persons employed during month.

⁹ Figures from the Bureau of Labor Statistics, Division of Construction and Public Employment; represent average weekly number of persons employed on other work and construction projects financed in whole or in part from Federal funds during monthly period ended on 15th of specified month.

¹⁰ Figures from the W. P. A., Division of Statistics; represent estimated number of persons employed under the Civil Works Program during month. ¹¹ Less than 500 persons.

¹² For administrative reasons, some payments which would have been certified in December 1936 and February 1937 were not certified until January and March 1937, respectively.

¹ Amount of payments to recipients from Federal, State, and local funds in States administering these programs under the Social Security Act and payments from State and local funds only for States not participating under the act, administrative expense excluded. Figures include direct assistance to recipients and obligations incurred for assistance in kind and for payments to persons other than those certified for assistance for rendering services to the recipient. They do not include expense for hospitalization and burials.

² Includes data for 42 States administering this program under the Social Security Act and 7 States—Connecticut, Illinois, Iowa, Kentucky, Nevada, South Dakota, and Texas—not participating under the act.

³ Includes data for 42 States administering this program under the Social Security Act and 5 States—Illinois, Missouri, Nevada, Pennsylvania, and Rhode Island—not participating under the act.

⁴ Includes an unknown number of children 16 years of age and over.

⁵ Includes \$88,651 incurred for payments to 2,996 recipients 60 but under 65 years of age.

⁶ Estimated.

⁷ In addition, in 77 counties payments amounting to \$17,128 were made from local funds without Federal participation to 1,002 families in behalf of 2,419 children under the State Mothers' Pension law. It is possible that a large number of the families receiving aid from this source for December also received aid under the State plan for aid to dependent children approved by the Social Security Board.

⁸ Less than \$500.

⁹ Includes 4,150 children 16-18 years of age.

¹ Excluding rural free delivery routes, ocean mail routes, and air mail routes to foreign countries.

² Audited postal surplus or deficit which is greater or less than excess of receipts or expenditures by the amount of adjusted losses and contingencies.

³ International includes foreign countries on domestic basis. For explanation see headnote 406.

⁴ Data are for continental United States and are estimates except in 1918 and beginning with 1926, when figures are accurate calculations. No estimates made from 1914 to 1922, inclusive.

⁵ Postage stamps first issued under act of Mar. 3, 1847, and placed on sale at New York July 1, 1847.

⁶ From Nov. 1, 1864, when money-order system first went into operation, to June 30, 1865.

⁷ From Sept. 1, 1869, to June 30, 1870. International money orders first issued under convention of Oct. 12, 1867.

⁸ Gross revenues of department for 1918 and 1919 include \$44,500,000 and \$71,292,000, respectively, war-tax revenue accruing from increased postage.

NO. 406.—POSTAL MONEY-ORDER BUSINESS—SUMMARY: YEARS ENDED JUNE 30, 1910 TO 1938

NOTE.—For revenues from money orders, see table 405. For value of orders issued for other years, see table 404. Money orders are exchanged on a domestic basis not only within this country, but with its outlying possessions, Canada, Cuba, and numerous islands and minor countries neighboring the United States. International-basis orders are exchanged between the United States and its outlying possessions, on the one hand, and other than "domestic basis" foreign countries, on the other. In this table, however, "International" includes money orders exchanged between the United States and "domestic basis" foreign countries, and these are not included in "Domestic."

No. 408.—TRANSPORTATION OF DOMESTIC MAILS, BY CLASS OF SERVICE: 1915 TO 1938

NOTE.—Amounts, except as indicated, in thousands of dollars. Since Nov. 1, 1916, all service on steam railroads is authorized and paid for under the space basis system; formerly, payments were based on a system of quadrennial weighings. Railway mail space units of service vary in size and character and may consist of a car, a section of a car, or a closed pouch carried on a car. Some cars are railway post offices, others are for storage only, about 20 classes of units being distinguished. The "equated unit" represents a calculation of the equivalent of all the different units in terms of a 60-foot car. Annual rate of expenditure (regular authorizations) represents estimated cost for transporting normal mail traffic over regular routes only, based on contracts outstanding at the end of each fiscal year. "Annual cost" includes emergency and side and transfer service. Average rates are based on "regular authorizations"

¹ Includes 10,550 connecting lines for which separate reports were not secured; data for such lines, however, were included in reports of operating companies supplying switchboard service.

² Includes data for connecting lines having fewer than 5 telephones per line, as follows: 11,759 lines; 29,000 telephones; and estimated figures for other items as follows: 44,000 miles of single wire; and \$1,600,000 investment in equipment.

³ Not reported for systems and lines having less than \$5,000 annual income in 1912. For 1917 and 1922, figures represent number of systems and lines reporting central offices; actual number of central offices was probably slightly larger.

⁴ Not reported except for systems and lines with income of \$5,000 or more.

⁵ Including assessments of mutual companies, and miscellaneous operating revenues.

⁶ \$3,378,000 miles of wire in cable and 6,193,000 not in cable.

⁷ No data.

⁸ No comparable data available.

No. 417.—TELEPHONE SYSTEMS—SUMMARY, CLASS A CARRIERS: 1926 TO 1938

NOTE.—Figures cover Class A telephone carriers which reported for 1938. Class A carriers are those carriers whose average annual operating revenues exceeded \$100,000. The gross operating revenues of these identical carriers in 1937 represented approximately 96 percent of the revenues of all telephone carriers as reported for the Census of Electrical Industries for that year. (See table 412.) The figures include data for carriers consolidated and merged prior to 1938, so far as annual data are available. Intercorporate duplications have not been excluded.

¹ The decrease reflected in data shown for the year 1933 is due mainly to the fact that prior to that year the total of wire jointly owned with other companies was included, whereas from 1933 on, only the respondents' portion of jointly owned wire was included.

² Data not reported.

³ In comparing figures in this table, consideration should be given to the effect of the revision of the Uniform System of Accounts, First Revised Issue, and the issue of June 19, 1935, as amended, resulting in certain changes and rearrangements of both the balance sheet and the income statement.

¹ Fuel equivalent is calculated from kilowatt-hours of power produced wherever available, as is true of all public-utility plants since 1919. Otherwise fuel equivalent is calculated from reported horsepower of installed water wheels. Prior to 1890 data were unsatisfactory, but estimates are included in total.

² Calculated at 26,200,000 British thermal units per ton.

³ Based on amount of coal displaced by gas, as estimated by gas companies.

⁴ Not including bootleg or stolen coal; if this were included energy for anthracite and total energy in 1936 and 1937 would be increased by approximately 65 trillion B. t. u.

⁵ Subject to revision.

No. 424.—ELECTRIC ENERGY—PRODUCTION, BY TYPE OF PRIME MOVER:
1920 TO 1938

NOTE.—In thousands of kilowatt-hours. Figures in this table and those in table 423 and in tables 425 to 429 are based on the operation of approximately 4,088 power plants in 1938 and represent the net output of the following types of plants: Privately owned electric utilities, that portion of mining and manufacturing plants that is devoted to public use, railways and railroads, municipal electric utilities, Bureau of Reclamation, other Federal projects, cooperatives, power districts, State projects and publicly owned non-central stations. The output of manufacturing plants generating exclusively for private use is not included.

NO. 430.—ELECTRIC LIGHT AND POWER INDUSTRY—SUMMARY: 1902 TO 1937

NOTE.—Figures cover all establishments engaged either in the generation and distribution of electric energy, or the distribution or transmission of electric energy, to public or private consumers. Statistics do not include establishments which consume all current generated, such as manufacturing and mining companies, railroads, railways, hotels, and other enterprises not in the nature of public utilities, unless a portion of their generated output is sold commercially. Plants operated by the Federal Government or by States were not included unless energy was sold commercially. For classification of reporting sources for 1937, see table 431.

¹ The term "establishment" as here used may represent a single electric station (either generating or distributing or both) or a number of such stations operated under the same ownership. ² Not available.

³ Comprises 1,112 stations operated by steam; 1,283 by internal-combustion; 1,426 by water; and 206 composite (stations having more than 1 type of prime mover).

⁴ Comprises generated output and energy purchased and received from other sources. Since the energy "Received from other sources" was, in a large part, purchased from other electric light and power companies, considerable duplication is involved, as such energy would also be included in the "Generated."

⁵ Includes "Estimated value of free service." ⁶ Number on June 30.

⁷ Reported by commercial establishments only. No data for municipal establishments.

⁸ Not comparable with figures for other years since amount includes only salaries and wages chargeable to electric operating service.

⁹ Includes value of plant and equipment, \$902,000,000, owned by companies engaged in the operation of electric light and power plants and other public utilities, not distributed among the several utilities.

¹⁰ In addition, hogged fuel, sawmill, and other waste were reported.

NO. 431.—ELECTRIC LIGHT AND POWER INDUSTRY—GENERATING FACILITIES, ENERGY GENERATED, AND FUEL CONSUMED, BY REPORTING SOURCES: 1937

NOTE.—The system of classification by reporting sources, as shown in this table, is a new one recently adopted by the Bureau of the Census in collaboration with the Federal Power Commission. This classification differs slightly from that employed by the Federal Power Commission. (See, headnote table 424.) The differences in the figures are due mainly (1) to the inclusion in the census survey of data for certain small concerns not canvassed by the Federal Power Commission, and (2) to the inclusion in the Federal Power Commission survey of data for a larger proportion of the energy output of certain concerns grouped under "Other sources" than is accounted for in the census survey.

No. 438.—WATER POWER, DEVELOPED AND POTENTIAL: 1921 TO 1939

NORG.—In thousands of horsepower. Data for developed water power cover capacity of actual installation of water wheels and turbines in plants of 100 horsepower or more. Potential power figures are 1936 revised estimates showing the 24-hour horsepower available 90 percent of the time and 50 percent of the time at an over-all efficiency of 70 percent at all developed and undeveloped sites. Data for potential power are not directly comparable with those for developed power, because developed power is usually given in terms of the capacity of installed water wheels or turbines, which may be several times the potential power available 90 percent of the time. Probably with complete development of the water-power resources of the whole country the installed capacity would amount to 80,000,000 horsepower or more.

NOTE.—Figures cover continental United States, except as noted, and refer to calendar years for most States. Mileage data included for 1921 and 1926 were obtained from county records; figures for 1929 and 1930 include some estimates. No data available for county and township roads after 1930, except for those under State control.

¹ Low-type includes soil-surfaced, gravel or stone, bituminous surface-treated, and mixed bituminous surfaces; high-type includes bituminous penetration, bituminous concrete and sheet asphalt, Portland cement concrete, brick, block, and dual-type surfaces, and unclassified surfacing on bridges.

² Includes 11,303 miles of unclassified roads. ³ Includes mileage partially graded and drained.

⁴ Includes original and reconstructed surfacing. ⁵ Includes 368 miles of unclassified roads.

⁶ Excludes funds transferred. ⁷ Excludes balance on hand at beginning of year; not reported in 1921.

⁸ For road and bridge purposes under supervision of State highway department only.

⁹ Includes an undetermined amount of municipal street mileage on State highway systems or connecting these systems. Beginning with 1934 such mileage is included, however, for only a few States. Figures prior to 1934 also include mileage of secondary road systems under State control for a number of States.

¹⁰ Primarily systems only. See also note 9. ¹¹ Not yet available.

¹² Includes funds transferred to or from local units.

¹³ Includes data for Puerto Rico beginning 1937 and for Hawaii except in 1926 figures for projects approved for construction. For 1938 figures for emergency road construction and grade-crossing projects, see table 443.

¹ Includes secondary road systems under State control with a total of 177,504 miles for the 14 States noted, comprising 54,690 miles of secondary State highways, 7,636 miles of State-aid system, and 115,178 miles of county roads under State control.

² See note 1, table 439.

³ Includes original and reconstructed surfacing. In addition to the mileage here shown, surfacing on secondary systems under State control totaled 2,254 miles in 1935 and 4,414 miles in 1936, and surfacing on urban extensions of State systems totaled 573 miles in 1935 and 614 miles in 1936.

⁴ Includes some mileage for urban extensions or connecting streets.

NO. 441.—HIGHWAYS UNDER SUPERVISION OF STATE HIGHWAY DEPARTMENTS—DISBURSEMENTS (INCLUDING FEDERAL-AID FUNDS) FOR, BY STATES: 1921 TO 1938

NOTE.—Figures include disbursements, whether from current revenues or the proceeds of loans, for construction, maintenance, interest and principal payments on highway bonds, transfers to local units, and miscellaneous disbursements. Data beginning 1934 cover calendar years, while figures for earlier years for many States represent fiscal years. For the States reporting on a fiscal year basis in 1933, the net total disbursements for interim and overlapping periods between 1933 and 1934 amounted to \$124,428,000.

No. 448.—MOTOR-VEHICLE REGISTRATIONS (COMBINED FIGURES FOR PASSENGER CARS AND MOTOR TRUCKS), BY STATES: 1915 TO 1938

NOTE.—Registration periods ending not earlier than Nov. 30 and not later than Jan. 31 are considered as calendar-year periods. Net numbers, excluding reregistrations and nonresident registrations, are given, so far as possible. Totals in this table do not include, in most cases, those official cars which are exempt (or partially exempt) from paying regular registration fees to the States. Tractor trucks and tractors for highway use are included beginning with 1925.

No. 450.—MOTOR-VEHICLE FATALITIES IN CONTINENTAL UNITED STATES:
1914 TO 1937

NOTE.—This table covers all deaths from automobile accidents, excluding deaths as a result of train and street car collisions with automobiles, and motorcycle accidents. Rural area and urban area or city population figures shown for 1930 to 1933 and used in computing rates for these years are the latest revised estimates. The term "rural area" includes all rural parts of the registration States excluding cities having populations of 10,000 or more; "urban area" includes all cities having populations of 10,000 or more in the registration States; and "cities in nonregistration States" includes only a few cities in certain States not in the death registration area.

20. TRANSPORTATION, AIR AND LAND—STEAM AND ELECTRIC RAILWAYS, EXPRESS COMPANIES, MOTOR BUSSES, AND CIVIL AERONAUTICS

[Data in this section relate to continental United States unless otherwise stated]

GENERAL NOTE.—The term "steam railways" as used in this section includes electrified divisions operated by such carriers. The total steam railroad mileage of the United States comprises: (a) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission, (b) switching and terminal railroads, also reporting to the Commission; and (c) private railroads (defined by the Commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of their annual operating revenues, class I, having more than \$1,000,000 of such revenue; class II, from \$100,000 to \$1,000,000; and class III, less than \$100,000. During recent years more detailed reports are required from class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of class II and class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district, the remainder of the country.

Class I companies make monthly reports from which data are compiled currently and published in a series of monthly statements. The yearly totals from these reports become available earlier than the sometimes slightly corrected totals from the final annual reports. The latest figures in these tables are in many cases from the monthly reports.

No. 452.—STEAM RAILWAYS—MILEAGE OWNED AND MILEAGE OPERATED: 1890 TO 1938

NOTE.—Beginning with 1908 switching and terminal roads are omitted (they operate about 2,300 miles of main tracks). The first and second columns cover all railways, including "circular" and "unofficial" lines; the last five columns omit "circular" and "unofficial" lines. Mileage owned excludes all duplication and covers continental United States only. Mileage operated includes some duplication under trackage rights and some mileage in Canada operated by United States companies.

¹ Data exclude switching and terminal companies beginning 1910. Class III roads are excluded in 1913. Exclusion of the latter has practically no effect on the comparability of the figures. Information for 1915 is incomplete, as 20 of the larger railroads did not report, and is not shown.

² Calculated for all classes of employees, including those not paid on an hourly basis.

³ Data cover Federal reports, reports of companies not under Federal control, and corporate reports.

NO. 464.—STEAM RAILWAYS—STOCK OUTSTANDING, DIVIDENDS, AND INTEREST: 1891 TO 1937

NOTE.—Data relate to years ending June 30 prior to 1916 and to calendar years thereafter. Nonoperating as well as operating roads are included. Switching and terminal roads are excluded beginning with 1908. Dividend figures throughout cover all classes of roads, but interest figure for 1913 excludes the unimportant class III roads. The amount of stock shown in the first column is exclusive of stock held by the issuing company, but includes that held by other railway companies.

¹ Prior to 1925 figures include investment of leased lines and exclude investment of proprietary companies not rendering annual reports. Beginning with 1925, the investment in road and equipment of proprietary companies is included as follows: 1925, \$480,216,000; 1926, \$831,574,000; 1927, \$191,095,000; 1928, \$1,013,752,000; 1929, \$1,051,469,000; 1930, \$1,095,631,000; 1931, \$1,114,637,000; 1932, \$1,121,945,000; 1933, \$1,096,264,000; 1934, \$890,581,000; 1935, \$861,716,000; 1936, \$861,896,000; 1937, \$848,173,000. No allowance is made for cash and material and supplies, and no deduction is made for depreciation.

² Investment originally published is increased by \$170,000,000, estimated reserve for depreciation.

³ Figures not comparable on account of Federal control accounting requirements.

⁴ Does not include returns for class II and class III companies.

**NO. 474.—STEAM RAILWAYS—REVENUE FREIGHT ORIGINATED AND CARRIED,
BY COMMODITY GROUPS, ALL ROADS, 1906 TO 1915, CLASS I ROADS, 1916 TO
1938**

NOTE.—All figures in thousands of tons of 2,000 pounds. Data relate to years ended June 30 prior to 1916, to calendar years thereafter. Switching and terminal roads excluded beginning with 1908. Figures for 1911 to 1915, inclusive, exclude class III roads but this affects the comparability very slightly; those after 1916 exclude both class II and class III, thereby reducing the grand total about 6 percent. Non-revenue freight is excluded; this is a large item in the case of a few commodities, notably coal.

Class of road and year or yearly average	Total	Products of agriculture	Animals and products	Products of mines		Products of forests	Manufactures and miscellaneous

No. 478.—STEAM RAILWAY ACCIDENTS—NUMBER OF PERSONS KILLED AND INJURED, BY STATUS: 1891 TO 1938

NOTE.—For various reasons, including the fact that returns were required under different acts, the statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of \$150 or any damage and a resulting casualty. Thereafter they were considered as such when the damage exceeded \$150 with or without a casualty. Where the damage is less than \$150 and there is a reportable casualty it is classified as a train-service accident. Figures for years 1911-1915 include industrial and other nontrain accidents to employees only, and for years 1908-1910 do not cover switching and terminal roads. Otherwise the statement covers all reportable accidents.

¹ The ratio of fuel oil to coal is based upon the experience of the various roads; 1 cord of hardwood equals two-thirds ton of coal; 1 cord of softwood equals one-half ton of coal.

² Totals include equivalent of a small amount of miscellaneous fuel.

³ The total charges shown do not include the labor cost of applying the rails or ties.

No. 483.—ELECTRIC RAILWAYS—SUMMARY: 1890 TO 1937

NOTE.—The census of street railways, which was first taken in 1890, and which has been taken at quinquennial intervals beginning with the inquiry for 1902, covers (1) all street railways, without regard to kind of motive power, and (2) all interurban railways using other than steam as motive power. The nonelectric railroads included are those operated principally by cable and gasoline engines. Operations of electrified divisions of steam-railway companies are not included. Figures in this table and tables 484-486, 488-490 do not include data for motorbus and trolley-bus operations of electric street railways. (For motorbus and trolley-bus statistics from Census reports, see tables 491-493)

¹ Excludes data for 22 companies, operating on a part-year basis. These companies reported 36,810,221 passengers; 9,108,000 car-miles; 1,042,866 car-hours; \$2,388,295, operating revenue; and \$2,412,010, operating expense.

² Includes certain companies in Pennsylvania which maintained separate organizations, though controlled through stock ownership by other companies. For 1912 these companies were treated as merged and not included in the number reported.

³ Includes small mileage of track lying outside United States.

⁴ Data incomplete. Some of the companies engaged in both light-and-power and electric-railway operations were unable to report separately the values of plant and equipment assignable to their railway activities.

⁵ Number reported as of June 30, for 1890, 1922, 1927, and 1932; for 1902, average for the year; for 1912, as of Sept. 16. Figures for 1937 represent an average of numbers reported on June 30 and Dec. 31.

⁶ Includes 334 trolley-bus operators.⁷ Includes 29,721,000 trolley-bus passengers.

⁸ Includes auxiliary operating revenues of \$8,905,000 for 1927 and \$91,242,000 for 1922; auxiliary expenses, \$7,822,000 for 1927, and \$49,232,000 for 1922. Data for operating revenues and operating expenses of auxiliary operations excluded so far as possible for earlier years.
